## FOREWORD

In 1914, when the Commission for Relief in Belgium was formed, Herbert Hoover demanded that there should be maintained a most complete accounting of financial transactions, including accurate statistical records covering the movement of all commodities. This policy, which was strictly followed in all the organizations under his leadership, resulted in many published accounting and statistical documents covering separately and completely the various activities from 1914 to the end of operations in 1924. Although this information has been available, the individual operations were so intertwined that no accurate picture of the work as a whole could be given without co-ordination of all this material.

The authors of this book are unusually well qualified to undertake the vast compilation necessary to make this presentation. Frank M. Surface, now assistant director of the Bureau of Foreign and Domestic Commerce, served as statistician for the Food Administration in Washington, was assigned to assist Mr. Hoover in the Supreme Economic Council in Paris, and was statistician for the United States Grain Corporation in London and in New York. Raymond L. Bland served as a statistician with the American Relief Administration practically from the beginning of that organization, and has carried on his work not only at headquarters in New York, but also in the field in Europe. The authors have approached and executed this difficult task in a fine spirit of service.

It has appeared important that this composite presentation should be published with an explanatory text because

1. Herbert Hoover during these ten years accepted responsibility and has accounted for \$375,000,000 in benevolent contributions from individuals and groups. This represents unprecedented generosity and the results should be better known.

2. In one way or another—by contributions in money, gifts of commodities in form of food and clothing, in saving food, in personal service—practically every American was involved in

these enterprises. For instance, over twelve million American women signed a pledge to co-operate fully with Hoover, the United States Food Administrator, in his plans to conserve food for overseas shipments, and every producer, manufacturer, and distributor of food products, every hotel, restaurant, and home, large or small, participated. The ultimate result in tons and dollars of this effort to make effective the slogan "Food will win the war" should have a place in history.

3. Well over a half-million American men and women were enrolled and gave their entire time, largely without remuneration, for periods extending from a few months to several years, in service with the Food Administration and Grain Corporation or with the relief organizations engaged in the actual distribution of food. This fine service should not be forgotten.

4. There was no precedent to guide Herbert Hoover in these gigantic enterprises, which involved furnishing to Europe food and related supplies to the value of more than \$5,234,000,000, but should mass relief operations again be required, this book will be a guide and inspiration.

5. This is not a history, and the text is nothing more than a statistician's interpretation of facts and figures. There has been no effort to evaluate what might have happened if this work had not been undertaken and carried through with efficiency. It was a super-preventive measure, contributing to an earlier rehabilitation of Europe than would otherwise have been possible, and it takes but little imagination to conjure up the horrors of famine and disease averted before and after the Armistice.

6. Although Herbert Hoover would reject the assertion, this book is the story of a one-man job. His associates dedicate this book to him; it is impossible to lay too great stress upon his stupendous achievement.

Any one of the foregoing six points is a sufficient justification for this book.

EDGAR RICKARD  
*Administrative Assistant  
to Herbert Hoover, 1914-1924*

## PREFACE

From the beginning of the World War in August, 1914, up to the close of the Russian Relief work in 1924, Herbert Hoover created and directed organizations which were responsible for securing and delivering vast quantities of foodstuffs to the peoples of various European countries. The importance and magnitude of this work and the results accomplished can hardly be overestimated. To mention only a few of the possibilities, it may be pointed out that a large portion of the 10,000,000 people in the occupied regions of Belgium and Northern France might have perished. The results of the World War might have been far different, for the final decision depended as much upon food as it did upon armed forces. In the Armistice Period the peoples of Central and Eastern Europe would have died by millions in the greatest famine the world had seen in three hundred years. Millions of young men and women in Europe today owe their very lives and their present physical fitness to the child-feeding work carried on from 1919 to 1923, and finally, still further millions of the Russian people owe their lives to the relief work in the terrible famine of 1921-1922.

These outstanding achievements in that decade of service were accomplished in the face of world-wide disorganization and the desire of every nation to concentrate on its own problems of reconstruction.

During the ten years, 1914 to 1924, operations were carried on under Mr. Hoover's direction and by the organizations which he headed involving the expenditure of the enormous sum of almost five and a quarter billions of dollars (\$5,234,028,208.56). Part of these funds came from charitable donations, part were funds from the United States Treasury donated for relief or loaned to other governments, part came from other countries or from other organizations.

For this sum there were delivered to the people of Europe more than thirty-three million (33,841,307) tons of commodities, mostly American foodstuffs but including some clothing and medical supplies.

Much of this relief work was carried on under the stress of great emergency and under pressure to make food available at a definite place in a limited space of time in order to save human life. Through it all, detailed records were kept of every ton of supplies from the moment of their purchase until they left the hands of the American organization. Considering the magnitude of the work and the conditions under which it was carried on, the statistical records are remarkably complete, with no serious gaps.

It is these records, including the audited reports from the accounting departments, supplemented by the operating commodity statements, which form the basis of this volume. Although this is not an accountant's report, all of the values reported are in reconciliation with audited figures. In order to bring out the details for the non-technical reader and to render the tables more intelligible from the standpoint of the separate operations, the accountant's set-up has often had to be dissected and recombined.

No attempt has been made here to write a popular history of the various projects. Such an undertaking would run into many volumes the size of this. The story of several distinct phases of these operations has already been published, such as *America and Germany*, by Sidney Brooks; *America and the New Poland*, by H. H. Fisher; *American Pork Production in the World War*, by Frank M. Surface; *The Grain Trade during the World War*, by Frank M. Surface; *On the Trail of the Russian Famine*, by Frank A. Golder and Lincoln Hutchinson; *The Famine in Soviet Russia*, by H. H. Fisher; *The Commission for Relief in Belgium, a Statistical Review of Relief Operations*, by George I. Gay; *Public Relations of the Commission for Relief in Belgium—Documents*, in two volumes by Gay and Fisher; bulletins of the American Relief Administration covering seven years.<sup>1</sup> These works, and many pamphlets, are to be found in the Library of Congress, the Hoover War Library, and many public libraries.

Other volumes will no doubt appear in the future as the work of those best qualified to

<sup>1</sup> For further reference to these and to other publications see Bibliography, pages 989-98.

cover particular subjects. Such text as has been included in this report is designed only to give background material necessary for an understanding of the statistical data. It is hoped that this text will make it possible for the reader to obtain a picture of the various undertakings and some idea of their magnitude and significance.

The authors desire to express their appreciation to many individuals and organizations for assistance in making this report possible. To Edgar Rickard, Director General of the American Relief Administration in later years, has fallen the task of supplying many details and furnishing constructive criticism of the results.

Edward M. Flesh has also furnished invaluable assistance throughout the preparation of this report. Acknowledgment is also due to Harry Hyslop, in New York, and to the staffs of the Hoover War Library and of Stanford University Library, at Stanford University, California. The manuscript has been read by and many helpful suggestions received from Mr. Rickard, H. H. Fisher of Stanford University, and Perrin C. Galpin and George Barr Baker, of New York.

## EXPLANATORY NOTES

### ACT OF CONGRESS

Act appropriating \$100,000,000 for relief (Public, No. 274, 65th Congress). This Act was approved February 25, 1919 (40 Stat. L., page 1161). However, the Executive Order was signed by President Wilson upon his arrival at Boston, Massachusetts, on February 24, 1919.

### APPENDIX TABLES

All of the summary tables in the Appendix contain a column headed "Table No." where reference is made to the table which contains a further segregation of the information given under that title. For example, in Table 101 there is a summary of the total relief delivered by major operations. On the third line of that table, after "Armistice Period," the reader is directed to Table 107, which divides the total relief in this period under organizations, or groups of organizations. Under "American Relief Administration" in this table, reference is made to Table 109. This latter table divides the A.R.A. relief by methods of finance, one of which is the "U.S. Congressional Appropriation for Relief," and, under this, reference is made to Table 112, which in turn shows the relief from this appropriation delivered to each country. Under "Armenia," the first country in this table, reference is made to Table 201, where one will find the detail by steamers of all relief delivered to Armenia from the Congressional Appropriation. All other items may be followed with the same or greater detail by this method of table reference.

### A.R.A.—A.R.A.E.C.F.—A.R.A.

The original American Relief Administration was organized to handle the official relief under the \$100,000,000 appropriation from the United States Treasury (Act of February 25, 1919). The period of operation was from February to August 1, 1919. The equipment and unconsumed stocks of the A.R.A. were turned over to the child-feeding organization, supported chiefly by private charity, known as the A.R.A.-European Children's

Fund. Later (August, 1921), when the A.R.A.E.C.F. started operation in Russia, a shorter name was desired. The organization then shortened the name to the A.R.A. (For further explanation see pages 73-74, 872 n.)

### A.R.A.W. AND A.R.A.E.C.F.

#### FOOD REMITTANCES AND BULK SALES FOR CENTRAL EUROPE

The stocks of the American Relief Administration Warehouses were pooled with those of the European Children's Fund on November 1, 1920. However, in order to distinguish between the commercial organization (A.R.A.W.) and the child-feeding organization (A.R.A.E.C.F.), the A.R.A.W. has been given credit for all food remittance and bulk sale operations.

### NAMES OF CITIES CHANGED

Alexandrovsk *to* Zaporozhe.  
Constantinople *to* Istanbul.  
Ekaterinoslav *to* Dnepropetrovsk.  
Elizabethgrad *to* Zinovievsk.  
St. Petersburg *to* Petrograd *to* Leningrad.  
Tzaritzin *to* Stalingrad.

### COUNTRIES

#### CZECHOSLOVAKIA

During the Armistice Period this country was generally spelled as two words and hyphenated. All Appendix tables referring to this country will be listed under Czecho-Slovakia. The text, which is of a later date, will show the country spelled as one word, Czechoslovakia.

#### JUGOSLAVIA

The name of this country has been changed rather frequently. Jugoslavia, being the accepted term today, has been used throughout this book to embrace Serbia, Greater Serbia, the Kingdom of S.H.S., and Jugo-Slavia.

## LIST OF ABBREVIATIONS

A.C.R.N.E.	American Committee for Relief in the Near East	Paiok	Primarily meant an allowance of food as for soldiers in the trenches, but later was used for any stipulated allowance, as money to a soldier's wife at home. It was used by the A.R.A. as a monthly food package.
A.F.S.C.	American Friends Service Committee	P.A.K.P.D.	Polsko-Amerykański Komitet Pomocy Dzieciom [Poland] (Polish-American Children's Relief Committee. An organization of Poles)

J.D.C.	American Jewish or Jewish Joint Distribution Committee		
N.E.R.	Near East Relief		
N.Y.	New York		

## PART I

## INTRODUCTION

In August, 1914, some 200,000 panic-stricken American tourists were stranded in the meshes of the Great War that had so suddenly enveloped continental Europe. At the first opportunity these Americans piled into England by tens of thousands, most of them without available funds because of the moratorium, and all of them without transportation home. In this emergency, the Honorable Walter Hines Page, the American Ambassador to Great Britain, persuaded Herbert Hoover, a mining engineer with an international reputation in his profession, to organize these chaotic groups of tourists and direct their homeward movement. Accustomed to co-ordinating big engineering projects, he soon reduced these confused groups to something like order. With ten other Americans he guaranteed an American Bank in London against loss and announced that all sorts of American paper, even personal checks, would be exchanged for currency. He arranged transportation with the steamship companies and soon the stream of tourists was homeward bound in an orderly fashion. Five thousand or more Americans a day passed through the hands of this organization during these first six weeks of the war. And although Hoover's Committee accepted checks and other evidences of credit to the extent of \$1,500,000, with little opportunity to scrutinize the security, they lost in all only \$150.

Hoover himself had engaged passage home for the last week in September, 1914. But the gods had another fate in store for him. Before he could sail, the German armies had invaded Belgium and left the people of that little country in a desperate situation. American and Belgian representatives importuned him to undertake the delicate and difficult task of organizing some means of saving the lives of these ten million people within the occupied territories. Hoover knew what this decision meant. He knew it was a long and difficult job and that if he undertook it he must sever his connections with all commercial activities. At that time, by reason of his numerous mining connections, he was in a position to control a large share of the world's sup-

ply of base metals, particularly zinc and lead. These were bound to be enormously valuable if the war continued and if he held on to these it was certain to result in a very large fortune. For three days he sat with Mr. Page and the Belgians, discussing details and imagining possibilities. And for three nights he weighed his own perplexities before he finally decided to cast his lot with the relief for the Belgians.

With that decision was born the Commission for Relief in Belgium—a decision of supreme importance for himself and for the world.

The story of the Commission for Relief in Belgium has been told many times:<sup>1</sup> of how this organization, beginning as a purely philanthropic enterprise, soon received the financial support of the Allied and American Governments; of how the C.R.B. without incorporation or definite legal status came to have many attributes of a government, flying its own flag, issuing its own passports, operating its own fleet under agreed immunity from all belligerent powers, and operating to feed a civilian population within its enemy lines. In April, 1917, the United States entered the war and it was necessary to delegate the distribution in Belgium and France to a neutral Spanish-Dutch committee. Mr. Hoover, now U.S. Food Administrator, continued as chairman of the Commission and arranged for financing the purchase and transport of the food supplies.

In the meantime President Wilson had asked Mr. Hoover to take charge of the food situation, which was rapidly approaching a crisis, in this country. Mr. Hoover arrived in the United States on May 19, 1917, and immediately initiated the preparatory work which led to the establishment of the United States Food Administration. Under the authority of the Food Control Act, which became a law on August 10, 1917, Mr. Hoover was appointed United States Food

<sup>1</sup> Among other publications see *The Commission for Relief in Belgium—Statistical Review of Relief Operations*, by George I. Gay, Stanford University Press, 1925, and *Public Relations of the Commission for Relief in Belgium—Documents*, by George I. Gay, with the collaboration of H. H. Fisher, Stanford University Press, 1929.

Administrator. From that time until after the Armistice, he directed all measures relating to the conservation and distribution of food in this country to insure an adequate supply to support our own needs and those of the Allies in Europe.

In the summer of 1918, Mr. Hoover, anticipating the distress in the liberated and enemy countries on the cessation of hostilities, caused a survey to be made of world food resources and prepared a definite plan for initiating relief measures. Immediately after the Armistice had been signed, President Wilson requested Mr. Hoover to go to Europe and represent the United States in such measures as had to be taken according to the plans already prepared, in order to relieve the impending suffering. He sailed from the United States on November 18, 1918, only seven days after the signing of the Armistice, having arranged before his departure for the dispatch of large quantities of food supplies. From that time until the following September was the most strenuous, the most difficult, but probably the most fruitful period of Mr. Hoover's relief activities. As Director General of Relief for the Allied Governments during these nine months he secured the finance and directed the delivery of more than 4,000,000 tons of food valued at more than one billion dollars.

With the 1919 harvest it was possible to bring this form of relief in Central and Eastern Europe to a close, but in the meantime it had been found that there were millions of children in these countries, many of them orphans, suffering from under-nutrition, many facing death, but all certain of permanent disability unless some means of relief were found. Mr. Hoover immediately set about perfecting an organization which could take care of this need. For three years the American Relief Administration European Children's Fund raised money and fed some 10,000,000 children in these stricken countries.

Before this work was entirely completed, the great famine in Russia again raised the need for "mass feeding" relief on a tremendous scale. The A.R.A. organization, although ready to liquidate, again responded to the call, and under Mr. Hoover's direction, relief to the value of more than \$63,000,000 was furnished to these stricken people.

With the close of the Russian relief and the withdrawal of the child-feeding operations in

Central Europe, this vast work extending over ten years came to a close.

#### SCOPE OF REPORT

The present volume attempts to give a statistical summary and a brief outline of relief activities by the organizations with which Mr. Hoover was connected, and also of the activities of other organizations in respect to their co-operation in this work. This is by no means a complete summary of all the relief work in Europe during this period. Many of the relief organizations mentioned in this volume spent millions, even hundreds of millions of dollars, entirely on their own activities, of which no account is taken in this report. To mention a few of these organizations: The American Red Cross spent upwards of \$200,000,000 in relief activities in Europe during this period,<sup>1</sup> yet in this report we have included less than \$7,300,000 (Table 33, page 58) as the amount spent by the Red Cross in activities in co-operation with the American Relief Administration. The Near East Relief, the Jewish Joint Distribution Committee, the American Friends Service Committee, the Knights of Columbus, and many other organizations each spent vast sums which had no relation to the work of the organizations which Mr. Hoover was then directing and, hence, are not included in this report. These facts are pointed out in the discussion of the work of each of these organizations but it is important that the reader bear in mind that the volume of relief attributed to many of these organizations in this report is only that portion carried on in co-operation with the American Relief Administration or its subsidiaries and often is only a small fraction of the total activities of those organizations during this period.

#### ORGANIZATIONS INVOLVED

Because of the large number of activities which were carried on at various times during these ten years and because at different times the same name was applied to totally separate organizations, the terminology used in this report is likely to be confusing. In the following paragraphs an attempt will be made to explain

<sup>1</sup> *Annual Reports of the American National Red Cross, 1919 to 1923.*

briefly the relationship between the major organizations involved. Because of the lengthy names of some of the organizations and in accordance with the usage which grew up during the work, many of these organizations are referred to by their initials, such as C.R.B. for Commission for Relief in Belgium; A.R.A. for American Relief Administration, etc. Some of these are indicated below, while others will be found in the List of Abbreviations on page xxiii.

The Commission for Relief in Belgium (C.R.B.) was established October 22, 1914, and was the buying and shipping organization for all relief supplies to the occupied regions of Belgium and Northern France for the entire duration of the war. Until the United States entered the war the C.R.B. was responsible to the belligerent governments for the execution of the agreements relative to the distribution of the relief in occupied territories. The Commission remained in active operation until August 31, 1919, by which time both the Belgian and French Governments were in a position to take care of their own people and the Commission had liquidated its stock of commodities.

Operating under the C.R.B. were two committees: one composed of Belgians and known as the "Comité National de Secours et d'Alimentation"; the other the corresponding committee of Frenchmen known as the "Comité d'Alimentation du Nord de la France." These two committees carried out the actual internal distribution of relief supplies within the respective countries. Under these committees there were numerous district and local committees through which the supplies moved to the people.

The United States Food Administration was created by Executive Order of President Wilson on August 14, 1917, to carry out the provisions of the Food Control Act of August 10, 1917. Under the United States Food Administration there were several organizations set up to carry out particular functions. The first of these referred to in this volume is the Food Administration Grain Corporation, which was charged with the responsibility of maintaining the guaranteed price of wheat and which engaged in buying and selling wheat, flour, and other cereals and was the source from which the Allied Governments secured their supplies of these commodities during the remainder of the war. The Food Administration came to a close officially on June 30,

1919, and in order to maintain President Wilson's guaranty of the minimum price of wheat to the producer for the 1919-1920 crop, the President directed a new corporation to be formed, known as the United States Grain Corporation, which was the successor to the preceding corporation.

The second organization under the Food Administration was the Sugar Equalization Board, which was incorporated, and purchased both the Cuban and the United States crops of sugar in 1918 and attended to the distribution of the available supplies, both to the Allied countries and internally in the United States.

The third organization under the Food Administration was the Division of Co-ordination of Purchases, through which all food purchases by the Allies, except cereals and sugar, were allocated (cf. page 21).

Immediately after the signing of the Armistice, Mr. Hoover went to Europe at President Wilson's request and through his efforts there was formed an Interallied Council of Supply and Relief, which later became the Food Section of the Supreme Economic Council. Mr. Hoover was made Director General of Relief for the Allied Governments and was given direct charge of all official relief work during the Armistice Period.

In order to handle the official relief from the United States, particularly the supplies furnished under the Congressional Appropriation of \$100,000,000 for Relief in Europe (Act of February 25, 1919), President Wilson directed Mr. Hoover to form the American Relief Administration (frequently designated A.R.A.), which was an official organization to handle the allocation and distribution of relief furnished by the United States Government. In addition to the relief paid for from the specific Congressional appropriation, the A.R.A. handled relief furnished from United States Treasury loans direct to certain of the newly established governments, supplies furnished from the President's National Security and Defense Fund and certain relief furnished against cash payment.

Under authorization of President Wilson, the Food Administration Grain Corporation co-operated in the buying and shipping of all relief supplies distributed by the American Relief Administration. The Grain Corporation established a London office which took care of all shipping

activities in European waters, handled all the accounting work, and made all settlements with the European governments. In the present report all relief deliveries are referred to as handled by the A.R.A., although to be exact the Grain Corporation should receive joint credit.

With the signing of the Treaty of Versailles on June 28, 1919, the Armistice Period ended and with it all official relief from the United States. From that time on the A.R.A. and the Grain Corporation were engaged solely in liquidating commitments.

In order to render further aid to the millions of destitute children in Europe, Mr. Hoover proposed the organization of an association which could mobilize charitable contributions from the United States. With the approval of President Wilson, it was arranged that any surplus which might have been earned by the Grain Corporation on the relief shipment in the Armistice Period should be turned over to this new organization for the relief of European children. The name of this new organization was the American Relief Administration European Children's Fund. In the present report this is usually referred to as the European Children's Fund or simply as the E.C.F. This was a purely private charitable organization and should not be confused with the American Relief Administration of the Armistice Period which was a semi-official organization.

At a somewhat later period, a separate but correlated organization was set up and known as the American Relief Administration Warehouses (sometimes designated by A.R.A.W.), which handled all food draft and bulk sale operations during its existence. (Cf. page 90.)

During this period there was also set up the European Relief Council (E.R.C.), which was an association of a number of charitable organizations under the leadership of Mr. Hoover which pooled their appeal for charitable contributions from the American public.

Finally, when it became necessary to expand an organization to take care of the crisis in the great Russian famine, the name American Relief Administration was again adopted. This latter organization was an outgrowth of the American Relief Administration European Children's Fund, but since the Russian relief included both adult and child feeding the latter name was regarded as inappropriate. In this

book this new organization is frequently referred to as the "American Relief Administration, Russian Unit," or as "A.R.A., Russian Unit." It should not be confused with the A.R.A. of the Armistice Period.

The origin and work of each of the above organizations is fully explained in the appropriate section of this volume but perhaps the above brief discussion will make clear some of the interrelations which might otherwise prove to be confusing.

#### TOTAL RELIEF DELIVERIES

As indicated in the preceding brief summary, this decade of relief work may be divided into four major operations or periods of activities. Although even these were often overlapping and graded one into the other, they stand out as four distinct major developments in the work with which Mr. Hoover was connected. The first of these was the work of the Commission for Relief in Belgium, which took care of the food supply of the occupied territories of Belgium and Northern France during the war. This work was started in November, 1914, and continued during the Armistice Period and up to August 31, 1919, before the respective governments were in a position entirely to take care of their people.

The second major activity was that of the United States Food Administration, which among other things was charged with the responsibility of furnishing the Allied nations with such food supplies as could be spared from the United States. Although the Food Administration was not definitely established until August, 1917, yet for many months prior to that, Mr. Hoover, under authority from President Wilson, was directing the work of furnishing food to the Allies. In this report we have included all food supplies furnished to the Allied Governments which were paid for from United States Treasury loans from April 6, 1917, to June 30, 1919, when the Food Administration passed out of existence.

The third major activity was the relief to European countries during the period from the signing of the Armistice on November 11, 1918, to the signing of the Treaty of Versailles on June 28, 1919. This was the period of official relief during which Mr. Hoover was Director

TABLE 1

GRAND TOTAL OF ALL FOOD AND OTHER RELIEF DELIVERED DURING THE WORLD WAR AND THE RECONSTRUCTION PERIOD  
—BY MAJOR OPERATIONS, 1914 TO 1924

Major Relief Operation	Duration	Total Metric Tons	Total Value
Commission for Relief in Belgium.....	November, 1914, to August, 1919	4,988,059.0	\$ 861,340,244.21
U.S. Food Administration.....	April, 1917, to June, 1919	23,103,266.2	3,050,496,599.23
Armistice Period (Director General of Relief) .....	November, 1918, to August, 1919	4,178,447.7	1,101,486,783.34
Reconstruction Period .....	August, 1919, to July, 1923	1,571,534.1	220,704,581.78
Grand total net deliveries.....	November, 1914, to July, 1923	33,841,307.0	\$5,234,028,208.56

General of Relief and had direct charge of all relief activities of the Allied Governments. Deliveries of relief commitments made during this Armistice Period were completed by the end of August, 1919.

The fourth and final period of relief activities considered in this report is that of the Reconstruction Period, which began with the work of the American Relief Administration European Children's Fund, in August, 1919, and included many phases of charitable relief, ending with the work in Russia in 1922 and 1923. The major portion of this relief was in the nature of child feeding, but it also includes many phases of adult relief, such as the food draft and bulk sale operations, intelligentsia relief, and much of the Russian work.

Table 1 summarizes the grand total of all relief work accounted for in this report under these four major operations. Table 101 (Appendix) gives additional detail of these deliveries by commodities.

This table shows that the total deliveries accounted for in this report reached the enormous amount of 33,841,307.0 metric tons<sup>1</sup> with a net delivered value of \$5,234,028,208.56. Some idea of the volume of these activities may be had by considering that this tonnage would have filled more than 500,000 American freight cars and would require more than 6,700 vessels of 5,000 tons each for its transatlantic transportation.

Table 1 shows further that some 60 per cent of these deliveries represent food supplies furnished to the Allied Governments during the Food Administration Period. As will be pointed out later (cf. page 15), the exigencies of the Allied food and shipping situation resulted in throwing almost the entire burden of feeding

these countries during the last two years of the war upon the United States. By the extraordinary increase in the total production by the American farmers and by strict conservation measures, the latter under the guidance of the Food Administration, this country was able to export more than three times the amount of foodstuffs which had been sent abroad during the pre-war years. To a very considerable extent this was due to measures inaugurated under Mr. Hoover's guidance.

Table 2 (page 9) shows the division by commodity groups<sup>2</sup> of the total tonnage delivered under each of the four major operations. It will

<sup>1</sup> All quantities in this report, unless otherwise specified, are given in metric tons, which is a common unit of measurement in continental Europe and on which all accounting was based. A metric ton contains 1,000 kilos (kilograms) and is the equivalent of 2,204.6 avoirdupois pounds as used in the United States. The metric ton is thus slightly smaller than the long ton of 2,240 pounds used very largely in Great Britain and to some extent in this country, and it is roughly 10 per cent larger than the short ton of 2,000 pounds. In the majority of tables quantities are given to the nearest tenth of a ton.

<sup>2</sup> In this and in all summary tables in the Appendix a uniform classification of commodities has been followed. This results in grouping together many closely related commodities under a single heading. Thus flour includes wheat, rye, and all other cereal flours. Grain includes all bread grains and substitutes, such as wheat, rye, corn, and barley. Rice is shown separately. Pork products is used to designate all meats and fats including bacon, hams, shoulders, lard, and also such small amounts of beef or other meats as were occasionally handled. Vegetable oils are also included under pork products because they were used as substitutes for lard. Milk includes both evaporated and condensed milk. Miscellaneous food includes a great variety of items most of which were individually small in tonnage. Examples are cod liver oil, hard-tack, etc. The detail tables of arrivals and particularly of internal deliveries of relief supplies show these separate commodities in greater detail. These summary groups have been used to bring the tables into reasonable size and to avoid much unnecessary detail.

be noted that flour and grain in the total constitute by far the major tonnage. These two groups make up approximately 22,000,000 tons, or roughly 65 per cent of the total quantity. Pork products, including all fats, totaled approximately 2,000,000 tons, but in value this was

a relatively much more important item than the tonnage figures indicate.

Table 3 gives the grand total deliveries of all food and relief by countries of destination.

Deliveries were made to 23 separate countries exclusive of sundry accounts, which in-

CHART I

clude chiefly local cash sales and deliveries to prisoners of war or refugees from one country but located in another so that it was difficult to allocate the relief.

The largest deliveries were made to the United Kingdom and France, both of which obtained supplies in excess of one and a quarter billions of dollars. Deliveries to Italy were nearly 800 million dollars. These were the three major Allies which received the bulk of food delivered during the war under the United States Food Administration.

Deliveries to Belgium amounted to nearly 700 million dollars, the major portion of which came from the C.R.B. A portion of the Belgian supplies was furnished under the Food Administration on direct loans from the United States Treasury.

Of the countries receiving relief after the Armistice only, the deliveries to Germany of nearly 300 million dollars were the largest. The major portion of these were sold for cash and paid for by German gold during the Armistice Period. Deliveries to Poland exceeded 200 million dollars. Those to Austria were more than 145 million dollars and to Czechoslovakia they exceeded 115 million. Other countries received smaller amounts, some of the largest of which were those to Russia, Roumania, Yugoslavia, Finland, and Armenia.

TABLE 3

In the following pages each of the four major operations will be reviewed as independent operations and where applicable these will be broken up into their subsidiary operations, each of which will be discussed separately. After these have been covered each country will be treated

independently, giving a brief picture of the conditions making the relief necessary, and a detailed discussion of the relief furnished, allocating it to each of the major and subsidiary operations involved.

The tables given in connection with the text

CHART II

Grand total metric tons and percentage of deliveries, by countries, during the World War and the Reconstruction Period—1914–1924. The totals may be obtained from Table 3, page 9, and greater detail for all countries is shown in Table 102, pages 274–75.

are all of a summary nature. The details are all given in the Appendix with the tables so arranged and cross-referenced as to enable every angle to be followed conveniently. In most instances the supplies are traced from the time the

relief was loaded on the vessel in the United States until it was delivered to its final destination, which in some cases was a European government and in others a local feeding kitchen in an isolated village.

CHART III

Grand total value and percentage of deliveries, by countries, during the World War and the Reconstruction Period—1914-1924. The totals may be obtained from Table 3, page 9, and greater detail for all countries is shown in Table 102, pages 274-75.

## COMMISSION FOR RELIEF IN BELGIUM PERIOD

The first of the major operations discussed in the preceding pages is the Commission for Relief in Belgium. The work of this Commission has been presented in a detailed statistical report by George I. Gay.<sup>1</sup> The same author has also published a very complete documentary history of the Commission's work.<sup>2</sup> These, together with many minor bulletins and other publications, make it unnecessary to present any detailed discussion or statistical material regarding the relief work in Belgium and Northern France in this report. Our purpose here is merely to pick up the total deliveries from Mr. Gay's report so that these may be included in a complete picture of the relief activities of those ten years.

The origin of the Commission for Relief in Belgium and Mr. Hoover's connection with this work has been outlined briefly in the introduction. The work of the Commission was of the most delicate character, involving as it did very intimate relations with the German Government and Military Authorities on the one hand and with the Allied Governments on the other. The German attempt to destroy the military force of the Allies and to occupy the English Channel ports in the first few weeks of the war had failed, but they did succeed in occupying practically all of Belgium and a large portion of Northern France. This large area, containing nearly 10,000,000 people, remained under German rule for the four years of the war.

During the German offensive, materials of all kinds including food supplies and crops were requisitioned or confiscated by the invading army. This highly industrialized area, always largely dependent on imported food was thus cut off from any communication with the outside and in addition had lost its own meager supplies. Germany had her hands full to secure sufficient food for her own people and her armies. The Allies immediately established a

blockade of the Central Powers and naturally they were in no mood to allow food supplies into Belgium which might find their way to Germany.

The first task of the newly formed committee was to secure permission from the Allied Powers to import food into occupied Belgium and Northern France. This in itself was no easy task, but permission was finally given providing adequate assurance could be obtained that none of this food would reach either the German people or the German Army, and further providing assurance could be given that all food produced within the occupied territory would be used for the civilian population and not confiscated by the German Army. The successful negotiation of these delicate agreements and the maintenance of strict observance of the terms during four years of a terrible war was in itself no mean triumph of diplomacy. The confidence which both sides placed in the sincerity and ability of Mr. Hoover was by far the greatest factor in the success of this undertaking.

But even after diplomatic authority had been secured, the difficulties facing the Relief Commission were stupendous, and failure was freely predicted on all sides. Among other things it was necessary to secure finance for an undertaking running into hundreds of millions of dollars. It was necessary to purchase food in already limited and disorganized markets. Vessels had to be chartered to cross mine-strewn seas and through naval blockades. Supplies had to be transshipped by barges and railroads through hostile naval and military lines. The whole of the Belgian crops had to be taken over and distributed by the Commission. These and many other hazards had to be overcome in this gigantic and unprecedented undertaking. The successful outcome was a triumph of organization.

The first meeting of the Commission for Relief in Belgium was held in London on October 22, 1914. Within ten days the first of the Belgian relief ships, the SS. "Coblentz," had crossed the channel and its cargo of flour, beans, and peas was being distributed to starving Belgians. This was the first of 2,313 cargoes, of which 993 came

<sup>1</sup> *The Commission for Relief in Belgium—Statistical Review of Relief Operations*, by George I. Gay. Stanford University Press, 1925.

<sup>2</sup> *Public Relations of the Commission for Relief in Belgium—Documents*, by George I. Gay, with the collaboration of H. H. Fisher. Stanford University Press, 1929.

from overseas, and which carried more than 5,000,000 tons of relief supplies during the next five years.

The period of active operation of the C.R.B. extended from November 1, 1914, to August 31, 1919. By this latter date, eight and one-half months after the Armistice, the Belgian and French governments were in a position to secure their own supplies, and international trade had again become sufficiently normal so that the Commission could close its operations.

In the present report all deliveries to Belgium and to Northern France by the C.R.B. from the beginning to the end of the Commission's operations are regarded as constituting the Commission for Relief in Belgium Period. These deliveries may be summarized in the following tabulation:

Deliveries to	Total Metric Tons	Total Value
Belgium .....	3,896,180.0	\$641,056,693.69
Northern France .....	1,091,879.0	220,283,550.52
Total .....	4,988,059.0	\$861,340,244.21

In addition to these operations the C.R.B. sold to Germany and certain other destinations a considerable volume of supplies during the Armistice Period. In this report these are accounted for under the Armistice Period where

they constitute a portion of the work of the Director General of Relief. These latter deliveries may be summarized here as follows:

Deliveries to	Total Metric Tons	Total Value
Germany .....	134,980.0	\$44,350,810.47
Sundry Accounts .....	51,392.0	21,990,430.40
Total .....	186,372.0	\$66,341,240.87

Together these two constitute the entire commodity operations of the Commission for Relief in Belgium, which during the five years of its active operation imported and distributed 5,174,431 metric tons of food and other supplies, which reached the value of \$927,681,485.08. This does not include the distribution of the native Belgian crops which were also handled by the Commission.

Table 4 summarizes by commodities the total deliveries to Belgium and France by the C.R.B., while Table 5 (page 14) summarizes the total deliveries by fiscal years as reported by the Commission.

Tables 103 to 105 (Appendix) summarize other of the more important aspects of these gigantic operations. The detailed statistics of these operations are given in Mr. Gay's report, which shows among other things the arrival of supplies by vessels, by ports, by commodities, and the distribution of these commodities by

TABLE 4

\* Deliveries from April 1, 1915, to Oct. 31, 1915.

provinces and communes for each year of operation. The reader is referred to the volumes cited for these and many other details.

The question of financing such vast operations was obviously one of the most difficult which had to be solved. The program at the outset of the Commission's work called for the expenditure of about \$5,000,000 per month, but due to increased prices and greater need this was increased to as high as \$30,000,000 per month in 1918. It was obvious that such vast sums could not be expected from charitable contributions and that the only hopes of success was in securing government subsidies. This was arranged and in the early years the principal source of funds were loans to the Belgian Government from England and France. With the entrance of the United States into the war in 1917 our own Treasury began making

direct advances to Belgium for expenditures through the C.R.B.

In addition to these government subsidies, charitable contributions were organized on a world-wide scale and more than \$52,000,000 were contributed from such sources.

The work of the Commission was organized on a business basis, and for accounting purposes the Belgian Government was charged with food delivered at a price sufficient to cover cost and some measure of the hazards involved in transporting and distributing the various commodities. Through good management the Commission thus accumulated a surplus which was used to supply additional relief.

Table 105 shows the source of the Commission's basic capital for the entire period and the division between Belgium, France, and other destinations.

## UNITED STATES FOOD ADMINISTRATION PERIOD

The United States entered the World War on April 6, 1917. Even prior to that date President Wilson had cabled to Mr. Hoover asking him to return to this country in order that the government might have the benefit of his experience and expert knowledge in handling war-time food problems. Mr. Hoover at that time was in London directing the work of the Commission for Relief in Belgium. He began immediately to put the affairs of the Commission in shape to leave and arrived in this country early in May, 1917.

Even at that time the food situation in this country was becoming precarious. The heavy and uncontrolled demand by the Allies, and the neutral countries as well, was fast drawing the food supplies out of this country, and prices were rising rapidly with evident demoralization of markets in many quarters.<sup>1</sup> It was evident that, for the safety of the Allied cause and for the protection of our own food requirements, some immediate steps must be undertaken to conserve supplies. Congress already had under consideration some form of legislation which would enable the President to conserve food, protect producers and consumers, and enable us to be of the greatest assistance to the Allies. Such legislation, much of it revolutionary in the extent of control of private business, required prolonged discussion in Congress. The Food Control Act, under which the United States Food Administration was created, did not become a law until August 10, 1917. In the meantime it was absolutely necessary to take some action to control the food situation.

Under the war powers of the President, Mr. Hoover was authorized to take such steps as were possible to organize the voluntary conservation of food, to co-operate with business organizations on a voluntary basis to secure both conservation and direction of movement of supplies to the Allies. Under the newly or-

ganized Council of National Defense and the Exports Administrative Board (the predecessor of the War Trade Board), it was possible to exert considerable control on the export movement of food and to direct these supplies to the Allied countries.

Under the Act of Congress of April 24, 1917, the Treasury was authorized to establish credits in favor of the Allied Governments to the extent of \$3,000,000,000 for the purchase of supplies in this country. In connection with the granting of these loans the Treasury required that all purchases should be made with the permission of the Treasury so as not to demoralize American markets. At a later time (August, 1917), a Purchasing Commission was appointed by the Treasury to co-ordinate all Allied purchasing.<sup>2</sup> But even before this commission was established all food purchases by the Allies were made in consultation with Mr. Hoover as the President's representative in all matters pertaining to food supplies. Thus, almost from the time we entered the war, Mr. Hoover took an important part in determining our food policies toward the Allied Governments and in directing all possible supplies to their needs.

With the passage of the Food Control Act and the appointment of Mr. Hoover as United States Food Administrator on August 10, 1917, it was possible to exert much more definite control on food supplies. The chief problems of the Food Administrator were first to eke out the exceedingly short crop in this country in 1917 by the most rigid conservation and prevention of waste, to see that hoarding of supplies and profiteering by dealers was prevented, to maintain sufficient supplies to feed our own population and at the same time to direct the largest possible amount of food to the Allied Governments. In its final essence the United States Food Administrator was charged with the stupendous duty of anticipating and preventing a world food shortage during the war.

Space does not permit us to go into a discussion of the numerous measures which were taken to accomplish these several purposes. It is sufficient to state that they were accomplished and largely through the voluntary co-operation

<sup>1</sup> For a further discussion of the food situation at this time see *American Pork Production in the World War*, F. M. Surface, A. W. Shaw Co., 1925, and *The Grain Trade during the World War*, F. M. Surface, Macmillan Co., 1928.

of the American people and American business under Mr. Hoover's leadership.

Too much emphasis cannot be placed upon the importance of this in assisting to bring about a successful termination of the war. There were times, particularly in the early spring of 1918, when the fate of the Allied cause depended upon the successful fulfillment of food shipments from the United States. And this program had to be fulfilled in spite of the fact that our own food crops were barely sufficient for our own normal consumption. The Allied food situation at that time has been discussed in previous publications.<sup>1</sup> Perhaps the seriousness of the situation that developed can be made clear by a few extracts from a letter written to Mr. Hoover on February 22, 1918, by the highest representatives in this country of the three Allied Powers. This letter, signed by Lord Reading, Ambassador from Great Britain, Count V. Macchi di Cellere, Ambassador from Italy, and André Tardieu, the French High Commissioner, read in part as follows:

We feel that every endeavor must be made to ship at least 1,100,000 tons in March and more if possible. With that object in view we have got together the necessary shipping and we are now met with the probability of being unable to procure sufficient grain to load full cargoes. A situation such as that would be nothing short of a calamity and we most earnestly seek your assistance. . . . You are so familiar with the grave urgency of this problem that we do not recapitulate the facts, but we *must* meet and overcome the present crisis. . . . Our excuse for our insistence is the fact, which is well known to you, that a failure to make adequate shipments in March may produce events of incalculable gravity in both Europe and America.

<sup>1</sup> See *The Grain Trade during the World War*, pp. 184-203.

Ambassadors of foreign governments are not given to using such language in their official correspondence unless the urgency of the situation demands it. Many other letters and cables might be quoted to show how serious the Allied food situation was at this time. These all make it clear that the slightest failure in food supplies from the United States was fraught with the greatest danger, even to jeopardizing the Allied cause itself.

Owing to our extremely short crops, to the breakdown in rail transportation, and the shortage in shipping, it was only with the greatest difficulty that the Food Administration could meet these demands by the Allies. Although it was necessary to make many substitutions and there were many annoying delays, nevertheless enough food was moved to seaboard and shipped to enable the Allies to "carry on" during this critical period.

Some idea of the supreme effort made by this country in supplying the Allies with food during the war is shown by the accompanying comparison of pre-war exports, and the war-time program and export movement. The 1918-1919 program for food exports called for more than three times our pre-war average exports, and this program was fulfilled.

Three agencies of the United States Food Administration organization were of particular importance in assisting with the food supply of the Allied countries. These were the Food Administration Grain Corporation, the Sugar Equalization Board, and the Division of Coordination of Purchase.

## FOOD ADMINISTRATION GRAIN CORPORATION

The problems of cereal supplies were the ones most urgent both for this country and for the Allies, and attention was first directed to these. Through numerous conferences, plans had been perfected for the control of cereal marketing prior to the passage of the Food Control Act. Under the authority of this Act, President Wilson issued an Executive Order on August 14, 1917, creating the Food Administration Grain Corporation as an agency of the government for the purpose of buying, selling, and storing grain and cereal products. This Executive Order directed that the Corporation be incorporated under the laws of the State of Delaware with a capital stock of \$50,000,000 to be paid for by the United States Treasury and that this stock should be held for the use and benefit of the United States.

Mr. Hoover was chairman of the Board of Directors and Julius H. Barnes was made president of the Corporation.<sup>1</sup> The organization was perfected by the end of August, and active operation was begun on September 4, 1917.

The primary purpose of the Grain Corporation was to provide a method of putting into effect the congressional guaranty of a price for wheat to the producer, which should not be less than \$2.00 per bushel for the 1918 crop. By presidential proclamation a basic fair price of \$2.20 per bushel for No. 1 Northern wheat at Chicago for the 1917 crop was established on the recommendation of a special wheat price committee.<sup>2</sup> This basic price was increased to \$2.26 for the 1918 and 1919 crops. Appropriate differentials were established for other grades and other markets. The Grain Corporation established buying agencies at all important markets and stood ready to purchase all wheat offered at the established price, thus maintain-

ing this as the minimum price throughout the period of its active existence, which was from September 4, 1917, to May 31, 1920.<sup>3</sup>

The Grain Corporation throughout the duration of the war also undertook to see that an equitable distribution of wheat supplies was made to American mills, and to control the prices at which flour and other products were sold by the mills and to the consumer. The Corporation was also charged with the control of all cereal supplies for export, i.e., those to the Allied and Neutral Governments. The authority for this control came, first from the War Trade Board, which refused to furnish an export license for any food commodity unless approved by the Food Administration, and second from the Treasury, which appointed a purchasing committee to co-ordinate all Allied buying in the United States.

The Allied Governments were being loaned vast sums by the United States Treasury, and as a condition of these loans the Treasury reserved the right to direct their purchasing so as not to dislocate unnecessarily the trade and industry of this country. This committee, consisting of Bernard M. Baruch, Robert S. Lovett, and Robert S. Brookings, authorized the Food Administrator to act for them in regard to the purchase of all food and feeding stuffs by any of the Allied Governments. So far as cereals and cereal products were concerned this authority was exercised by the Food Administration Grain Corporation.

Just prior to our entrance into the war the Allied Governments had pooled their cereal-buying efforts in one organization known as the Allied Wheat Executive with headquarters in London. The Wheat Executive established buying organizations in all important wheat exporting countries. In the United States this buying organization was known as the Wheat Export Company, Incorporated, with offices at 27 Beaver St., New York City. The Wheat Export Company thus became the organization to which the Grain Corporation sold its cereals and cereal products which could be spared for the Allied countries.

The total gross sales of the Grain Corporation during the 33 months of its active existence totaled \$3,763,800,246.40. Of this amount, a considerable proportion represented inter-agency transaction within the Corporation. The total

<sup>1</sup> Following is a list of the officers of the corporation at the time of its organization: President, Julius H. Barnes; First Vice-President, Frank G. Crowell; Second Vice-President, Watson S. Moore; Treasurer, Gates W. McGarrah; General Counsel, Curtis H. Lindley; New York City Counsel, Edwin P. Shattuck; Transport Executive, Edward Chambers; Second Vice-Presidents, Edw. M. Flesh, M. H. Houser, C. B. Fox, H. D. Irwin, P. H. Ginder, Frank L. Carey, Geo. S. Jackson, Howard B. Jackson, Charles Kennedy, R. A. Lewin, D. F. Piazzek, Charles T. Neal, and E. F. Newing.

<sup>2</sup> See *Grain Trade during the World War*, pages 64-75.

<sup>3</sup> On July 1, 1919, the name of the corporation was changed to United States Grain Corporation.

value of net sales to organizations outside the Corporation amounted to \$2,127,127,659.41. Of this latter amount, the total sales to the Wheat Export Company were valued at \$952,091,853.71. Table 7 summarizes these sales to the Wheat

TABLE 7

SUMMARY OF SALES TO THE WHEAT EXPORT COMPANY BY THE FOOD ADMINISTRATION GRAIN CORPORATION AND ITS SUCCESSOR, THE UNITED STATES GRAIN CORPORATION—SEPTEMBER, 1917, TO JANUARY 31, 1921

Commodity	Total Metric Tons	Total Value
Wheat flour .....	3,120,203.3	\$376,516,811.55
Cereal flour .....	32,749.5	3,222,194.83
Wheat grain .....	6,238,617.2	549,185,139.28
Rye grain .....	57,646.7	4,262,599.41
Barley grain .....	79,880.9	4,765,390.15
Corn grain .....	5,527.4	325,628.84
Beans and peas .....	67,556.3	13,753,007.09
Rolled oats .....	502.4	61,082.56
Total .....	9,602,683.7	\$952,091,853.71

Export Company as shown by the books of the Grain Corporation.<sup>1</sup> These figures, however, do not represent the total cereal supplies obtained by the Allied Governments from the United States during our participation in the war and the immediate post-war period. In the first place the Grain Corporation did not begin operations until September, 1917, or five months after our entrance into the war. In the second place the Grain Corporation did not attempt to handle any coarse grains or coarse grain products until after July, 1918, and even then it permitted the Wheat Export Company to purchase a large proportion of its supplies in the open market. The Grain Corporation never undertook to handle feed oats or many other important cereal supplies.

It should be possible to determine from export and import figures for the several countries, the details of food movement during the

war and the post-war period. However, several difficulties are encountered here. Exports of cereals from the United States to Allied countries were handled by the Wheat Export Company as noted above. Because of the submarine activities and also because of the exigencies of the various programs, vessels were frequently re-allocated en route and did not discharge their cargo in the country for which the ship's manifest was made out and which formed the basis of our export statistics. Thus a food ship might leave New York bound for Liverpool, and export statistics would show the cargo going to England, but the vessel may have been instructed en route to proceed to Marseilles and the cargo thus finally have been consigned to France. The import statistics of most European countries cannot be relied upon for details covering the war period.

In order to get some measure of the assistance rendered to the Allied countries through food supplies during the war and the immediate post-war period, it has seemed best to depend primarily upon Treasury statistics showing the amount of money loaned to each of the Allied countries for food purchases in the United States.

Under the acts of Congress of April 24, 1917, September 24, 1917, April 4, 1918, and July 9, 1918, the Treasury was authorized to establish credits in favor of foreign governments engaged in war with enemies of the United States to the extent of \$10,000,000,000.00. The total net cash advanced under these acts amounted to \$9,466,283,171.25 according to the Treasury report.<sup>2</sup> The Treasury figures also show that of this total amount the sum of \$3,050,496,599.23 was definitely ear-marked for the purchase of foodstuffs for the governments of Great Britain, France, Italy, and Belgium.<sup>3</sup> The total expenditures from these loans for the purchase of cereals and cereal products amounted to \$1,438,419,102.99. The final allocation of these purchases to the country receiving the supplies is somewhat involved, because in the majority of cases the original credit was established in favor of Great Britain, and later, if the supplies were allocated to another country, Great Britain was reimbursed through credits, transferred to the other governments. It is perfectly easy to get the totals of such reimbursing credits, but it has not always been so easy to

<sup>1</sup> For further details see *The Grain Trade during the World War*, pages 423-435.

<sup>2</sup> *Annual Report of the Secretary of the Treasury for the Fiscal Year Ending June 30, 1920*, page 338.

<sup>3</sup> This is exclusive of the advances made to Belgium, France, and other countries for relief work. These advances, totaling \$538,188,490.99, were also used chiefly for food and in this report are accounted for under the Commission for Relief in Belgium (pages 12-14) and under the work of the Director General of Relief (pages 23-72).

TABLE 8

SUMMARY OF THE SALES OF AMERICAN CEREALS AND CEREAL PRODUCTS TO THE ALLIED GOVERNMENTS, FINANCED BY UNITED STATES TREASURY CREDITS—APRIL, 1917, TO DECEMBER 31, 1919

(Net Metric Tons)

\* Exclusive of relief supplies.

determine the division of such reimbursements between the several categories of purchases. By using the published reports and the document files in the Treasury Department it has been possible to allocate most of the food credits to the proper government.

The Treasury files contain little information on the physical quantities of the various commodities purchased with the credits established. However, by using the export figures for the period under consideration and re-allocating these in accordance with the Treasury loans, it has been possible to arrive at estimated tonnage figures which went to the several countries under the food credits established by the Treasury.

Even these figures do not represent the total amounts of food which were supplied to the Allied countries from the United States, for in many instances, particularly in the early period of our participation in the war and again in the post-Armistice periods, large supplies were purchased with credits other than those supplied by the United States Government. The figures here considered, therefore, are rather the minimum shipments of foodstuffs all of which were purchased with American Treasury credits. Furthermore, these foodstuffs were all either purchased through agencies of the United States Food Administration or else with the permission and co-operation of the Food Administrator.

The total purchases of cereals by the several governments determined according to the methods discussed above are shown in Table 8.

#### THE SUGAR EQUALIZATION BOARD

The second important commodity problem faced by the United States Food Administrator had to do with sugar. In the pre-war years the

United States produced in the form of beet sugar and Louisiana cane sugar about one-fifth of our total consumption, which averaged about 4,000,000 tons per year. The balance of the supply for the United States was imported from Cuba, with lesser amounts from Hawaii, Porto Rico, and the Philippines. Before the war Europe depended almost entirely upon domestic beet sugar produced chiefly in France, Germany, and parts of the old Austro-Hungarian Empire. Great Britain produced little sugar but secured about 54 per cent of her supply from Germany and Austro-Hungary, with about 6 per cent from France and Belgium.

The war had practically destroyed the sugar-beet industry of Europe. Great Britain, France, and Italy had turned largely to Cuba to make up for the decreased supplies at home and from their normal sources in the Central Empires. In 1916 these three nations had imported, either from Cuba direct or from the United States, a total of 1,242,750 tons, as compared with only 272,516 tons from the same sources in 1913. The United States was dependent upon Cuba for the major portion of its domestic supply of sugar, and with the Allies increasing their demands by more than 1,000,000 tons per year from this source it was evident that our supply was in danger. With the increasing intensity of the war it was clear that the Allied demands for Cuban sugar would increase.

Mr. Hoover immediately sensed this serious situation and long before the Food Control Act became a law he was holding innumerable conferences with beet-sugar producers, refiners, and others in order to reach some solution which would protect our own supply and yet give the Allies the maximum that could be spared from the Western Hemisphere.

Arrangements were finally perfected for the organization of an International Sugar Committee,<sup>1</sup> which was to undertake the distribution of our domestic beet sugar and which later on was able to effect an agreement with the Cuban Government by which three-fourths of the Cuban crop was to be handled by the committee. This arrangement gave the Food Administrator a chance to control the principal supplies for our own needs and to prevent the threatened demoralization of this market.

It was evident, however, that this control by a committee based upon voluntary agreement was not sufficient to cope with the situation which might arise the next year. In the early part of 1918 Mr. Hoover proposed to President Wilson that a new organization should be incorporated with capital supplied by the Treasury, and which should undertake to purchase and distribute both to the domestic market and to the Allies the whole of our domestic production and the whole of the Cuban sugar crop. There were many other reasons behind this proposal which space does not permit us to discuss here.<sup>2</sup> For one thing there was a very difficult price situation which had to be met. In order to stimulate domestic beet production it was deemed necessary to raise the wholesale price of beet sugar to nine cents per pound, which was far above the price necessary to pay for Cuban sugar. Through the Sugar Equalization Board it was possible to pay the higher price for domestic sugar, which could then be equalized by the lower price of Cuban, thus protecting the price to the consumer, and if any profits should be realized on the operations

they would be returned to the United States Treasury.

The President approved Mr. Hoover's proposal and the Sugar Equalization Board<sup>3</sup> was incorporated under the laws of the State of Delaware on July 11, 1918, with a capital of \$5,000,000. The Board made the advance purchase of the 1918-1919 Cuban crop and carried out its distribution and the control of sugar prices. Because of the urgent needs of the Allies which could not be supplied from other sources it was necessary to make rather drastic restrictions on sugar consumption in this country. The Board undertook to allocate supplies to industrial users and domestic consumers were limited to two pounds per person per month. It has been estimated that the conservation policies of the Food Administration reduced consumption in this country by more than 1,300,000,000 pounds (650,000 tons) in 1918, thus making this amount available for the Allies.

In connection with the purchase of the Cuban crop, the Sugar Equalization Board entered into an agreement with the Royal Commission on Sugar Supplies, acting for the Allied Powers, by which the Commission was to have one-third of the total Cuban crop. The Royal Commission was to have the privilege of bringing a portion of this raw sugar into the United States to be refined if it desired. In fact a considerable proportion of this sugar was handled in this way, thus relieving the labor situation abroad.

The United States Treasury agreed to finance the purchases of sugar for the Allied Governments and, according to the Treasury figures referred to above, a total of \$303,191,544.71 was loaned to Great Britain, France, and Italy for sugar purchases. Table 9 gives the allocation of sugar credits to the three countries as shown by the Treasury reports, together with the estimated tonnage to each.

TABLE 9

SUMMARY OF THE SALES OF SUGAR TO THE ALLIED GOVERNMENTS FINANCED BY UNITED STATES TREASURY CREDITS—APRIL, 1917, TO DECEMBER 31, 1919

Allied Governments	Metric Tons	Value
France .....	378,018.0	\$ 58,741,487.85
Great Britain .....	1,539,236.7	239,853,538.86
Italy .....	30,682.1	4,596,518.00
Total .....	1,947,936.8	\$303,191,544.71

<sup>1</sup> This committee consisted of five members: two of which, Sir Joseph White-Todd and John Ramsay Drake, represented the English, French, and Italian Governments; two members, Earl D. Babst and Wm. A. Jamison, represented American refiners; one member, George M. Rolph, represented the United States Food Administration. Final agreement for the purchase of the 1918 Cuban crop was signed December 24, 1917, at a price of \$4.60 per hundred pounds, f.o.b. Cuban ports. One-third of the amount bought was to go to the Royal Commission on Sugar Supplies for the Allies.

<sup>2</sup> For complete discussion of war-time sugar problems, see Joshua Bernhardt, *Government Control of the Sugar Industry in the United States* (Macmillan, New York, 1920).

<sup>3</sup> The officers of the Sugar Equalization Board were as follows: Chairman of Board, Herbert Hoover; President, George M. Rolph; Treasurer, Theodore F. Whitmarsh; Secretary, Robert A. Taft; other Directors, George A. Zabriskie, Clarence M. Wooley, Wm. A. Glasgow, and F. W. Taussig.

## DIVISION OF CO-ORDINATION OF PURCHASE

As stated earlier the great problem constantly before the United States Food Administrator was to anticipate and prevent a world shortage of food during the war. In order to do this it was necessary also to prevent the demoralization of the food markets, especially in the United States, which formed the basis of the Allied supply. We had already witnessed in the spring of 1917 something of what the unco-ordinated and unguided demand of the Allies could do to our markets, especially in wheat and flour. Mr. Hoover was determined there should be no repetition of this if it could be prevented. The Allies had already pooled their purchases of grain supplies with one buying agency, the Wheat Export Company, in this country. Mr. Hoover now asked that similar action be taken with regard to other food supplies and that the Allied Governments each indicate their needs through a single agency. For this purpose there was created a joint Allied commission known as the Allied Provisions Export Commission, to which each government submitted its food requirements with the exceptions of grains, flours, and meals. This Commission was in turn to give notice to the Food Administration of these requirements.

To take care of this business the Food Administration organized a Division of Co-ordination of Purchase. Upon receipt of notice from the Allied Provisions Export Commission it was the function of this division to indicate the method of purchase which should be followed in securing these requirements in order that market conditions might be disturbed as little as possible. Such purchases were made either by allocation throughout the industry concerned or on bids secured and passed to the purchaser for approval, or the purchaser was advised to buy direct in the open market. In the case of allocation of purchases or of bids, the Division of Co-ordination of Purchase exercised general supervision in co-operation with a committee from the industry.

The Division of Co-ordination of Purchase was organized on October 24, 1917. Shortly after that there was also organized a Food Purchase Board, composed of a representative each from the Secretary of War, Secretary of the Navy, Federal Trade Commission, and the Food Administrator. The purpose of this board was to

co-ordinate the food purchases of the Army, the Navy, and the Marine Corps. Other large food purchasers, such as the Commission for Relief in Belgium, the American Red Cross, the Salvation Army, and the Y.M.C.A., also submitted their requirements through the Division of Co-ordination of Purchase.

For a considerable part of the war this division was supervising business amounting to more than \$200,000,000 per month. No complete record of the purchases handled through this division are available, although for the eight months from May to December, 1918, the Division of Co-ordination of Purchase cleared transactions totaling \$1,069,370,419.00. Of this amount \$715,000,000 were for the Allied Governments; \$206,000,000 were for the Army, Navy, and Marine Corps, and the remainder for the miscellaneous organizations noted above. The commodities purchased through the Division of Co-ordination of Purchase included meats and pork products, canned foods, vegetable oils, dairy products, dried fruits, and vegetables, as well as many other miscellaneous foods.<sup>1</sup>

Statistics as to the detailed purchases of particular commodities by the Allied countries are not available. However, by using the allocation of Treasury credits discussed above it is possible to arrive at some approximation of the amounts going to the several countries. The division between the several groups of miscellaneous foods has been based largely on export figures for the period, allocated in accordance with Treasury loans. Even here it is probable that the proportion of miscellaneous foods going to Great Britain is unduly large because many of the purchases were made in the name of Great Britain and subsequently diverted to either France or Italy. It has been impossible to be certain that all of the reimbursing credits have been properly allocated to this group of food purchases.

Table 10 (page 22) summarizes the food purchases of the Allied countries, as shown by the allocation of United States Treasury credits for this purpose. The estimated tonnage figures are based on the relation of the shipments to these countries, as shown by official export figures for

<sup>1</sup> For a discussion of the efforts made to stimulate pork production in the United States to supplement the Allied supply of meats and fats and of the difficulties encountered in carrying out this program, see F. M. Surface, *American Pork Production in the World War*.

\* Values based upon records in the United States Treasury, with tonnage allocated according to record of food exports to these countries during the war period.

the war and immediate post-war period. Table 10 includes the cereal and sugar purchases already set forth in Tables 8 and 9.

According to these figures, the total exports of foodstuffs to the Allied Governments paid for through United States Treasury credits amounted to more than 23,000,000 metric tons, with a total value of \$3,050,496,599.23. Even this enormous total does not represent all the foodstuffs sold to these countries from the United States. As pointed out in an earlier paragraph,

large purchases were made, particularly in the early part of 1917 and after the Armistice, with credits other than those provided by the United States Treasury. No effort has been made to include these here.

The purchases credited to Belgium are only relatively minor purchases made by the Belgian Government in 1919 after the Commission for Relief in Belgium had begun to close its operations. The C.R.B. purchases are treated elsewhere in this volume. (See pages 12-14.)

## ARMISTICE PERIOD—DIRECTOR GENERAL OF RELIEF

NOVEMBER, 1918, TO SEPTEMBER, 1919

The terrible suffering which the peoples of Central and Southern Europe were undergoing because of military requisitions and the ebb and flow of belligerent armies was well known in official circles long before the close of the war. For example, the suffering of the Polish people became intense within a few months after the beginning of the war. Sections of Congress Poland near the German frontier and a large portion of the eastern half of Austrian Poland were the scene of destructive military operations in 1914. In 1915 came the great German-Austrian drive and the retreat of the Russians, who systematically destroyed everything that would be of use to the Germans. By the end of 1915 practically all of the present Poland was cut off from Russia and because of the destruction of crops and factories was in great distress.

Through the dense curtain of war-time censorship there gradually filtered some inkling of this suffering. These reports came to the ears of Mr. Hoover in connection with his relief work in Belgium. The Relief Commission had its hands full in caring for the total population of Belgium and Northern France, but such impassioned appeals could not be ignored. Mr. Hoover had a special investigation of Polish conditions made and attempted to get the belligerents to agree to the organization of some form of relief similar to that in Belgium. In spite of repeated attempts, the belligerents could never be brought to agree to any terms by which relief could be carried on. The Poles suffered all that Belgium would have experienced without the Relief Commission, and it was impossible to offer any outside help.

Nor was Poland the only country which experienced these distressing effects of war. Someone has spoken of "the rivalry in martyrdom of Belgium, Poland, Serbia, and Armenia." Besides these, various classes within the combatant countries such as Roumania, Bulgaria, Russia, as well as the Czechs, the Hungarians, and the Jugoslavs suffered equally or at best in but slightly less degree.

When the Armistice came and the curtain

was lifted on this great territory of Eastern and Southern Europe, there was displayed to an astonished world a population of some 200,000,000 people on the verge of starvation. Besides the task of relieving these people, the relief of the 10,000,000 people of Belgium and Northern France seemed mere child's play.

There was no chance that these peoples could help themselves or could by their own efforts improve their condition before the next harvest. If help in vast amounts was not immediately forthcoming, it seemed as if fifty per cent or more of this great population must perish before the next spring. No catastrophe of such great proportions had faced the Western World since the Thirty Years' War, three centuries before.

The problem of succoring this large population was far too big for public charity, too big even for any one government; it must of necessity be a responsibility upon the Allied and Associated Governments.

These facts were recognized by the officials of the United States and of the Allied countries long before the Armistice, although the full extent of the enormous suffering and need did not become apparent until later. Even as early as October, 1918, the Allied and Associated Powers were discussing the terms of a possible armistice and in this connection were drafting various recommendations to deal with food relief to these countries. Cables from Mr. Hoover's representatives began to tell of the arrangements which the Allies wanted to make by which all such relief supplies would be handled through the already existing Allied food agencies. Mr. Hoover consistently opposed this method, and his reasons are clearly stated in his many letters and cables at this time. Thus the following extract from his cable, November 7, 1918, to Joseph C. Cotton, the Food Administration's representative in London, is typical:

For your general advice this government will not agree to any program that even looks like Inter-Allied control of our economic resources after peace. After peace, over one-half of the whole export food supplies of the world will come from the United States and for

the buyers of these supplies to sit in majority in dictation to us as to prices and distribution is wholly inconceivable. The same applies to raw materials. Our only hope of securing justice in distribution, proper appreciation abroad of the effort we make to assist foreign nations, and proper return for the service that we will perform will revolve around complete independence of commitment to joint action on our part.

Again on November 11, 1918, the day of the Armistice, Mr. Hoover wrote President Wilson setting forth his views in somewhat greater detail. This letter was as follows:

I enclose herewith two cables which I would be grateful if you could find time to peruse.

The first, with regard to our entering into a joint Inter-Allied pool for the purpose of distributing all of the world's wheat until the middle of 1920 fills me with complete horror. Of all of the import wheat in the world, seventy per cent must come from the Western Hemisphere and I assume that we would be called upon to finance it and to place the distribution of it in the hands of a body that we could not control.

I can see no objective in such a plan, as I believe there is sufficient wheat for the world to get through with, unless it is the intention to use this control of the prime necessity of life to dominate other measures in the world.

As to the second telegram on the subject of arrangements which the English may set up in London for provisioning the world with our foodstuffs and on our credit, I have a similar reaction.

Both of these telegrams bring me to express to you the urgency of a definition of our principles in these matters, to be conveyed to the Allied Governments in order that I and the other agents of the government in Europe may be able to act in entire unison with your own views.

If I might make a suggestion in this direction, it would be on the line that we consider ourselves as trustees of our surplus production of all kinds for the benefit of the most necessitous and the most deserving. We feel that we must ourselves execute this trusteeship; that we are not unmindful of the obligation which we have to the sustenance of those who have fought with us against Germany and that, together with the necessities of those populations released from the German yoke, we feel that they may well deserve a priority in our distribution. On the other hand, we cannot undertake any co-operative arrangements that look to the control of our exports after peace and furthermore—and equally important—that the Inter-Allied councils hitherto set up in Europe were entirely for the purpose of guiding Inter-Allied relations during the period of the war and that any extension of their functions either by way of their control of our relations to other nations or the extension of their present functions beyond peace, cannot be entertained by us; that all relationship involving the use of American food or credit for the people of other nations than the Allies themselves must await Mr. Hoover's arrival in Europe,

so far as any such supplies or interest of the United States is concerned.

I believe that the settlement of this question requires some specific statement from you.

Yours faithfully,

As indicated in the letter above, arrangements had already been made for Mr. Hoover to go to Europe immediately after the Armistice to direct the work of the United States in the matter of relief to these countries. These and certain other arrangements were definitely authorized in a memorandum approved by the President on November 12, 1918. This memorandum was as follows:

MEMORANDUM OF ARRANGEMENTS WITH REGARD TO  
PROVISIONING THE POPULATIONS WHICH ARE NOW  
OR HAVE BEEN UNDER THE DOMINATION OF THE  
CENTRAL EMPIRES.

1. Mr. Hoover, as United States Food Administrator, will proceed at once to Europe to determine what action is required from the United States and what extensions of the Food Administration organization or otherwise are necessary in order to carry out the work of the participation of the United States Government in this matter, and to take such steps as are necessary in temporary relief.

2. In order to expedite the movement of foodstuffs toward Europe, the War Department will undertake to purchase, in the usual co-ordination through the Food Administration during the next twenty days, 120,000 tons of flour and from 30,000,000 to 40,000,000 pounds of pork products. These foodstuffs to be shipped by the diversion of Army tonnage at the earliest possible moment that the Shipping Board arranges and to be consigned to French ports for re-consignment or storage.

3. This foodstuff and any other suitable surplus supplies of the Quartermaster in Europe to be made available for distribution at Mr. Hoover's direction, it being understood that if it proves infeasible to re-ship or re-direct the steamers to the territories lately held by the Central Empires, Mr. Hoover will make arrangements for the resale of the foodstuffs to the Allied Governments or, alternatively, to the Belgian Relief.

4. In order to facilitate administration in Washington, Mr. Hoover will set up a preliminary committee to assist the Food Administration, comprising: Mr. Theodore Whitmarsh, of the Food Administration, who will act as Chairman in Mr. Hoover's absence; Mr. F. S. Snyder, of the Meat Division of the Food Administration; Mr. Julius H. Barnes, of the Cereal Division of the Food Administration; General R. E. Wood, Quartermaster General, representing the War Department; Mr. John Beaver White, representing the War Trade Board; Mr. Prentiss N. Gray, representing the Shipping Board. These gentlemen to take in hand the general directions of these operations through the various government agencies concerned.

5. The War Department is to purchase, inspect, pay for, load, and ship these foodstuffs in the usual manner of transmission of Quartermaster's supplies, and upon transfer from the Quartermaster's Department in Europe they are to be paid for by the buyer.

6. The American representatives in Europe are to be at once instructed by cable that the whole of the matter of the American food supplies and the establishment of a more permanent organization are to be settled by Mr. Hoover on his arrival in Europe and that the United States will take no participation in any arrangements made pending that time.

### INTER-ALLIED RELIEF ORGANIZATION

Under these arrangements, Mr. Hoover sailed for Europe on November 18, 1918, only seven days after the signing of the Armistice. Before leaving he had made arrangements as indicated by the memorandum above for the shipment of about 140,000 tons of foodstuffs, to be transported and financed by the War Department and, in addition, he had also arranged for the Food Administration Grain Corporation to ship and finance up to the time of its sale a further amount of some 120,000 tons. Thus arrangements were made for something more than 250,000 tons of American foodstuffs to be shipped immediately to European ports. This food was to form the nucleus of American relief and was to be available for delivery as quickly as plans for this work could be perfected. The wisdom of shipping these advance supplies was amply demonstrated in the strenuous months which followed. Without these readily available supplies, the suffering in these countries would have been vastly greater during the early months of 1919. Yet it is necessary to remember that it took a high degree of courage and foresight to arrange for the advance shipment of these vast supplies costing many millions of dollars. It was many weeks before any methods were devised by which these supplies could finally be financed and in the meantime there was much uncertainty as to the course events might take.

It was no easy task that confronted Mr. Hoover on this trip to Europe. In the first place, it was necessary to effect some agreement with the Allies which would be acceptable to the United States. Mr. Hoover was determined that we should enter into no arrangements by which we should lose control of supplies which had to come from and be financed by the United States. On the other hand, the relief of Europe

had to be handled as a joint responsibility of the Allied and Associated Governments. This was necessary, first, because the task was too large to be undertaken by any one government and, second, because of the many political and economic questions such as blockade, finance, transportation, etc., which could only be solved by international co-operation.

In the second place, Mr. Hoover's task involved finding methods of financing and transporting these enormous quantities of food. The newly liberated countries had no funds which could be used to purchase these supplies, and for the most part they had no liquid assets which could be used. Congress at that time had made no appropriation which could be used in furnishing this food on credit. Even if financial arrangements were completed, there still remained the difficulty of securing shipping for overseas transportation and the even greater difficulty of securing internal distribution within the countries of Europe. The war had reduced the world's available shipping far below the normal needs, and tonnage was extremely difficult to charter while rail transportation throughout Europe was almost completely disorganized.

Mr. Hoover's first task was to secure some form of Inter-Allied co-operation so that the necessary organization for relief could be set up. Following Mr. Hoover's views and at his instance, President Wilson directed Colonel E. M. House, who was then in Europe, to present a memorandum from him to the Allied Governments. This memorandum dated December 1, 1918, was as follows:

The President has requested me to communicate to you for the consideration of your government the following memorandum containing his views respecting the general question of furnishing relief to the civilian population of the European countries affected by the war:

I have given much thought to the formulation of the most practicable means of carrying into effect the resolution presented by Colonel House at the last meeting of the Supreme War Council at Versailles to the effect that the Supreme War Council in a spirit of humanity desired to co-operate in making available, as far as possible, supplies necessary for the relief of the civilian populations of the European countries affected by the war.

In considering this matter I have had constantly in mind the urgent necessity of the case and the fact that it is essential in the working out of relief of this character on a large scale, that there be a unity of direction similar in character to that which has proved so

successful under French and British Chief Command in the operations of the Allies on the land and on sea respectively. I suggest that the Supreme War Council proceed along the following lines:

In order to secure effective administration there should be created a Director General of Relief whose field of activities will cover not only enemy populations but also the whole of the populations liberated from enemy yoke and the neutrals contiguous to these territories.

It is obvious that present Inter-Allied administrative arrangements cover the Allied countries themselves and if the whole of the world's food supplies could be made available through sufficient shipping, there appears to be sufficiency to take effective care of these other populations provided that these supplies are administered with care, with economy, and with single direction.

The one essential to this plan in order that all world supplies may be brought into play is that enemy tonnage shall be brought into service at the earliest possible moment. It would appear to me entirely just that the enemy shipping in consideration of relief of enemy territory should be placed in the general food service of all the populations released from the enemy yoke as well as enemy territory.

I have carefully considered the suggestion made by Mr. Balfour to the Supreme War Council at the time the terms of armistice to be offered the enemy were under discussion to the effect that the enemy should be required to place under the operation and control of the Allied Maritime Transport Council the enemy mercantile fleet in enemy and neutral ports. It appears to me that in practice there would be many embarrassments presented by this plan, and that the principle should be maintained that this fleet be used as to its carrying capacity for purposes of relief and be under the direction of the Director General of Relief. In order to secure its adequate operation, the Director General should assign appropriate portions of this tonnage, first for operations individually by Italy, France, and Belgium sufficient to transport the relief to actually liberated nationals of these nations. The administration of relief in the three above instances would then naturally fall entirely under the three governments mentioned, and would not further interest the Director General of Relief. Second: the remainder of enemy cargo tonnage or such part of it as is necessary should be placed under the operation of the British Ministry of Shipping and the United States Shipping Board in equal portions. These two institutions agreeing with the Director General of Relief to deliver a quantity of cargo equal to the carrying capacity of these two fleets from such sources to such destinations as the Director General of Relief may direct in supplying the balance of population to be relieved. Third: the passenger tonnage or so much of it as may be required by the United States Shipping Board should be assigned to them, they giving the equivalent cargo capacity delivery to the Director General of Relief. Under this plan it does not follow that enemy shipping would be employed directly in the transporta-

tion of this cargo but that equivalent cargo should be delivered. This plan enables the use of enemy passenger tonnage in the transportation of the United States Armies homeward. This arrangement would in effect add materially to the volume of the world's shipping and release tonnage for the particular purposes of the individual countries.

In the operations of the Director General of Relief, he would, of course, purchase and sell foodstuffs to enemy populations and therefore not require financial assistance in this particular further than working capital. In the relief of newly liberated peoples such as Belgium, Poland, Servia (including Yugoslavia) and Bohemia, it will no doubt be necessary to provide temporary advances from the Associated Governments to these recuperating nationalities with which they can purchase supplies from the Director General, such arrangements to be worked out by the Associated Treasuries. In some cases public charity may have to be mobilized.

In the Director General's dealings with neutrals they of course would provide their own shipping and financial resources and probably some tonnage and food, either directly or indirectly for the purposes of the Director General, they acting under his direction and authorization as to supplies and sources thereof. The Director General, of course, acting in these matters in co-operation with the blockade authorities of the Allies and the United States.

In order to prevent profiteering the Director General must make his purchases directly from the respective Food Administrations of the Associated Governments where his supplies arise from their territories and where purchasing in neutral markets he should act in co-operation with the established Inter-Allied agencies.

It is evident that after the Allies have supplied themselves from their own territories at home and abroad and the balance from other sources, the only effective source of surplus supplies available for relief lies to a minor extent in the Argentine but to a vast preponderance in the United States. The Director General will have a large command of American resources and markets and will require the undivided support of the American people in saving and productive activities.

Owing to the political necessity of American control over American resources and the greater co-ordination and efficiency to be obtained thereby, I am sure that you will agree with me that the Office of Director General of Relief must be held initially by the United States Food Administrator and in case of necessity by such a successor as may be nominated by me. I would suggest, however, that the policies of the Director General should be determined by the Supreme War Council, to whom he should report, it being our united policies in these matters not only to save life but also to stabilize governments.

All these arrangements to be for the period of emergency and it is highly desirable for them to be liquidated as fast as practicable.

I shall be grateful to you if you will advise me as

soon as practicable the views of the British Government concerning this matter.

Faithfully yours,

(Signed) E. M. HOUSE

This proposal did not meet with the immediate approval of the Allied Governments. It was their point of view that the Central Powers were a common foe and that all the resources of the Allied and Associated Governments should be pooled. They wished first of all to use their already existing and functioning Inter-Allied agencies as those through which the relief should be handled. From their point of view, such a desire was not unreasonable. Here were agencies already organized and working smoothly and handling many millions of dollars' worth of supplies. It would be a simple matter for these to expand their scope of operations sufficiently to take care of this additional work. Why should it be necessary to set up new agencies with the additional expense and the confusion which would result, as they argued? Furthermore, in place of centralizing the direction of the relief work in the hands of a Director General of Relief, they proposed the establishment of an Inter-Allied Board consisting of two members from each of the four Associated Governments.

Under the leadership of Mr. Hoover these proposals were strongly opposed by the American representatives. The chief reasons for this opposition have been set forth in the letters and memoranda quoted above. Mr. Hoover felt that the only hope of accomplishing the difficult tasks ahead would be to have the executive power centralized in a single hand. This, of course, is only the elementary essential of executive efficiency. A board or commission is always inefficient in executive control, although useful in advisory or semi-judicial capacities. Here was a task that required prompt executive action and no doubt frequent changes in policy as the work developed. Such action could never be obtained from an international board of eight men.

Furthermore, the United States did not propose to enter any organization in which the distribution of its supplies and finances could be determined by a majority vote of representatives of foreign countries.

Mr. Hoover arrived in London at the end of November, 1918. Three weeks were spent in

fruitless endeavor to come to some agreement with the Allied Governments. They were insistent that their views be accepted and Mr. Hoover was just as obstinate in his contention for the rights of the United States. Finally, near the middle of December, Mr. Hoover moved his office to Paris and established his headquarters in the Hotel Crillon in connection with the American Commission to Negotiate Peace.

In the meantime, while carrying on these negotiations with the Allies, Mr. Hoover had not been idle in other directions. With a small group of trained associates chosen largely from the Belgian Relief he had begun immediately an investigation of the actual food conditions in the newly liberated territories. Missions had been sent to Poland, Czechoslovakia, Austria, Yugoslavia, Roumania, and other countries. Preliminary reports from some of these missions began to come in about the middle of December and they revealed a situation so serious, so much worse than had been realized, that it called for some immediate action. With men, women, and children actually starving, there was no longer time to argue with foreign diplomats as to the best formula for relief. What was needed was the actual movement of food toward these people and that Mr. Hoover decided to start without delay.

Accordingly on December 16, 1918, he addressed a memorandum to President Wilson, who was then in Paris, pointing out the serious condition of the people in Serbia and Austria and suggesting that the American Government take immediate and independent action to relieve this situation, but that they invite the Allies to join with them if they would. The President accepted this suggestion and on the same day directed Colonel House to address another letter to the Allied Governments. The text of this letter is as follows:

DEAR MR. BALFOUR:

The President requests me to say that the discussions of his proposal of December 1 submitted through me, for the creation of a European Relief Administration and the appointment of a Director General of Relief, have been reported to him. He entertains no doubt but that he will receive in due course from the Allied Governments a reply to that note, but it appears from the discussions that some time will be required to reconcile the differences of view involved in the undertaking.

The objects of the United States Government in connection with food supply—which concern only the

Armistice—are to save lives, to preserve order throughout the liberated, neutral, and enemy territories, and to create an efficient organization to accomplish these purposes. In these purposes he feels assured of your entire sympathy and co-operation.

Pending further discussions of the entire problem, however, the situation in certain areas is of so critical a nature, and requires such immediate emergency action, that he wishes me to inform you that he is instructing the United States Food Administration to take measures at once to furnish food supplies and to establish an organization to this end in certain places outside of Germany.

Taking it for granted that you will also be anxious to undertake immediate action in these matters through your various food departments and in order that there shall be full co-ordination in this task, he has asked Mr. Hoover to indicate to you these situations and points at which he proposes to establish representatives for the administration of relief measures, so that if you see fit, you may also send your representatives to these points and these gentlemen may mutually co-ordinate their various efforts.

Mr. Hoover proceeded at once to put these arrangements into operation. On December 11 he sent a representative to Germany, and on December 20, 1918, a mission in charge of Colonel W. G. Atwood of the United States Army was dispatched to Belgrade to set up relations with the Serbian Government and to make arrangements for the delivery of food supplies which were then on passage from the United States. Spurred on by this concrete example of activity the British and French decided to join forces in this operation and each sent representatives to Belgrade to co-operate with Colonel Atwood. A similar mission under Captain T. T. C. Gregory and with similar Allied co-operation was dispatched to Vienna, and another under Dr. Vernon Kellogg and Colonel W. R. Grove to Warsaw.

These activities inaugurated by Mr. Hoover, as well as the concrete reports on the terrible condition in Central and Southern Europe which began to come in from all sides, materially hastened the negotiations with the Allies for the establishment of the necessary relief machinery. Thus, on December 31, 1918, the four Associated Governments agreed upon the establishment of a Supreme Council of Supply and Relief, to which each government was to appoint two delegates.

Although the relief situation was serious and urgent, it proved impossible to arrange the first meeting of this Supreme Council before Janu-

ary 11, 1919. At this meeting, which was held in Paris, Mr. Hoover was made Director General of Relief in Europe. The Supreme Council of Supply and Relief was established for the purpose of investigating the relief requirements of Europe, their relation to the general supply of the Allied and neutral countries, to determine the general policies and measures which should be carried out, and to co-ordinate the relief efforts of the several governments. The Council decided at its first meeting that these objects could best be carried out by a permanent committee, which was established.

This Permanent Committee of the Supreme Council of Supply and Relief held its first meeting on January 19, 1919, under the chairmanship of Mr. Hoover. This committee continued to meet until February 24, 1919, having held a total of twelve meetings. By this time it had become clear that the question of relief to Europe was too complicated to be handled by an isolated body with only the meager powers accorded to the Supreme Council of Supply and Relief. The question of relief was not alone one of allotting food to needy nations. It involved questions of finance, shipping, inland transportation, blockade, and many other problems, all of which must be closely co-ordinated.

#### SUPREME ECONOMIC COUNCIL

In the early part of February, 1919, the Supreme War Council had, at the request of the American representatives, set up a body known as the Supreme Economic Council. This latter organization was authorized to have final supervision over all economic activities of the Allied and Associated Governments in connection with the Armistice. Its decisions were final, subject only to review by the Supreme War Council itself.

The Supreme Economic Council was directed to absorb whatever Inter-Allied organizations and whatever powers of such organizations it might deem necessary and also to establish new organizations under it whenever such action seemed essential to the accomplishments of its purposes.

At the first meeting of the Supreme Economic Council, held on February 24, 1919, it was voted to establish under itself Sections on Finance, Blockade, Communications, Raw Materials, Food, and Maritime Transport. The work of

the Permanent Committee of the Supreme Council of Supply and Relief was absorbed, and this body now became the Food Section of the Supreme Economic Council. The functions of the Inter-Allied Food Council were also assumed by the Food Section. The first meeting of the Food Section was held on February 27, 1918, and it continued to meet weekly or bi-weekly under the chairmanship of Mr. Hoover until the early part of August, 1919, at which time the Supreme Economic Council was dissolved.

The co-ordination of efforts accomplished under the Supreme Economic Council very materially aided the relief work and made possible many things which had previously been impossible, or at most, possible only with great difficulty.

The personnel of the Food Section changed from time to time but the following persons represented their respective governments either throughout the period or at various times.

Director General of Relief and Chairman  
of the Food Section: Herbert Hoover

American Representatives: Robert A. Taft,  
Colonel James A. Logan, Jr.

British Representatives: Sir John Beale,  
Sir William Goode, E. F. Wise

French Representatives: M. J. May, Jean  
Monnet, Major R. Fillioux, J. M. Carpentier

Italian Representatives: Professor Attolico,  
Count Zucchini, Captain Caetani

Belgian Representative: Baron de Cartier  
de Marchienne

At the meetings of the Food Section as well as those of its predecessor, the Permanent Committee, all matters pertaining to relief needs or requests, relief programs, deliveries, and reports from missions were presented, discussed, and acted upon. Through the Supreme Economic Council, questions involving financial relation, transportation, blockade, etc., were referred to their respective sections, where it was possible to secure prompt consideration.

#### ORGANIZATION OF THE WORK OF THE DIRECTOR GENERAL OF RELIEF

Almost immediately after his arrival in Europe, Mr. Hoover dispatched missions to various sections of Europe to study at first-hand their

needs and requirements. In December, 1918, Dr. Alonzo E. Taylor headed a mission to Vienna and various parts of the old Austro-Hungarian Empire as well as to a portion of the Balkan States. At the same time Dr. Vernon Kellogg headed a mission to Poland. Preliminary reports from these expeditions were received by the middle of December and showed the alarming shortage of food supplies of all kinds in many parts of these countries. Drs. Taylor and Kellogg returned to Paris early in January and their reports formed the first basis for relief programs to these countries.

The next step was to establish resident missions in each country which should have charge of receiving the relief shipments and, in co-operation with the authorities of that country, to see that these were distributed to the people who were most in need. The further duty of these missions was, of course, to study the changing food situation within each of these countries and to keep the Director General of Relief informed as to the immediate and probable future needs.

With the establishment of Inter-Allied co-operation in the relief work these missions at the more important points were composed of representatives of the several governments. Each government through its representative was responsible for receiving and accounting for its own supplies. All programs were co-ordinated through the Food Section in Paris. Each government made its own financial arrangements as to payment or obligations received for their relief deliveries, although these were co-ordinated and approved by the Finance Section of the Supreme Economic Council.

#### COUNTRIES IN NEED OF RELIEF

At the time of the Armistice it was known that Poland, Serbia, and many sections of the old Austro-Hungarian Empire were in dire need of food and other relief. These countries had in many instances been the battleground for contending armies or these armies had swept through their territories en route to the several battle fronts. Native food supplies had been requisitioned by the military authorities even to the last obtainable pound. There was no way in which these people could increase their native food supply before the next harvest, some nine months away. The breakdown in internal

transportation made it impossible to move any surpluses which might be in one part of a country to another part where they were so badly needed. In general, the peasants had succeeded in secreting a fair supply of food from the authorities sufficient for their own use for some months, but in the industrial districts the suffering was most acute.

The upheaval in Europe after more than four years of war had resulted in the birth of many new nations. These new governments were necessarily feeble and without financial resources. If they were to succeed in maintaining order within their territories it was imperative that their people should be fed. However, the new national boundaries with their new military and customs barriers supported by the age-old racial hatreds between the different peoples of Eastern Europe presented a serious obstacle to the interchange of food, raw material, or manufactured products.

The Allied nations were on record as supporting the development of these new nationalities along lines to be determined by the peoples of those territories. If these new governments were to succeed, their people must be fed and enabled to get to work. If this were not done revolution and Bolshevism were threatened throughout this territory, with the possibility that it might spread over the rest of Europe, including the Allies themselves. There were, therefore, many urgent political, as well as humanitarian, reasons why relief should be given to these countries.

The rigid censorship of the war had prevented any intimate knowledge of the extent of the needs of these countries reaching the Allied or Associated Powers. As pointed out above, one of Mr. Hoover's first acts after his arrival in Europe late in November, 1918, was to dispatch missions to Poland, Vienna, and Serbia to determine the extent of their needs. The reports of these missions revealed situations much more serious and distressing than had hitherto been recognized. Mr. Hoover took immediate steps to get relief supplies moving toward these countries. At the same time he extended his investigation of the needs of Europe by sending other missions to the new Baltic countries, to Germany, to Yugoslavia, and to the several Balkan countries. Reports were received from still other countries, such as Finland, Armenia,

and various sections of Russia, showing urgent need for help.

Gradually as these reports came in and the extent of the needs in different countries were realized, monthly programs of the requirements to each country were prepared.

In addition to the so-called liberated countries, which included Belgium and the invaded regions of Northern France, it was found that certain neutrals and even Allied countries were in need of assistance in securing food supplies for their people. Also the enemy countries, particularly Austria and Germany, were in almost if not quite as serious need of food relief as any of the liberated countries. It was not without a long struggle that the Allies consented to allowing these enemy countries to secure additional food, but if this had not been done they would undoubtedly have been overrun by Bolshevism and the peace of all Europe would have been threatened.

Altogether more than twenty different countries of Europe were furnished food supplies under the direction of the Director General of Relief. These countries, as shown in Table 11, comprised an area of some 1,400,000 square miles, an area nearly half the size of continental United States, and with a total population of more than 200,000,000 people. The countries and territories included in this relief area are shown on the endsheet map.

Naturally not the whole of the 230 million people in these countries were suffering for food, yet it is safe to say that few of the 100 million people included within the liberated countries could have gone until the next harvest without great privation, and the same is true of the populations of Austria and Germany. Certainly more than one hundred and fifty million people were in real need of relief and if that relief had not been forthcoming many millions would have died of actual starvation.

## RELIEF PROGRAMS

Obviously one of the first things that had to be done in planning the relief work was to make out programs for each country based both on the needs of the country and on the finances that could be secured to carry it through. The first programs were of a tentative nature, based on incomplete reports of conditions within the

countries. Gradually these monthly programs were modified as the conditions for each country became better known, but at all times these programs remained essentially tentative, and

TABLE 11

AREA AND POPULATION OF COUNTRIES REQUIRING ASSISTANCE FROM THE DIRECTOR GENERAL OF RELIEF IN 1919

Liberated Countries	Area, Square Miles	Population
Poland .....	149,220	27,179,000
Lithuania .....	20,390	2,011,000

<b>Total .....</b>	<b>661,633</b>	<b>87,744,000</b>
Enemy Countries	Area, Square Miles	Population
Germany .....	182,264	59,856,000
Austria .....	32,395	6,423,000
Hungary .....	35,832	7,951,000
Bulgaria .....	39,825	4,861,000
Turkey .....	282,144	14,549,000
<b>Total .....</b>	<b>572,460</b>	<b>93,640,000</b>
Neutral and Allied Countries	Area, Square Miles	Population
Italy .....	119,991	38,835,000
Holland .....	13,205	6,977,000
Denmark .....	17,149	3,290,000
<b>Total .....</b>	<b>150,345</b>	<b>49,102,000</b>
<b>Grand total .....</b>	<b>1,384,438</b>	<b>230,486,000</b>

new developments within a given country required frequent shifts of program and often the re-allotment of cargoes en route so that the points of most serious suffering should receive relief.

The first comprehensive although tentative relief program was prepared by Mr. Hoover and submitted to the Supreme Council of Supply and Relief about February 1, 1919. This program was as follows:

TABLE 12

PRELIMINARY RELIEF PROGRAM—ARMISTICE PERIOD, 1919

Country	Monthly Requirements	
	Tons of Food	Estimated Cost
<i>Liberated countries</i>		
Poland .....	60,000	\$13,000,000
Czechoslovakia .....	55,000	12,000,000
Roumania .....	35,000	7,500,000
Jugoslavia .....	35,000	8,000,000
Armenia .....	20,000	5,000,000
<i>Enemy countries</i>		
Austria .....	40,000	12,000,000
Hungary .....	4,000	2,000,000
Turkey .....	10,000	2,500,000
<b>Total .....</b>	<b>259,000</b>	<b>\$62,000,000</b>

Something of the magnitude of the relief task can be gathered from these early figures, which indicated a monthly requirement of 259,000 tons of food at an estimated cost of \$62,000,000. This program alone would require upward of fifty shiploads of supplies each month, and if it were continued until the next harvest its total cost would be in the neighborhood of \$400,000,000.

Yet, as was found out later, this program was by no means complete. It contained no provision for the Baltic countries, which later were found to be in such dire distress. It contained no provision for Germany, which at this time was not permitted to secure outside supplies. It did not contain provision for Belgium and Northern France, which were being cared for by the Commission for the Relief of Belgium.

In making up the programs and estimating the requirements for these countries, four principal groups of staple food commodities were considered, viz: (1) Breadstuffs, consisting chiefly of wheat and cereal flour, and wheat and rye grain; (2) Peas, beans, and rice; (3) Milk, consisting of both evaporated and condensed milk, and (4) Fats, including pork products (meats), lard, lard substitute, and other vegetable oils. Other commodities were delivered in small amounts in some cases to meet special demands. In general the relief countries possessed sufficient supplies of vegetables with which to supplement the above-mentioned staples.

Of the foregoing commodities, breadstuffs were by far the most important and constituted more than three-fourths of the total tonnage delivered. Peas, beans, and rice were delivered

\* The programs for Belgium and Northern France date from December, 1918. The programs given here for February include the three months, December, January, and February.

largely as substitutes for other and more expensive commodities. Owing to the decrease in the number of dairy cows and the decreased production of those remaining, there were many places in Europe where absolutely no milk could be obtained. Preserved milk, particularly for children and invalids, was therefore a very important commodity, although in number of tons delivered it amounted to less than any of the other principal groups.

The shortage of fats throughout Europe had made itself evident in many diseases which follow a fat-deficient diet. It was very important that a large quantity of fat-containing food should be delivered to remedy this deficiency. Fortunately, the United States possessed a large supply of pork products created under stimulation of the war demand and which the Allies no longer wanted. These supplies proved to be

a godsend to these famished people, and their disposal in this way relieved a serious oversupply of a perishable product in the hands of American farmers.<sup>1</sup>

Relief programs for each country (Table 13) were calculated from reports sent in by special and permanent missions in these countries. These reports covered, as far as possible, estimates of production, available stocks of food, population in need of relief, as well as general economic conditions. Naturally the disorganization of the war had upset all statistical activities within these territories so that no reliable estimates of production and supplies could be furnished by these governments. The relief missions were therefore forced to make many estimates themselves. These had to be regarded as

<sup>1</sup> For a detailed discussion of this subject see F. M. Surface, *American Pork Production in the World War*.

tentative and were revised at frequent intervals as experience showed the need. Tentative relief programs were based on these early estimates and their adequacy tested by the cut-and-try method. It frequently happened that the estimates for a given country proved to be too low and the missions reported that supplies were not adequate to meet the urgent needs. Whenever these requirements were sufficiently urgent, vessels on passage for other countries were re-allocated to the one most in need. In some instances, the estimated requirements were too high and later deliveries were cut down below the original estimate. Table 13 gives the monthly relief programs for each country as they were originally made out for the shipment of overseas supplies. These programs served as a basis for the ordering of supplies which had to be done from a month to six weeks in advance of the date of delivery.

#### RELIEF FINANCES

Not the least of the many difficult tasks which faced Mr. Hoover as Director General of Relief was that of finding means by which these much-needed food supplies could be financed. The situation as it appeared after the Armistice was as follows: The Allied countries were already receiving advances from the United States Treasury to cover their food and other purchases in the United States. It was anticipated that these would be continued for a time at least. The neutral countries had been much restricted in their food purchases both because of the world shortage under war conditions and also in order to prevent supplies leaking through to the enemy. It was assumed that their rations under the blockade would be increased. They had sufficient funds to pay cash for their purchases but they might need some help in securing supplies and shipping. The newly liberated countries were almost totally without available financial assets. On the whole, they were in greater need than any of the other countries but some means would have to be found by which supplies could be furnished to them on credit. The enemy countries would be in great need of food before the next harvest, but with the exception of Austria they had sufficient tangible assets which could be used to pay for their requirements.

The immediate and urgent problem was to

find some means of financing deliveries to the liberated countries and to Austria. Shortly after the Armistice, and at Mr. Hoover's request, a bill had been introduced in the United States Congress appropriating \$100,000,000 for relief to the liberated countries, but specifically excluding all ex-enemy countries. This, like most legislation, pursued a leisurely course through Congress and did not become a law until February 25, 1919. In the meantime, men, women, and children were starving, and something had to be done. Mr. Hoover's first move was to ask for and receive an allotment of \$5,000,000 from the President's National Security and Defense Fund. Although relatively insignificant compared with the total needs, this furnished a nucleus for the relief. He next took up with President Wilson the possibility of granting United States Treasury loans to certain of the liberated countries which were technically Allies and would thus come under the war powers by which Congress had authorized the President to make loans to the Allies (Acts of April 24, 1917; September 24, 1917; April 4, 1918; and July 9, 1918). Under these powers relief loans were made to Czechoslovakia, Roumania, and Yugoslavia (Kingdom of the Serbs, Croats, and Slovenes). Before the end of the operations these loans totaled upward of \$87,000,000.

Methods of financing relief to Austria offered a serious obstacle. Austria was technically an enemy country and, hence, the United States could neither give her a direct Treasury loan nor furnish supplies from the \$100,000,000 relief appropriation by Congress. Mr. Hoover tried to persuade the Allies to take care of the Austrian requirements, but this they were both unwilling and unable to do. This difficulty was finally overcome by a joint financial arrangement by which the United States advanced \$16,000,000 to each of the three Allies, Great Britain, France, and Italy, to be used in purchasing American food for Austria, the Allies in turn agreeing to furnish transportation and take Austrian obligations for the repayment of the total amounts.

In addition to the arrangements above, the relief of Belgium and Northern France was continued as during the war, largely through loans from the United States and Allied treasuries. Also through Mr. Hoover's efforts the United States Liquidation Commission (War Depart-

ment) sold large quantities of surplus army food and other commodities on credit to these countries.

Great Britain provided a relief credit of £12,500,000 (about \$59,500,000) which they used largely to supplement the deliveries made by the United States. Neither France nor Italy established definite relief credits, but from time to time they did furnish supplies or other assistance to certain groups and countries.

In addition to the foregoing operations which were on a credit basis, the Director General of Relief arranged the sale of large quantities of supplies for cash or on the basis of exchange of commodities, which was the equivalent of cash.<sup>1</sup>

In addition to the various sources of official relief provided through Treasury funds, the Director General of Relief undertook to co-ordinate the work of the various charitable organizations which were furnishing non-medical relief to the European countries. The co-operation thus effected was of very material help in providing certain kinds of relief which could not well be undertaken under the government operations. Thus, the feeding of German children by the American Friends Service Committee, the work of the Joint Distribution Committee for Jewish Relief, and other similar work supplemented that done by the governments and accomplished much greater good than would have been possible with each organization working independently.

Among the American charitable organizations thus co-operating with the Director General of Relief were the following: American Friends Service Committee; American Jewish Joint Distribution Committee; American Committee for Relief of the Near East; American Red Cross (non-medical relief), and, of course, the Commission for Relief in Belgium, part of which was supported by public charity. A number of British charitable societies also contributed to this work, including: Friends' Emergency Relief Committee in Vienna; Friends' War Victims Relief Committee in Poland; the British Red Cross; Lady Muriel Paget's Mission in Czechoslovakia; "Save the Children" Fund; Scottish Women's Hospitals; and the Vienna Emergency Relief Fund in London.

<sup>1</sup> For further discussion of the relief finances provided by each government see pages 142-44.

<sup>2</sup> See Appendix Tables 107 and 108.

## TOTAL DELIVERIES UNDER THE DIRECTION OF THE DIRECTOR GENERAL OF RELIEF<sup>2</sup>

As indicated in the preceding paragraphs Mr. Hoover, as Director General of Relief for the Allied and Associated Governments, was responsible not only for the official relief delivered from the United States but also for the co-ordination of the relief work of other governments and of many charitable organizations. During the nine months from the end of November, 1918, to the first of September, 1919, there were delivered under his direction a total of 4,178,447.7 metric tons of food and other relief, valued at \$1,101,486,783.34. Table 14 summarizes under four major categories these total deliveries, while Table 107 (Appendix) gives further details regarding these operations.

TABLE 14

TOTAL RELIEF DELIVERIES UNDER THE DIRECTION OF THE DIRECTOR GENERAL OF RELIEF, BY MAJOR OPERATIONS—ARMISTICE PERIOD, 1919\*

Major Operation	Total Metric Tons	Total Value
American Relief Administration . . . . .	1,684,456.6	\$ 363,211,835.48
Other American organizations . . . . .	1,058,770.9	462,622,804.46
Joint Allied Finance . . . . .	345,839.8	48,000,000.00
Countries other than United States . . . . .	1,139,042.6	238,783,036.92
Total . . . . .	4,228,109.9	\$1,112,617,676.86
Less duplications . . . . .	49,662.2	11,130,893.52
Grand total net deliveries . . . . .	4,178,447.7	\$1,101,486,783.34

\* See Table 107 for details.

The deliveries under each of these major operations are discussed in detail in the following pages. It may be pointed out here that the American Relief Administration was the official organization set up to handle in particular the relief furnished by the United States Government. Under "Other American Organizations" are included a number of charitable societies in so far as their work was directly co-ordinated with the Director General of Relief. It should be remembered that each of these organizations carried on a large amount of other work on their own responsibility which is not included

in the present report. Under this category are also included the relief deliveries from the United States Liquidation Commission (War Department) which while official in character was entirely separate from the work of the American Relief Administration.

Under Joint Allied Finance is included the relief to Austria for which the United States Treasury furnished the money but for which the three major Allies accepted the credit risk (cf. pages 59-60).

The duplications which are deducted to obtain the net total arise through deliveries from one organization to another. The most important duplication arises from the sale of certain supplies to the United Kingdom by the A.R.A. which were then delivered to Austria as part of the Joint Allied Finance (see page 60).

The supplies furnished under the direction of the Director General of Relief during the

Armistice Period<sup>1</sup> were delivered to 21 different countries of Europe. Table 15 summarizes the deliveries to each of these countries.

It will be noted that the largest deliveries to any country during the Armistice Period were those to Germany. These supplies were paid for by the transfer of German gold and other assets as explained elsewhere (cf. page 194). France also received a large volume of supplies which is accounted for largely through the transfer of material by the United States Liquidation Commission (cf. page 53). Poland, Czechoslovakia, Austria, and Yugoslavia were other countries receiving large quantities of relief. These deliveries will be discussed in more detail in connection with the separate operations.

#### THE AMERICAN RELIEF ADMINISTRATION

When Mr. Hoover went to Europe immediately after the Armistice, there was no organization in the United States through which the relief activities of this country could be handled. It is true that the Commission for Relief in Belgium had received official recognition as the agency through which United States Treasury loans to Belgium were being expended, but it is also true that similar recognition and official patronage had been extended to this Commission by Great Britain, France, and Belgium.

In the memorandum approved by President Wilson on November 12, 1918 (see pages 24-25), he had directed Mr. Hoover to determine "what extensions of the Food Administration organization or otherwise are necessary in order to carry out the work of the participation of the United States Government in this matter."

What was needed immediately was some organization which could purchase, ship, and finance food supplies up to the point of delivery to the relief countries. It still remained, of course, to arrange methods by which these countries could pay for the supplies thus delivered.

Before sailing for Europe, Mr. Hoover had already arranged for an initial service of purchasing, shipping, and financing of foodstuffs for relief by the United States Army as was

\* See Table 108 for further details.

<sup>1</sup> The Armistice Period was officially from November 11, 1918, to the signing of the Treaty of Versailles on June 28, 1919. However, it required until September, 1919, to complete the deliveries on commitment made prior to the first of July and, hence, this is regarded as the duration of the Armistice Period in this report.

provided in the memorandum of November 12, 1918, referred to above. This service was supplemented by arrangements for the Food Administration Grain Corporation also to purchase and transport an initial program for this work.

If there was to be an extension of the Food Administration organization to handle this work, the logical thing to do was to extend the operation of the Grain Corporation to include European transactions. The Food Administration Grain Corporation was a commercial organization incorporated by direction of the President under the laws of Delaware and with a capital, at this time, of \$150,000,000 from the United States Treasury as provided in the Food Control Act of August 10, 1917. The Grain Corporation had been established for the purpose of making effective the Congressional guaranty as to the price of wheat to American farmers.<sup>1</sup>

<sup>1</sup> For further discussion of this subject see F. M. Surface, *The Stabilization of the Price of Wheat during the War and Its Effect upon the Returns to the Producer*, United States Grain Corporation, Washington, D.C. (May, 1925) and *The Grain Trade during the World War*.

<sup>2</sup> Following is the text of the memorandum from Mr. Hoover to President Wilson which the latter approved:

"In order to adequately handle the problem of European food relief, it is necessary that we should establish stocks of food, particularly cereals and fats, at certain strategic ports, these stocks to be drawn upon for the supply of different countries from time to time. Such an arrangement enables us to maintain constant transporting and a regular drain of our food supplies from the United States. This arrangement, together with many political considerations involved, requires that the foodstuffs in transit and in storage at these bases should be in the name and possession of the United States Government. The War Department, with your approval, is now performing this function in respect to certain stocks in the Adriatic, but I assume that their action is only for the emergency, and beyond this it is necessary for us to establish further such stocks at points like Rotterdam, possibly at Gutenberg, and even at German ports as well. The United States Food Administration has the right to buy and sell foodstuffs as may be required in the common defense. The appropriation to the Food Administration for these purposes lies entirely in the Food Administration Grain Corporation, of which you are the sole stockholder. The directors of the Grain Corporation feel that, as a corporation, they should have your approval for extending their operations outside of United States territory.

"There is no reason either in the intention or in the purpose of the United States to maintain the common defense that does not warrant such action, and there is abundant actual reason why this action should be taken as a part of the necessity of the United States to maintain tranquillity in Europe while its armies are entangled here.

"It is not proposed to part with any of the foodstuffs thus belonging to the Grain Corporation without prior payment. There is, of course, some commercial risk in the matter, also there might be further outbreak of hostilities

This Corporation was engaged in buying and selling grain and flour, and thus possessed the commercial organization which could readily purchase and ship relief supplies. However, the Food Control Act, under which authority the Grain Corporation had been established, had not contemplated operations in foreign countries. There was some question as to whether the President had the authority to extend the operation of the Corporation to countries outside of the United States. After some consideration of this and possible alternatives, Mr. Hoover asked President Wilson to approve this extension of the scope of the Grain Corporation's activities, which he did on December 23, 1918.<sup>2</sup>

In the meantime, a bill had been introduced into Congress appropriating \$100,000,000 to be used for the relief of non-enemy countries of Europe, which became a law February 25, 1919.<sup>3</sup>

in Europe and some of our bases might be involved. This, however, I regard as a risk of war that cannot be avoided.

"I would, therefore, be glad to know if you will authorize the Grain Corporation to extend its operations to the extent of establishing these stocks and carrying them on the capital and credit which it possesses.

"Yours faithfully,

(Signed) "HERBERT HOOVER"

<sup>3</sup> Following is the text of this Act (Public, No. 274, 65th Congress):

"An Act Providing for the relief of such populations in Europe, and countries contiguous thereto, outside of Germany, German-Austria, Hungary, Bulgaria, and Turkey, as may be determined upon by the President as necessary.

"Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That for the participation by the Government of the United States in the furnishing of foodstuffs and other urgent supplies, and for the transportation, distribution, and administration thereof to such populations in Europe, and countries contiguous thereto, outside of Germany, German-Austria, Hungary, Bulgaria, and Turkey: Provided, however, That Armenians, Syrians, Greeks, and other Christian and Jewish populations of Asia Minor, now or formerly subjects of Turkey may be included within the populations to receive relief under this Act, as may be determined upon by the President from time to time as necessary, and for each and every purpose connected therewith, in the discretion of the President, there is appropriated out of any money in the Treasury not otherwise appropriated \$100,000,000, which may be used as a revolving fund until June thirtieth, nineteen hundred and nineteen, and which shall be audited in the same manner as other expenditures of the Government: Provided, That expenditures hereunder shall be reimbursed so far as possible by the Governments or subdivisions thereof or the peoples to whom relief is furnished: Provided further, That a report of the receipts, expenditures, and an itemized statement of such receipts and expenditures made under this appropriation shall be submitted to Congress not later than the first day of the next regular session: And provided further, That so far as said fund shall be expended for the purchase of wheat to be donated, preference shall be given to grain grown in the United States."

This act, besides appropriating money, also resulted in providing definite Congressional authority for the relief work, and thus permitted the President to authorize definitely the establishment of the American Relief Administration, and authorized the employment of the Grain Corporation as the commercial and fiscal agent of the Relief Administration. This the President did by issuing the following Executive Order on February 24,<sup>1</sup> 1919:

In pursuance of an Act entitled "An Act providing for the relief of such populations in Europe and countries contiguous thereto, outside of Germany, German-Austria, Hungary, Bulgaria and Turkey, as may be determined upon by the President as necessary," approved February 24, 1919, I hereby direct that the furnishing of foodstuffs and other urgent supplies, and the transportation, distributing, and administration thereof, provided for in said Act, shall be conducted under the direction of Herbert Hoover who is hereby appointed Director General of the American Relief Administration with full power to determine to which of the populations named in said Act the supplies shall be furnished and in what quantities, and further to arrange for reimbursement so far as possible as in said Act provided.

He is hereby authorized to establish the American Relief Administration for the purpose of carrying out the provisions of said Act and to employ such persons and incur such expenses as may be necessary for such purpose, to disburse all sums appropriated under the aforesaid Act or appoint a disbursing officer with that power; and particularly to employ the Food Administration Grain Corporation, organized under the provisions of the Food Control Act of August 10, 1917, as an agency for the purchase, transportation, and distribution of foodstuffs and supplies to the populations requiring relief.

He is hereby further authorized in the carrying out of the aforesaid Act of February twenty-fourth, 1919, to contract with the Food Administration Grain Corporation or any other person or corporation, that such person or corporation shall carry stocks of food in transit to Europe, and at points in Europe, in such quantities as may be agreed upon and as are required to meet relief needs, and that there shall be paid to such person or corporation in advance from the appropriation made in the aforesaid Act of February twenty-fourth, 1919, any sums which may be required for the purchase and transportation of foodstuffs and maintenance of stocks.

#### FOOD ADMINISTRATION GRAIN CORPORATION— LONDON OFFICE

In the meantime, under the authority of the memorandum of December 23, 1918, the Grain

Corporation had established an office in London and had built up stocks of food in foreign ports as well as having carried on a considerable amount of actual distribution of relief supplies.

The work accomplished by the American Relief Administration in 1919 would have been impossible had it not been able to call upon some going commercial organization like the Grain Corporation to carry on this phase of its work.

The London office of the Food Administration Grain Corporation was established at 12 Grosvenor Garden, London, early in January, 1919. Edward M. Flesh, who throughout the war had acted as second vice-president of the Grain Corporation in charge of the St. Louis office, was asked by Mr. Hoover to come to London and organize this work. The London office had complete charge of the movement of all American relief ships while in European waters. It also acted as fiscal agent for the American Relief Administration and, as such, established agencies in each of the important European ports used in the relief work. Through these agencies the London office kept accurate account of all relief arrivals, saw to it that all deliveries were properly receipted for and, finally, made all settlements with the foreign governments or others to which relief supplies were delivered.

The New York office of the Grain Corporation was the purchasing and shipping agency for the American Relief Administration, and for this purpose organized a special division called the Miscellaneous Commodities Division.

Briefly the method of operation was as follows: The American Relief Administration with headquarters in Paris outlined all relief programs. These were made out on the basis of reports to the Director General of Relief from the relief missions in the various countries, supplemented by information and reports from other sources. The programs were all cleared through the Supreme Council of Supply and Relief, and later the Food Section of the Supreme Economic Council which kept the American activities co-ordinated with those of the Allies and of other relief organizations. These programs were cabled to the New York office of the Food Administration Grain Corporation as far in advance as possible. There they served as warrants for the purchase and shipment of commodities. These programs were made out in two sections, known respectively as Northern

<sup>1</sup> See note regarding date of Act, page xxii.

and Southern Relief. The former included all supplies destined for Northern European ports between Rotterdam and Helsingfors, while the Southern Relief program included shipments destined to Adriatic and Black Sea ports.

As the ships were loaded at American ports, those designed for the Northern Relief program were dispatched to Falmouth, England, for orders, and those for Southern Relief cleared for Gibraltar for orders. Immediately after each ship sailed, the London office of the Grain Corporation and the Paris office of the Relief Administration were advised of the name of the vessel, port, and date of sailing, the contents of the cargo, and whether for Falmouth or Gibraltar. Before the vessel arrived within wireless range of its port of call, it was allocated to the relief program of some country and to a final port of discharge. This allocation was made by the Paris office and advice sent to London. All orders and directions to ships were handled by the London office of the Grain Corporation. When the vessel arrived in its port of discharge, it was, in most cases, turned over to officials of the receiving government or other recipient on a c.i.f. basis, but in some instances it was necessary to unload the cargo in warehouses and to make deliveries from stock. In either case, the London office of the Grain Corporation through its port agencies obtained properly executed receipts from the receiving officials, attended to the details of checking cargoes, etc.

In the case of deliveries to governments all the details and expenses of handling and distributing the supplies from the ports were handled by the receiving governments. However, the American Relief Administration officials assigned to that country followed these distributions to make sure that the relief supplies actually reached the people who were in distress. This provision was one of the conditions under which the supplies were furnished by the American Relief Administration. In the Children's Relief and some other deliveries as discussed later, the Administration followed the distribution in considerably greater detail.

As fast as the relief supplies were shipped from American ports by the New York office they were invoiced to the London office of the Grain Corporation. The latter office was thus made responsible for the accounting on all relief commodities, and for carrying through all

settlements, both in payment for commodities to the New York office, for shipping and other costs, and for the settlement with the ultimate receivers of these supplies. The task of the London office as the shipping and financial agent of the American Relief Administration was one of the most important and exacting. It is a remarkable tribute to the personnel of the London office that this vast program of handling the shipping and accounting for supplies delivered within a period of nine months, valued at \$363,271,835.48, was carried through without a single serious error. These results are to be attributed to the efficient organization established in London by Edward M. Flesh, in which the shipping operations were under the immediate direction of Captain Rodger D. Lapham and the accounting work under George K. Hyslop.

In acting as commercial and fiscal agent for the Relief Administration, the Food Administration Grain Corporation must of necessity protect itself against possible losses. The Grain Corporation had at this time a capital from the United States Treasury of only \$150,000,000, which was far too small to carry on its normal operations of protecting the guaranteed price of wheat. At one time before the Armistice, the Corporation had found it necessary to borrow money from outside sources to the extent of \$385,000,000, and even during 1919 its borrowing ran into hundreds of millions. It, therefore, had no funds which it could tie up for any length of time in relief supplies, unless it could secure their return along with costs including interest and overhead.

Furthermore, commercial operations in European waters during the Armistice Period were particularly hazardous. Many of these waters were still mined and hence a serious menace to shipping. Furthermore, conditions within many of these countries were extremely precarious. New governments had been established, often with the support of a bare majority of the population. The spirit of unrest and revolution was everywhere apparent. With populations hungry, or on the verge of starvation, no one knew when the governments might be overthrown and stocks of commodities, particularly food, confiscated. In addition, there was the very real threat of a Bolshevik invasion from the east, with uprising and warfare throughout this whole territory.

The risks were so great that no private organization could engage in trade with many of these countries, and certainly could not undertake to establish stocks of food in these ports. No insurance company could afford to underwrite these risks except at almost confiscatory premiums.

It was under such conditions that the Grain Corporation was asked to make deliveries to these countries and to build up port stocks. Yet the Grain Corporation had no capital which it could afford to lose without endangering its ability to carry out its primary purpose of protecting the guaranteed price of wheat in the United States. The only protection which the Grain Corporation could secure in its European operations was to recognize these risks and to make its prices high enough to cover some portion of the hazards thus imposed upon it.

One of the first tasks of the London office after its establishment was to work out definite arbitraries for each European port which could be added to the f.o.b. cost of the commodities, and thus arrive at a c.i.f. or delivered price at which the relief supplies should be invoiced. These arbitraries had to include allowance for marine freight and insurance, war risk insurance, and handling charges, as well as for the added hazards discussed above.

The Grain Corporation had no desire to make any profit out of these relief operations but it felt it would be seriously remiss in the trust which had been imposed upon it if it did not use the ordinary business methods of protecting the integrity of its capital. Fortunately, the Grain Corporation experienced no serious losses in these operations, and as a result, the 1919 relief work was completed with a fair surplus over and above all expenditures. Inasmuch as this work had been undertaken for purely humanitarian reasons, it was felt that it would be entirely unjust for the Grain Corporation, and hence the United States Government, to retain this surplus. Several ways were available by which this surplus could be returned to the countries from which it was received in protection of the Grain Corporation against possible loss. This could be done by a direct cash rebate, or by a credit on the account of those governments which were indebted to the United States.

A survey of the European food situation late in the summer of 1919 convinced Mr. Hoover

that there would be serious suffering in many countries during the coming year. On the other hand, it was obviously desirable that further governmental or official relief should be withdrawn after the arrival of the 1919 harvest. This harvest would be sufficient to feed these countries for several months, during which time, if placed on their own responsibility, they should be able to make their own arrangements for further supplies. However, certain classes of these populations, and particularly the children, were likely to suffer because of the lack of sufficient quantity, and especially the proper kind, of food. After consulting with the representatives of the several governments to which relief had been supplied, as well as with President Wilson, it was determined that the best way in which this surplus from the 1919 operations could be returned to these countries would be in the form of further food relief for the children. Accordingly at the express request of these governments, and at the direction of the President, Mr. Hoover organized the American Relief Administration European Children's Fund, incorporated under the laws of Delaware, as a charitable institution which continued to feed the undernourished children of these countries for another three years. The surplus above cost of operation on the 1919 European relief operations of the Grain Corporation was turned over to this new organization. This formed the nucleus of the fund for later child-feeding operations in Europe. This fund was greatly increased by charitable contribution in the United States and by contributions from European governments and elsewhere.

The account of the child-feeding work carried on by the American Relief Administration European Children's Fund, after August 1, 1919, is given in detail in a subsequent section of this volume (see pages 73-90).

#### SOURCE OF FINANCE

References have been made to the difficulties which faced the Director General of Relief in securing finance for the relief that must be furnished to these countries.

The sources of the relief finances for the Armistice Period as a whole have been briefly outlined (pages 32-35), but it will be advantageous to set forth here the finance that was avail-

able to the American Relief Administration as one of the agencies under the Director General of Relief.

Table 16 summarizes the total finance available to the A.R.A. and indicates the value of the supplies delivered from each of these sources.

TABLE 16

SUMMARY OF FINANCES AVAILABLE TO THE AMERICAN RELIEF ADMINISTRATION FOR COMMODITY PURCHASES AND THE SALES VALUE OF RELIEF SUPPLIES DELIVERED—ARMISTICE PERIOD, 1919

Source of Finance	Funds Available	Sales Value of Relief Supplies Delivered
Act of Congress, February 25, 1919	\$100,000,000.00	\$120,566,195.32*
U.S. Treasury Loans	89,450,000.00	86,743,158.36
President's National Security and Defense Fund . . . . .	5,000,000.00	3,339,426.26
Cash sales, commodities . . . . .	168,946,191.10	168,946,191.10
Total . . . . .	\$363,396,191.10	\$379,594,971.04

\* For explanation of deliveries in excess of funds available, see text page 45.

The total finance thus available for the American Relief Administration in 1919 amounted to \$363,396,191.10 including cash sales at their actual value. Against this the Grain Corporation delivered commodities having a sales value of \$379,594,971.04. The difference represents, in part, the commodities paid for out of the Grain Corporation surplus.

In all of these operations the Food Administration Grain Corporation acted as the fiscal agent of the American Relief Administration, purchasing the commodities, attending to their transportation and handling, and collecting all accounts. The books of the London office of the Grain Corporation have been audited and a detailed report covering all phases of these operations has been made by certified accountants. All of the operating expenses of the American Relief Administration, including the expenses of the Paris office and the Relief Missions in various parts of Europe, were paid by the Grain Corporation. Thus none of the expenses of the relief operations were charged directly against the relief appropriations or other relief funds. The total operating expenses of the American Relief Administration were \$1,551,173.42. The expenses of the London office of the Grain

Corporation, including its European Agencies, totaled \$444,144.29, making the grand total of all expenses connected with the 1919 relief operation \$1,995,317.71. This represents 0.5273 per cent or approximately 53/100 of one per cent of the total sales value of all supplies delivered by the organization in 1919. These expenses included many other items than those actually connected with the food deliveries, as, for example, the expenses of the coal and railway missions in Austria, Czechoslovakia, Jugoslavia, and elsewhere, the expenses of establishing and maintaining telegraphic and other communications over large areas, the expenses of conducting exchange operations for these countries, etc. Many of these operations are discussed briefly in other parts of this volume.<sup>1</sup>

#### DELIVERIES BY THE AMERICAN RELIEF ADMINISTRATION—ARMISTICE PERIOD, 1919<sup>2</sup>

Table 17 summarizes the total deliveries made by the American Relief Administration

TABLE 17

DELIVERIES BY THE AMERICAN RELIEF ADMINISTRATION BY METHODS OF FINANCE—ARMISTICE PERIOD, 1919

Method of Finance	Total Metric Tons	Total Value
Congressional Appropriation . . . . .	485,558.1*	\$107,132,276.99*
U.S. Treasury Loan . . . . .	417,024.6	86,743,158.36
President's National Security and Defense Fund . . . . .	1,622.0†	390,209.03†
Cash Settlement . . . . .	780,251.9	168,946,191.10
Total . . . . .	1,684,456.6‡	\$363,211,835.48‡

\* Does not include 36,002.1 metric tons valued at \$13,433,918.33, representing children's relief which in this report is accounted for under European Children's Fund. See Table 150.

† Does not include 7,823.1 metric tons, valued at \$2,949,217.23, used for children's relief in Austria and in this report accounted for under the European Children's Fund. See Table 150.

‡ If the children's relief referred to in the two preceding notes were included, the deliveries made by the American Relief Administration in the Armistice Period would amount to a total of 1,728,281.8 metric tons and a total value of \$379,594,971.04 which agrees with the sales value of relief supplied by the A.R.A. as shown in Table 16. For the reasons for treatment of the children's relief under the Reconstruction Period, see text, page 44.

during the Armistice Period under four headings representing the methods by which these deliveries were financed. As indicated else-

<sup>1</sup> See also section on Sources of Relief Finances, pages 142-46.

<sup>2</sup> See Appendix Tables 109 to 120.

where (cf. page 82), this table does not include the deliveries for children's relief paid for from the Congressional Appropriation for Relief, and which in this report are accounted for under the Reconstruction Period, because the major portion of the deliveries were actually made in this latter period. Likewise the children's relief to Austria, paid for from the President's National Security and Defense Fund, is also accounted for under the European Children's Fund in the Reconstruction Period.

While it is true that the arrangements for these children's relief supplies were all made by the Director General of Relief and most of the foodstuffs were shipped and received in Europe during the Armistice Period, a considerable portion was regarded as stocks for child-feeding work after August, 1919, and hence were in reality actually distributed by the European Children's Fund. The real reason for accounting for these supplies in the Reconstruction Period is that the feeding-station receipts are almost inextricably tied up with other child-feeding supplies furnished by the E.C.F. In many instances, the same receipt contains commodities paid for from the Congressional Appropriation and other commodities from other sources. Hence, it has seemed that the data could be presented much more simply by regarding these child-feeding operations as part of the work of the European Children's Fund.

This method has, of course, the effect of reducing the amount of relief credited to the American Relief Administration during the Armistice Period by 43,825.2 metric tons and \$16,383,135.56 divided as follows:

	Metric Tons	Value
Congressional Appropriation .....	36,002.1	\$13,433,918.33
President's National Security and Defense Fund..	7,823.1	2,949,217.23
Total .....	43,825.2	\$16,383,135.56

However, these amounts are fully accounted for elsewhere in this report (cf. Tables 53, 150, pages 82 and 334-35) and, hence, are included in the total relief supplied. If the above-mentioned amounts were included in the deliveries by the American Relief Administration in the Armistice Period, it would bring the total to 1,728,281.8 metric tons and a value of \$379,594,971.04, as shown in Table 16.

Table 18 gives the division of the total relief credited to the American Relief Administration in the Armistice Period by country of destination. Altogether deliveries were made to twenty different countries in addition to the sundry accounts which could not well be credited to

TABLE 18  
DELIVERIES BY THE AMERICAN RELIEF ADMINISTRATION  
BY COUNTRIES OF DESTINATION—ARMISTICE  
PERIOD, 1919\*

Country	Total Metric Tons	Total Value

any one country. It will be noted that the largest deliveries were made to Germany, Poland, Czechoslovakia, Finland, and Roumania. Relatively large amounts also went to Jugoslavia, Armenia, and the United Kingdom.

Deliveries to Russia include three separate operations as follows:

	Metric Tons	Value
Northwest Russia .....	17,950.4	\$5,337,568.35
Southern Russia (Kouban) ..	915.5	444,718.50
Volunteer Army (Russian) ..	394.0	86,680.00
Total .....	19,259.9	\$5,868,966.85

#### CONGRESSIONAL APPROPRIATION FOR RELIEF (Act of February 25, 1919)

Reference has been made (page 39) to the Act of Congress of February 25, 1919, which appropriated \$100,000,000 "for the relief of such

populations in Europe, and countries contiguous thereto, outside of Germany, German-Austria, Hungary, Bulgaria, and Turkey, as may be determined upon by the President as necessary." The act provided that this money could be used as a revolving fund and that as far as possible expenditures should be reimbursed by the government or peoples to whom relief was furnished.

By the executive order previously quoted (page 40), President Wilson placed the administration of this relief in Mr. Hoover's hands. Mr. Hoover proposed to use this fund for three purposes. The major portion was to be used to furnish foodstuffs to the newly liberated governments of Central and Eastern Europe on credit. Since these governments had no funds available it was impossible to obtain cash payment and, hence, their notes to repay the United States Treasury were to be accepted. Smaller portions of this fund were to be used to furnish special foods for child-feeding programs in certain of these countries, and these were to be delivered as gifts from the American people without any obligation for repayment. The third activity undertaken with funds from the Congressional Appropriation was the payment of transportation charges on supplies which were furnished to these liberated governments from other sources, but which were useless in relieving the people until transported to these countries. A portion of these freight and insurance costs was charged against the respective countries and included in the notes which they gave to the United States Treasury, while a smaller portion, representing charges on charitable gifts, was furnished to the respective countries without obligation on their part.

The total activities carried on under the Congressional Appropriation may be summarized under these headings:

## CONGRESSIONAL APPROPRIATION

	Metric Tons	Value
Deliveries to governments		
(credit) .....	485,558.1	\$105,915,038.72
Freight, insurance, etc.		
(credit) .....		733,247.86
Freight, insurance, etc.		
(gift) .....		483,990.41
Sub-total .....	485,558.1	\$107,132,276.99
Children's Relief (gift) ....	36,002.1	13,433,918.33
Grand total .....	521,560.2	\$120,566,195.32

It will be noted that the total value of the relief furnished under the Congressional Appropriation was \$120,566,195.32, although the appropriation was for only \$100,000,000. This apparent anomaly arose from the fact that the Comptroller of the Treasury refused to allow payment for any of the costs of the operations, and required detailed vouchers for each cargo of relief showing the f.o.b. cost of the foodstuffs in the United States and separate vouchers showing the ocean transportation costs and certain handling charges. No allowance was permitted for any overhead costs, such as the cost of purchasing, directing the operation, checking the delivery, or making settlement with the receiving government. Therefore, in order to obtain the use of the major portion of the Congressional Appropriation, it was necessary to deliver commodities, the sales value of which was far in excess of the amount of the reimbursement received from the Treasury. The difference had to be absorbed by the Food Administration Grain Corporation out of surplus derived from other operations.

Reference has been made to the fact that the Food Administration Grain Corporation was made the purchasing and fiscal agent for the American Relief Administration, under the authority of the Executive Order of February 24, 1919. A contract between the American Relief Administration and the Grain Corporation was drawn up and signed on March 15, 1919.<sup>1</sup>

<sup>1</sup> This contract was as follows:

"The Grain Corporation will, by constant contact with the American Relief Administration in America and Europe, endeavor to maintain, in suitable European ports and en route thereto, sufficient food stocks, so that the American Relief Administration may be assured of adequate supplies for its requirements; and the American Relief Administration agrees to take from the Grain Corporation, at European ports or elsewhere, a total of foodstuffs as indicated by the American Relief Administration to the Grain Corporation from time to time.

"The American Relief Administration has the right to draw from any of the present stocks of the Grain Corporation in European ports, or en route thereto, and from such additional quantities as may be put afloat by the Grain Corporation for European destinations after joint conference and discussion; and the American Relief Administration will take delivery of such foodstuffs at such European destinations or as otherwise mutually arranged, and at such prices as may be mutually agreed on from time to time.

"The Grain Corporation shall so arrange its accounting system that, on commodities actually afterwards sold to the American Relief Administration in European ports or elsewhere, any profit between such European sale prices and

Under this contract it was expected that duly executed invoices together with receipts from the governments to which deliveries were made would be accepted by the Treasury as warrants for payments from the appropriation. However, the Comptroller ruled otherwise after a considerable period of delay and, as stated above, required the detailed vouchers without any allowance for any of the necessary items of overhead expense. Under this ruling it would have been impossible to have made any deliveries under the appropriation had there not been available the services of a public commercial organization like the Grain Corporation, which not only did not demand payment for the services rendered, but which, also, was able to absorb the very heavy expenses and the risk incident to these operations.

Under these rulings of the Comptroller, it was deemed necessary to draw up a new contract between the American Relief Administration and the Grain Corporation to take the place of the one signed on March 15, 1919. This new contract, signed on June 11, 1919,<sup>1</sup> provided that

the f.o.b. American price, after deduction of all proper and necessary expenses and losses, shall be for account of the American Relief Administration and accounted for to the American Relief Administration.

"The Grain Corporation agrees to accept payment either directly from the American Relief Administration or from such Governments or Agencies as may be designated by the Director General of the American Relief Administration; but not later than actual delivery of the goods, as evidenced by proper invoices, for which payment the American Relief Administration remains responsible.

"AMERICAN RELIEF ADMINISTRATION,

"By EDGAR RICKARD,

"THEO. F. WHITMARSH

"Accepted,

"FOOD ADMINISTRATION GRAIN CORPORATION,

"JULIUS H. BARNES, *President*"

<sup>1</sup> The text of this contract was as follows:

"1. Grain Corporation will endeavor to maintain in suitable European ports and en route thereto sufficient food stocks so that Director General of Relief may be assured of adequate supplies for all operations conducted under his direction.

"2. Director General of Relief shall have right to draw from any of present stocks of Grain Corporation in European ports or en route thereto and from such additional quantities as may be put afloat by Grain Corporation for European destinations after joint conversation and discussion. Director General of Relief will arrange either that American Relief Administration takes delivery of such foodstuffs at such European destinations or that other persons or governments designated by Director General of Relief take delivery after paying cash for such cargoes.

"3. To extent such foodstuffs are turned over to American Relief Administration to be ultimately charged against

the overhead expense of the American Relief Administration would be paid by the Grain Corporation out of a margin to be charged on supplies delivered for the A.R.A. other than those for the Congressional Appropriation, and further that the Grain Corporation would turn over any balance of such margins on its European operations to the Director General of Relief, or to institutions or governments named by him.

The ruling by the Comptroller worked a great hardship on the Grain Corporation because of the long delay in securing any of the funds from the Congressional Appropriation. Although the

hundred million dollar appropriation settlement shall be made directly between American Relief Administration and Grain Corporation in accordance with such regulations as may be prescribed by the Comptroller of the Treasury. Where ships intended for relief purposes and invoiced by Grain Corporation to American Relief Administration to be charged against the hundred million dollar appropriation are subsequently by agreement diverted for other purposes Grain Corporation agrees to credit American Relief Administration with the amount previously paid by American Relief Administration or repay it in such manner as may be directed by the Director General of Relief.

"4. Except for foodstuffs referred to in paragraph 3 prices of such foodstuffs shall be agreed upon from time to time between Grain Corporation and Director General of Relief.

"5. Grain Corporation agrees to pay all expenses of American Relief Administration in Europe.

"6. It is the intention of this contract that the Grain Corporation shall make no profit from its relief operations and shall suffer no losses. It therefore agrees that it will deduct from its gross receipts on all supplies, other than those delivered to American Relief Administration for payment from hundred million dollar appropriation, all items of cost and expense on such sales including expenses paid under paragraph 5 of this contract and will hold balance as special fund. From this fund shall be paid First any items of insurance or expense relating to the cargoes delivered against the hundred million dollar appropriation and not repaid from United States Treasury. The balance, if any, shall be paid to Director General of Relief or his successor or such person, institution or government as he or his successor may direct for charitable purposes in Europe. In case there should be no Director General of Relief such direction shall be made by United States Wheat Director.

"7. Director General of Relief agrees that in case operations of Grain Corporation in Europe should result in loss to it he will pay to Grain Corporation sufficient sum to make good such loss to extent that he has funds available from special allocation of five million dollars made by the President of the United States for relief purposes from his National Security and Defense Fund.

"8. Grain Corporation agrees to accept payment either directly from American Relief Administration or from such governments or agencies as may be designated by Director General of Relief but not later than actual delivery of goods as evidenced by proper invoices for which payment American Relief Administration remains responsible."

Act authorized the use of this money as a revolving fund, it was impossible to secure any of these funds from the Treasury until late in the fall of 1919, after the relief operations had been entirely closed. In the meantime, the Grain Corporation had to carry the burden of these operations out of its own meager capital and on funds which it could borrow from the banks.

In the final settlement with the United States Treasury, the Grain Corporation received a total of \$94,938,417.05, against which it had made deliveries of commodities and services valued at \$119,832,947.86. The Grain Corporation thus had to absorb a total of \$24,894,530.81 on this operation. In addition to the foregoing the Grain Corporation made disbursements, which were billed to, or collected from, other organizations, in the amount of \$733,247.86. This amount represented freight, insurance, and other transportation charges on relief supplies forwarded for other organizations. Following is a comparison of the sales value and the amounts received from the Treasury and other organizations under the main headings under which this appropriation was expended.

SALES VALUE AND REIMBURSEMENTS ON DELIVERIES  
UNDER THE CONGRESSIONAL APPROPRIATION

	Treasury Reimbursement	Sales Value
Deliveries to govern- ments .....	\$84,014,527.92	\$105,915,038.72
Freight, insurance, etc.	385,749.83	483,990.81
Children's Relief .....	10,538,139.30	13,433,918.33
Total .....	\$94,938,417.05	\$119,832,947.86

	Other Reimbursements	Sales Value
Freight, insurance, etc., billed and / or col- lected .....	\$ 733,247.86	\$ 733,247.86
Total .....	\$95,671,664.91	\$120,566,195.72

DELIVERIES TO GOVERNMENTS

Table 19 summarizes the deliveries made to governments, under the Congressional Appropriation, by country of destination. As pointed out earlier, these deliveries were made on credit and notes from each government were taken covering the amount of the Treasury reimbursement. The difference between the Treasury reimbursement and the sales value had to be absorbed by the Food Administration Grain Corporation.

It will be noted that by far the largest deliveries to any one government from the Congressional Appropriation were those to Poland, where the whole of A.R.A. relief of the Armistice Period, as shown in Table 18, was paid for from this source, if we include the freight and

Drying pine bark in Finland. The Finns used pulverized pine bark for flour prior to arrival of A.R.A. relief supplies.

insurance costs discussed below. The same is true of the deliveries to Latvia, Lithuania, and Russia. In the case of the other countries, the A.R.A. deliveries from the Congressional Appropriation were supplemented by supplies financed from other sources. Large amounts

tions other than the A.R.A. is discussed in some detail in the section on transportation (pages 135-38). As indicated above, a portion of these

charges was included as additional credit extended to these governments, while the remainder was furnished as direct gifts to the people of these countries. The latter represented freight and insurance paid on commodities which were given to these countries by other organizations.

Table 20 summarizes the freight and insurance charges paid from the Congressional Appropriation, showing the country for which the charges were incurred, and whether a credit or a benevolent operation.

#### CHILDREN'S RELIEF

As pointed out in an earlier section, the Children's Relief deliveries paid for from the Congressional Appropriation are considered in this report as part of the relief during the Reconstruction Period, because a large portion of the supplies were actually used during that period and because the records of these deliveries are closely interwoven with the records of other operations by the American Relief Administration European Children's Fund. The reader, therefore, is referred to that section of this report (pages 84 to 88) for a discussion of the deliveries for Children's Relief.

Table 21 summarizes the operations under the Congressional Appropriation for Relief in the Armistice Period, as accounted for in this report, by the countries receiving the relief.

\* Does not include deliveries for children's relief, see pages 84-88.

### RELIEF DELIVERIES UNDER UNITED STATES TREASURY LOANS DURING THE ARMISTICE PERIOD

As shown in Table 17, the second important source of finance for relief handled by the American Relief Administration during the Armistice Period was direct loans from the United States Treasury to certain of the newly established European governments. These loans were made under the authority granted by Congress for the Treasury to loan money to countries at war with the enemies of the United States (Acts of April 24, 1917; September 24, 1917; April 4, 1918; and July 9, 1918). Certain of these countries, like Roumania and Serbia, had been fighting on the side of the Allied nations, while the newly established governments in Central Europe had declared war against Germany and Austria and, hence, were technically on the side of the Allies.

Realizing the great need of food to prevent not only great suffering, but actual starvation, Mr. Hoover, through President Wilson, made arrangements for the Treasury to establish credits for three countries, viz., Czechoslovakia, Yugoslavia (then called Greater Serbia or the Kingdom of the Serbs, Croats, and Slovenes), and Roumania. Against these credits, the American Relief Administration was able to deliver relief supplies, and to secure direct payment from the United States Treasury upon authorization from the respective governments.

Table 22 summarizes the deliveries made under these Treasury loans by countries receiving the relief. Further details showing the commodities delivered to each country are given in Table 119 (Appendix).

TABLE 22

RELIEF DELIVERIES PAID FOR FROM UNITED STATES TREASURY LOANS, BY COUNTRIES OF DESTINATION—ARMISTICE PERIOD, 1919

Country	Total Metric Tons	Total Value
Czechoslovakia .....	259,004.9	\$50,113,572.61
Jugoslavia .....	55,077.2	13,191,246.46
Roumania .....	102,942.5	23,438,339.29
Total .....	417,024.6	\$86,743,158.36

The total deliveries under these Treasury loans amounted to 417,024.6 metric tons, valued

at \$86,743,158.36. For this full amount the American Relief Administration through the Grain Corporation turned over duly executed notes of the respective governments. It will be noted that about 60 per cent of the deliveries under this heading went to Czechoslovakia. It will also be recalled that Czechoslovakia participated in the relief from the Congressional Appropriation to the extent of \$8,455,144.90 (Table 21), so that the total relief to that country from these two sources amounted to \$58,568,717.51. In addition to this, there were some minor cash sales credited to Czechoslovakia, which makes up the total from the American Relief Administration as shown in Table 18.

### RELIEF DELIVERIES FROM THE PRESIDENT'S NATIONAL SECURITY AND DEFENSE FUND DURING THE ARMISTICE PERIOD

As recorded on page 32, President Wilson turned over to Mr. Hoover \$5,000,000 from the President's National Security and Defense Fund, to be used as a nucleus for relief and for the payment of expenses of the administration of the relief work. As a matter of fact, none of this fund was used for expenses, since all of these were paid by the Grain Corporation, and only \$3,339,426.26 out of the \$5,000,000 were actually expended, the remainder being turned back to the President.

This fund was used to finance relief operations for which it was impossible to use money from other sources. Two operations of this kind were paid for from the President's Fund. One was for children's relief in Austria where the Congressional Appropriation could not be used, and the other was for the relief of Russian prisoners of war in Germany. Table 23 (page 50) shows relief furnished for these two purposes.

The children's relief deliveries from the President's Fund are considered in connection with the work of the European Children's Fund in the Reconstruction Period and, hence, in this report is not regarded as part of the relief in the Armistice Period. The reasons for considering this relief in the Reconstruction Period are the same as those discussed under the Congressional Appropriation.

Consequently, as indicated in Table 17, the

only relief from the President's National Security and Defense Fund considered in this report as an Armistice Period delivery is that to the Russian prisoners of war who were being held in Germany.

TABLE 23

RELIEF DELIVERIES PAID FOR FROM THE PRESIDENT'S  
NATIONAL SECURITY AND DEFENSE FUND

Delivered to	Total Metric Tons	Total Value
Austrian Children's Relief*	7,823.1	\$2,949,217.23
Russian prisoners of war in Germany .....	1,622.0	390,209.03
Total .....	9,445.1	\$3,339,426.26

\* In the final allocation of these supplies by the European Children's Fund, a portion was delivered to Hungary. See page 89.

Reports were received by the Director General of Relief showing the very serious condition of these war prisoners. Germany did not have sufficient food to feed her own people who, as pointed out elsewhere (pages 189 ff.), were suffering greatly. These war prisoners could not be repatriated at this time, nor was there sufficient food for them. Mr. Hoover persuaded the French Government that they should take the responsibility of furnishing relief to these Russian war prisoners, but at the time the French Government had no supplies which could be used for this purpose. Accordingly, the American Relief Administration undertook to advance these supplies, to be later reimbursed by the French Government. No free funds were available to the American Relief Administration except from the President's National Security and Defense Fund. Supplies to the extent of 1,622.0 metric tons of flour, sugar, and miscellaneous food, with a total value of \$390,209.03, were turned over to the French for these prisoners. At a later time, notes were obtained from the French Government to repay this amount to the United States Treasury.

RELIEF DELIVERIES AGAINST CASH  
SETTLEMENT DURING THE  
ARMISTICE PERIOD

It was necessary to mobilize every available source of finance to take care of vast and urgent needs for food in the period following the Armistice. Many of the European governments

possessed some cash or available assets which could be used for this purpose. In other cases, it was possible to sell food for cash to local organizations or to commercial establishments, which agreed to handle this on a minimum margin in order to relieve the suffering people. It must be remembered that during this time practically all ordinary commercial operations had ceased, blockade restrictions were still in force, and, hence, the relief organizations had to perform many functions which would ordinarily be carried on by commercial establishments.

It was Mr. Hoover's principle that, wherever possible, food should be sold for cash payment, and as pointed out in an earlier section, a very considerable proportion, 46.5 per cent, of the relief delivered under the Director General of Relief was sold for cash. In this connection, the American Relief Administration, acting through its fiscal agent, the Food Administration Grain Corporation, played an important part. As shown in Table 17, one of the four main divisions of the work of the American Relief Administration was sales against cash settlement. The total deliveries made during the Armistice Period under this category amounted to 780,251.9 metric tons, valued at \$168,946,191.10. These supplies were delivered to fifteen different countries in addition to sundry accounts.

Table 24 summarizes these cash sales by country of destination, while Table 120 (Appendix) gives further details regarding these operations.

The conditions surrounding these cash sales are discussed in detail under each of the countries to which deliveries were made. Only a few of the important points regarding these deliveries will be discussed here.

The deliveries to Germany, totaling 483,155.8 metric tons, valued at \$113,758,637.74, far exceeded those to any other country. These supplies were furnished to Germany under the terms of the Brussels agreement and were paid for through the deposit of German gold in Rotterdam and Brussels to the credit of the Director General of Relief. Sales to Bulgaria were also paid for by gold deposits. In both instances, the Grain Corporation later sold this gold to the Federal Reserve Bank of New York.

Deliveries to Italy represented emergency supplies furnished because of a deficiency in

the Allied program. Deliveries to the United Kingdom represented supplies which were furnished to Austria by the British under the Joint Allied Finance plan. Deliveries to countries

Total .....	780,251.9	\$168,946,191.10

like Denmark, Finland, and the Netherlands represented direct sales to supplement the greatly diminished food supply of these countries. Sales to Turkey were made through a commercial organization which then undertook to supplement the bread supply in Istanbul (Constantinople). Deliveries to Armenia represent cash sales to the Near East Relief, while the sales to France represent a transaction involving flour sold to Esthonia by the United States Liquidation Commission, but which France refused to allow to be moved out of the country (cf. page 68).

RELIEF DELIVERIES DURING THE ARMIS-  
TICE PERIOD BY AMERICAN ORGANIZA-  
TIONS OTHER THAN THE AMERICAN  
RELIEF ADMINISTRATION

Table 14 (page 35), shows the second major division under the work of the Director General of Relief as deliveries by American organizations other than the American Relief Administration. The total deliveries under this heading

is given as 1,058,770.9 metric tons, valued at \$462,622,804.46. This includes the work of five separate organizations operating during the Armistice Period, and which worked in close co-operation with the Director General of Relief. Table 25 summarizes these deliveries by the separate organizations.

It should be pointed out again that, with each of those organizations, the operations recorded here form only a portion of their total activities.

TABLE 25

RELIEF DELIVERIES BY AMERICAN ORGANIZATIONS OTHER  
THAN THE AMERICAN RELIEF ADMINISTRATION—  
ARMISTICE PERIOD, 1919

American Red Cross...	7,510.8	1,741,740.00
Total .....	1,058,770.9	\$462,622,804.46

The United States Liquidation Commission (War Department) disposed of vast quantities of munitions, railroad and industrial equipment, and other supplies which were not regarded as relief within the meaning of this report, and which are not included in the table above.

The deliveries by the C.R.B. do not include any of the supplies going to Belgium or Northern France during the Armistice Period, which are accounted for elsewhere. The three other organizations were each spending vast sums for relief, which was not directly co-ordinated with the work of the Director General of Relief and, hence, are not included in this report.

Table 26 (page 52) shows total deliveries from these five organizations tabulated by the countries receiving the relief. France heads the list because of the large amount of supplies turned over to that country by the United States Liquidation Commission. Other countries receiving substantial amounts of relief from these sources were Poland, Germany, Belgium, Yugoslavia, and Czechoslovakia. In the following pages, the deliveries by each of these organizations will be discussed.

UNITED STATES LIQUIDATION COMMISSION—  
WAR DEPARTMENT

Under an Act of Congress approved May 10, 1918, the President was authorized, during the war-time emergency, to sell supplies, material, equipment, or other properties which had previously been purchased or acquired in connection with the prosecution of the war. Under these powers, there was created by General Orders No. 24 of the War Department, dated February 11, 1919, the "United States Liquidation Commission (War Department)" as a central agency (1) to dispose of America's surplus war stocks in Europe, and (2) to settle all claims and accounts between Allied Governments and their nationals on the one side and the United States War Department on the other side. The powers thus granted to this Commission were further confirmed by Section 3 of an Act of Congress approved March 2, 1919, which directly empowered the Secretary of War to make such sales and settlements.

The Liquidation Commission was composed of Judge Edwin B. Parker, Chairman, Brigadier General Charles G. Dawes, H. H. Johnson, and Henry F. Hollis. The Commission entered immediately upon its task, with its principal office established in Paris.

The signing of the Armistice had naturally found the American Army with vast stores of commodities, equipment, and establishments in several countries of Europe. With more than 2,000,000 men in overseas service at this time, and with an equal number rapidly moving toward or preparing to move toward the war zone, it was necessary to have enormous supplies of all kinds of material and equipment on hand. The assets of the War Department consisted of both installations and stocks. Under installations were included warehouses, cold storage plants, barracks, hospitals, railway yards, docks, telephone and telegraph lines, etc. These structures had been erected upon land for the most part requisitioned for war purposes and involved claims for rent, damages, etc., from more than 150,000 individual owners.

Stocks of supplies and equipment included clothing, food and subsistence, machinery, tools, lumber, transport equipment, ordnance, hospital supplies, office fixtures, etc. Most of this material could not be salvaged and returned to the United States without costing more than could possibly be received for it. Furthermore, for a large part of these war supplies, there would be little or no demand in the United States.

On the other hand, many of these supplies were urgently needed to assist the hungry and demoralized peoples of Europe. After much consideration, it was decided that the bulk of these supplies should be sold in Europe as speedily as possible and under the best obtainable terms. It was hoped that the sale of these commodities and installations could be made to offset all, or most, of the claims against the War Department arising in the several European countries.

The United States Liquidation Commission (War Department) has issued a final report prepared by its chairman, Edwin B. Parker.<sup>1</sup> This report discusses the scope of the Commission's activities, the many difficulties encountered, and the results obtained. The following summary taken from this report gives some idea of the extent of the Commission's work:

<sup>1</sup> *Final Report of the United States Liquidation Commission (War Department)* (Government Printing Office, Washington, D.C., 1920). See also *Report of the War Department* (1920).

SUMMARY OF SETTLEMENTS NEGOTIATED AND SALES EFFECTED BY THE UNITED STATES LIQUIDATION COMMISSION (WAR DEPARTMENT)—FEBRUARY 11, 1919, TO MAY 31, 1920

*Amounts Involved in Settlements*

Settlement with France.....	\$748,392,004.82
Settlement with Great Britain.....	112,996,912.16
Settlement with Belgium.....	2,279,827.12
Settlement with Italy.....	12,620,173.75
Settlements with individuals, associations, and others .....	17,427,175.41
<b>Total .....</b>	<b>\$893,716,093.26</b>

*Amounts of Sales*

Bulk sale to France.....	\$400,000,000.00
Other sales, stated in dollars.....	377,905,193.23
Other sales, stated in francs and converted .....	45,018,032.59
<b>Total .....</b>	<b>\$822,923,225.82</b>

The distribution of these sales to the various countries of Europe is shown by the following table. This table also gives, separately, the values of the groups of commodities which were of most interest in the relief work, viz., clothing and subsistence.

The largest single item in these operations was the so-called "bulk sale" to France by which all remaining stocks, equipment, and installations in France were turned over to the French Government for the lump sum of \$400,000,000 in ten-year five per cent bonds and the agreement of the French Government to assume all responsibility for claims against the United States War Department for rents, damages, etc., and also for the waiver by France of all claims for taxes or custom duties on properties imported and sold in France after our entrance into the war. Although the stocks and properties thus turned over to France had cost several times the amount realized, this sale undoubtedly was of advantage to the United States. It enabled us to dispose of possessions, many of which could be sold only to France, and others of which had little or no commercial value elsewhere; it enabled us to expedite the return of the American Army; and, in particular, it avoided the necessity of making individual settlements with many thousands of individual claimants in these foreign countries. Such settlements would undoubtedly have led to long-

TABLE 27

SUMMARY OF DISTRIBUTION OF TOTAL SALES BY UNITED STATES LIQUIDATION COMMISSION (WAR DEPARTMENT)

Sales Made To	Clothing and Textiles	Subsistence Supplies	All Other Commodities	Total Value
France .....	\$ 5,820,612.39	\$ 36,590,339.54	\$ 90,255,045.00	\$132,665,996.93
Great Britain .....	204,109.72	1,464,706.16	507,670.39	2,176,486.27

drawn-out negotiations and litigation, and would inevitably have left in their wake much bitterness and hard-feeling toward the United States which it was hoped could be avoided.

Much of the work of the United States Liquidation Commission (War Department) could not be considered as relief to Europe and had no connection with the Office of the Director General of Relief or with any of the American agencies engaged in relief work. On the other hand, a considerable portion of the sales were made either at the direct instance of the Director General of Relief, or through his immediate assistance.

On March 17, 1919, Mr. Hoover wrote to Judge Parker, Chairman of the Liquidation Commission, pointing out the serious needs of additional supplies of both clothing and subsistence in the newly liberated countries. He suggested that many of the surplus Army supplies could be disposed of to these countries, provided the prices were reasonable and the Commission was willing to accept the obligations of these countries in lieu of cash payment.

On March 24, 1919, President Wilson wrote the Commission, seconding Mr. Hoover's suggestion and adding, "I would be glad, therefore, if the Commission could accept as its guiding principle in these negotiations the fact that it is not only securing a rapid liquidation of materials that may otherwise prove unsalable but also that it is an opportunity to perform a fine human service by approaching the matter in the most sympathetic mind, and I would be glad if the Commission could see its way to very largely accept Mr. Hoover's views as to the terms upon which dealings should be undertaken with the liberated peoples."

These suggestions were accepted by the Commission and as a result large quantities of clothing, food, and reconstruction materials were made available to these distressed countries.

The final report of the Liquidation Commission gives, for the most part, dollar values only for the sales which it effected. These transactions have been closed so long that it is practically impossible to obtain further details on these operations at this late date. Based upon information which was available in the Paris office of the American Relief Administration at the time these transactions took place, we have compiled a table which gives an approximation

of the tonnage of commodities delivered to these several countries by the Liquidation Commission. In compiling this table the total deliveries by the Commission to the liberated countries, including Belgium, and in addition, those deliveries to France which comprised food, clothing, and the more important reconstruction material have been regarded as relief. In the case of France, these categories amounted to approximately 40 per cent of the total value of all sales to that country by the Commission. All of the foregoing transactions were carried out with the collaboration and assistance of the Director General of Relief. Other sales by the Commission, such as those to Great Britain, Italy, Spain, Holland, Greece, and Portugal, have not been considered as relief transactions, although in many instances they might well have been so regarded.

Table 28 summarizes the relief sales made directly by the Liquidation Commission, and for which they accepted the obligations of the countries to which the commodities were sold.

As shown by this table, there was a total of approximately 823,202 metric tons, valued at \$381,721,094.59, delivered to these countries, and here considered as European relief. This amounts to less than one-half of the total value of all sales by the Commission which, as shown above, amounted to nearly \$823,000,000.

In addition to the relief deliveries shown in Table 28, page 55, the American Relief Administration purchased outright from the Commission, food commodities to the value of \$18,308,655.58. The commodities thus purchased consisted of cereals, beans, pork products, evaporated milk, and a small quantity of medical supplies. The American Relief Administration paid cash for these commodities which were priced on a basis to justify their purchase in France rather than their shipment from the United States. These commodities are accounted for under the deliveries by the American Relief Administration. A portion of the commodities thus taken over were sold to the French Government as shown in Table 47, page 69. The remainder was delivered to various liberated countries. The details of this distribution are shown in Table 141B, pages 324-25.

The direct sales of commodities by the Liquidation Commission to many of these newly established governments involved serious diffi-

TABLE 28

RELIEF SUPPLIES FURNISHED BY THE UNITED STATES LIQUIDATION COMMISSION  
(WAR DEPARTMENT)—ARMISTICE PERIOD, 1919*(Approximate quantities stated in metric tons of 2,204.6 pounds each)*

Country	Food	Clothing	Other Non-food Commodities	Total Tons	Total Value
France .....	370,285.0	129,490.0	20,000.0	519,775.0	\$213,067,400.00

culties in transportation. Most of these supplies were located in France and these new countries possessed no shipping, nor did they have acceptable funds with which to pay for this transportation. Consequently, it looked as if many of these supplies would remain inaccessible to these suffering people even after their governments had purchased them. This problem was solved largely through the co-operation of the American and British Relief agencies.

The American Relief Administration undertook to transport a large portion of the pork sold by the Liquidation Commission, and these charges were finally paid from the Congressional Appropriation for Relief. The details of these coastwise shipments are given in Table 144 and the transactions are further discussed on pages 67-69 and 137.

The transportation on these commodities by Great Britain is included in Table 41.

DELIVERIES BY THE COMMISSION FOR RELIEF IN  
BELGIUM DURING THE ARMISTICE PERIOD

The work of the Commission for Relief in Belgium has been discussed and the deliveries by that organization to Belgium and Northern France have been presented (page 13). In addition to those activities the Commission also co-

operated with the Director General of Relief during the Armistice Period in furnishing supplies which went to other countries in Europe. These deliveries may be considered under two categories, viz., sales to Germany, and sundry activities.

For purposes of clarity it may be well to summarize, in Table 29, the total operations of the C.R.B., divided between the two periods to which they apply.<sup>1</sup>

The deliveries to Belgium and Northern France have been treated elsewhere, and at this point we are concerned only with the deliveries from this organization, which are credited in Table 25 to the Armistice Period, and

TABLE 29

TOTAL OPERATIONS OF THE COMMISSION FOR  
RELIEF IN BELGIUM

Sub-total .....	186,372.0	\$ 66,341,240.87
Grand total .....	5,174,431.0	\$927,681,485.08

<sup>1</sup> All of the statistics relating to the operations of the C.R.B. are taken from the statistical report on the work of that organization, by G. I. Gay, to which the reader is referred for further details.

which total 186,372.0 metric tons, valued at \$66,341,240.87.

Approximately two-thirds of this amount represents deliveries to Germany under the terms of the Brussels Agreement.<sup>1</sup> In March, 1919, Germany was in a serious condition with regard to food. When the Brussels Agreement was finally signed permitting her to purchase limited quantities of foodstuffs, it was impossible to make immediate delivery of sufficient quantities from A.R.A. stocks. Mr. Hoover, therefore, arranged with the Commission for Relief in Belgium to sell to Germany such supplies as could be spared from stocks in Rotterdam and Antwerp. These sales, totaling 134,980.0 metric tons, worth \$44,350,810.47, were of the greatest importance in relieving the acute situation in Germany at this time.

These supplies were paid for out of the gold which Germany deposited to the credit of the Director General of Relief in designated banks in Belgium and the Netherlands. These operations are discussed in more detail under deliveries to Germany.

The work of the C.R.B., classified in Table 29 as Sundry Activities during the Armistice Period, includes a great variety of operations, not all of which occurred during the Armistice, but which have been grouped here for convenience. Of the total amount, nearly \$4,500,000 represent commodities purchased from the C.R.B. by the American Relief Administration. An almost equal amount applies to the distribution of some twenty million British Army rations. Other miscellaneous sales include recovery from underwriters on commodities damaged or lost in transit, and also the sale of surplus or other damaged commodities not required for the work of the Commission. Further details regarding these operations are given in Table 103, Appendix, and in Mr. Gay's report.

#### DELIVERIES BY THE NEAR EAST RELIEF IN THE ARMISTICE PERIOD

The work of the Near East Relief is referred to in some detail in the section dealing with deliveries to Armenia. As has been pointed out repeatedly, this report deals only with that small portion of the work of the Near East Relief, which was directly co-ordinated with the work

of the Director General of Relief in the Armistice Period and with certain other operations in the Reconstruction Period.

Although at the moment we are concerned only with the deliveries of the Near East Relief during the Armistice Period, it will be more convenient to refer, at this point, to all of the Near East Relief work reported on in this volume. This is summarized in Table 30.

TABLE 30

#### RELIEF DELIVERIES TO ARMENIA BY THE NEAR EAST RELIEF AS COVERED BY THIS REPORT

Period of Delivery	Total Metric Tons	Total Value
Armistice Period . . . . .	30,657.0	\$ 8,711,472.00
Reconstruction Period		
Relief deliveries . . . . .	7,404.3	\$ 1,411,329.90
Freight and miscellaneous . . . . .	.....	532,790.01
Sub-total Reconstruction Period . . . . .	7,404.3	\$ 1,944,119.91
Grand total . . . . .	38,061.3	\$10,655,591.91

According to this table, the Near East Relief delivered during the Armistice Period a total of 30,657.0 metric tons of supplies, with a total value of \$8,711,472.00. In addition to this amount, the American Relief Administration sold to the Near East Relief 1,994.3 metric tons of food, worth \$511,422.34. The Near East Relief paid cash for this food and were responsible for its delivery. For the purpose of this report this latter delivery is credited to the American Relief Administration under cash sales. The credit also belongs to the Near East Relief, which would bring their total deliveries during this period as reported here up to 32,651.3 metric tons, with a value of \$9,222,894.34.

The work of the Near East Relief in the Reconstruction Period will be discussed in a later section (page 122).

#### JEWISH JOINT DISTRIBUTION COMMITTEE

At the very outbreak of the war in 1914, American Jewry recognized there would be need for alleviating the inevitable suffering of war. At that time, American Jews were primarily interested in bringing relief to the suffering Jews in Palestine. Early in 1915 there was organized the Joint Distribution Committee for General

<sup>1</sup> Cf. pages 194-95, and Table 326, pages 616-25.

Relief in Palestine, and during the period up to the Armistice approximately \$1,750,000.00 was raised by American Jews and expended for relief work in the Holy Land.

When the Armistice raised the curtain of censorship on Central and Eastern Europe, it disclosed the appalling sight of millions of persons facing starvation and the ravages of disease. The American Jewish Joint Distribution Committee was one of the several organizations which immediately went to work to alleviate such of this suffering as they could. Throughout the terrible winter of 1919-1920 and the succeeding years, this organization worked in all the countries of Europe and finally did valiant service in fighting the famine in Russia in 1921, 1922, and 1923. Throughout this work its relief was administered without prejudice to the race, religion, or politics of the recipient. Naturally, its effort was directed largely to countries where there was a considerable proportion of Jews in the population, but its relief was on the basis of need, not religion.

During the period from 1914 to 1924, the Joint Distribution Committee collected in America, and expended in Europe and contiguous territory, the enormous sum of more than \$60,000,000. Its relief work was carried on in forty-one different countries.

Throughout the whole period the Joint Distribution Committee worked in close co-operation with the American Relief Administration. It is our purpose in these pages to refer only to those operations in which the two organizations were involved as shown by the records and accounts of the American Relief Administration.

This co-operation began early in 1919, or almost immediately after the Armistice, and extended to the close of the Russian operations in 1923. Table 31 presents in summary form the extent of the co-operation between these two organizations, and includes work done during both the Armistice and the Reconstruction periods. The work of the Committee during the Armistice will be discussed in the following pages, while the work after August, 1919, will be referred to in a later section (page 121).

The first co-operation between the two organizations occurred early in the relief work of 1919. It will be remembered that Mr. Hoover, before sailing from the United States in November, 1918, had arranged for the immediate ship-

ment of large quantities of food supplies to be financed temporarily by the War Department and by the Food Administration Grain Corporation. Mr. Hoover proposed, if necessary, to place these foodstuffs in store in strategic points in Europe pending the settlement of some means of financing these to the stricken countries. Among the first cargoes to be loaded by the Grain Corporation was that of the "Westward Ho," which

TABLE 31

SUMMARY OF TOTAL RELIEF OPERATIONS OF THE JOINT DISTRIBUTION COMMITTEE CARRIED ON IN CO-OPERATION WITH THE AMERICAN RELIEF ADMINISTRATION

Country	Armistice Period	Reconstruction Period	Total Value
Austria . . . . .	\$ 363,760.00	\$ 200,000.00	\$ 563,760.00
Poland . . . . .	3,412,497.00	323,555.00	3,736,052.00
Roumania . . . . .	256,000.00	.....	256,000.00
Siberia . . . . .	75,000.00	.....	75,000.00
Russia . . . . .	.....	4,396,129.34	4,396,129.34
Total . . . . .	\$4,107,257.00	\$4,919,684.34	\$9,026,941.34

sailed from New York January 26, 1919, with a cargo of flour, milk, and fats, totaling 6,486 metric tons and valued at \$2,000,000. Prior to this, the Joint Distribution Committee had sent investigators into Poland, and their reports, together with those obtained by the American Relief Administration, indicated the urgent need of immediate help. In the meantime, Mr. Hoover had not been able to perfect satisfactory arrangements with the Allies, nor to secure definite finance for the relief to Poland. He therefore proposed to the Joint Distribution Committee that they purchase and distribute the cargo of the "Westward Ho."

Although this was relief on a larger scale than hitherto contemplated by the J.D.C., they were able to raise immediately the money for the purchase of one-half of this cargo, and to arrange with the Polish National Department, a Polish-American organization, to donate the other half. The "Westward Ho," I,<sup>1</sup> arrived in Danzig, February 25, 1919, and arrangements were made for its immediate distribution in Poland, thus constituting one of the first large pieces of actual relief work in the Armistice Period.

The Joint Distribution Committee undertook many phases of the relief work on their own

<sup>1</sup> Roman numerals refer to the voyage number.

responsibility. So far as direct co-operation with the Director General of Relief in 1919 was concerned, the principal J.D.C. deliveries were made to Poland and consisted besides the "Westward Ho," I, mentioned above, of a portion of the cargo of the "Westward Ho," II, and of the "Schwarzenfels" as well as Army Liquidation supplies transported from France in the "Kerowlee," "Lake Clear," IV, "Lake Clear," V, "Lake Eckhart," V, and "Democracy," II. Smaller amounts were also delivered to Roumania, Austria, and Siberia during this period.

Table 32 gives the total tons and value of these deliveries, while Table 125 (Appendix) gives the details by cargoes and countries.

#### THE AMERICAN NATIONAL RED CROSS

The splendid work of the American Red Cross is too well known to call for extended comment here. During the war this organization collected and expended vast sums of money. After the Armistice and during the Reconstruction Period, it maintained relief activities in

nearly every country in Europe. From 1914 to the end of 1923, the American Red Cross collected and expended some \$350,000,000. A very considerable portion of this was used for work in Europe, both during the war and afterward. It is impossible, readily, to extract from the Annual Reports of the American Red Cross a definite figure, which would represent the expenditures for purely relief work in Europe during these years. It is evident, however, from an examination of these reports, that such expenditures would exceed \$200,000,000.

Naturally, the work of the American Red Cross was largely in the field of medical relief and related activities. However, like any versatile organization, they not infrequently found that food and clothing relief was essential to supplement any relief from disease which they might render. A very substantial portion of the Red Cross expenditures in Europe were for food and clothing.

In addition they carried on an active campaign for children's relief in these countries. Again they stressed the medical phase of relief, but by no means neglected food and clothing, where these were essential.

The major portion of the activities of the American Red Cross was carried on quite independently of the American Relief Administration, although where there was any reason for co-operation, these two organizations worked hand-in-hand for the common cause. As in the case of other charitable organizations, we have included in this report only those activities of the American Red Cross which were conducted in close co-operation with the organizations which Mr. Hoover directed. Table 33 sum-

† Includes 415.0 tons of medical supplies.

‡ Transportation costs of \$369,404.95 paid by A.R.A. (Table 143, page 328), not included in total value shown in this table.

marizes these activities as divided between the Armistice and the Reconstruction periods.

Of the total of \$7,258,553.10 accounted for in Table 33, only \$1,741,740.00 represented relief carried on during the Armistice Period. This latter consisted entirely of clothing and medical relief. A large portion of the former represented second-hand clothing collected in the United States, and transported to Europe by the American Relief Administration. These transportation costs were paid for from the Congressional Appropriation for Relief, as a direct gift to these countries.<sup>1</sup> Table 34 summarizes the American Red Cross deliveries during the Armistice Period, and separates those on which the A.R.A. paid the transportation costs. As shown in Table 126 (Appendix), 4,028.9 tons of the American Red Cross supplies consisted of clothing, and 3,481.9 tons were medical and hospital supplies.

Through numerous conferences between the officials of the American Relief Administration and the American Red Cross, much of the other work of the latter organization was co-ordinated with the work of the Director General of Relief, but the operations discussed here were the only ones where the relations were close enough to be reported through the Paris office of the Director General of Relief.

The work of the American Red Cross in co-operation with the European Children's Fund and other organizations in the Reconstruction Period is discussed in a later section. (Page 116.)

<sup>1</sup> Cf. pages 48 and 135.

## JOINT ALLIED FINANCE

Table 14 (page 35) shows the third major operation under the Director General of Relief, in the Armistice Period, as deliveries under Joint Allied Finance. The Act of Congress, approved February 25, 1919, by which a revolving fund of \$100,000,000 was created for European relief, expressly stated that this money would be available for the assistance of such population in Europe and contiguous countries as may be determined upon by the President, except Germany, German-Austria, Hungary, Bulgaria, and Mohammedan Turkey. Likewise, it was impossible for the United States Treasury to loan money to these countries which were technically at war with the United States.

These areas were as much in need of relief as the rest of Europe, although perhaps not subject, at that time, to such sympathetic attention. But, as one of the primary objects of the relief work was to prevent anarchy and its spread, and to encourage the establishment of good government, some means had to be found for furnishing relief to these enemies, as well as to our friends.

So far as Germany, Bulgaria, and Turkey were concerned, payment could be effected by the transfer of gold or other forms of securities. Hungary had formed a Communistic government under Bela Kuhn, in close association with the Soviet régime in Russia. Therefore, under the ruling of the Supreme War Council, relief could not be delivered to her in any event.

Austria, on the other hand, was prostrate. The need for relief there was certainly as great

as anywhere else in Europe. Some means had to be found by which this situation could be relieved, or else the revolution which must follow in Austria might well render all relief and reconstruction in other parts of Europe of no avail.

After much difficulty, Mr. Hoover, in the latter part of February, 1919, arranged through the United States Treasury, that loans should be made to England, France, and Italy for the purchase of food in the United States, and that these countries in turn would accept Austrian securities for the food delivered. Through this plan the relief to Austria was financed jointly by the United States, United Kingdom, France, and Italy.

TABLE 35

SUMMARY OF DELIVERIES TO AUSTRIA UNDER JOINT ALLIED FINANCE—ARMISTICE PERIOD, 1919

(Metric Tons)

Commodity	By United Kingdom	By France	By Italy	Total
Wheat flour...	64,454.3	72,409.5	3,225.0	140,088.8
Cereal flour ..	7,718.2	22,480.4	10,076.0	40,274.6
Wheat grain ..	24,309.8	44,904.3	71,855.0	141,069.1
Rye grain ....	.....	10,190.3	.....	10,190.3
Pork products. ....	.....	.....	11,374.0	11,374.0
Milk .....	1,998.0	.....	845.0	2,843.0
Total .....	98,480.3	149,984.5	97,375.0	345,839.8

The preliminary arrangements contemplated the advance of \$10,000,000 to each of the three Allies, but it was later found that this would be insufficient, and the amount was increased to \$16,000,000 to each country, or a total of \$48,000,000 in all. The three Allies agreed that this money should all be available for the purchase of food, and that they would finance the overseas transportation out of separate funds.

The total supplies delivered to Austria for this \$48,000,000, as shown in Table 35, amounted to 345,839.8 metric tons, chiefly breadstuffs, but

including some 14,000 tons of pork and milk. In addition to the cost of this food in America, the Allies advanced the freight charges amounting to approximately \$11,281,250.00.

#### DELIVERIES BY GREAT BRITAIN

At the time the original arrangement was made, the Austrian food situation was very serious. It was predicted by competent observers that the Austrian Republic could not remain in control much longer unless relief was received. The American Relief Administration therefore arranged to sell to England, against this Treasury loan, 46,283.9 tons of flour and 1,088 tons of milk, then in stock at Trieste. (This transaction by the A.R.A. is accounted for under cash sales in Table 120.) This arrangement, which avoided the long delay necessary in transporting supplies from America, was able to save the situation, and once more tide Austria over the danger point. The details of these deliveries by the American Relief Administration to the United Kingdom for Austria are shown in Table 131 (Appendix).

During August and September, 1919, five steamers with 25,888.6 metric tons of American flour for Austria were delivered at Trieste by the British (Table 130). During this period, the United Kingdom also delivered 910 tons of American milk from surplus stocks in Great Britain. Owing to the delay in turning over the Austrian tonnage to the Allies, it was impossible to complete the British deliveries during September. Five cargoes of wheat grain shipped in former Austrian tonnage were delivered to Austria by the British after September, 1919. No details of these shipments by steamers are available.

Table 36 summarizes the total deliveries to Austria by the United Kingdom under the Joint

TABLE 36

Allied Finance arrangement. Further details are shown in Tables 130 and 131.

#### DELIVERIES BY FRANCE

The deliveries to Austria by France under the Joint Allied financial arrangements were all shipped direct from the United States in ex-Austrian steamers, with the exception of three cargoes. These three cargoes were from Australia and destined for Italy under the direction of the Allied Wheat Executive. In May, 1919, the Austrian food supply was so dangerously low that Mr. Hoover succeeded in arranging with the Italians to have these three cargoes diverted to Austria on the French account, and later replaced to Italy by three similar cargoes from America. By this act another serious food crisis in Austria was averted.

The total French deliveries were not completed up to the close of September, but some 18,000 tons of wheat, valued at \$1,662,958, were shipped from America at a later date to complete the program.

The details of the French deliveries on the joint finance account are given in Table 129.

The total deliveries by commodities are summarized in Table 35.

#### DELIVERIES BY ITALY

No complete statement has ever been obtained of the actual amounts of American supplies delivered to Austria as the Italian portion of the Joint Allied Finance. Throughout the Armistice Period, the Italians were delivering supplies to Austria, part of which were of Italian origin and part were imported from America. In spite of repeated requests, no separation of these supplies could be obtained. Finally, Mr. Hoover, in a conference with the Italian representative in Paris, came to an agreement on the amount of American foods which they had shipped to Austria. This statement, submitted to the Supreme Economic Council by Mr. Hoover in July, 1919, was as follows:

Commodity	Total Tons	Value F.O.B. New York
Wheat .....	82,724	\$ 7,610,608
Wheat flour .....	3,225	407,962
Maize flour .....	10,076	886,688
Lard .....	12,343	7,405,800
Pork .....	3,394	2,445,680
Vegetable oil .....	524	209,600
Condensed milk .....	845	316,793
Total .....	113,131	\$19,283,131

Inasmuch as the f.o.b. New York value of the above amount totaled more than the \$16,000,000 loaned by the United States Treasury, it is clear that some \$3,000,000 of this was delivered by the Italians under their own financial arrangements with Austria. Accordingly, we have arbitrarily reduced the amounts in the statement above so that the f.o.b. value totals \$16,000,000, and the remainder is added to the direct Italian deliveries.

Table 37 gives a summary of the total supplies which are regarded as having been de-

TABLE 37

livered to Austria, by the Italians, under the joint financial arrangement. The Italians have never submitted a detailed statement to the Director General of Relief showing the ships on which these cargoes were carried.

#### DELIVERIES BY COUNTRIES OTHER THAN THE UNITED STATES—ARMISTICE PERIOD, 1919<sup>1</sup>

Table 14 (page 35) shows that the fourth and final major operation under the Director General of Relief in the Armistice Period consisted of relief deliveries by countries other than the United States. It will be remembered that the office of Director General of Relief was established by the Inter-Allied Supreme Council of Supply and Relief. One of the chief functions of the Director General was to co-ordinate the relief activities of all the Allied nations in order to secure an equitable distribution of the supplies available in accordance with the needs of

<sup>1</sup> See Appendix Tables 132 to 136.

the various countries. As explained elsewhere (page 28), this co-ordination was accomplished first through the Permanent Committee on Supply and Relief, and later, through the Food Section of the Supreme Economic Council.

While it is true that the United States possessed the bulk of the supplies available for relief, and was also in a position to furnish the major portion of the finance, yet the contributions from other countries totaled to an imposing figure. Table 38 (also Table 107) shows that the total relief deliveries during the Armistice Period from countries other than the United States amounted to 1,139,042.6 metric tons,

† Includes finance on freight for \$4,500,000.00.

‡ Includes finance on freight for \$2,021,250.00.

valued at \$238,783,036.92. As in the case of the United States, this includes supplies furnished on credit or as gifts from funds appropriated by various governments, supplies furnished from benevolent funds, as well as cash sales or their equivalent. Furthermore, as in the case of the United States, this is not a complete statement of all relief furnished from these various countries, but only that portion which was handled in co-operation with the Director General of Relief and, hence, was reported to his office.

Approximately three-fourths of the relief accounted for under this heading came from the three major Allies in Europe, the United Kingdom, France, and Italy. The United Kingdom alone contributed about one-half of the value of the total relief from these countries. The supplies furnished by the other countries represented largely commodity exchanges between the several countries, which were arranged through the Director General of Relief.

Table 38 summarizes the deliveries by countries other than the United States, by the countries which furnished the relief, while Table 39

summarizes these same deliveries by the countries to which the supplies were delivered. Further details are shown in Tables 132 A and 132 B in the Appendix. These tables do not include the supplies handled under the Joint Allied Finance, which has been discussed separately.

## DELIVERIES FROM THE BRITISH EMPIRE

Early in 1919, the British Treasury voted a credit of £12,000,000 sterling, approximately \$59,000,000, for European relief. In addition to this, many private and charitable organizations in the United Kingdom furnished large quantities of supplies either as direct gifts or in return for cash or credit and, finally, the British Government participated in furnishing relief to Germany against cash settlement as in the case of the United States. In addition to the relief from the United Kingdom, Canada and Newfoundland each furnished substantial quantities of relief to Roumania on credit. Canada established a credit of \$5,000,000 in favor of Roumania, against which wheat, flour, and agricultural implements to the value of \$3,836,600.00 were delivered during the Armistice Period. Newfoundland furnished to Roumania a cargo of fish, valued at \$1,566,040. The total relief deliveries from the British Empire, as accounted for in this report for the Armistice Period, may be summarized as in Table 40.

TABLE 40

SUMMARY OF RELIEF DELIVERIES FROM THE BRITISH EMPIRE—ARMISTICE PERIOD, 1919

Furnished by	Total Metric Tons	Total Value
United Kingdom .....	450,832.0	\$114,768,639.00
Canada .....	38,184.0	3,836,600.00
Newfoundland .....	2,356.0	1,566,040.00
Total .....	491,372.0	\$120,171,279.00

As pointed out above, the relief from Canada and Newfoundland was furnished to Roumania. Table 41 summarizes the deliveries from the United Kingdom, by country of destination.

It will be noted that the United Kingdom financed the freight and other charges on relief supplies to the extent of \$7,063,820.00, leaving the value of commodities furnished as \$107,704,810.00. Included in the finance on freight is \$4,760,000 for Austria, which represents the freight and other charges on the supplies delivered under the Joint Allied Finance as discussed elsewhere. The remainder of the freight finance consisted chiefly of the cost of transporting from French ports supplies sold to the liberated countries by the United States Liquidation Commission. The United Kingdom transported more than 80,000 tons of these sup-

plies, and thus contributed very materially to the relief of these countries. In addition to these direct contributions, the United Kingdom furnished large amounts of shipping for both the liberated and enemy countries as indicated in Table 184, page 392. In this period of world shortage of shipping, Great Britain bore also the burden of supplementing the tonnage required for transporting to France and Italy their share of the Allied cereal program and other necessary foodstuffs.

TABLE 41

SUMMARY OF RELIEF DELIVERIES FROM THE UNITED KINGDOM, BY COUNTRIES OF DESTINATION—ARMISTICE PERIOD, 1919

Country	Finance On Freight	Total Metric Tons	Total Value Including Freight
Armenia ....	\$ 71,400.00	.....	\$ 71,400.00
Austria .....	4,760,000.00	18,000.0	6,676,640.00

Lithuania ...	57,120.00	.....	57,120.00
Poland .....	1,389,920.00	21,462.0	7,694,540.00
Roumania ..	21,420.00	59,248.0	10,026,048.00
Russia (Kouban) .....	.....	100.0	10,472.00
Total ....	\$7,063,840.00	450,832.0	\$114,768,639.00

Of the 450,832.0 metric tons of relief supplies furnished by the United Kingdom in co-operation with the Director General of Relief, the major portion, 299,144.0 tons, valued at \$75,653,861.00, represented cash sales to Germany under the Brussels agreement. The remaining 151,688.0 tons, with a sales value of \$32,050,949.00, represents almost entirely relief furnished on credit. The freight finance was also a credit transaction, making a total of \$39,114,778.00, which was largely furnished during the Armistice Period out of the British Treasury credits. The remainder of the British credits of \$59,500,000 was used chiefly in assistance to Central European countries after the Armistice Period and are not included here.<sup>1</sup>

<sup>1</sup> For an account of the British relief work, the reader is referred to reports by Sir William Goode, *Economic Conditions in Central Europe*, Miscellaneous Series No. 1 (1920), Cmd. 521, and Miscellaneous No. 6 (1920), Cmd. 641.

It should also be said that some of the deliveries accounted for above represent sales for cash by British dealers, and some benevolent deliveries by British charitable organizations. No complete separation of these operations was ever furnished to the Director General of Relief, but from the information available it seems certain that such deliveries included in these figures would amount to less than \$3,000,000. They include, chiefly, certain cash sales to Finland and certain benevolent deliveries in Jugoslavia.

In addition to any figures included in this report, there were many British organizations which carried on important relief operations during the Armistice Period, but which, like many American organizations, were working quite independently of the Director General of Relief. Among these organizations may be mentioned the British Red Cross, Friends' Emergency and War Victims' Relief Committee, and the Lady Muriel Paget's Mission.

#### DELIVERIES BY FRANCE

France had suffered severely in the war. The whole of Northern France had been devastated. Her own people were in need of all the assistance which the French Government could furnish. Under these circumstances, it was not expected that France could play the same part in the relief of other countries that the United States or Great Britain could undertake. Nevertheless, during the Armistice Period, France furnished a total of 88,647.0 metric tons of relief supplies of a total value of \$29,404,724.00 (Table 38). The latter includes \$4,500,000 as finance on the freight and insurance of supplies to Austria furnished under Joint Allied Finance.

Table 42 summarizes the total deliveries by France exclusive of the Joint Allied Finance.

Of the total deliveries by France, 69,404.0 metric tons, valued at \$16,262,889.00, represented sales to Germany under the Brussels agreement. Germany paid for these supplies chiefly through the exchange of commodities and not through the transfer of gold as in the case of supplies furnished by the United States and Great Britain. Of the supplies furnished to Germany by France, 55,000 tons consisted of oil seeds from French provinces in Africa. The remainder consisted of flour, pork products, and miscellaneous foods, chiefly army rations.<sup>1</sup>

<sup>1</sup> See Table 134, Appendix.

French deliveries to Czechoslovakia consisted chiefly of rice, beans, and pork products. Of this amount, 20 tons of flour and 20 tons of rice represented a gift from the French Government to Czechoslovakian children's relief, while the remainder was exchanged for 20,000 tons of sugar.

TABLE 42  
SUMMARY OF RELIEF DELIVERIES FROM FRANCE, BY  
COUNTRIES OF DESTINATION—ARMISTICE  
PERIOD, 1919

Country	Total Metric Tons	Total Value
Austria .....	.....	\$ 4,500,000.00
Czechoslovakia .....	16,571.0	7,540,918.00
Germany .....	69,404.0	16,262,889.00
Sundry (Russian prisoners) .....	2,672.0	1,100,917.00
Total .....	88,647.0	\$29,404,724.00

The deliveries under Sundry Activities represent supplies furnished by France for Russian prisoners of war in Germany. These prisoners were in a pitiful condition because of the food shortage in Germany. France undertook to assist them pending their repatriation. Of the 2,672 tons furnished to these prisoners, 1,622 tons represent commodities delivered by the American Relief Administration from the President's National Security and Defense Fund, but which were subsequently paid for by France (cf. page 49). The whole of the relief to the Russian prisoners represents a benevolent gift from France.

#### DELIVERIES BY ITALY

Italy, like France, was in no position to render a large amount of assistance in the relief of other European countries. However, as shown in Table 38, Italy did furnish a total of 139,922.0 metric tons of a total value of \$37,532,042.00. This is exclusive of Italy's share in the commodity deliveries to Austria under the Joint Allied Finance, but it does include \$2,021,250.00 paid by Italy as freight and insurance on the Joint Allied Finance deliveries. As summarized in Table 43, Italy's contributions during the Armistice Period were confined to deliveries to Austria and Czechoslovakia. With the exception of the freight referred to above, all of these operations were in the nature of cash transac-

tions. The commodities furnished by Italy to these countries were paid for through the exchange of other commodities or by concessions.

TABLE 43

SUMMARY OF RELIEF DELIVERIES FROM ITALY, BY COUNTRIES OF DESTINATION—ARMISTICE PERIOD, 1919\*

Country	Total Metric Tons	Total Value
Austria .....	64,061.0	\$20,878,122.00†
Czechoslovakia .....	75,861.0	16,653,920.00
Total .....	139,922.0	\$37,532,042.00

\* See Table 135 for details.

† Includes \$2,021,250.00 as freight on commodities delivered under Joint Allied Finance.

#### DELIVERIES BY COUNTRIES OTHER THAN THE MAJOR ALLIES

Table 38 shows a total of 419,108.2 metric tons, valued at \$51,678,951.92, delivered during the Armistice Period by countries other than the three major Allies. Of the amounts shown in that table, the delivery of 155,000.0 tons, valued at \$16,774,000.00, from Argentina, represents wheat for which Germany was able to negotiate credit. The deliveries by the Polish League of Women, the Russo Carpathian Committee, and 25 tons of codliver oil from Norway represent benevolent gifts. All of the remainder repre-

TABLE 44

SUMMARY OF RELIEF DELIVERIES FROM COUNTRIES OTHER THAN THE MAJOR ALLIES, BY COUNTRIES OF DESTINATION\*—ARMISTICE PERIOD, 1919

Accounted for in Recon- struction Period .....	6.6	3,960.00
Grand total .....	419,108.2	\$51,678,951.92

\* It should be pointed out that only food and related relief commodities concerned in these transactions were reported to the Director General of Relief. Very often food supplies from one country would be paid for by coal, machinery, or manufactured goods from the other. In general, these latter commodities are not included in these tables.

sents barter transactions involving the exchange of commodities between these countries and, in principal, were cash transactions. These exchanges were arranged, through the Director General of Relief, to take care of surpluses of certain commodities in one country and shortages in others. The trade barriers between these newly established nations had not yet been adjusted so that such transactions could take place between the normal commercial agencies, and the intervention of the Director General of Relief was necessary to bring about these exchanges, which were mutually advantageous to both sides. Table 44 summarizes the total deliveries from these thirteen sources, by the countries of destination. Table 136 (Appendix) shows the destination of the deliveries from each country of origin.

#### PURCHASES OF UNITED STATES ARMY SUPPLIES<sup>1</sup>—ARMISTICE PERIOD, 1919

Before Mr. Hoover sailed from the United States in November, 1918, he had arranged with the War Department, upon the authorization of President Wilson, that the United States Army Quartermaster should ship from army stocks in the United States approximately 120,000 short tons (108,863 metric tons) of wheat flour, 20,000 short tons (18,144 metric tons) of pork products, and 4,000 short tons (3,629 metric tons) of milk. These supplies were shipped by the Army in its own tonnage and constituted what was known as the Southern Relief Program. The ships, twenty-one in number, all sailed for Gibraltar as a port of call, and from there were directed to Adriatic or Black Sea ports for discharge. For the most part these cargoes were unloaded into warehouses by the Army, and were then invoiced to the American Relief Administration, at a c.i.f. price, as they were needed in the relief operations. In all of these transactions, the London office of the Food Administration Grain Corporation acted as the fiscal agent, undertaking the settlement with the Army, and in turn, securing either cash or obligations from the governments to which the supplies were delivered.

The Army ships which sailed on this first Southern Relief program and were discharged under this agreement were as follows:

<sup>1</sup> See Appendix Tables 138 to 142 inclusive.

## SOUTHERN RELIEF ARMY SHIPS

## Discharged at Adriatic Ports

Canoga	West Alcasco
Cape Lookout	Westerner
Durham	Western Hope
East Wind	Western Plains (part)
Mount Shasta	Western Scout
Nantahala	West Kyska, I
Oregonian	West Lashaway, I
Sudbury	Williamantic

## Discharged at Black Sea Ports

Englewood	West Mahomet
Maine	Western Plains (part)
West Eldara	West Mount

The total tonnage delivered from these Army cargoes amounted to 124,709.2 metric tons, for which the invoiced value amounted to \$35,111,425.34. The charges on these shipments, including the actual cost of the commodities plus all transportation and handling charges, were paid to the Army Quartermaster by the Grain Corporation.

The American Relief Administration, also, purchased from the United States Liquidation Commission, large quantities of supplies from surplus Army stocks at French ports. The total direct purchases from the Liquidation Commission amounted to 69,624.1 metric tons of a total value of \$18,308,655.58.

The total purchases of relief supplies from the United States Army are summarized in Table 138, showing a total of 194,323.3 metric tons, with a value of \$53,420,080.92.

## ADRIATIC PORTS

Table 139 (Appendix) gives the details of purchases from the United States Army Quartermaster at Trieste and Adriatic ports, by Quartermaster (Q.M.) invoices and by cargoes. The total purchase, as shown by this table, consisted of the following:

Commodities	Metric Tons
Flour .....	77,446.5
Pork products .....	7,230.8
Lard .....	2,470.8
Lard substitute .....	1,116.7
Milk .....	1,361.0
Total tons .....	89,625.8
Total value .....	\$25,428,013.84

These commodities were delivered to the various countries and for various relief pur-

poses, including sales to governments, children's relief, and miscellaneous cash sales. Table 45 summarizes the total quantities and values delivered to each country, and for each relief project. The details of these deliveries are given in the Appendix Tables for the respective countries.

TABLE 45

## SUMMARY OF RELIEF DELIVERIES OF ARMY STOCKS FROM ADRIATIC PORTS—ARMISTICE PERIOD, 1919

Delivered to	Total Metric Tons	Total Value
Austria, Children's Relief...	50.8	\$ 37,679.59
Jugoslavia, Children's Relief	200.3	86,930.55
Czechoslovakia, Children's Relief .....	54.4	38,605.26
Jugoslavia .....	24,092.9	6,652,118.60
Czechoslovakia .....	34,591.1	10,360,307.47
Austria .....	3,680.6	2,047,811.35
Great Britain .....	21,349.5	4,706,713.64
Italy .....	4,686.4	1,033,158.45
Hungary .....	319.1	245,519.96
Miscellaneous cash sales....	600.7	219,168.97
Total .....	89,625.8	\$25,428,013.84

The Children's Relief deliveries to Jugoslavia and Czechoslovakia were paid for out of the \$100,000,000 Congressional appropriation, while those to Austria were paid for from the President's National Security and Defense Fund. The deliveries to the governments of Czechoslovakia and Jugoslavia were paid from United States Treasury loans. The deliveries to Austria and Hungary were paid for in cash. Deliveries to Italy represent a relief cargo turned over to Italy to avert a serious food shortage. This was paid for through the Wheat Executive in London. The deliveries to Great Britain represent part of the Joint Allied Finance for the Relief of Austria (see page 60). The miscellaneous cash sales represented small sales to individuals or local organizations, or to United States Army or Navy officers' messes in these localities.

## CONSTANTINOPLE AND BLACK SEA PORTS

Table 140 (Appendix) gives the details of the American Relief Administration purchases from the Army Quartermaster at Constantinople (Istanbul) and Black Sea Ports, by cargoes, and by countries or agencies to which the supplies

were delivered. These purchases consisted of the following:

Commodities	Metric Tons
Wheat flour .....	31,136.9
Pork products .....	1,972.2
Lard .....	986.9
Milk .....	977.4
Total tons .....	35,073.4
Total value .....	\$9,683,411.50

Table 46 summarizes these deliveries according to destination and use.

TABLE 46

SUMMARY OF RELIEF DELIVERIES FROM ARMY STOCKS AT  
CONSTANTINOPLE AND BLACK SEA PORTS—  
ARMISTICE PERIOD, 1919

Delivered to	Total Metric Tons	Total Value
Roumania, Children's Relief..	40.0	\$ 28,750.00
Roumania .....	19,405.7	5,905,760.02
Armenia .....	464.9	145,527.00
American Commission for Relief in Near East.....	1,217.4	340,503.68
J. W. Whittall & Co. (Turkey)	8,591.1	2,083,437.80
Bulgaria .....	4,010.9	882,387.00
French Army .....	907.2	200,000.00
Russian Volunteer Army.....	394.0	86,680.00
Miscellaneous cash sales.....	42.2	10,366.00
Total .....	35,073.4	\$9,683,411.50

The deliveries for Roumanian Children's Relief and to the Government of Armenia were paid for from the \$100,000,000 Congressional appropriation. For the Armenian deliveries the Relief Administration took notes which were turned over to the Treasury. The Children's Relief was a direct gift as explained elsewhere. The deliveries to the American Commission for Relief in the Near East were destined for Armenia, but represent supplies which were purchased for cash from the American Relief Administration.

The sales to J. W. Whittall and Company represent purchases by a British syndicate in Turkey, which was organized to purchase and sell foodstuffs to the Turkish population at a nominal profit in order to relieve some of the distress in that country (see page 265). The deliveries to Bulgaria were paid for in gold as discussed elsewhere (page 164). The other deliveries were all sales, for cash, of supplies

which were urgently needed, but which could not be secured locally because of the breakdown in commercial operations.

In the majority of instances, the sales from these Army stocks represent only a fraction of the deliveries made to the respective countries or agencies, and the reader is referred to other sections of this report for further details regarding these.

#### PURCHASES FROM THE UNITED STATES LIQUIDATION COMMISSION

As discussed elsewhere in this report, the United States Liquidation Commission, in 1919, made large sales of American Army surplus stock in France to many European countries. These transactions, in so far as they related to food and relief supplies, were carried on in close co-operation with the American Relief Administration. It was found that certain of these surplus stocks could be used to advantage in some of the A.R.A. relief programs and that they could be purchased at prices which would permit their transportation from French ports in competition with supplies direct from the United States. As shown in Table 141 (Appendix), the American Relief Administration purchased from the Liquidation Commission a total of 69,624.1 metric tons of these supplies, with a total delivered sales value of \$18,308,655.58.

These purchases consisted of the following:

Commodities	Metric Tons
Wheat flour .....	54,336.1
Cereal flour .....	1,376.3
Rice .....	2,691.1
Beans and peas.....	434.9
Pork products .....	6,982.5
Milk .....	2,723.4
Clothing .....	52.0
Miscellaneous commodities .....	1,023.2
Soap .....	4.6
Total tons .....	69,624.1
Total sales value .....	\$18,308,655.58

These supplies as sold by the Commission were in store in various French ports, and for the most part, they had to be transported by the American Relief Administration to North Baltic, or other ports, where they could be delivered on the relief programs to the several countries. This transportation was handled chiefly by a

fleet of "Lake" boats, which the Grain Corporation had chartered from the United States Shipping Board in order to transport supplies from Rotterdam and other North Sea and Channel ports up to the Baltic countries.<sup>1</sup>

The supplies purchased were stored principally at the three French ports of Bordeaux, Marseilles, and St. Nazaire, although considerable amounts of flour were turned over at interior warehouses.

Table 142 (Appendix) shows the detail of the total purchases at the several locations, and shows that the principal supplies were at Bordeaux and St. Nazaire.

This table also shows the total deliveries of these supplies to the country of destination and by the French ports from which they were shipped. The deliveries from internal warehouses in France are lumped together in this table and will be discussed later.

The same table also gives the movement of these supplies by vessels, and by destination. With the exception of the flour deliveries to France, all of the supplies from Bordeaux and St. Nazaire were moved by vessels chartered by the American Relief Administration. From Bordeaux, 12,512.3 metric tons were moved in eight cargoes to the ports of Hamburg, Libau, Riga, and Reval. The bulk of these supplies were delivered to the governments of Czechoslovakia and Latvia, with smaller amounts going to Esthonia, Lithuania, and Northwest Russia. Many of these commodities were also used for child feeding in Austria, Czechoslovakia, Esthonia, Latvia, and Jugoslavia. The remaining 16,250.1 tons from Bordeaux represents flour delivered to France.

Ten cargoes, carrying 19,041.8 tons of flour, pork, and milk, were shipped from St. Nazaire to the ports of Hamburg, Danzig, Viborg, and Reval. The bulk of these supplies were delivered to the governments of Poland, Northwest Russia, and Czechoslovakia. Relatively large amounts of these supplies were also used for child feeding in Poland, and smaller amounts in Esthonia and Czechoslovakia. The remainder of the supplies from St. Nazaire, consisting of 2,098.2 tons of flour, were delivered to the French Government.

The American Relief Administration had no vessels on the Mediterranean, and it was neces-

sary to handle the shipments from Marseilles in a different manner. Mr. Hoover learned that the Roumanians had some small vessels available and suggested that they should send these to Marseilles and undertake themselves to transport such supplies as could be made available to them. Three Roumanian vessels were sent to Marseilles under this arrangement, and transported a total of 6,742.3 metric tons of Army food, of which 300 tons were used for Roumanian Children's Relief and the remainder went to the government. The Roumanian Government financed the transportation of these supplies, which were sold to them at Marseilles on United States Treasury credit.

The fourth cargo of supplies from Marseilles was that of the "Kickapoo," a United States Shipping Board vessel which the American Relief Administration chartered for this voyage. As discussed elsewhere (see page 150), this vessel carried chiefly agricultural implements and miscellaneous supplies, which were bartered to the peasants in the Kouban (South Russia) for surplus wheat, which in turn was delivered to Armenia.

Of the deliveries of Army supplies at interior French warehouses, 52.0 tons of clothing and 4.6 tons of soap were obtained at Montoir in northwestern France, and were shipped to Czechoslovakia by rail. Here they were used in connection with the Children's Relief operations.

The remainder of the supplies from interior warehouses represented flour, which the United States Liquidation Commission had sold to the Esthonian Government, but which the French Government refused to permit them to move out of France because of the severe flour shortage there at that time. Mr. Hoover finally solved the difficulty by arranging for the French to pay the American Relief Administration for this flour, and the latter organization delivered other foodstuffs to Esthonia in place of the flour for which Esthonia had given notes to the United States Liquidation Commission. The 9,996.7 tons of flour delivered to France from interior warehouses represents the flour originally sold to Esthonia.

The total sales of Army flour to France by the American Relief Administration are shown by United States Army Quartermaster invoices in Table 47.

<sup>1</sup> See pages 130-33 for further details.

TABLE 47

SALES OF AMERICAN ARMY FLOUR TO FRANCE BY THE  
AMERICAN RELIEF ADMINISTRATION—  
ARMISTICE PERIOD, 1919

Q.M.C. Invoices (Paris Division) Invoice No.	Metric Tons	Value
12 .....	6,797.844	\$1,087,655.04
17 .....	2,587.142	413,942.72
25 .....	1,877.756	300,440.96
28 .....	1,177.472	188,395.55
29 .....	2,851.039	456,166.24
30 .....	360.737	57,717.92
43 .....	536.001	85,760.16
44 .....	67.668	10,826.88
45 .....	451.441	72,230.56
71 (Replaces No. 54) .....	336.804	53,888.64
56 .....	1,905.647	304,903.52
57 .....	2,370.896	379,343.36
58 .....	2,125.842	340,134.72
60 .....	286.029	45,764.64
61 .....	715.689	114,510.24
62 .....	345.142	55,222.72
63 .....	4,721.453	755,432.45
64 .....	684.336	109,493.76
Total .....	30,198.938	\$4,831,830.08

Table 48 shows the sources of these deliveries, by warehouses. Of the deliveries from interior warehouses, the bulk of the flour for France came from Montierchaume, and the remainder from scattered warehouses in different parts of the country.

TABLE 48

SUMMARY OF FLOUR DELIVERIES TO FRANCE FROM  
AMERICAN ARMY WAREHOUSES—  
ARMISTICE PERIOD, 1919

Location of Warehouse	Metric Tons	Total Value
St. Nazaire .....	2,098.244	\$ 335,719.04

Interior warehouses ....	9,996.664	1,599,485.72
Total .....	30,198.938	\$4,831,830.08

## EXCHANGE REMITTANCES

The urgent need for greater food supplies in the war-torn countries of Central and Eastern Europe, in 1919, has already been emphasized. This food was needed not only to save lives, but also to stabilize the newly formed governments in these liberated countries. A hungry and

starving population forms fertile soil for the spread of anarchy and bolshevism. To provide even the most necessary relief for these peoples required the mobilization of every form of credit which could be obtained. Public and private charity and government loans were being utilized to the utmost, but still there was not enough.

It was well known that there were thousands of Americans who had relatives or friends in Central and Eastern Europe, whom they would be glad to assist, but since all forms of communication had been severed during the war and in most instances had not been re-established, they had no way of transmitting that assistance.

Mr. Hoover conceived that here was a relatively large reservoir of credit which might be mobilized to assist in the relief work. Accordingly negotiations were entered into with the Federal Reserve Board, and with the several European governments, which terminated in plans to facilitate exchange remittances. Under the plan worked out, the Federal Reserve Board issued an order prohibiting the purchase of foreign exchange by dealers in the United States for certain specifically named countries, except from the American Relief Administration. The Relief Administration undertook to secure the needed local currency from the government in which the payee was located. The A.R.A. then retained the dollar value, which was placed to the credit of the government to be used in purchasing food supplies, or for other purposes which the government might indicate.

In the practical operation of the plan, a banker in an American city would receive an application from an individual to transmit a sum of money to a friend or relative in Poland, for example. The banker would remit this sum together with the application to the American Relief Administration in New York. The New York office cabled Mr. Hoover's office in Paris daily the total amount of the remittances received for each country. The Paris office forwarded this information to the A.R.A. Missions in the respective countries, and they, in turn, notified the governments of the amounts of currency which would be required when the schedules arrived by mail. On the arrival of the schedules, the A.R.A. saw to it that the local governments deposited the required currency in

the designated banks, where it was available to the payee. It was certain that a considerable number of remittances would be made for persons who could not be found by the disbursing bank. The Relief Administration undertook to see that these sums were returned to the remitting bank, but without interest. There were many safeguards to insure safety and accuracy in handling these remittances, which space will not permit us to discuss here.

The Exchange Remittance plan was put into operation on April 23, 1919, and continued until June 30, 1919, by which time conditions had become more stable, and the general relief operations were drawing to a close. During this short period of less than ten weeks the total number of remittances sold was 17,216, with a total value of \$8,900,676.29. Of this amount remittances to the value of \$2,428,820.14 were refunded either because the payee could not be located, or because satisfactory arrangements could not be made with the government of the designated country.

There were also remittances to the amount of \$111,715.26, which were executed by the United States Grain Corporation, either because they had facilities for handling them, or because these countries needed special credits to meet obligations due to the Grain Corporation. There remained therefore a net total of \$6,360,140.89 in executed remittances, which were accounted for on the books of the American Relief Administration.

In the beginning, arrangements were made to put the exchange remittance plan in operation in eight countries, namely: Bulgaria, Czechoslovakia, Finland, Austria, Yugoslavia, Poland, Roumania, and Turkey. Later on, the arrangements with Bulgaria and Turkey were canceled, all remittances to those countries returned, and Germany was added to the list.

As indicated above, the dollar credits arising from these exchange transactions were held by the American Relief Administration for the credit of the respective governments. The major portion of these credits were turned over by the governments to the A.R.A., European Children's Fund for child-feeding work. A portion was drawn upon by the respective governments for the purchase of food supplies in the United States, and a portion was used for the European Technical Advisers in connection with the re-

habilitation of the industry and commerce of these countries. The following summary shows the disposition of the Exchange Remittance Fund according to these several requirements.

#### SUMMARY OF DISPOSITION OF EXCHANGE REMITTANCE CREDITS

A.R.A., E.C.F., for child feeding.....	\$3,824,683.35
Account of governments.....	1,775,005.53
European Technical Advisers.....	759,997.72
Refund adjustments .....	454.29
Total .....	\$6,360,140.89

The detailed summaries of the Exchange Remittance operations showing remittance by countries of destination, sources of remittances, and the disposition of funds by countries are shown in Tables 179-182.

#### EUROPEAN TECHNICAL ADVISERS

Throughout the entire relief work, and particularly in 1919, Mr. Hoover was constantly bending his efforts toward the economic rehabilitation of the war-torn countries. The immediate job was to get food to these people to prevent actual starvation, but Mr. Hoover perceived that charitable relief could only be temporary and that the solution of their difficulties lay in the revival of industry and commerce. If the people could be put to work they would have money with which to buy the food they needed. Consequently, we find, time after time, that Mr. Hoover was making concrete suggestions to these governments as to how they might stimulate industry and trade, and put it on a firm foundation. Through the reorganization of the transport and communication systems in these countries, the A.R.A. was itself laying the foundations for such revival.

As early as March, 1919, Mr. Hoover suggested to Mr. Paderewski, the Prime Minister of Poland, that a Commission of Polish business men should be set up and provided with local and foreign credits as a revolving fund for the purpose of buying such commodities as Poland needed from foreign countries, and of selling in foreign markets the products of Polish industry and agriculture. It proved impossible to put such a plan into operation at that time, but after the peace treaty M. Paderewski requested Mr. Hoover to outline this plan. Mr. Hoover did this

in a long letter addressed to the Prime Minister under date of August 17, 1919.<sup>1</sup> Many of the features of this plan were put into actual operation by Poland, and were of great assistance in starting the wheels of industry and commerce in this new country.

Mr. Hoover also made many similar suggestions to the governments of other Central and Eastern European states, all of which were of material help in the period following the peace treaty. Among these suggestions was one to the effect that they should employ certain technical advisers, particularly American engineers, who could assist in the rehabilitation of trade and industry. It was Mr. Hoover's belief that, in addition to the technical help which such an engineer could render, the presence of a prominent American on the staffs of these governments would inspire confidence and greatly facilitate trade negotiations. Since most of the finance and the supplies needed would have to be obtained in the United States, it was important that such an adviser should be an American.

The following quotations from a letter which Mr. Hoover addressed to Dr. Edouard Beneš, the representative of the Czechoslovakian Government in Paris, will make clear the objects which it was hoped would be accomplished by this plan. This letter, dated July 11, 1919, read in part as follows:

DEAR DOCTOR BENEŠ:

The suggestion that I made to you this morning in connection with transportation matters in Czecho-Slovakia is as follows:

It appears to us from the experience we have had with transportation questions in Central Europe that Czecho-Slovakia is in vital need of securing an eminent American Engineer, with a few assistants, to act as Transportation Advisor of the government. Aside from the intrinsic advantage of the skill of such a gentleman, there are other reasons which appear to me are pertinent for taking such an action during the forthcoming year.

First, the Czecho-Slovak Government will probably be in need of railway material and finance from the United States and, if their Transportation Advisor is an American Engineer of standing, his reports will be of the greatest possible use in negotiations for such finance.

Second, the Czecho-Slovak Government will need to continue to set up further railway relationship with

the surrounding governments and, in view of the antagonistic feeling in many of these countries, an eminent American could be of a great deal of use in conduct of such negotiations. All of these governments will be seeking American assistance and the presence of an eminent American on the Czecho-Slovak Government staff would contribute, I am sure, towards practical and amiable settlement of transportation problems outside of Czecho-Slovakia. As you know, during the last six months we have carried on a general transportation service throughout Europe in the conduct of co-ordination of railway systems of different States, traffic on the Elbe, etc., and as I am compelled to withdraw these services with the demobilization of the American Army they will necessarily come to an end.

The ideal man for such a position would be Colonel Ryan, who has had charge of the Food Administration's distribution, formerly in Serbia and since that time in Germany. Before the war he was the Manager of an important railway. I do not know that Colonel Ryan would accept such a position, but I feel that he might do so.

Such a Transportation Advisor would require two or three assistants, for instance, to maintain a representative at Hamburg and another at Trieste, with possibly a third to maintain relationships with Polish and Austrian railways. I imagine that such a Commission might cost, for salaries and expenses, perhaps One Hundred Thousand Dollars for the twelve months. The problem of how to finance this in American dollars would at once occur to you, and I could make the following suggestion in this particular:

We have in our hands some unexpended balance of exchange remittances made to Czecho-Slovakia and, if the Czecho-Slovak Government would authorize me, acting under your guidance, to engage this staff, I would undertake to act as a trustee for the deposit of \$100,000.00 and engage that my New York office would attend to the details of paying salaries, etc., of such a staff, and would, of course, furnish the accounts to the Czecho-Slovak Government.

The matter is somewhat pressing as we are compelled to take steps at an early moment to the demobilization of our staff and these men will be returning to the United States and are already making arrangements to set up their pre-war relationships. I would be glad if you could let me know whether the Czecho-Slovak Government desires that I should proceed in the matter as above outlined.

Faithfully yours,

(Signed) HERBERT HOOVER

Letters making similar proposals for technical advisers were sent to the governments of Austria, Poland, and Jugoslavia (Kingdom S.H.S.). Each of these four governments readily accepted the proposal and the following Americans were appointed as chiefs of the Technical Adviser Missions to the respective governments: Austria, Col. W. B. Causey; Czechoslo-

<sup>1</sup> This letter is quoted in full in *America and the New Poland* by H. H. Fisher (Macmillan), pp. 267-271.

vakia, Lt. Col. W. B. Ryan, followed by Dr. Lincoln Hutchinson; Poland, Col. A. B. Barber; Jugoslavia, Col. Wm. G. Atwood.

Each of these men took with him a small staff of trained engineers and experts. In addition certain of the governments employed other American experts for special problems. For example, Dr. E. Dana Durand, an economist of world-wide reputation, became the Food Adviser to the Polish Government, and Mr. Irving Shuman was engaged by Mr. Paderewski, as Commercial Adviser.

In order to assist the Technical Advisers with contacts in America and particularly in the purchase of supplies, Messrs. Edgar Rickard and W. B. Poland maintained offices in New York in connection with the A.R.A., and were able also to assist greatly the various agents which came to the United States from these countries on important economic missions.

The Technical Advisers and their staffs remained in the respective countries from one to three years and were able to render invaluable service, particularly, in reorganizing the transportation systems, securing needed equipment, and in negotiating satisfactory agreements between neighboring countries with regard to through transportation, interchange of equipment, etc. They also assisted in re-establishing trade routes and the interchange of commodities.<sup>1</sup> The following letter to Col. Barber from Arthur Sliwinski, President of the Council of Ministers of Poland, dated July 29, 1922, shows something of the appreciation which these countries felt for the service rendered.

DEAR COLONEL:

In the name of the Polish Government I feel that I must express to you, before you quit the soil of our country, the gratitude which Poland owes you for what you have accomplished during the three years that you have spent among us.

You arrived in Poland at the moment when the

state, which had just been reconstituted after a century of foreign oppression and a war of long duration, was still struggling with a thousand political and economic difficulties. Under these difficult circumstances you brought to bear the effective aid of your experienced ability in the organization of the state railways. It was due to the normal functioning of the railways, to which your advice and intervention largely contributed, that Poland, during very perilous times, was able to avoid disaster due to lack of coal and food and to develop uninterruptedly her reborn commerce and industry. Neither would I fail to mention the services which you rendered to Poland both at Genoa and at Geneva during the various conferences dealing with the economic reconstruction of Europe and the organization of the economic system of Upper Silesia.

The rôle which you have played in all political and economic questions relating to Poland cannot but contribute to the maintenance and strengthening of the excellent friendly relations which exist between Poland and the United States of America, and I am sure that your departure will not in any way break the ties which you have formed with us and that you will remain always a true bond of union between our two countries.

ARTHUR SLIWINSKI

*President of the Council of Ministers*

As indicated in Mr. Hoover's letter (page 71) it was proposed to the several governments that the Technical Advisers should be paid out of credits arising from the A.R.A. exchange operations. This the governments agreed to and as shown in Table 180 the following amounts were expended for this work:

Austria .....	\$184,997.72
Czechoslovakia .....	100,000.00
Poland .....	325,000.00
Jugoslavia .....	150,000.00
Total .....	\$759,997.72

<sup>1</sup> For complete statement of accomplishments, see *Report of European Technical Advisers Mission to Poland, 1919-1922* by A. B. Barber (New York, 1923), and manuscript reports from other missions in Hoover War Library, Stanford University.

## RECONSTRUCTION PERIOD

As presented in Table 1 (page 7), the fourth and final major division of this decade of relief is designated as the Reconstruction Period. With the signing of the peace treaty at Versailles on June 28, 1919, the period of official relief in Europe came to a close. The months of July and August, 1919, were occupied in completing the deliveries of relief supplies contracted for prior to July 1 and in closing up the relief operations. During the first seven months of 1919 the primary purpose of the Director General of Relief had been fulfilled, viz., that of furnishing foodstuffs to the newly constituted countries until the next harvest. With the new harvest in sight these countries would be able to take care of themselves for some months at least.

However, long before this time Mr. Hoover realized that Europe could not get through the next winter without serious suffering unless she received some outside assistance. Obviously, it could not be expected that either the United States or any other government could continue indefinitely to furnish food to these countries either on credit or as charity. Furthermore, such continuing relief would be good for neither the receiving governments nor their peoples. If these nations were to survive they must make their own arrangements to take care of their own people. The arrival of the new harvest therefore formed an opportune time at which to withdraw all official relief and to put the responsibility for future food supplies squarely up to the respective governments.

On June 10, 1919, the Director General of Relief submitted a memorandum to the Supreme Economic Council which read in part:

. . . . We are notifying the various governments that, while American intervention in the distribution of overseas foodstuffs in the present form will cease with harvest, we will be glad to receive an estimate from each of the governments under relief in respect to the assistance which they will need during the coming year from the United States. Further that we consider it desirable that these estimates should be presented in the United States by a Commission fully empowered to handle credit, shipping, and collateral questions. Under this arrangement there will therefore be no break in American interest and helpfulness, and, on the other hand, a definite step will have been attained in

advancement from sheer relief to economic measures in co-operation with the countries concerned. . . .

### CHILDREN'S RELIEF

As pointed out in a preceding section of this report, the pitiful situation of the children in the newly liberated countries had attracted Mr. Hoover's attention soon after his arrival in Europe. By the end of February, 1919, a special Children's Relief Bureau had been organized in the American Relief Administration and definite programs for child feeding were carried out in most of the countries.<sup>1</sup> As the period of official relief came to a close it became evident that the children would be heavy sufferers in the food shortage that was certain to develop during the next year. Many of the children who were being cared for were war orphans; all of them had suffered from undernourishment during the war and many of them were just beginning to show signs of improvement under the influence of these increased rations. Mr. Hoover could not leave these children to their fate and he accordingly began to make plans for the continuance of children's relief under a charitable foundation.

On July 7, 1919, Mr. Hoover sent a long cable from Paris to the New York office of the American Relief Administration, which read in part as follows:

In order to meet all the various complexions of the problem of winding up the Government's relief measures and of continuing the Children's Relief, of applying any residuum of the contingent funds to this purpose, with the approval of the various governments in Europe, and of handling and developing private charity, we believe it is critically necessary that we should at once set up a new and wholly private organization, which we propose to call the American Relief Administration European Children's Fund. . . .

In this cable Mr. Hoover further suggested that there should be a committee formed in the United States consisting of some of the leading men in the Food Administration and the Relief Administration and that they should incorporate at once as a private charitable organization under the laws of the state of New York.

<sup>1</sup> See page 84.

This proposal met with the approval of the men in New York and the organization was perfected. Although an outgrowth of the American Relief Administration, which acted as an agent of the United States Government, the new organization, the A.R.A. European Children's Fund, was purely a voluntary private organization for the promotion of charitable purposes. It had no official charter although it did enjoy the confidence of the Government and assumed responsibility for the distribution of the remaining food supplies donated from the Congressional Appropriation and the President's National Security and Defense Fund. As the American Relief Administration and the Grain Corporation withdrew from the various countries the European Children's Fund took over the remaining equipment and continued their work without a break in the program.

#### EUROPEAN CHILDREN'S FUND

The headquarters of the E.C.F. were in New York and the European branch was in London. Mr. Hoover was chairman, Edgar Rickard was director for America, and Walter Lyman Brown was director for Europe. Field missions were located at Helsingfors, Finland; Reval, Esthonia; Jamburg, Northwest Russia; Riga, Latvia; Kovno, Lithuania; Warsaw, Poland; Prague, Czechoslovakia; Vienna, Austria; Budapest, Hungary; Bucharest, Roumania; and Belgrade, Jugoslavia.

The New York office controlled policy and arranged finances, purchases, and shipping. The London office carried out the policies by supervision of the work of each mission, made such purchases in Europe as were necessary, prepared programs, directed shipments, and handled such accounts, statistics, and records as were needed.

All commodities purchased in the United States were charged to the London office as shipped and these in turn were charged against the various relief operations as and when distributed. All expenditures or deliveries in each country were reported weekly to London with properly approved and receipted vouchers for every expenditure or delivery. The books of both the New York and London offices were audited monthly by recognized chartered accountants. These records and receipts form the basis of the statistics contained in this report,

all of which are in reconciliation with the accountants' figures.

When the European Children's Fund began operations in August, 1919, it was expected that these could be discontinued in the summer of 1920 at the time the new harvest became available. However, economic recovery was slower than had been anticipated. The 1920 crops were less in many countries than had been hoped for, and milk and fat supplies, due to the continued shortage of cattle feeds, were still entirely inadequate. Furthermore, the Bolshevist invasions had again prostrated the Polish people. It seemed necessary, therefore, that some assistance should be continued to the children of certain of these countries. It was estimated that there were still some 2,500,000 children who would need help in 1920-1921. In the summer of 1920 child feeding was entirely discontinued in Finland and in Jugoslavia, with important reductions in Czechoslovakia and a few other countries.

In the summer of 1921 it was found that some child feeding would still be necessary, although it was possible to discontinue all work in Czechoslovakia and Hungary. In the spring of 1922 child feeding was discontinued in Poland and Austria and the operations in Central Europe were practically closed during the year.

In the meantime, however, the terrible famine in Russia had broken out in the summer of 1921. This required the remobilization of the relief organization on a scale larger than ever, and continued until late in 1923 before the whole of these operations could be discontinued.

During the course of the five years 1919 to 1924 the A.R.A. E.C.F. found it necessary to undertake many subsidiary operations and to co-operate with many other relief organizations, often for the relief of certain portions of the adult population as well as for child feeding. Among the more important of these undertakings were the A.R.A.W. operations, including food drafts and bulk sales;<sup>1</sup> the various special programs, including intelligentsia and student feeding; the handling of the United States Grain Corporation deliveries to Russia; the European Relief Council drive; and the co-operation with the Red Cross, the Joint Distribution Committee, American Friends Service Committee, the Y.M.C.A., and many other organizations.

<sup>1</sup> See pages 90-95.

The European Children's Fund began to function about August 1, 1919. As fast as the American Relief Administration and the United States Grain Corporation withdrew from a country or locality where child feeding was being carried on, the new organization stepped in and continued the work without any break in its continuity, and often with the same personnel. The change in organization involved no change in policies inaugurated by the Children's Relief Bureau under the old American Relief Administration.<sup>1</sup>

Each field mission was charged with the duty of maintaining a continual check upon conditions in each community within its territory and to make such adjustments as were needed in required supplies. In this way it was possible to reduce excessive stocks in one community and to increase supplies to another where the needs were greater. Each month the local committees forwarded a statement showing the number of children needing relief during the coming month. These statements were assembled by each field mission and forwarded to the London office with notes and recommendations for modifications in the respective local requirements. These statements formed the basis on which advance supplies were ordered by the London office through New York. Additional checks on the equitable distribution of supplies were assured through the reports of American inspectors, who were constantly in the field summarizing conditions, visiting kitchens, and reporting special needs or suggesting changes in requirements.

A system of central and regional warehouses was maintained at strategic points,<sup>2</sup> and as requisitions were approved the commodities needed were issued to the local kitchens.

There were three steps in the selection of children needing aid: first, their registration, usually through school teachers; second, an investigation by the local committee; and third, a physical examination by a local physician. These examinations were repeated at regular intervals and any child reaching a fair state of nourishment was taken off the list to make way for another whose condition was worse.

<sup>1</sup> See pages 84-86 for description of these policies and methods used in child feeding.

<sup>2</sup> See page 93.

<sup>3</sup> See pages 49-50 and 88-90.

<sup>4</sup> See pages 86-88.

All child feeding was carried on in special kitchens set up for that purpose or in institutions such as orphanages or hospitals. In most countries a noonday meal was served six days a week. Each child admitted to feeding received a card which was punched for each meal received. These meals were prepared by the local committees which bore all the expense of preparing and serving the meal. In some instances a small charge, amounting to about one cent per meal, was made by the local committee to defray the necessary expenses. However, it was an unvarying rule that no child was refused admittance because of inability to pay. At other places these expenses were met by local donations and no charges were paid by the children or their parents. The services of the local committees were always voluntary, and in most instances rentals for kitchens and equipment were also donated.

#### FINANCE FOR EUROPEAN CHILDREN'S FUND

The basis of the work of the A.R.A. European Children's Fund consisted of the undistributed stocks of child-feeding supplies which had been furnished by the American Relief Administration during the summer of 1919. These supplies had been paid for out of the Congressional Appropriation and the President's National Security and Defense Fund.<sup>3</sup> All child-feeding work was based upon furnishing actual meals under supervision. The programs had been planned to carry this work through the fall of 1919 until after the new harvest had been completed and was available. When the American Relief Administration decided to withdraw its official work after the peace treaty, these supplies were already in stock, or en route. Mr. Hoover secured the consent of President Wilson to have the distribution of these supplies administered by the European Children's Fund. The total stocks of child-feeding commodities which were thus distributed under the direction of the European Children's Fund are shown in Table 147 and total to 17,585.0 metric tons, valued at \$6,625,051.36. The distribution of these commodities to the final country of destination is accounted for under the European Children's Fund.<sup>4</sup>

The presence of these supplies in European ports or en route made it possible for the European Children's Fund to begin functioning at once. However, the program which the E.C.F.

contemplated involved the expenditure of much larger sums of money.

The first source of additional funds for this work came from the surplus accumulated by the London office of the Food Administration Grain Corporation in connection with the handling of American Relief Administration supplies. In the contract<sup>1</sup> drawn up between the American Relief Administration and the Food Administration Grain Corporation there was the following paragraph:

6. It is the intention of this contract that the Grain Corporation shall make no profit from its relief operations and shall suffer no losses. It therefore agrees that it will deduct from its gross receipts on all supplies, other than those delivered to the American Relief Administration for payment from the hundred million dollar appropriation, all items of cost and expense on such sales, including expenses paid under paragraph 5 of this contract [expenses of A.R.A. in Europe], and will hold balance as a special fund. From this fund shall be paid, first, any items of insurance or expense relating to the cargoes delivered against the hundred million dollar appropriation and not repaid from the United States Treasury. The balance, if any, shall be paid to the Director General of Relief or his successor, or such person, institution, or government as he or his successor may direct, for charitable purposes in Europe. In case there should be no Director General of Relief such direction shall be made by the United States Wheat Director. . . .

It has already been pointed out<sup>2</sup> that, due to the extraordinary hazards of conducting shipping and commercial operations in Europe immediately after the Armistice, the Grain Corporation felt it necessary to add a sufficient margin to protect it against any unusual loss. This margin had to be higher than usual because no insurance company would take the risk on this business. Furthermore, the Grain Corporation had very definite responsibilities in connection with the marketing of the American wheat crop. If it should risk the impairment of its capital through its connection with the European relief work it might cause serious apprehension at home and would most certainly make the Corporation liable for serious criticism. Therefore, to assure against this risk, which no commercial concern would assume at any price, larger margins above cost were carried than would normally be deemed essential.

Fortunately, the losses actually suffered by

the Grain Corporation on its European business were smaller than had been anticipated and, consequently, the operation showed a rather large net remainder. This remainder under the arrangements finally made was turned over to the European Children's Fund to be used in child feeding in the several liberated countries.

As soon as Mr. Hoover had determined upon the establishment of a charitable organization for children's relief, he addressed a letter to each of the countries to which relief supplies had been delivered, outlining the plan of using such profits as might develop and asking their approval of this action. Following is the letter addressed to the Czechoslovakian Minister of Foreign Affairs, which is similar to those addressed to the other governments:

51, AVENUE MONTAIGNE  
PARIS, FRANCE  
June 12, 1919

*M. Edouard Benes*  
*Minister Foreign Affairs*  
*Czecho-Slovak Republic*  
*18, rue Bonaparte, Paris*

SIR:

In the course of supplying foodstuffs to the Republic of Czecho-Slovakia under our arrangement of February 28, 1919, the American Relief Administration has delivered all foodstuffs at fixed prices as near to the actual outlay as could be determined, with a sufficient margin to protect the Relief Administration against loss arising from the unknown factors in the continuing state of war where every commercial service had been destroyed, and private capital did not dare to venture.

The whole operation of relief to Europe has been by a coordination of shipping, finance and administration conducted as one operation and it has of course been impossible in advance to determine the exact cost for the contingent liabilities inherent in the operation. It is possible therefore that with the closing of the program in the month of July, and a final calculation of cost and liabilities incurred, there may be some profit accruing to the Relief Administration or its agencies.

Under the agreement of February 28, 1919, possible profits could of course be retained by the Relief Administration, but it is our earnest desire that no profits should be earned from the relief operations in Czecho-Slovakia. If such a profit should exist, it will represent partially the saving effected through the sacrifice of the representatives of the United States Food Administration, the American Relief Administration and the Grain Corporation, whose services are partially or wholly voluntary. Even when salaries are received they are usually paid by other departments of the United States Government without being calculated in the price of the foodstuffs. The prices fixed have therefore been

<sup>1</sup> For text of this contract see page 46 n.

<sup>2</sup> See page 41.

less than commercial prices in a free market. Therefore such margins represent a gift of service to Czecho-Slovakia by these gentlemen.

In these lights I propose that any such total residual sum as may be determined by the Food Administration or its agencies to be in fact a profit after the completion of our total operations should be lodged with me or such organizations as I may erect in New York to be added to public charity for the continued support of child relief in Czecho-Slovakia as a contribution representing service.

It is my intention to organize the supply of further funds by public charity in the United States and the addition of such residual amounts as above would give a substantial substratum and endurance to this effort.

It is very desirable however that such action should have the full approval of the Czech-Slovak Government, and I would be glad if you would indicate that this course would meet with their approval. It is my intention to personally direct the organization and extension of such work in the United States if the above plan can be adhered to. It has been accepted by the other Governments to which it has been submitted.

Faithfully yours,

(Signed) HERBERT HOOVER

This proposal was enthusiastically endorsed by each of the liberated governments to which relief deliveries had been made and thus gave official approval to the turning over of these funds to the European Children's Fund when it was created.

Other important sources of funds for the European Children's Fund were the contributions from other charitable and national organizations in the United States, the funds collected in the European Relief Council campaign, the proceeds of the exchange remittances, the sale of food drafts and bulk sales, the donations by such organizations as the Commonwealth Fund, the Laura Spelman Rockefeller Memorial, the American Red Cross, the American Friends Society, the Jewish Joint Distribution Committee, the Y.M.C.A., and many others.

For the Russian relief operations special funds were made available through the Congressional appropriation of money from the capital of the Grain Corporation, Soviet gold, United States Government surplus, and American Red Cross medical supplies, and from many other sources.<sup>1</sup>

#### EUROPEAN RELIEF COUNCIL

As shown on page 145, one of the important sources of finance for work in the Reconstruction Period was the fund collected by the European Relief Council.

In the latter part of 1919 and in 1920, it was clearly recognized by the relief workers in Central Europe that there was an enormous need for charitable aid to these countries, covering many months and even years. These war-torn countries and their newly organized governments were not in a position to restore anything approaching normal economic conditions for a long time. In the meantime, the impoverished population *must* eat if anarchy and rebellion were not to gain the upper hand. There were a number of well-organized American relief agencies already in the field doing their utmost to alleviate the terrible suffering on every hand. Each of these organizations was constantly appealing to its constituents and to the American public for the urgently needed funds with which to continue this work.

Realizing the enormity of the need and also the fact the such unco-ordinated efforts were not likely to secure the necessary funds for this work, Mr. Hoover called together the leaders of many of these relief organizations and proposed that their efforts, particularly as applied to child relief, should be co-ordinated. It was only by such co-ordination and by a joint appeal to the American public that there seemed any chance of obtaining the staggering sums of money needed for this work.

As a result of Mr. Hoover's efforts there was organized in the fall of 1920 the European Relief Council, which comprised nine organizations, as follows: American Friends Service Committee, American Red Cross, American Relief Administration, Federal Council of the Churches of Christ in America, Jewish Joint Distribution Committee, Knights of Columbus, National Catholic Welfare Council, Young Men's Christian Association, and Young Women's Christian Association.

An executive committee was organized with Herbert Hoover, chairman; Franklin K. Lane, treasurer; Christian A. Herter, secretary; and the following representatives of the nine organizations in the order named above: Dr. Rufus M. Jones, Dr. Livingston Farrand, Edgar Rickard, Dr. Arthur J. Brown, Felix M. Warburg, James A. Flaherty, Michael J. Slaterry, C. V. Hibbard, and Miss Sarah S. Lyon.

It was decided by the Council that child relief in Eastern and Central Europe should have priority over any other form of European relief

<sup>1</sup> For further detail see pages 245-47.

until the next harvest. On the basis of careful surveys it was estimated that a total 3,500,000 ill, undernourished, and orphan children would require support until the harvest of 1921. It was further estimated that \$33,000,000 would be required for this work, of which \$10,000,000 would be needed for medical service and care and \$23,000,000 for mass child-feeding and clothing requirements. This vast program contemplated the greatest collection from the American public for charitable purposes ever undertaken by any organization. Furthermore, it came in a period of financial depression and at a time when the community at large was just emerging from generous and repeated financial support of various war activities.

The success of this undertaking was due largely to the thorough organization for the work and its support by leading citizens in every state. This support in turn was secured because of the prestige and the confidence in the Chairman, because the appeal was for children and because of the consolidated appeal of nine relief organizations all recognized for ability and integrity.

The Chairman appointed four committees upon which the burden of organization fell. These were the Executive, Control, Publicity, and Finance committees.

Voluntary state organizations were perfected in every state, often headed by the governor or, if not, by another out-standing citizen. Local committees were formed in nearly every city and many smaller places. Organizations were also perfected in Alaska, Hawaii, the Philippines, and the Canal Zone, which turned in substantial subscriptions. The success of the drive for funds which began December 19, 1920, and ended April 1, 1921, was due largely to the energetic efforts of the local chairmen and their co-workers and to the assistance rendered by local banks, newspapers, and other businesses, and by such nation-wide organizations as that of the *Literary Digest* and the many charitable foundations. It would be far beyond the scope of this report to attempt to name the hundreds of organizations and the thousands of individuals, who by their untiring efforts made this campaign a success.

<sup>1</sup> See *National Collection of European Relief Council, 1920-21* (New York), *Interim Report of European Relief Council* (New York, May 31, 1921), and *Final Report of European Relief Council* (May 31, 1922), issued by the American Relief Administration as Liquidators of European Relief Council.

Various publications of the European Relief Council and of the American Relief Administration have given these and many other facts regarding this campaign.<sup>1</sup> The summary pre-

\* It is impossible to estimate the total influence of this publication upon the whole campaign in this appeal, as in others of the Hoover appeals, because of its special efforts, which covered the entire United States to the benefit of local efforts of all the constituent bodies.

† This represents donations of United States Treasury Certificates of Indebtedness, Liberty Loan Bonds, and other securities at par value.

‡ The proceeds of the Motion Picture Campaign were turned over by the Motion Picture Campaign headquarters, to the various state depositories and national headquarters of the European Relief Council. While it is estimated that more than \$1,000,000 were brought in from this campaign, they are credited here with the amount of \$169,187.76, which they turned over directly to the Relief Council.

§ The various Community Chests and funds, of which there were thirty in number, contributed upward of \$1,000,000. However, since only those contributions in excess of \$25,000 are listed separately, the remaining twenty-four community funds were totaled and entered as one item in the amount of \$112,000.

¶ The school children of New York City contributed \$100,000 to the drive. It is also estimated that more than \$500,000 was contributed by school children of the United States and Territories, but New York was the only state that segregated the donations as between school children and other donors.

sented herewith based on the audited accounts of the Council will show the origin and disposition of the funds collected.

The contributions received by the European Relief Council totaled \$29,556,071.90, or approximately three and a half million dollars less than the mark set at the beginning of the campaign. Considering the difficulties of collecting funds during this particular period of economic and financial stress, the outcome can only be regarded as highly successful. Because of the considerable fall in the price of food, clothing, and transportation between the time that plans were made for the campaign and its completion, it was believed that the funds collected would accomplish all the work the Council had planned. According to the audited statement the total cost of conducting the campaign amounted to only \$677,929.22, or 2.31 per cent of the total contributions. These expenses were

paid by the American Relief Administration out of credits arising from their food draft operations (see page 95) so that every dollar contributed to the European Relief Council was available for relief purposes.

Table 49 shows the sources of the larger contributions to this fund. Throughout the campaign emphasis was placed upon the small contributions by individuals, and results show that over \$10,000,000, or more than one-third of the total, was made up of such contributions to state and national headquarters. The final reports of the European Relief Council show that more than 3,000 persons gave their time and energies to this service and it is estimated that more than 7,000,000 persons contributed to the funds.

Table 50 gives an analysis of the Relief Council contributions by state of origin so far as this could be determined.

The allocation of European Relief Council

Nebraska .....	197,715.27		
		Total contributions .....	\$29,556,071.90

funds among the several relief organizations was as follows:

A.R.A. European Children's Fund.....	\$15,669,899.59
American Red Cross.....	10,000,150.00
Joint Distribution Committee.....	3,000,000.00
American Friends Service Committee..	861,022.31
National Polish Committee.....	25,000.00
Total contributions .....	\$29,556,071.90

The European Children's Fund was therefore responsible for the distribution of \$15,669,899.59, which is shown in the table on page 145 as one source of relief funds in the Reconstruction Period. Various other allocations of funds to other relief organizations were made by the A.R.A. from its share of the Relief Council funds. However, these were made for special purposes, such as the student relief discussed on pages 110-11, which was carried on in close co-operation with the Y.M.C.A. organization, but which for the most part was directed by the European Children's Fund.

#### TOTAL RELIEF DELIVERIES DURING THE RECONSTRUCTION PERIOD

Table 1 (page 7) shows that during the Reconstruction Period the total relief furnished to Europe, within the scope of this report, amounted to 1,571,534.1 metric tons and a total value of \$220,704,581.78. Although considerably smaller in volume than the relief furnished during any of the three preceding periods, it is to be remembered that dependence for finance in this latter period was more largely upon benevolent contributions, and also that the character of the relief furnished was quite different. During each of the three preceding periods relief was being delivered to governments and the responsibility was for feeding whole nations. During the Reconstruction Period, relief was largely restricted to the furnishing of supplementary meals to children and to a few other special classes of the population. With the exception of the Russian relief, it represented largely the tapering off of the vast operations which were necessary during the war and the Armistice Period.

Table 51 summarizes the total relief deliveries accounted for during this period, under the three principal categories of relief organizations involved. Table 148 (Appendix) gives the detail

of the commodities supplied under each of these categories.

The deliveries under each of these categories will be discussed in the following pages. It may be pointed out here that the American Relief Administration European Children's Fund was the central organization for the work of this period. Under "Other American Organizations" is included the work of a large number of charitable societies so far as their activities were carried on in direct co-operation with the European Children's Fund. Under this heading there are also included the deliveries by the United States Grain Corporation under the authority of Congress both to Central Europe and to Russia. Also the United States Government surplus medical supplies for Russia are included here.

TABLE 51

#### SUMMARY OF TOTAL RELIEF DELIVERIES IN THE RECONSTRUCTION PERIOD, BY PRINCIPAL OPERATIONS

Deliveries by	Total Metric Tons	Total Value
European Children's Fund	422,098.2	\$ 84,639,241.40
Other American organizations .....	942,267.0	96,506,869.36
Countries other than United States .....	266,229.1	44,222,231.22
Total .....	1,630,594.3	\$225,368,341.98
Less duplication * .....	59,060.2	4,663,760.20
Grand total, net.....	1,571,534.1	\$220,704,581.78

\* These duplications include (1) expenditures for advance deliveries against Soviet gold which are covered both under "E.C.F." and "Countries other than the United States" and (2) certain warehouse sales to the American Friends Service Committee which are included both in the A.R.A.W. operations and in the deliveries by the Friends Committee under "Other American organizations." The amounts involved in these two duplications are:

	Tons	Value
Soviet gold .....	57,823.0	\$4,322,450.83
Sale to Friends.....	1,237.2	341,309.37
Total .....	59,060.2	\$4,663,760.20

These transactions are more fully discussed in the text; cf. pages 120 and 246.

The duplications deducted to obtain the net total in Table 51 are caused by inter-organization deliveries. The most important of these in the Reconstruction Period concerns certain supplies delivered to Russia by the American Relief Administration but subsequently paid for by a portion of the Russian gold.

The supplies furnished during the Recon-

struction Period were delivered to sixteen countries of Europe, in addition to sundry accounts. Table 52 (page 82) summarizes the total deliveries during this period from all sources by countries of destination.

The largest deliveries to any one country in

point of value were those to Poland, while the supplies furnished to the Soviet Republics represented a much larger tonnage but a slightly smaller value. The Russian supplies consisted to a large extent of grain and corn grits, which were much cheaper per ton than the type of supplies

CHART VI

Total metric tons and percentage of deliveries, by countries—Reconstruction Period. The detail for all other countries is shown in Table 52, page 82.

furnished to the other countries. The third country in point of value of relief received was Austria, with Germany fourth, although consider-

dren's Fund in Table 51 may, therefore, be divided under four heads, as summarized in Table 53.

TABLE 52

Grand total, net.....	1,571,534.1	\$220,704,581.78

ably less than to any of the first three. The relief to Poland and Austria was greatly increased by the flour furnished by the United States Grain Corporation under the authority of Congress.

#### I. DELIVERIES UNDER THE DIRECTION OF THE EUROPEAN CHILDREN'S FUND

As pointed out in earlier paragraphs, the American Relief Administration European Children's Fund was responsible not only for the delivery of supplies purchased with its own funds but also for a large portion of the child-feeding supplies provided by the Congressional Appropriation for Relief and by the President's National Security and Defense Fund. In order to simplify the presentation, all of the supplies from the two last-mentioned sources are regarded, for the purposes of this report, as part of the European Children's Fund. The European Children's Fund was also responsible for the organization and operation of the A.R.A. Warehouses, through which the food and clothing drafts and bulk sale operations were carried on.

The deliveries credited to the European Chil-

TABLE 53

SUMMARY OF RELIEF DELIVERIES DIRECTED BY THE EUROPEAN CHILDREN'S FUND—RECONSTRUCTION PERIOD, 1919-1924

Source	Total Metric Tons	Total Value
Congressional Appropriation	36,002.1	\$13,433,918.33
President's National Security and Defense Fund.....	7,823.1	2,949,217.23
European Children's Fund..	337,953.5	58,370,700.11
A.R.A. Warehouses .....	40,319.5	9,885,405.73
Total .....	422,098.2	\$84,639,241.40

More than two-thirds of the total value of the relief accounted for in this table was supplied by the European Children's Fund itself. The Congressional Appropriation and the President's National Security and Defense Fund together furnished something more than \$16,000,000 worth of supplies while the A.R.A. Warehouse operations amounted to nearly \$10,000,000.

Table 54 shows the total relief deliveries made under the direction of the European Children's Fund, by countries to which the supplies were delivered. Relief was furnished to fourteen dif-

ferent countries, in addition to sundry accounts. Deliveries to the Soviet Republics of Russia during the great famine of 1922 and 1923 accounted for 230,597.9 metric tons of supplies valued at \$28,992,756.94. The next largest deliveries were to Poland, totaling \$24,500,251.54. Although

this amount was less than \$4,500,000 below the value of the deliveries to the Soviet Republics, the tonnage going to Poland was only a little more than one-third that supplied to Russia. This is accounted for by the much greater value per ton of child-feeding supplies, including

CHART VII

Total value and percentage of deliveries, by countries—Reconstruction Period. The detail for all other countries is shown in Table 52, page 82.

chiefly milk, cocoa, and fats compared with the flour, meal, and corn grits which made up a large part of the Russian famine relief. The country receiving the third largest amount of relief under E.C.F. direction was Austria, with \$13,193,794.30. Other countries received smaller amounts in proportion to their needs. The allocation of these supplies is discussed in greater detail under the individual operations and under the respective countries.

#### CONGRESSIONAL APPROPRIATION, CHILDREN'S RELIEF

Shortly after the American Relief Administration began operations in the early months of 1919, the pitiful condition of the children in many of these countries attracted Mr. Hoover's attention. Throughout the period of the war, the Commission for Relief in Belgium carried on special feeding of children in that country. The work there had been so successful and had shown such good results that it seemed worth while to extend this on a larger scale to these other devastated regions.

Investigations in many of these newly liberated countries showed that as many as 90 per cent of the children under fifteen years were so seriously undernourished that there was grave danger of permanent injury to their health. Rickets, scurvy, and tuberculosis were extremely prevalent. Reports from all sides showed that many of these children were so undernourished that they would no longer play or smile. They could not run but sat or lay down, taking no interest in their surroundings.

The effect of such conditions, as well as the scenes of horror through which they had passed, must have made deep impressions on the minds of these children. It was said that for months after the war the children in many villages continued to play "Atrocities" to the horror of the adult population. The children from the Baltic to the Black Sea had experienced so much of terror, deprivation, and suffering from the war as to give grounds for fear that their minds had been so deeply impressed as to affect their adult psychology.

Certainly, quite apart from the human element of relieving suffering, these were not the proper conditions under which to bring up the men and women that were to control the future destinies of Europe, and perhaps the world.

It was these considerations which led Mr.

Hoover to inaugurate the first child-feeding program. It was proposed to make this a direct gift from the American people to the children of these countries. It was hoped that the effect of food arriving suddenly from a distance, by an unseen hand, without price or compensation, would do much to develop their ideals of justice, altruism, and citizenship and perhaps obliterate in a large part the influences of the degrading environment of war.

The results which were evident in the latter part of 1919 showed that these contentions were in part, at least, justified. The demonstration upon Mr. Hoover's visit to Warsaw in August, 1919, and the hundreds of letters from individuals, societies, and government officials which were received, showed how deeply this work was appreciated at that time. Probably there is nothing which the American Government has ever done which brought such heartfelt thanks from so many persons, or which did so much at the time to make the name of America and the United States revered in all parts of Europe.

*Organization of A.R.A. Children's Relief.*—By February, 1919, Mr. Hoover had received reports of the conditions in sufficient detail from most of the liberated countries to cause him to act at once in the matter of child relief. The Act of Congress of February 25, 1919, had authorized the President at his discretion to use parts of the \$100,000,000 appropriation as gifts to the suffering people of Europe. Mr. Hoover secured President Wilson's approval to use a portion of this fund for child feeding, which was to be a gift from the American Government and quite distinct from the general relief program, for which the respective governments were required by Congress to pay either in cash or by notes.

A special Children's Relief Bureau was set up as part of the American Relief Administration. This Bureau, with headquarters in the Paris office of the A.R.A., was under the joint supervision of Colonel A. J. Carlson, of the University of Chicago, and E. A. Peden, of Texas. Special representatives were placed in the relief missions in the different countries. Their duty was to organize and supervise the child-feeding operations in each country.

In organizing this child-feeding work, several basic principles were outlined and strictly adhered to. These were, first, that no children's relief should be extended to countries which

were able to care for their own people; second, that the selection of children should be based solely on their state of undernourishment, preferably as determined by medical examination, and that no preference was to be given because of race, nationality, creed, politics, or class; third, that one of the factors in determining the extent of the relief furnished must be the willingness of the people to help themselves by such material contributions as they were able to make; fourth, that all distribution was to be carried out by local organizations under the supervision and control of the A.R.A.; fifth, that all children were to be fed in public kitchens and that no food was to be taken from the premises unless exceptional conditions made it necessary to make such arrangements; and, finally, that the A.R.A. representatives must refrain from any participation in political, military, racial, or other controversial questions and must abstain from personal business activities.

The rule requiring food to be consumed on the premises was necessary to make certain that the rations intended for a child did not go to others. This was strictly adhered to except in certain parts of Finland, Yugoslavia, Northwest Russia, and Esthonia, where the most needy children often lived miles away from the nearest village, and it would have been a severe hardship to require them to come to a central kitchen.

The first duty of the local Children's Relief representative of the A.R.A. was to determine some approximation of the number of children that would require relief and thus give a basis for a program of importation. Next, it was his duty to acquaint the local government with the aims of the Administration and, with their assistance, to organize a national committee to arrange the details of the internal distribution. This committee, with the assistance of the A.R.A. representative, was then to organize the network of subsidiary organizations necessary to distribute the food to needy children in the form of cooked meals.

The national committee operated by dispatching representatives to local areas to organize a committee in each town or district where feeding was to be undertaken. Upon arriving at a town this representative interviewed a few influential persons, usually the mayor or a priest, and asked to have assembled at once a

small gathering of leading men and women, such as the head of any local charitable organization, a physician, a prominent Jew, a member of the school board, and others. The proposed work was first described to this gathering and the requirements regarding a local committee outlined. One of the important rules regarding such local committees was that they must be representative of all prevailing races, religions, and classes. Where local conflicts existed between such groups, they were induced by all means possible to subordinate such differences to the higher purposes of this work. The records of the Administration show that in many instances this influence, exerted solely in the interest of child welfare, often brought about mutual understandings which seemed to augur well for future co-operation between these groups.

Although methods necessarily differed somewhat in different countries, there were three steps in selecting the children to be fed which were followed in all cases where possible. These were: first, their registration, which was generally made through the school teachers; second, an investigation of each case by the local committee; and, third, a physical examination by a local physician. These examinations were repeated at regular intervals, and at each examination those children who had reached a fair state of nourishment were taken off the list to make way for others whose condition was worse and who had not been receiving rations.

The child-feeding work was carried on by furnishing a supplementary meal to each child admitted to the feeding. In most places these meals were served at noon, six days a week, in special kitchens set up for the purpose or in existing institutions, such as orphanages or hospitals. Expectant mothers also were provided with food either in hospitals or at special dining-rooms, or in exceptional cases in their own homes. All children upon being admitted to the feeding received a card which was punched for each meal.

The national committees arranged to take care of the internal transportation of all children's relief supplies and, in addition, to arrange for national and local contributions of additional supplies, such as flour, vegetables, etc. The local committees always provided the

kitchen facilities, including quarters for offices and kitchens, cooking utensils, dishes, fuel and light, as well as local supplies of vegetables and other food. The local committees also undertook to see that the meals were prepared and served.

By means of this decentralization of efforts, it required a relatively small American personnel to guide and direct these vast operations.

This policy of organizing the relief as a step in self-help had a decided constructive influence upon these local and national groups. It was not unusual to find these groups extending their activities in other directions of their own accord, and many of the organizations continued long after the American child feeding ceased. Benevolence which merely maintains an individual or a group without an incentive for self-help too often tends to lower self-reliance and aggravates the very condition it sought to remedy.

However, the tasks of the American representatives in these countries were by no means easy. The general political turmoil of new governments and their conflicting personalities, frequent ministerial changes, long periods with no responsible government due to inability to form a cabinet, and the feeling in many quarters that there must be some ulterior motive behind these free gifts, all tended to make the work more difficult. Furthermore, the general demoralization of railroad transportation and of all communication systems caused incessant troubles in the moving of supplies from the ports to internal points where they were needed.

*Child-feeding programs.*—As pointed out above, the first duty of the American representatives was to make some approximation of the number of children in each country needing relief. These first estimates could not be very accurate but they served as a basis for the first relief programs. The first children's relief program by the American Relief Administration was made up early in March, 1919, and contemplated the expenditure of some \$2,000,000, allotted chiefly to Austria, the Baltic States, Czechoslovakia, Jugoslavia, Poland, and Roumania. Even before these commodities had arrived, it was found that this was hopelessly inadequate to meet even the most urgent needs for this work. A second program was prepared involving approximately

double the amount called for by the first program. Before the close of the American Relief Administration's work, it became clear that many of these children would need to be fed at least to the end of 1919, and a third program was made up in June, 1919, providing sufficient food to feed some 3,000,000 children to the first of 1920. None of the commodities on the third A.R.A. program arrived until after the close of the American Relief Administration in July, 1919. These, together with the remaining stocks from the first and second programs, were turned over to the European Children's Fund for distribution.

Table 55 gives the three relief programs as originally made out by the American Relief Administration. These programs were modified considerably by further knowledge of local needs and the re-allocation of supplies to countries where the requirements were more urgent. In these programs the children's relief for Austria was to be paid for from the President's National Security and Defense Fund since the Congressional Appropriation expressly forbade its use for countries regarded as enemy territory.

*Relief from Congressional Appropriation.*—As pointed out above, the Children's Relief Bureau of the American Relief Administration was organized in February, 1919. The first child-feeding operations were started early in March and were continued by that organization until the end of July, 1919. By the first of August the American Relief Administration had practically withdrawn and the work had been taken over by the European Children's Fund. A large portion of the children's relief supplies purchased by the A.R.A. from the Congressional Appropriation was designed for use during the latter half of 1919. These supplies either were in store in European ports or warehouses or were still on passage when the work of further distribution was taken over by the E.C.F. For purposes of its records and accounting, all of the child-feeding supplies had been allocated to individual countries in accordance with the indicated needs. Table 113 (Appendix) shows in detail the original allocation of these supplies by countries of destination as given in the records of the American Relief Administration. These allocations are summarized in Table 56.

Total .....	36,036.2	\$13,433,918.33

other countries than the ones for which they had been designated. The European Children's Fund was distributing similar commodities purchased with other funds and they not infrequently substituted supplies from these latter sources for the ones allocated from the Congressional Appropriation stocks. Thus, when we come to actually trace the deliveries of the commodities purchased from the Congressional Fund for children's relief we find they were distributed somewhat differently from that shown above in the table of allocations.

Table 114 (Appendix) gives the actual distribution of these supplies as totaled from the delivery receipts. These deliveries are summarized in Table 57 (page 88).

The difference between the allocation and actual delivery of these supplies is of no material consequence because, in the case of most of the countries, the E.C.F. furnished supplies to several times the value of those obtained from the Congressional Appropriation. The difference

is discussed here because the reports of the American Relief Administration show one set of figures and those of the European Children's Fund show a different set, which might lead to confusion unless explained.

All of the children's relief supplies paid for from the Congressional Appropriation were furnished as a gift from the American Government to the children of these respective countries and no obligations for repayment for these supplies were requested. The arrival of these children's relief supplies in European ports is shown in detail in Table 115 (Appendix).

The distribution of other portions of the Congressional Appropriation for Relief has been discussed under the Armistice Period (cf. pages 44-48).

#### THE PRESIDENT'S NATIONAL SECURITY AND DEFENSE FUND

When Mr. Hoover went to Europe after the Armistice to take charge of the relief activities, President Wilson turned over to him the sum of \$5,000,000 from the President's National Security and Defense Fund. This sum was intended as a nucleus for starting such work as was urgently needed and to pay the expenses of such organization as was deemed necessary. The National Security and Defense Fund was an appropriation of \$50,000,000 which Congress made available to the President during the war for such

emergencies as might arise from time to time, and for which it would be undesirable to await the delays incident to a special appropriation.

Mr. Hoover found it possible to take care of all of the necessary expenses of the relief work from other sources and the \$5,000,000 allocated from this fund was used for only two purposes which could not be paid for out of other funds. As pointed out on pages 49-50 these two purposes were supplies for Russian prisoners of war in Germany, and for children's relief to Austria. In summary form the expenditures from the National Security and Defense Fund were as follows (cf. Table 23, page 50):

	Total Metric Tons	Total Value
Russian prisoners of war.....	1,622.0	\$ 390,209.03
Austrian children's relief .....	7,823.1	2,949,217.23
Total expended .....	9,445.1	\$3,339,426.26
Returned to the President.....		1,660,573.74
Total .....		\$5,000,000.00

The deliveries to the Russian prisoners of war in Germany have been discussed under the relief work in the Armistice Period.

The children's relief furnished from this fund, although purchased and partly delivered during the Armistice Period, is considered in this report along with other children's relief work in the Reconstruction Period. The reason for the use of this fund for children's relief to Austria was that the Act of Congress making available the \$100,000,000 for relief work (Act of February 25, 1919, cf. page 39 n.) expressly forbade its use in Austria or other countries then regarded as enemies of the United States. Yet Austrian children were suffering as much as those of any other country and the new Government had no resources which could be used to purchase supplies. With the approval of President Wilson, Mr. Hoover arranged to furnish urgently needed assistance to Austrian children from this fund.

The children's relief work in Austria was started early in March, 1919, under the Children's Relief Bureau of the American Relief Administration. As in the case of the children's relief deliveries from the Congressional Appropriation, this work was taken over by the Euro-

pean Children's Fund in August, 1919, and a large proportion of the actual deliveries of supplies from the National Security and Defense Fund were made under the direction of the E.C.F.

According to the allocation of supplies made by the American Relief Administration, all of the food purchased from this fund was intended for Austrian children. However, in the actual delivery of these supplies by the E.C.F. a small portion was used for children's relief in Hungary. This change in destination was made only because of convenience and the availability of supplies urgently needed in Hungary. The E.C.F. delivered large quantities of similar food for Austrian children paid for from other funds, which replaced many times the supplies diverted to Hungary.

Table 116 (Appendix) shows in detail the deliveries from the President's National Security and Defense Fund. Table 58 summarizes the children's relief deliveries from this fund as shown by the feeding-station receipts obtained by the European Children's Fund.

#### RELIEF SUPPLIED BY THE EUROPEAN CHILDREN'S FUND

Table 53 (page 82) shows that the European Children's Fund furnished supplies for relief which totaled to 337,953.5 metric tons, valued at \$58,370,700.11. This amount includes the relief furnished to the Soviet Republics in the great Russian famine, which in reality was handled by the American Relief Administration Russian Unit.<sup>1</sup> By far the major portion of the relief supplied by the E.C.F. was for child feeding. Of the total shown above, 235,533.1 metric tons,

valued at \$41,390,238.98, were specifically earmarked as children's relief. This includes 131,412.6 metric tons, valued at \$12,347,924.55, for children's relief in Soviet Russia, a part of which, however, was used for adult relief. The children's relief figures include 5,616.1 tons of clothing and 1,000.4 tons of soap. The remainder represented food supplies. Table 59 (page 90) shows total deliveries by the European Children's Fund segregated as children's relief and for other purposes. The detail of the total deliveries is given in Table 156 and in the several tables under the individual countries.

The children's relief deliveries were used to provide supplementary meals for undernourished children in accordance with the methods already described. The particular arrangements varied somewhat from country to country. These differences are set forth in the discussion of deliveries to individual countries.

It will be noted that by far the largest tonnage of children's relief supplies from the E.C.F. went to the Soviet Republics, although the value of these supplies was considerably less than the value of those furnished to Poland. This difference is accounted for by the type of commodities furnished. Those going to Russia consisted to a large extent of flour, meals, corn grits, and other foods with a lower value per ton than that of the type of commodities furnished to Poland. Outside of Russia and Poland the next largest deliveries by the E.C.F. were to Austria, where the suffering was very great. Czechoslovakia, Hungary, and Latvia also received relatively large amounts of these children's relief supplies. The deliveries to Germany were handled through the American Friends Service Committee and represent contributions of commodities to the Friends Committee by the E.C.F. (see pages 117-18).

The relief deliveries by the E.C.F. for purposes other than children's relief were inconsequential, except in the case of Russia. In the other countries these represented chiefly the sale of child-feeding or other commodities to governmental organizations, many of which were donated for the relief work by these governments.

In the case of Russia the relief other than that designated for children and adults was

<sup>1</sup> See discussion on page 6.

increased chiefly because of the food and clothing remittances and the bulk sales to other organizations.<sup>1</sup> These transactions are described in detail in the text covering deliveries to the Soviet Republics. In the case of the other countries the bulk sales and remittances were handled by a separate organization of the A.R.A. Warehouses, described elsewhere.

The finance for the relief supplies furnished by the European Children's Fund came from a number of sources. The nucleus of this was furnished by the surplus from the European operations of the Food Administration Grain Corporation.<sup>2</sup> This was greatly increased by the funds obtained through the European Relief Council,<sup>3</sup>

and also by funds supplied by various charitable and relief organizations. Also, the profits on the food and clothing remittances and particularly on the bulk sales handled through the A.R.A. Warehouses helped to increase the amount available for charitable relief. Further details of sources of the relief finances are given in another section of this report (pages 142–46).

## AMERICAN RELIEF ADMINISTRATION WAREHOUSES

The last of the four major operations under the immediate supervision of the European Children's Fund is that of the American Relief Administration Warehouses, which handled all of the food and clothing remittance business and the bulk sales of commodities for Central European countries. As shown in Table 53 (page 82) the total supplies handled by this organization

<sup>1</sup> See footnote †† to Table 59.

<sup>2</sup> Cf. page 76.

<sup>3</sup> Cf. pages 77–80.

amounted to 40,319.5 metric tons with a total value of \$9,885,405.73.

Shortly after the European Children's Fund had begun operations in the latter part of 1919, it became evident that in addition to the child-feeding work there was also need for additional adult relief because the supplies of food from the 1919 harvest were insufficient to take care of all requirements. Furthermore, the newly formed governments were not yet in a position to make satisfactory arrangements for imported supplies. Food supplies were being requisitioned and rationed by the governments, but the rations were inadequate and the cost of food outside the rations was exorbitant.

The A.R.A. had had considerable experience in appealing to the residents of America who had emigrated from Central and Eastern Europe. It was known that these people were receiving urgent requests for help from relatives, friends, and acquaintances in the mother countries. These were willing and anxious to render this help but their unorganized efforts largely were meeting with disappointment. If they sent money, this was largely useless because food was not available except at such exorbitant prices that little could be secured with the money sent. If they attempted to send packages of food, these all too often went astray or were looted en route under the chaotic conditions prevailing in most of these countries immediately after the war.

Realizing this condition, Mr. Hoover in November, 1919, proposed to his associates that a scheme of food draft deliveries from warehouses should be put into operation. He proposed to sell through American bankers "food drafts" to persons in this country. These drafts were to be mailed to their relatives or friends in Europe. The receiver could then "cash" the drafts for definite amounts of food at warehouses to be established at designated places in Europe. The operation was to be much the same as the cashing of a foreign bank draft except that the recipient would obtain a package of food instead of money.

For three months the officials of the American Relief Administration worked over the details of this plan, trying to foresee every difficulty and to perfect the machinery for this new

experiment to make it both simple and fool-proof. Finally, in January, 1920, the scheme was launched. Perhaps no better statement of the purpose and object to be accomplished can be given than the following letter from Mr. Hoover which was sent to American bankers at this time:

TO THE BANKERS OF AMERICA:

Owing to the slow economic recovery of Europe, the depreciation and exhaustion of its securities, and the shortage of export commodity production, due to the lack of raw material, the only hope of large sections passing the winter without going into sheer anarchy lies in their again obtaining food supplies on some basis of support from America.

Throughout the whole of Central and Eastern Europe the food supply of the people falls into two classes: first, the ration issued by the government; second, illicit circulation of food available to those who have a sufficient amount of money. The government ration is necessarily meagre and nowhere near sufficient to properly maintain life, and must be supplemented. Under these circumstances, the scramble for such supplementary margin has placed the price of the illicit food supplies entirely beyond the reach of the great bulk of the population. To illustrate: A single ham outside the ration system sells for as high as one hundred and fifty dollars.

In groping for a solution of this problem we have decided to undertake a measure on the following basis, as we believe it will contribute largely to relieve the situation:

There are three to four million families in the United States with family affiliations in Eastern and Central Europe. Many of them are desirous of giving direct personal assistance to these relatives and friends. Some are endeavoring to perform this service by preparing or purchasing packages of food for overseas shipment. In some cases the packing and extra freight involved adds one hundred per cent to the cost. We are proposing to solve this difficulty by establishing warehouses to carry stocks of staple foodstuffs in European cities where distress is particularly acute. We propose to sell, in America, orders upon these warehouses in the form of FOOD DRAFTS which can be transmitted to friends or relatives in Europe. We propose to charge the buyer of the FOOD DRAFT the factory cost of the food plus a reasonable margin to cover cost of transportation and insurance. Profits, if any accrue, will be turned over to the European Children's Fund.

The object of this plan is to add to the total stock of available food supplies in Central and Eastern European countries. Under an arrangement set up with the governments of these countries, this food will be allowed to revolve outside the rationing system, with the hope that enough food will be injected to reduce the pressure on the narrow marginal supplies. The officials of these new governments are endeavoring to impress upon the American people that it is useless to

remit money to a family in Central or Eastern Europe with the hope of improving its food situation. The sum total of food now available in Central Europe is insufficient to keep the population alive, and under these circumstances money thus becomes that much paper so far as nutrition is concerned. A hungry man wants food, not money, and under the arrangements outlined above we can meet his need. I feel that you will agree that such an enterprise, organized on a thoroughly business basis, will effect a considerable amount of actual relief abroad. I am informed that the President of the American Bankers' Association states that the Association will co-operate in all possible ways in the plan as above outlined. I do not believe, under the system which we have devised, that this will entail any great effort on the part of the banks, and the plan is one of such sympathetic character that the banks can well entertain it to aid the distressed people of Europe.

Faithfully,

(Signed) HERBERT HOOVER

The working out of the detailed plans for this undertaking brought up many difficult problems. First, it was necessary to insure the co-

ing in content, although five nations and two classes of consumers, Christian and Jew, had to be served. The price of the packages would have to remain unchanged for at least a year. It was necessary to build up these stocks of foods and establish the warehouses, together with the personnel to operate them. Steps had to be taken to insure that the food furnished was of the highest quality; and to make certain of this the A.R.A. established its own inspectors in every factory where this food was purchased.

The careful attention which was given to these and many other details based upon experience in Belgium and other countries was responsible very largely for the success of this undertaking. Another important element in this success was the whole-hearted co-operation of the banks throughout the United States and in many other countries. Food drafts were sold by 4,827 banks located in every state in the United States and in Alaska, the Hawaiian Islands,

Canada, Central and South American countries, Mexico, England, France, Denmark, and Australia. This service was performed by the banks without any remuneration whatever.

Central warehouses were established in important cities in five countries as follows: Prague, Czechoslovakia; Warsaw, Poland; Hamburg, Germany; Budapest, Hungary; and Vienna, Austria. It was soon found that because of transportation and other difficulties it would be necessary to establish branch warehouses in many other cities. Altogether, sixty-four such branch warehouses were established, located as follows:

Czechoslovakia	Hungary
<i>Central Warehouse</i>	<i>Central Warehouse</i>
Praha (Prague)	Budapest
<i>Branch Warehouses</i>	
Brno (Brünn)	Austria
Opava (Troppau)	<i>Central Warehouse</i>

The location of these warehouses and the territory served by the food draft operations are shown in the map on page 132.

The foods were shipped in bulk from the United States either to Hamburg or Danzig and then transported to the several warehouses, where they were made up into the standard packages ready for delivery upon presentation of the drafts by the recipients.

The contents of the food packages were carefully standardized by food experts to contain the maximum nutrient value consistent with bulk and price. Drafts were sold for four different types of packages at two different prices. Packages "A" and "B" were sold at \$10 and \$50, respectively, and contained foods for consumption by Christians. Packages "C" and "D" at the same respective prices contained food for Jewish consumption.

The contents of the four types of packages were as follows:

	Package "A" \$10.00	Package "B" \$50.00
	24½ lbs. flour	140 lbs. flour
	10 lbs. beans	50 lbs. beans
	8 lbs. bacon	16 lbs. bacon
	8 cans milk	15 lbs. lard
		12 lbs. corned beef
		48 cans milk
	Package "C" \$10.00	Package "D" \$50.00
	24½ lbs. flour	140 lbs. flour
	10 lbs. beans	50 lbs. beans
	7½ lbs. cottonseed oil	45 lbs. cottonseed oil
	12 cans milk	48 cans milk

In November, 1920, due to the decrease in the cost of food, each \$10 package was augmented by 2 and 1/5 pounds sugar and 1 pound cocoa, and each \$50 package by 13 pounds of sugar and 3 and 1/3 pounds of cocoa, in addition to the commodities listed.

Food drafts were primarily designed for the convenience of persons having friends or relatives in Central Europe. However, provision was also made for anyone charitably inclined to purchase drafts for "General Relief" if there were no individual to whom they wished to send food. Many thousands of dollars of "General Relief" drafts were purchased. The American Relief Administration undertook to see that all such packages were delivered to worthy and needy

individuals. The selection of recipients was usually made by local committees, but in some instances selections were made from lists of those who had applied for relief. The final selection was made only after careful investigation.

Soon after the Warehouses had begun operations it was found that many organizations conducting relief in Europe desired to purchase supplies from these Warehouses, rather than to take the trouble and risk of importing directly relatively small lots of food. Arrangements were therefore perfected by which so-called "bulk sales" could be made from warehouse stocks. Each warehouse was stocked with the following commodities:

Cocoa	Flour	Pure lard
Sugar	Peas	Lard substitute
Evaporated milk	Beans	Vegetable oil
Condensed milk	Rice	Corned beef
		Bacon

Bulk sales were limited to a minimum of \$500 value, but any relief organization could purchase supplies made up of any of the above commodities at definitely determined prices. Advantage was also taken of this plan by many European governments to purchase food for relief purposes. This plan proved to be of great assistance to many organizations, and almost four million dollars' worth of food supplies were sold in these bulk sales.

Although it was not intended that the warehouse operations should yield a profit, yet it was necessary that a sufficient protective allowance

be made for fluctuating food prices, administrative expenses, transportation, port charges, insurance, etc. Because of the experience with the Belgian Relief Commission it was possible to arrive at fairly definite overhead charges to cover the expenses and the risks involved. However, owing to the unforeseen decline in food prices, the warehouse operations resulted in fairly large profits. As indicated in Mr. Hoover's letter to the bankers, and in the agreement with the respective countries, these profits were all turned over to the European Children's Fund to be used for child feeding in the countries to which the drafts had been sent. The surplus from A.R.A.W. operations, totaling \$605,194.61, was divided between the several countries as follows:

#### DISTRIBUTION OF SURPLUS OF A.R.A. WAREHOUSES

Austria .....	\$289,222.50
Czechoslovakia .....	44,481.81
Hungary .....	45,813.23
Poland .....	80,914.52
Sub-total .....	\$460,432.06
Germany .....	144,762.55
Total .....	\$605,194.61

Of this amount, \$460,432.06 was turned over to the European Children's Fund and used for child feeding in the countries indicated. The \$144,762.55 for Germany was turned over to the American Friends Service Committee for use in German child feeding, since the A.R.A. had no organization for that purpose in Germany.

Total .....	14,636.1	\$5,913,370.00	25,683.4	\$3,972,035.73	40,319.5	\$9,885,405.73

\* Only two drafts sold, amounting to less than 1/10 ton.

† Includes 7,720.3 metric tons, worth \$864,562.40, purchased through the warehouse at Danzig.

The sales of food drafts which were begun in January, 1920, were continued until April 30, 1921, at which time all banks were notified to stop selling. This operation was discontinued because a survey of the several countries showed that food conditions were becoming much more normal and the Central European governments were planning to decontrol all food supplies. The arrangements were that the Warehouses would honor all drafts sold prior to April 30, 1921, and presented to the Warehouses, before July 31, 1921. During the period of warehouse operation a total of 403,037 food drafts of all kinds were sold and delivered, amounting to \$5,913,370. A summary of these deliveries is given in Table 60. Further details will be found in Tables 153 and 154 in the Appendix.

The bulk sales operations were proving so helpful to the relief work of the various governments and relief organizations that it was decided to continue the warehouse operations after the sale of food drafts had been discontinued. These Warehouses were also useful in connection with the child-feeding operations as centers from which to make deliveries to feeding stations.

The bulk sales were continued up until June, 1923, during which time 25,683.4 metric tons of food, valued at \$3,972,035.73, were delivered in this way. A summary of these operations also is given in Table 60 and further details are shown in the Appendix Tables 153-155.

Further profits originating from the bulk sales and other warehouse operations amounted to \$630,969.07 and were used to defray the expenses of the European Relief Council campaign.<sup>1</sup>

#### SPECIAL PROGRAMS

Outside of the warehouse and food draft operations the work of the European Children's Fund in Central Europe was connected chiefly with child relief. As a matter of fact, contributions to its funds were given with the definite understanding that they would be used only for child feeding, a restriction which was always very carefully observed. The aftermath of the war, however, left a considerable portion of the adult population in extreme distress. This was

particularly true of the educated and professional classes. With the vanishing purchasing power of their former income, if they were so fortunate as to have even this, college professors, teachers, lawyers, doctors, actors, engineers, and many others were often unable to secure sufficient food for mere existence. The appeal to the educated classes in the United States and in other countries resulted in a considerable volume of food drafts designated for college professors and teachers, but these were far too limited to meet the widespread needs.

Intelligentsia Dining Room, Lwów University, Poland.

Appeals were therefore made to a number of charitable foundations in the United States to render special assistance in connection with these problems of adult feeding in Central Europe. These organizations responded freely, and during the period from 1919 to 1923 considerable sums of money were contributed mainly for this purpose. The books of the E.C.F. accounted for the donations under the heading of "Special programs." In addition, certain contributions obtained during the European Relief Council drive were designated for or were available for adult relief. The total contributions accounted for under the heading of "Special programs," together with the sources of these funds, are shown in Table 61 (page 96). These sums have already been accounted for in connection with relief furnished by the European Children's Fund, or by other organizations, but it is desirable to include some further description of this work at this point.

<sup>1</sup> See page 79.

TABLE 61

## SOURCE OF FUNDS FOR THE SPECIAL PROGRAMS (CHIEFLY INTELLIGENTSIA RELIEF)

The Commonwealth Fund .....	\$2,165,211.20
The Joint Distribution Committee.....	250,000.00
The Laura Spelman Rockefeller Memorial .....	98,622.59
American Relief Administration .....	695,323.76
Refugee Relief .....	302,300.00
Total .....	\$3,511,457.55

*The Commonwealth Fund.*—The Commonwealth Fund was incorporated under the laws of the state of New York on October 17, 1918. The purpose of the organization as stated in the articles of incorporation was “the application to charitable purposes of the income or the principal of such property as from time to time the corporation shall possess.” The organization had its inception in the offer of a very considerable gift from Mrs. Stephen V. Harkness, which was later supplemented by further gifts from the same source. The appropriations from the fund have largely been used for the purposes of aiding child welfare, the promotion of health and hygienic activities, and for educational research. In general, the appropriations have been made in the form of grants to organizations already in existence, rather than to establish new organizations to carry out the purposes of the corporation.

During the first year of its existence the directors of the Fund became convinced that the critical condition of many of the peoples of Europe, as a result of the long continued war, was a matter to which they should give attention. As a result of these inquiries, negotiations were entered into with the American Relief Administra-

tion European Children's Fund, by which very considerable donations were made to the latter organization during the period from 1919 to 1923. Following is a summary of these appropriations as shown by the annual reports of the Commonwealth Fund:

## APPROPRIATIONS BY THE COMMONWEALTH FUND TO THE EUROPEAN CHILDREN'S FUND

Fiscal Year	Total Appropriation
1919-1920 .....	\$1,250,000
1920-1921 .....	600,000
1921-1922 .....	149,000
1922-1923 .....	150,000
Total .....	\$2,149,000

In addition to these appropriations, there should be added the sum of \$16,211.20, which represents the amount received by the American Relief Administration from the sale of flour in Armenia, an amount which was used for subsequent relief deliveries by the European Children's Fund and credited to the Commonwealth Fund. The total amount to be accounted for by the American Relief Administration is therefore \$2,165,211.20.

Certain of these funds were appropriated with the understanding that they would be used for definite purposes, while other funds were given for the general relief activities in Central Europe. The appropriations from this fund were especially valuable in furnishing relief to the intelligentsia classes in Central Europe, especially university professors, many of whom were in dire distress during these years.

The records of the American Relief Administration show the following allocation of these funds by countries and by types of relief:

## DISTRIBUTION BY EUROPEAN CHILDREN'S FUND OF APPROPRIATIONS RECEIVED FROM THE COMMONWEALTH FUND, 1919-1923

Country	Food Drafts	Intelligentsia General Relief	Professors' Relief	Child Feeding	Total
Armenia .....	.....	.....	.....	\$746,107.12*	\$ 746,107.12*
Austria .....	\$200,000.00	\$470,868.38	\$20,464.66	.....	691,333.04
Czechoslovakia .....	62,500.00	20,001.10	.....	.....	82,501.10
Danzig Free City.....	9,752.84	5,000.00	.....	.....	14,752.84
Hungary .....	62,500.00	64,494.30	.....	.....	126,994.30
Poland .....	175,000.00	226,532.38	.....	.....	401,532.38
To E.C.F. general fund...	.....	1,639.18	.....	351.24	1,990.42
To E.C.F. for E.R.C. fund. ....	.....	.....	.....	100,000.00	100,000.00
Total .....	\$509,752.84	\$788,535.34	\$20,464.66	\$846,458.36	\$2,165,211.20

\* This sum is accounted for under the Commonwealth Fund. See page 121.

The contributions from the Commonwealth Fund for European relief were made in nine separate appropriations. Thus the contribution in 1919–1920, totaling \$1,250,000, consisted of three separate appropriations. The first appropriation of \$750,000 was to assist the feeding of Armenian children during the winter of 1919–1920, while the second and third appropriations of \$250,000 each were for the purchase of food drafts to be distributed by the American Relief Administration to individuals of the intellectual classes in Central Europe.

The contribution of \$600,000 in 1920–1921 was made in four separate appropriations. The first of these, or the fourth in the total appropriations, consisted of \$100,000 given to the European Relief Council. This gift, made on November 30, 1920, formed part of the large funds raised during the Relief Council drive. No separate segregation of this particular fund to countries can be made, but it is included in the relief furnished by the European Children's Fund, previously discussed.

The fifth appropriation from the Commonwealth Fund consisted of \$250,000 given to supply food for the intellectual classes in Central Europe. The sixth appropriation of \$150,000 was given in response to the urgent need for clothing by the suffering intelligentsia of these countries. With the exception of \$5,464.66, this latter appropriation was used for clothing in Austria, Hungary, and Poland. The latter sum was used for special food relief to Austrian university professors, as discussed later.

The seventh appropriation from the Commonwealth Fund made near the end of June, 1921, consisted of an additional \$100,000 for intelligentsia relief. This money was received so late in the fiscal year that it was carried over and distributed in 1921–1922, along with the \$149,000 contained in the eighth Commonwealth Fund appropriation. These two appropriations were used to supply food to the intellectual classes in Austria and Poland.

The ninth and last appropriation from the Commonwealth Fund was made in 1922–1923 and consisted of \$150,000 for the intellectual classes in Austria, where there was still great suffering.

In order to defray the costs of port operations, inland freight, and other sundry expenses

connected with the delivery of the relief supplies in Armenia, it was found necessary from time to time to sell small amounts of flour in Constantinople for cash. As a result of these operations, there remained \$16,211.20 as a cash balance, which was credited to the Commonwealth Fund. This balance plus \$3,892.88 of the original appropriation not spent for Armenian food ( $\$750,000.00 - \$746,107.12 = \$3,892.88$ ) made a total of \$20,104.08 remaining to the credit of the Commonwealth Fund. This sum was later used to purchase food drafts for destitute intelligentsia in Austria and Danzig Free City. The actual allocation of this balance was as follows:

Danzig Free City.....	\$ 9,752.84
Austria—Graz .....	5,000.00
Austria—Vienna .....	5,000.00
E.C.F. general feeding balance.....	351.24
Total .....	\$20,104.08

The distribution of the funds from each of the Commonwealth appropriations as shown by the records of the American Relief Administration is given in the accompanying table (Table 62), which also includes the allocation of the cash received from the sale of flour in Armenia.

There was also the sum of \$1,639.18 remaining from the fifth Commonwealth appropriation which was turned into unallocated general funds of the European Children's Fund and is accounted for under Special Programs as shown on page 112. As a matter of fact, this money was used along with other funds for additional food relief to the intelligentsia in Poland, but in order to tie this up with the actual delivery of food it is necessary to account for it under other operations of the American Relief Administration.

a) *Armenian Relief*: The Commonwealth Fund contribution formed part of the funds expended under the direction of Colonel (now Major General) William N. Haskell, Allied High Commissioner to Armenia.<sup>1</sup> The contribution from the Commonwealth Fund was used to purchase four cargoes of foodstuffs in the United States, which were shipped from New York late in 1919 and early in 1920. These four cargoes, carried on the "Chincha," "Massillon Bridge,"

<sup>1</sup> See pages 151–52 for discussion of the work of Colonel Haskell's mission.

TABLE

## DISTRIBUTION BY APPROPRIATIONS OF THE

Country	1919-1920			1920-1921	
	First	Second	Third	Fourth	Fifth
Armenia .....	\$746,107.12	.....	.....	.....	.....
Austria .....	.....	\$125,000.00	\$ 75,000.00	.....	\$ 93,393.12
Czechoslovakia .....	.....	25,000.00	37,500.00	.....	20,001.10
Danzig Free City.....	3,892.88	.....	.....	.....	5,000.00
Hungary .....	.....	37,500.00	25,000.00	.....	39,966.71
Poland .....	.....	62,500.00	112,500.00	.....	89,999.89
European Relief Council and general.....	.....	.....	.....	\$100,000.00	1,639.18
. Total .....	\$750,000.00	\$250,000.00	\$250,000.00	\$100,000.00	\$250,000.00

"Lake Fiscus," and "River Araxes" (see arrival table, pages 410-11), consisted of the following commodities for the child-feeding program:

Commodity	Metric Tons
Flour .....	2,679.3
Milk, condensed .....	102.8
Sugar .....	96.5
Cocoa .....	61.0
Beans .....	404.6
Rice .....	366.9
Fats .....	50.9
Total .....	3,762.0

The total cost of these four cargoes delivered in Near East ports amounted to \$746,107.12.

No detail of the internal distribution of these foodstuffs in Armenia is available, but Colonel Haskell reported that this contribution enabled the relief mission to reach nearly all the undernourished Armenian children, as well as some of other nationalities. At the height of the work more than 75,000 children were being fed daily. When Colonel Haskell left Armenia in July, 1920, he reported that there were sufficient quantities of these foods remaining to continue the child-feeding program, as taken over by the Near East Relief, for at least four months. In the meantime, the Near East Relief made provision for continuing the work which had been inaugurated through the Commonwealth Fund appropriation.

b) *Austria*: Probably in no country of Central Europe were the post-war conditions of the intellectual classes so deplorable as in the new republic of Austria. Vienna, once the great center of art, drama, and learning, presented a sorry spectacle in the period from 1920 to 1923. Thousands of individuals of the former wealthy and

intellectual classes were existing by trading for food such remnants of former prosperous days as remained in their hands. It was not unusual to see families take an old coat or an old pair of shoes into the country to trade for a few potatoes or other vegetables. And still other thousands had nothing left to trade.

It was conditions such as these which influenced the trustees of the Commonwealth Fund to make their appropriations for the relief of the suffering intellectuals. As shown in Table 61, a total of \$691,333.04 from the Commonwealth Fund was expended in Austria. Of this amount, \$62,475.26, from the sixth appropriation, was for clothing. The remainder of the Commonwealth appropriations was spent for food. The latter was distributed both as packages to individuals and as bulk food to intelligentsia kitchens and to students' and professors' messes.

As in the other countries, this relief was distributed in co-operation with, and on the recommendation of, local committees. An Austrian national committee was formed, headed by Karl Seitz, then president of the Austrian Republic. Under the direction of this organization, numerous local committees were formed representing the various professions. Approximately 70 per cent of the intelligentsia relief in Austria was distributed in Vienna. The remainder went to the provinces, particularly to the Universities of Innsbruck, Graz, and Loeben.

Table 63 (pages 100-101) shows distribution of food supplies made available from each of the Commonwealth appropriations, by occupation of the beneficiary so far as this was known. This food was supplied to a total of more than 150,000 separate beneficiaries and represented the equivalent of almost 11,000,000 meals.

## COMMONWEALTH FUND CONTRIBUTIONS TO EUROPEAN RELIEF

1920-1921		1921-22	1922-1923	Cash from Flour Sales	Total	Country
Sixth	Seventh	Eighth	Ninth			
.....	.....	.....	.....	.....	\$ 746,107.12	Armenia
\$ 67,939.92	\$ 45,000.00	\$125,000.00	\$150,000.00	\$10,000.00	691,333.04	Austria
.....	.....	.....	.....	.....	82,501.10	Czechoslovakia
.....	.....	.....	.....	5,859.96	14,752.84	Danzig Free City
24,527.59	.....	.....	.....	.....	126,994.30	Hungary
57,532.49	55,000.00	24,000.00	.....	.....	401,532.38	Poland
.....	.....	.....	.....	351.24	101,990.42	European Relief Council and general
\$150,000.00	\$100,000.00	\$149,000.00	\$150,000.00	\$16,211.20	\$2,165,211.20	Total

In addition to the distribution of food detailed above, a total of \$62,475.26 from the sixth Commonwealth appropriation was expended for clothing for the intellectual classes in Austria. This sum was used to purchase the following commodities:

Commodity	Quantity
Shoes .....	5,800 pairs
Socks and stockings.....	11,600 pairs
Woolen cloth .....	20,913 yards
Lining .....	28,156½ yards
Pocketing .....	9,883 yards
Combination underwear .....	2,800 suits
Undershirts .....	8,800 each
Underdrawers .....	8,800 pairs
Needles .....	5,000 number
Thread .....	3,000 cops
Buckles .....	8,800 each
Ivory buttons .....	68,544 number
Metal buttons .....	53,568 number
Hooks and eyes.....	6,912 pairs
Snap fasteners .....	12,096 pairs
Total value .....	\$62,475.26

This material was arranged in packages as follows:

## Men's outfits:

- Cloth with accessories for 1 suit
- 2 pairs of socks
- 2 suits of underwear
- 1 pair shoes

## Women's outfits:

- Cloth with accessories for 1 dress
- 2 pairs of stockings
- 2 suits of underwear
- 1 pair shoes

At the time these outfits were distributed in the winter of 1921-1922 the local prices of cloth-

ing had increased some 600 per cent over pre-war prices. The value of such an outfit in the local shops approximated 100,000 Kronen.

Following is the distribution of these clothing outfits by districts. All packages were distributed to the intellectual classes, but no complete statistics are available as to the distribution to different classes in the population.

DISTRIBUTION OF COMMONWEALTH FUND CLOTHING  
IN AUSTRIA

(Number of Outfits)

Province	Men	Women	Total
Vienna .....	2,772	882	3,654
Lower Austria .....	220	70	290

\* Proceeds from sale of surplus flour.

‡ Includes \$5,464.66 from the sixth Commonwealth appropriation. This appropriation was intended for clothing relief, but \$5,000 of this was utilized for the purchase of additional food and

\$464.66 was turned over to Dr. C. Pirquet for the purchase of kitchen equipment to facilitate the distribution of food in the professors' and students' messes. Included in this item was \$15,000 from the seventh appropriation which was given by the Common-

c) *Czechoslovakia*: In Czechoslovakia a national committee was formed in 1920, consisting of representatives of various professional societies, which recommended the cases of individuals or families among the intellectual classes which were in most serious need of relief.

As shown by Table 62 (pages 98-99), the total amount from the Commonwealth Fund distributed in Czechoslovakia was \$82,501.10, which represented parts of the second, third, and fifth appropriations. The second and third appropriations were used entirely for food drafts, and

wealth Fund as a Christmas gift to Austrian professors in December, 1921. The remaining \$30,000 from the seventh appropriation was utilized partly for student relief and partly for professors. The statistics do not show the complete separation between these

two classes and the total has been included here under professors, although a part of the 9,881 beneficiaries fed from this sum were university students.

† Includes authors, musicians, and actors.

of these Czechoslovakia received \$62,500, representing approximately 400,000 meals. These food drafts were distributed to 17,251 individuals, at an average cost of \$3.62 per person. The accompanying table shows the distribution of the food drafts among the several types of beneficiaries.

From the fifth Commonwealth appropriation, the sum of \$20,001.10 was distributed in Czechoslovakia to assist college professors and their families in the universities of Prague and Brünn. From this fund, 2,420 individuals were given a total of 145,200 meals.

The total Commonwealth relief in Czechoslovakia thus supplied the equivalent of 545,200 meals to 19,671 individuals, with a total value of \$82,501.10.

d) *Danzig Free City*: As in other sections of Central Europe, the professional and intellectual classes in Danzig Free City were in se-

rious need in 1921 and 1922. No specific mention had been made of Danzig in the Commonwealth Fund appropriations, but, with the surplus derived from the sale of Armenian flour and certain surplus stocks accumulated in other Central European countries, the European Children's Fund was able to take care of a portion of the suffering in that country. Relief amounting to \$14,752.84 was furnished to the educated classes in Danzig from the Commonwealth Fund. Of this amount, the sum of \$9,752.84 was delivered in 1921 and 1922 in the form of food drafts, which supplied the equivalent of 122,964 meals to 3,351 beneficiaries distributed among the different classes of the population as shown in the table on page 102.

When the Commonwealth Fund decided to continue intelligentsia relief in Poland to June, 1923, as provided in their fifth appropriation,

an appeal was made on behalf of the Free City of Danzig. Early in January, 1923, the sum of \$5,000 was set aside for additional intelli-

DISTRIBUTION OF FOOD DRAFTS FROM THE COMMONWEALTH FUND IN DANZIG FREE CITY

Type of Beneficiary	Number of Individuals	Sales Value
Professors .....	7	\$ 20.37
Teachers .....	643	1,871.41
Clergymen .....	114	331.79
Lawyers .....	21	61.12

gentsia feeding in that city. These funds were used for the purchase of the following commodities from the Relief Administration supplies:

Commodity	Metric Tons
Flour .....	16.9
Sugar .....	3.1
Rice .....	4.9
Corn grits .....	3.0
Cocoa .....	1.0
Lard substitute .....	2.8
Vegetable oil .....	1.4
Milk, evaporated .....	8.0
Milk, condensed .....	2.0
Total .....	43.1

Three kitchens were opened, one in the Wiedenkaserner and two in the suburb of Langfuhr. Approximately 800 persons were served one meal a day from these kitchens for a period of six months, making a total of approximately 144,000 meals, costing \$5,000, or an average of 3.47 cents per meal.

The total relief to Danzig from the Commonwealth Fund, totaling \$14,752.84, supplied 4,151 beneficiaries with an equivalent of 266,964 meals.

The appreciation of this gift is perhaps best expressed in a letter to the American Relief Administration from President H. Sahm of the Free City of Danzig, in which he says in part:

It has caused us great joy to note the interest which America has always evinced in the fate of our suffering

population, and in the well-being of our tiny state. But this gift for our intellectuals brings special gladness to our heart; it will appease the hunger of many of our unfortunate citizens whom the Free City would like to, but is powerless to help.

Please accept our thanks and the thanks of our people for your organization and for your generous country which has not forgotten us in our need.

*e) Hungary:* In Hungary the distribution of food packages from gifts of the Commonwealth Fund began in July, 1920, and food relief ended in January, 1921. As in other countries, a Hungarian committee of representatives of professional societies was formed to aid in the investigation and selection of the most needy cases. Food relief, totaling \$102,466.71, was supplied to Hungary from the second, third, and fifth Commonwealth appropriations and, in addition, \$24,527.59 worth of clothing from the sixth appropriation. Thus, the relief to Hungarian intellectuals from this source totaled \$126,994.30.

The second and third appropriations were used in the form of food drafts, with a total value of \$62,500, which represented the equivalent of about 660,000 meals and were distributed to families and individuals totaling approximately 25,000 beneficiaries. The distribution of these food drafts among the several classes of the population is shown in the accompanying table.

DISTRIBUTION OF FOOD DRAFTS IN HUNGARY TO INTELLECTUAL CLASSES BY TYPE OF BENEFICIARY

Type of Beneficiary	Number of Individuals	Sales Value
Normal school teachers.....	3,924	\$ 9,810
High-school teachers .....	2,356	5,890
Kindergarten teachers .....	356	890
University professors .....	232	580
Actors and actresses .....	612	1,530
Writers, journalists .....	828	2,070
Painters, sculptors, composers....	948	2,370
Judges, attorneys .....	612	1,530
Lawyers .....	832	2,080
Physicians .....	292	730
Engineers, architects .....	1,032	2,580
Clergymen, rabbis .....	692	1,730
State officials .....	4,296	10,740
Municipal officials .....	660	1,650
Widows and orphans .....	1,964	4,910
Pensioned people .....	536	1,340
Miscellaneous cases .....	1,628	4,070
Four university mensas.....	3,200	8,000
Total .....	25,000	\$62,500
Equivalent number of meals.....		660,000

In addition to these food drafts, there was allotted to Hungary a total of \$40,000 out of the fifth Commonwealth Fund appropriation. Of this amount, \$39,966.71 was actually expended in Hungary. This was used to supply food to professors' and students' "mensas," or dining-rooms, where meals were served at a nominal price far below the actual cost and, in the case of particularly needy individuals, were furnished free. In all, the equivalent of 403,400 meals to 15,900 individual beneficiaries were furnished from this appropriation.

The total food relief to Hungarian intellectuals from the Commonwealth Fund thus totaled \$102,466.71, representing 1,063,400 meals distributed among approximately 40,900 individual beneficiaries.

From the sixth Commonwealth appropriation for clothing relief the sum of \$25,000 was allocated to Hungary and the records show that \$24,527.29 was actually spent. This sum was used to purchase the following commodities:

Commodities	Quantity
Shoes .....	2,500 pairs
Socks and stockings .....	4,984 pairs
Woolen cloth .....	9,392 yards
Lining .....	12,077 yards
Pocketing .....	3,630 yards
Underdrawers .....	3,400 pairs
Combination underwear .....	1,600 suits

For distribution, this was divided into two types of packages: "A"—Woolen, lining, etc., for 1 suit or costume; "B"—1 pair shoes, 2 pairs stockings, 2 suits underwear. A small charge was made for each package sufficient to cover the incidental cost of distribution. This money was placed in a special fund and was later used to purchase 9,000 meters of linen, sufficient to supply 1,800 persons with outfits.

In all, the European Children's Fund was able to supply 5,000 clothing packages in Hungary from this Commonwealth appropriation. The distribution of these gifts by type of beneficiary is given in the accompanying tabulation.

Altogether, the \$126,994.30 from the Commonwealth Fund which was used in Hungary benefited a total of approximately 45,900 individuals.

*f) Poland:* The situation in Poland was rendered particularly difficult because of the large number of refugees from Russia and the war-

stricken districts of eastern Poland. It was estimated that in the five larger cities of Poland there were at least 65,000 Russian refugee intellectuals in urgent need, as well as other thousands in the smaller cities.

DISTRIBUTION OF CLOTHING PACKAGES TO INTELLECTUAL CLASSES IN HUNGARY BY TYPE OF BENEFICIARY

Type of Beneficiary	Number of Individuals
Teachers and professors .....	1,412
State employees .....	508
Clerks .....	453
Widows and orphans .....	452
Pensioners .....	310
Architects and engineers.....	235
Refugees .....	220
University students .....	185
Physicians .....	180
Unemployed .....	147
Attorneys, ex-judges, and lawyers.....	156
Journalists .....	107
Actors .....	97
Musicians .....	78
Law students .....	78
Pharmacists .....	59
Sculptors .....	55
Ex-army officers .....	55
Writers and authors .....	44
Invalid war veterans .....	42
Painters .....	41
Priests, various faiths .....	33
Ex-police staff .....	29
Applied art .....	24
Total beneficiaries .....	5,000
Total value .....	\$24,527.59

The contributions from the Commonwealth Fund formed an important means of relieving many thousands of these Polish and Russian intellectuals. As shown in Table 62 (pages 98-99), the total contributions from the Commonwealth Fund used in Poland amounted to \$401,532.38. Of this amount \$57,532.49 came from the sixth contribution and was used for the purchase of clothing. This left \$343,999.89 from the second, third, fifth, seventh, and eighth appropriations, all of which was used for food relief.

The distribution of the Commonwealth food was in the form of food packages, except in certain cities where kitchens were operated for professors, students, and other needy intelligentsia. In each instance, investigations were carried out by local committees representing the various professions or organizations and the

distributions were made after recommendation by these committees. In certain instances the final distribution was made through well-established local relief organizations.

The following table gives an analysis of the Commonwealth Fund food distribution in Poland.

The food distributed to these 85,187 beneficiaries was equivalent to approximately 3,920,348 meals, making the average cost per meal \$0.088 and the cost per beneficiary \$4.04.

In addition to the food relief, the sixth Commonwealth Fund appropriation provided for an intelligentsia clothing program, of which a total

of \$57,532.49 was expended for beneficiaries in Poland. This sum provided for the following commodities:

Commodity	Quantity
Shoes .....	5,800 pairs
Socks and stockings .....	11,600 pairs
Cloth .....	20,938 $\frac{5}{8}$ yards
Lining .....	24,252 yards
Pocketing .....	2,503 yards
Undershirts .....	2,000 each
Drawers .....	2,000 pairs
Combination underwear .....	9,600 suits
Ivory buttons .....	70,704 number
Metal buttons .....	12,096 number
Hooks and eyes.....	86,400 pairs
Thread, needles, and other accessories

It was estimated that this material would supply 5,800 complete outfits, of which 1,000 were allotted to men and 4,800 to women. Certain savings which were effected in the actual manufacture of this material made it possible to increase the number of outfits distributed to 6,280, including 1,284 for men and 4,996 for women. The preceding table shows the distribution of these clothing outfits by cities and the organizations through which distribution was effected. Direct distribution where indicated was through the European Children's Fund.

*Joint Distribution Committee contributions.*—As pointed out in another section of this report the American Jewish Joint Distribution Committee played a very important part in the post-war relief in Central Europe. In addition to large funds spent on their own responsibility, this organization through, or in co-operation with, the A.R.A.E.C.F. made relief contributions totaling \$8,161,941.34. Of this amount, we are concerned, here, only with the \$250,000 contributed by the J.D.C. to the special programs

for intelligentsia feeding. This sum of money was turned over to the E.C.F. in 1922 with the instructions that it was to be used in Austria and Poland without regard to the race or religion of the beneficiary. As in the case of other intelligentsia feeding, this relief was administered in co-operation with local relief organizations, which investigated needy cases and recommended relief. The relief was applied through food packages to individuals, through meals served in kitchens, food deliveries to homes, and that supplied to students' and professors' messes.

Of the total amount, \$200,000 was distributed in Austria and \$50,000 in Poland. The following table summarizes these deliveries.

## SUMMARY OF J.D.C. INTELLIGENTSIA RELIEF ON SPECIAL PROGRAMS

The detail of the Austrian deliveries is shown in Table 64, which gives the number of beneficiaries and the value of deliveries by types of relief and by professions of recipients.

The relief to the intellectual classes in Poland from the Joint Distribution Committee funds was used entirely for supplementary rations in intelligentsia kitchens. The Farmers' Union in Poland co-operated in furnishing certain supplies for these kitchens, particularly vegetables, and these were also supplemented by local government contributions. As a result, the supplies furnished by the European Children's Fund were distributed to a much larger number of persons and over a longer period than would otherwise have been possible. As shown in the summary table given on this page, the \$50,000 spent in Poland was distributed in 1,958,174 meals, making the average cost of this food only \$0.0255 per meal. In Austria, where local donations could not be supplied so freely, the cost per meal was approximately \$0.0459, or nearly double that in Poland.

The accompanying table shows the number of beneficiaries in each of the fourteen Polish cities where this fund was distributed. No statistics are available to show the division by professions of the beneficiaries of this particular

fund. However, they were in all cases selected on the same basis as were those for other intelligentsia feeding.

*Laura Spelman Rockefeller Memorial.*—Following the revolution in Russia, approximately 2,000,000 Russian citizens were forced to leave their native country. A considerable number of these refugees, especially from Odessa, Novoros-

sisk, and Crimea, were forced into Turkey and particularly into Constantinople. The plight of these refugees, many of them from the educated classes, was particularly deplorable. It soon became evident that there was no immediate possibility of these Russians becoming permanently established in Turkey and little chance of their returning to Russia. The solution of the problem therefore involved their evacuation to other countries. The next difficulty, in view of their destitute and demoralized condition, was to find countries which would permit their entry. In the meantime it was urgently necessary that they be fed.

In the fall of 1921 Dr. Fridtjof Nansen, High Commissioner for Russian Refugee Relief of the League of Nations, visited Constantinople and from that time the League took an active interest in expediting the evacuations of these Russians from Constantinople. However, relatively little was accomplished, and the condition of the refugees was becoming worse in the summer of that year.

In the meantime the European Children's Fund had attempted to alleviate some of the worst suffering, but the lack of funds available for adult relief permitted little activity there. Besides, it would be an enormous drain on any relief funds to attempt to feed these refugees indefinitely. Therefore it was decided that steps must be taken to solve this problem permanently.

In the meantime the E.C.F. had interested the trustees of the Laura Spelman Rockefeller Memorial in the pitiful condition of these refugees. In March, 1922, the E.C.F. at the request of this Fund, sent Arthur Ringland to Constantinople. As a result of Mr. Ringland's efforts, an agreement between the League of Nations and the E.C.F. was drawn up which provided that if the League would appropriate \$150,000 (£30,000 sterling) for the evacuation of the dependent refugees the E.C.F., on behalf of the Laura Spelman Rockefeller Memorial, would undertake their feeding during the period of evacuation, estimated to require four months, commencing July 1, 1922. The League accepted the proposal and invited the member nations to subscribe the necessary funds. Late in June contributions, totaling approximately \$90,000, had been received from Belgium, Brazil, China, Czecho-

slovakia, Great Britain, Japan, and Switzerland. To this amount the American Red Cross generously contributed approximately \$60,000 to complete the necessary fund.

The Laura Spelman Rockefeller Memorial made available to the E.C.F. the sum of \$100,000 to take care of the feeding operations. Although it was estimated that there were approximately 27,000 Russian refugees in the vicinity of Constantinople, the Relief Administration could only undertake the support of those who were wholly dependent. A special registration showed 11,407 refugees in this class, divided as follows:

Class of Refugee	Number of Refugees
Children from four to fifteen, inclusive..	1,378
Hospital patients .....	1,159
Convalescent invalids .....	3,568
Able-bodied adults .....	3,558
Children under four, and nursing and expectant mothers .....	1,744
Total .....	11,407

The complete evacuation of the Russian refugees from Constantinople was not accomplished until May 1, 1923. During this period about 22,000 refugees were evacuated, of which 1,847 were sent to the United States. The expense of evacuating those sent to the United States was shared equally by the E.C.F., the League of Nations, and the Red Cross fund.

The final accounting for the \$100,000 contribution from the Laura Spelman Rockefeller Memorial is shown by the records of the E.C.F., as follows:

Value of food purchased .....	\$62,957.64
Cost of warehousing .....	3,581.60
Cost of transportation .....	4,982.81
Cost of kitchens and bakeries.....	5,841.79
Total cost of feeding operations..	\$77,363.84
Cost of evacuation operations.....	21,402.18
Total cost .....	\$98,766.02
Received from sale of equipment..	143.43
Total expended .....	\$98,622.59
Balance returned to Memorial Fund by check dated February 8, 1924..	1,377.41
Total fund .....	\$100,000.00

It will be noted that the expenses for warehousing, transportation, and for kitchens and bakeries total \$14,406.20. This extra cost was made necessary because the operations were carried on with little assistance from the local governments or other organizations and also because facilities in the vicinity of Constantinople were scarce and costly. The overhead cost of the operations was borne by the E.C.F.

Because of the various needs of the refugees it was necessary to establish special rations for each class. These rations varied in caloric value from 1,133 calories for the able-bodied to 2,000 calories for the hospital patients. Altogether, 1,357,632 meals were served with a total cost of \$77,363.84, or approximately 5.7 cents per meal.

The food purchased for the refugee relief in Constantinople is summarized in the accompanying table.

SUMMARY OF FOOD DISTRIBUTED IN REFUGEE RELIEF IN  
CONSTANTINOPLE

(Paid for from the Laura Spelman Rockefeller  
Memorial Appropriation)

Commodity	Metric Tons	Value

Total .....	562.0	\$62,957.64

*European Children's Fund contribution.*—

As pointed out in an earlier paragraph, a large portion of the money available to the E.C.F. had been contributed for particular purposes and hence was not available for many needs for which relief was urgently required. In some instances the Administration was able to secure special appropriations from other organizations to take care of these particular needs, as in the case of the intelligentsia relief discussed in the preceding pages. On the other hand, there were also other relief organizations which were in a particularly strategic position to carry out cer-

tain kinds of needed relief and these not infrequently asked for contributions from the E.C.F. In only a few instances could these requests for funds be granted, and then it frequently became a trade by which the other organization undertook a form of relief for which the E.C.F. was not organized.

These contributions by the E.C.F. to other relief organizations were handled under the heading of "Special programs." Such contributions, totaling \$696,962.94, were made to two organizations as follows:

American Friends Service Committee	\$326,962.94
World's Student Christian Federation..	370,000.00
Total .....	\$696,962.94

The contribution to the American Friends Service Committee was made for work in three countries, viz., Russia, Poland, and Austria.

*American Friends Service Committee.*—(a) *Russia:* Early in 1921 Russia was suffering from the terrible effects of the revolution, but the E.C.F. at that time had effected no arrangements with the Soviet Government which would permit them to undertake relief work there. The Friends Emergency and War Victims' Relief Committee, one of the organizations of international Quaker relief, was already established in Russia. The severe suffering there led the Quakers to appeal for help from many sources. The American Friends Service Committee, with headquarters in Philadelphia, appealed to the E.C.F., who in May, 1921, agreed to turn over to the Friends Committee food supplies to the value of \$100,000.

Although the American Relief Administration (Russian Unit) began its own relief work in Russia in the latter part of 1921, they made a further agreement to turn over a second \$100,000 worth of food to the Quakers in 1922. The work of the Friends Committee was serving such a useful purpose that it seemed much better to support this organization than to attempt to duplicate the work they were already carrying out.

Under these agreements a total of 468.2 metric tons of food, valued at \$196,672.20, was furnished to the Quaker organization. The commodities delivered are shown in the accompanying table.

COMMODITIES DELIVERED TO THE FRIENDS SERVICE  
COMMITTEE FOR RELIEF IN RUSSIA

Commodity	Metric Tons	Value

b) *Poland*: Almost immediately after the close of hostilities a committee of the Friends relief organization made a visit to Poland. The suffering they found there induced them to undertake various relief activities, including a considerable amount of child feeding. By 1921 the E.C.F. was engaged in extensive child feeding in Poland, but it was found that the Quakers were reaching certain types of the population and certain localities which the E.C.F. could not duplicate without great expense. Rather than attempt this duplication the E.C.F. undertook to assist the Friends in certain of their special programs.

Altogether, commodities to the value of \$80,290.74 were turned over to the Friends Committee in Poland. These deliveries were effected by two transactions: first, a bulk sale from warehouse stock at Warsaw of 106.7 metric tons of foodstuffs, valued at approximately \$50,000; and, second, three cargoes of cottonseed meal shipped from Galveston, Texas, to Hamburg and then transshipped to Danzig. This cottonseed meal, amounting to 633.3 metric tons valued at \$30,291.26, was to supplement the cattle feed and thus to increase the local milk supply. This was in line with the policy of the E.C.F. to help the various countries help themselves, and to build up their industries.

The commodities turned over to the Quakers under the bulk sale transactions are shown in Table 65.

The cottonseed meal was delivered in three cargoes, as shown below.

Date (1921)	Galveston to Hamburg via	Hamburg to Danzig via	Metric Tons
May .....	King City .....	Mottlau .....	152.4
June .....	Alness .....	Aeolus, VII .....	289.1
August .....	Hans .....	Adele, IV .....	191.8
Total tons .....			633.3
Total value .....			\$30,291.26

The total deliveries of all commodities to the Friends for Polish relief thus amounted to 740.0 metric tons, valued at \$80,290.74.

c) *Austria*: As in other countries of Central Europe, the Quakers established their relief work in Vienna and certain other sections of Austria shortly after the Armistice. A certain proportion of this work was child feeding, and among other things they were feeding in the homes a large number of undernourished younger children, i.e., those between the ages of three and six years who were not able to come to the kitchens.

The E.C.F. was carrying on a large child-feeding program in Austria, but all of its feeding was being done in kitchens and they had no organization to adequately supervise home feeding of this character. The Quakers asked that either the E.C.F. should take over this home feeding or else furnish the Friends organization with supplies.

The E.C.F. agreed to turn over \$50,000 worth of food to the Quaker organization for feeding these younger children, with the understanding that this should be known as E.C.F. feeding, but handled entirely by the Friends personnel. This food was used to feed approximately 40,000 children, each of whom was furnished with half the regular child-feeding ration. These funds thus provided for approximately 3,000,000 supplementary meals for these younger children.

This transfer of food to the Quaker organization took place in six bulk sale deliveries from the Vienna warehouse. The detail of these deliveries is given in Table 66 (page 110).

*Student feeding.*—In connection with the campaign for the European Relief Council fund (see pages 77–80), efforts were made in co-operation with the American Y.M.C.A. to have special gifts designated for the relief of students in Central European universities. The condition of many of the students in these universities was particularly distressing. This appeal had particular weight with many American universities and considerable sums of money were contributed by American students to assist their distressed brothers in Europe.

As a result of the Relief Council drive, Mr. Hoover was able to allocate the sum of \$370,000 for this student feeding, which sum was to be spent in co-operation with the American Y.M.C.A. and Y.W.C.A. and their suborganization, the World's Student Christian Federation.

Of this total, the sum of \$80,000 was turned over to the World's Student Christian Federation in cash to be expended for general relief other than feeding. This arrangement was in accordance with an agreement entered into with the Y.M.C.A. at the time the funds were collected. The reports of the Student Federation show that this money was spent for relief in Austria, Czechoslovakia, Poland, Hungary, and the Baltic countries. This money was expended for such things as textbooks, scientific apparatus, bedding, room rent, fuel, and many other necessities in the life of these destitute students. However, the reports of the World's Student Christian Federation show no details as to these expenditures nor their exact allocation to the several countries. For the purposes of this report this \$80,000 will have to be carried as unallocated relief.

Of the remaining \$290,000, £4,000 sterling, or

\$16,755.98, was expended for clothing purchased in London. This clothing was distributed to needy students in the universities in Central Europe. This purchase and distribution was handled entirely by the World's Student Christian Federation, and no details of the type of clothing, the number of beneficiaries, or the countries in which the clothing was distributed are available at this date.

With these expenditures deducted, there remained from the student-feeding fund a total of \$273,244.02, all of which was used for feeding purposes. The distribution of this food was handled by the E.C.F. working in close co-operation with the World's Student Christian Federation and through them with the well-organized local students' committees in the various schools. The personnel of the W.S.C.F. was used largely to assist in this distribution.

The general policy of the student-feeding work was to furnish or contribute toward the supply of one relief meal a day to needy students. The size of the ration varied somewhat according to needs, but the average meal was planned to consist of about 1,000 calories. In most cases the feeding was done at the local student messes, which were going concerns, usually under faculty supervision. Usually a nominal charge of a few cents was made for each meal; however, one of the conditions imposed by the Relief Administration was that no student should be excluded on account of inability to pay or on account of race, religion, or politics. In some places, as in Graz and Innsbruck, it was necessary to establish completely new kitchens and to furnish all the food requirements for the relief meal.

Table 67 shows the allocation of this student-

feeding fund, by countries, together with the number of beneficiaries, and the estimated number of meals in each.

*Refugee relief in Poland.*—On July 12, 1920, the London office of the E.C.F. relayed the following message from Warsaw to New York:

Thousands destitute refugees coming into Poland as result Bolshevik advance. Great need food relief, especially warehouse packages. General relief food drafts almost exhausted. Cannot some philanthropic organization be persuaded to help in this emergency?

Mr. Hoover replied immediately by allotting \$50,000 from E.C.F. funds for this purpose and by making an immediate appeal to other organizations for assistance. Within ten days after this cable was received the A.R.A. European Children's Fund had secured contributions of \$200,000 to care for this emergency.

The extreme urgency of the refugee situation is clearly shown in the cables and reports from the Warsaw office at this time. Thus, a cable from Warsaw dated July 24, 1920, contains the following:

Freight cars in train loads reach our eastern feeding stations filled with refugee families, frequently days without food. Crowded into same cars are several families with such belongings as they could rescue, often including cow, pig, or few chickens.

On July 13, 1920, Hugh Gibson, American Minister to Poland, gave an interview to the

press asking for assistance in this emergency. He said in part:

Reports from various sources indicate that thousands of refugees are pouring westward before the Soviet Army under conditions of desperate suffering and distress. The food situation, already bad, has been aggravated by this influx of refugees and by the effect of the crisis on transportation and distribution. If suffering and starvation are to be averted there must be immediate help from this country.

Much is now being done but not enough to meet the crisis. The European Children's Fund is feeding 1,200,000 children every day in Poland. Various other relief bodies are working to the limit of their resources. . . . It is to be hoped that the acute suffering of the present crisis will awaken practical sympathy and that our splendid corps of relief workers in Poland may be enabled to meet the crisis through adequate support from their own country.

The refugee relief work is especially noteworthy for the speed with which it was put into execution. As pointed out above, the first cable regarding this situation was sent to New York on July 12, 1920. By July 16, the London office had been authorized to deliver food on this program to the extent of \$50,000. On July 24, 1920, W. P. Fuller, Jr., chief of the E.C.F. Warsaw Mission, cabled in part as follows:

. . . . Within 48 hours of notice of donation our food was actually being fed to refugees in Warsaw, Białystok, Brest, and Lwów, which are most important stations. Shortly afterwards we were also feeding at Chełm, Kraków, and Łódź, as well as on smaller scale

at many roadside points. Large-scale operations now beginning at Thorn, where permanent refugee camps are being arranged. . . .

The quickness with which this work was started was of course possible because of the warehouse stock of food and the ability of the E.C.F. personnel to meet emergencies of this character.

The total of the special refugee relief fund amounted to \$302,000. The sources of these contributions were as follows:

European Children's Fund—General funds..	\$125,000
National Polish Committee.....	50,000
Joint Distribution Committee.....	25,000
Edward W. Harkness.....	75,000
William Bingham II.....	27,000
Total .....	\$302,000

The contribution from the E.C.F. general fund includes a number of small donations especially earmarked for refugee relief.

This money was used to purchase food packages and bulk deliveries to the refugee kitchens. The total amount delivered was 809.9 metric tons. The warehouse records account for these deliveries as shown in Table 68.

The meals furnished by the refugee kitchens consisted of an average of 280 grams per person.

On this basis the estimated number of meals provided by the relief deliveries would amount to 2,892,572, and the average cost per meal was 10.44 cents.

The distribution of this food in the refugee camps and kitchens was greatly aided by many existing relief organizations, such as the National Refugee Commission, Joint Distribution Committee, the Red Cross, and others. These organizations had already established feeding stations, railroad station canteens, or central kitchens, on the eastern border of Poland and were thus able to render great assistance in getting food to the refugees.

No accurate figures of the number of refugees fed are available. Many hundreds of thousands, even millions, of refugees crossed the Polish border during these trying times. There were times when the E.C.F. kitchens in Warsaw served as many as 10,000 dinners a day to these unfortunates.

In addition to the relief meals furnished to adult refugees discussed above, the E.C.F. fed vast numbers of refugee children at its regular child-feeding kitchens. No separate report on the number of these children is available, but it was estimated that more than 150,000 refugee children under fifteen years were actually being fed in the 2,000 kitchens and institutions oper-

\* Represents value of package deliveries to kitchens, to-wit: 353 "A," 49 "B," 100 "C," 59 "D." All other deliveries were made from bulk stock.

† Owing to the Bolshevik invasion, the A.R.A. Warehouses were unable to make deliveries in eastern Poland. The following deliveries were taken care of by the E.C.F. from surplus child-feeding stocks, which were later returned to the E.C.F. by the A.R.A.W.

ated in Poland by the E.C.F. All of this child feeding was in addition to the refugee relief discussed above.

The files of the Hoover War Library at Stanford University contain hundreds of letters from Polish officials and private citizens expressing appreciation and thanks for the help rendered at a time when it looked as if Poland would be overrun by this horde of refugees from the east.

## II. AMERICAN ORGANIZATIONS OTHER THAN THE EUROPEAN CHILDREN'S FUND—RECONSTRUCTION PERIOD, 1919-1924

Table 51 (page 80) shows that aside from the work under the immediate direction of the European Children's Fund there were other American organizations which, in co-operation with the E.C.F., furnished relief supplies amounting to 942,267.0 metric tons and valued at

TABLE 69

\$96,506,869.36, during the Reconstruction Period. Two of these organizations, the United States Grain Corporation and the "United States

Government,"<sup>1</sup> were governmental bodies and the deliveries made by them were with the authority of Congress. The other American organizations were private charitable bodies. In addition to the organizations included here, there were certain other American organizations where the co-operation with the European Children's Fund was of a more involved nature; these have been discussed under Special Programs. Records of such deliveries have for the most part been included with those of the E.C.F.

Table 69 summarizes the deliveries by organizations other than the E.C.F. which will be discussed in this section.

### UNITED STATES GRAIN CORPORATION

The relief deliveries to European countries by the United States Grain Corporation during the Reconstruction Period were made under the authority of two acts of Congress. The first was the Act of March 30, 1920,<sup>2</sup> which authorized the Grain Corporation to sell to these countries, for cash or credit, up to 5,000,000 barrels of surplus flour which the Corporation had acquired in connection with its operations in maintaining the guaranteed price of wheat.<sup>3</sup> The second was the Act of December 22, 1921,<sup>2</sup> which appropriated \$20,000,000 of the Grain Corporation's capital to be used to purchase American corn, milk, and seed grain for the relief of the Russian people during the great famine.

*Surplus flour.*—With the approach of the end of the 1919-1920 crop year, the United States Grain Corporation found that it had accumulated a considerable stock of soft winter-wheat straight flour which had been acquired in connection with maintaining the guaranteed price of wheat under the Act of March 4, 1919. This flour was not readily salable in such large quantities either in this country or to the Allies. In the spring of 1920, Mr. Barnes wrote to President Wilson pointing out that the Corporation had some 500,000 tons of this flour which it was feared might spoil with the advent of warmer weather. In reply to this, the President wrote:

It is desirable that you should take steps to dispose of these accumulated stocks on credit, if you cannot do so for cash, to such buyers and on such terms and conditions as best protect the interest of our Government.

On these points, it is desirable that the views of our own Department of State and of our National Treasury should be secured.

<sup>1</sup> In accordance with the executive order of President Harding, dated January 24, 1922, the surplus medical and hospital supplies were to be delivered by the War, Navy, and Treasury departments and by the United States Shipping Board.

<sup>2</sup> For text of this Act, see *The Grain Trade during the World War*, by F. M. Surface, page 514.

<sup>3</sup> For further discussion of this, see Surface, *loc. cit.*

Before any action was taken on this, it was deemed best to place the whole situation before Congress for such action as it might care to take. Congress promptly passed an act (approved March 30, 1920) which directly authorized the Grain Corporation to dispose of its remaining stock of flour up to 5,000,000 barrels for cash, or on credit, for the purpose of providing relief for the distressed population in the countries of Europe or countries contiguous thereto.

Under this direct authorization the Grain Corporation made sales of flour on credit to Armenia, Austria, Czechoslovakia, Hungary, and Poland. The Grain Corporation secured treasury notes from each of these governments covering the sums involved. These notes, payable in eighteen months, with 5 per cent interest payable semiannually, were turned over to the United States Treasury as part of the assets of the Grain Corporation.

The deliveries of flour to these countries under this Act, totaling 481,945.3 metric tons, valued at \$57,782,118.20, are summarized in Table 70 (page 115).

It should be pointed out that the foregoing value represents the f.o.b. value of this flour in the United States. The Grain Corporation had no funds and no authority to pay for the transportation from American ports to Europe. The countries to which the flour was sold likewise had no facilities for overseas transportation and were also without funds with which to pay for its movement. The European Children's Fund was able to persuade the British Government to pay the major portion of freight, insurance, and other charges for the overseas transportation of this flour (cf. page 123). The freight for the flour going to Armenia was paid in part by the American Red Cross and the Near East Relief.

*Soviet Republics.*—In December, 1921, Congress, upon recommendation of President Harding and Secretary of Commerce Hoover, passed an act (approved December 22, 1921) which authorized the President to cause to be spent out of the capital of the United States Grain Corporation a sum not exceeding \$20,000,000. This was to be used to purchase in the United States, and to transport and distribute in Russia, corn, seed grain, and preserved milk for the relief of the Russian people. Corn was specified as the

only food grain to be purchased because of the large surplus in this country and the low price which it was bringing.

To carry out this Act, President Harding issued an Executive Order on December 24, 1921, creating a "Purchasing Commission for Russian Relief," and naming the U.S. Grain Corporation as the fiscal agent of the Commission, while the American Relief Administration was directed to accept these commodities in Russia and to attend to their distribution in that country.<sup>1</sup>

The members of this Purchasing Commission named in the Executive Order were the Secretary of Commerce; James P. Goodrich, of Indiana; Edward M. Flesh, of Missouri; Edgar Rickard, of New York; and Don Livingston, of South Dakota.

Because of the terrible conditions existing in Russia at this time it was necessary for the Commission to act quickly if they were to save any considerable portion of the population. The Purchasing Commission was fortunate enough to be able to buy four cargoes of corn grits and milk which were already on their way to Europe, one having sailed as early as December 10, 1921. These early cargoes enabled the relief work to get under way early in January, which would otherwise have been delayed a full month.

The Purchasing Commission at once advertised for bids on corn for immediate shipment and before the end of December had purchased upward of 1,000,000 bushels. The bulk of the commodities paid for from the Grain Corporation funds were purchased and shipped during the period from January to April, 1922, although some purchases were made as late as August, 1922.

Owing to the very large crop of corn in the United States in 1921, the price had fallen to disastrously low levels. According to the figures compiled by the Department of Agriculture, the average price paid to the producer for corn in Nebraska was twenty-five cents a bushel in November, 1921, and instances are known where the price fell as low as eleven cents a bushel. Many farmers were using corn for fuel. Largely as a result of President Harding's Purchasing Committee for Russian Relief entering the mar-

<sup>1</sup> For the text of this Executive Order, see Surface, *loc. cit.*, page 545.

## SUMMARY OF COMMODITIES PURCHASED FOR SOVIET RUSSIA AND PAID FOR BY THE UNITED STATES GRAIN CORPORATION

Commodity	Unit	Quantity	Equivalent Metric Tons	Total Value
Mixed corn, No. 2.....	Bushel	8,147,294	206,953.6	\$ 5,196,359.10

Miscellaneous .....		.....	1,100.0	.....
Total f.o.b. value .....			386,070.8	\$14,857,594.83
Total transportation cost .....				3,804,585.17
Total c.i.f. value .....				\$18,662,180.00

ket, the average price to the producer rose to fifty cents a bushel in February, 1922, and shortly afterward was above sixty cents. This indirect result of the Russian relief added hundreds of millions of dollars to the value of the corn crop for the American farmers.

The Act of Congress authorized the payment of transportation charges as well as the cost of the food and seed grain. In order to handle the work, the Grain Corporation had to reorganize its purchasing and shipping departments, which had been practically demobilized preparatory to liquidation, and it had also to build up its accounting department. In spite of these handicaps the supplies were handled with dispatch, and a total of 386,070.8 metric tons of food and seed grain, with a total value of \$18,662,180, were shipped. The preceding tabulation summarizes the detail of these purchases, while Tables 511 and 517 give further details of their shipment and distribution.

The supplies furnished from the Grain Corporation funds were of the greatest help in alleviating some of the worst suffering during that terrible winter of 1921-1922. Furthermore, without the seed grain furnished in time for planting, Russia would have been even worse off the year following, because in many regions the peasants had eaten the last of their grain and it would have been impossible to have planted another crop.<sup>1</sup>

The total deliveries by the Grain Corporation in the Reconstruction Period summarized by

<sup>1</sup> For further discussion, see page 255, but especially H. H. Fisher, *The Famine in Soviet Russia*, Macmillan Company, 1927.

operation and country of destination are given in Table 70. Further detail will be found in Appendix tables, and in discussion of relief to the respective countries.

TABLE 70

## SUMMARY OF RELIEF DELIVERIES BY THE UNITED STATES GRAIN CORPORATION—RECONSTRUCTION PERIOD, 1920-1924

Country of Destination	Total Metric Tons	Total Value
Act of March 30, 1920		
Armenia .....	40,633.5	\$ 4,813,744.45
Austria .....	200,824.8	24,055,708.92
Czechoslovakia .....	23,809.0	2,873,238.25
Hungary .....	14,114.0	1,685,835.61
Poland .....	202,564.0	24,353,590.97
Subtotal .....	481,945.3	\$57,782,118.20
Act of December 22, 1921		
Russia, Soviet Republics	386,070.8	18,662,180.00
Grand total .....	868,016.1	\$76,444,298.20

## U.S. GOVERNMENT SURPLUS MEDICAL SUPPLIES

One of the difficult conditions which faced the Russian unit of the American Relief Administration in its work in Soviet Russia was the rapid spread of disease and the lack of facilities with which to combat it. Russian cities and provinces were found to be reasonably well supplied with hospital facilities, but these were almost entirely denuded of equipment, including drugs, medicines, instruments, bedding, etc. In order to help remedy this situation, Mr. Hoover first interested the American Red Cross in the Russian situation, with the result that they turned over to the A.R.A. large quantities of

supplies which are discussed in a later section of this report. At the same time he undertook to secure from the United States Government certain supplies which they had accumulated in Europe during the war and which were in store in Germany in connection with the Army of Occupation. The Army was willing to release these supplies but was lacking in authority to do so. At Mr. Hoover's instance the matter was presented to Congress and an act was passed (Act of January 20, 1922) authorizing these supplies to be turned over to the American Relief Administration for use in Russia.

The medical and hospital supplies obtained from the Government totaled approximately 3,107.6 metric tons, valued at \$4,000,000.00. The Laura Spelman Rockefeller Memorial contributed \$267,392.88 to pay the freight charges on transporting these supplies to Russian ports. A portion of these supplies was turned over to the Near East Relief for distribution and use in the Caucasus. The remainder was distributed by the A.R.A. Russian Medical Unit, which was organized for this purpose. The following tabulation summarizes the distribution of these supplies.

#### U.S. GOVERNMENT SURPLUS MEDICAL SUPPLIES

	Metric Tons	Value
Distributed by A.R.A.		
Soviet Russia .....	2,892.4	\$3,790,268.37
Distributed by Near East Relief		
Caucasus .....	215.2	209,731.63
Total .....	3,107.6	\$4,000,000.00
Freight on supplies to Soviet		
Russia contributed by Laura		
Spelman Rockefeller Memo-		
rial .....		\$ 267,392.88
Grand total .....	3,107.6	\$4,267,392.88

The distribution of these supplies to the eighteen districts of Soviet Russia is shown in detail in Medical Tables 2 and 3 (pages 946-86). The work of the A.R.A. Medical Unit is also further described in the section on Russian relief (pages 251-53).

#### AMERICAN RED CROSS

In connection with relief deliveries during the Armistice Period reference has been made to the work of the American Red Cross in

Europe (cf. page 58). The major portion of the work of the American Red Cross was carried on quite independently of any of the organizations which form the basis of this report. Only those operations of the Red Cross which were in close co-operation with the A.R.A. or the E.C.F. are reported in this volume. Table 33 (page 58) shows that the total operations of the Red Cross coming in this category amounted to \$7,258,553.10, of which \$1,741,740.00 represented relief during the Armistice Period and has been reported upon elsewhere. This leaves \$5,516,813.10 as the relief furnished by the American Red Cross in co-operation with the European Children's Fund and affiliated organizations during the Reconstruction Period. As shown by Table 69, this represented a total of 25,548.3 metric tons of relief supplies. The following tabulation shows the distribution of this relief by countries of destination.

#### SUMMARY OF RELIEF FURNISHED BY THE AMERICAN RED CROSS DURING THE RECONSTRUCTION PERIOD

Country	Total Tons	Total Value
Armenia (freight) .....		\$ 500,000.00
Greece .....	20,374.0	1,211,949.95
Russia, Soviet Republics ....	5,174.3	3,804,863.15
Total .....	25,548.3	\$5,516,813.10

The relief furnished to Armenia was toward the payment of freight on flour sold by the U.S. Grain Corporation. This contribution by the Red Cross, together with contributions by the Near East Relief and the United Kingdom, made it possible for this flour to be delivered to Armenia at a time when these people were in urgent need.

The relief to Greece was to render aid to the panic-stricken Greek refugees from Turkey in the fall of 1922. As described elsewhere (page 201), a special emergency fund was collected for this purpose in the United States. The American Relief Administration undertook to act as purchasing agent for the American Red Cross for the supplies needed. Between November, 1922, and May, 1923, the A.R.A. purchased and shipped 20,374.0 metric tons of foodstuffs, chiefly cereal supplies. The total f.o.b. value of these commodities at New York City was \$1,178,163.85. In addition, the A.R.A. paid out \$33,786.10 for freight and other charges, mak-

ing a total of \$1,211,949.95. The American Red Cross reimbursed the A.R.A. for this full amount and paid out of other funds all additional freight and miscellaneous charges. The distribution of these supplies in Greece was entirely in the hands of the Red Cross.

The relief furnished to the Soviet Republics of Russia by the Red Cross represents medical and hospital supplies turned over to the American Relief Administration for distribution in Russia. As discussed earlier in connection with the U.S. Government surplus medical supplies, there was urgent need for medical relief in Russia in 1922. The Red Cross had no organization in Russia which could handle this, but agreed to furnish these supplies if the A.R.A. would undertake their distribution.

As shown in the table on page 116 the total amount of the medical and hospital supplies turned over by the Red Cross was 5,174.3 metric tons, valued at \$3,804,863.15. Medical Table 1 (pages 936-45) shows the distribution of these supplies in detail, and further facts regarding the work of the A.R.A. Medical Unit in Soviet Russia are given in connection with the discussion of the relief to that country.

#### AMERICAN FRIENDS SERVICE COMMITTEE

As is well known, the Quaker religion teaches that all war is wrong. History is replete with incidents wherein the members of this faith have suffered disgrace, ignominy, and imprisonment at the hands of their own governments rather than take an active part in that which was against their conscience. When the war broke out in 1914, the Quakers in England were divided in opinion. Some felt that the special circumstances of this war justified them in joining the army, and, since the basis of the Quaker religion is individual responsibility according to the dictates of one's own conscience, they did so. Others joined the Red Cross or ambulance work in the field. Still others, believing that any direct participation in the war was wrong, devoted themselves to the alleviation of the suffering which the war brought to the civilian populations. It was this latter group which in September, 1914, formed the Friends War Victims Relief Committee, which later became known as the Friends Emergency and War Victims Relief Committee.

This organization began at once its relief work among the civilians in the occupied territory of France and Belgium. Helping to rehabilitate homes, building temporary houses, securing needed furniture, distributing clothing and food, and alleviating suffering among the peasants were among the self-imposed duties of these bands of Friends from England. Throughout this period the American Quakers co-operated with the English Friends in this work.

In June, 1917, after the United States had entered the war, there was organized the American Friends Service Committee which represented all Quaker organizations in America. This organization continued to co-operate with the English Friends and joined with them in relief activities in Russia prior to the Armistice.

Following the Armistice the American Friends Service Committee began immediately to send out little bands of relief workers. These went to Poland, Syria, Serbia, and other countries, and as soon as conditions permitted into Germany and Austria. The Friends thus sought to heal the wounds of war by extending a helping hand to these peoples in their time of need.

In the summer of 1919, Mr. Hoover asked the Friends to extend this relief work into Germany, where the need was great but where American public opinion would not yet permit official relief to be extended.<sup>1</sup>

In the meantime, the Friends made a survey of German conditions and found that 75 per cent or more of the German children were suffering from undernourishment and were in need of outside help. A beginning was made in the summer of 1919 when the Friends Committee purchased from the American Relief Administration 60.9 tons of fats, milk, cocoa, and clothing for \$29,687.25, with which they began the program of German child feeding under the direction of Carolena M. Wood, Jane Addams, and Dr. Alice Hamilton.

In November, 1919, Mr. Hoover asked the American Friends Service Committee to extend their work over the whole of Germany, and to carry this on along the lines being followed by

<sup>1</sup> Congress in making the appropriation of \$100,000,000 for European Relief (Act of February 25, 1919) specifically excepted all former enemy countries from its benefits.

By the Armistice extension agreement, dated January 16, 1919, Germany was permitted to buy food in large quantities, for cash (cf. pages 193 ff.).

the European Children's Fund in other countries. This the Friends Committee gladly undertook.

Under the agreement between the two organizations, the European Children's Fund attended to the purchasing and shipping of all commodities originating with the E.C.F. for German child feeding. These commodities were turned over to the American Friends Service Committee in German ports, chiefly at Hamburg, and all details of the distribution within the country were handled by the Friends Committee.<sup>1</sup> Under these arrangements shipments of food were started in January, 1920, and actual feeding began on February 26, 1920.

During the early period of this relief the purchase and shipment of supplies were financed by the European Children's Fund out of such profits as had been realized by the Grain Corporation on cash sales of food to Germany in 1919.

In the winter of 1920-1921 the American Friends Service Committee participated in the European Relief Council drive and, as shown on page 80, the Friends Committee were credited with a total of \$861,022.31 from the proceeds of this campaign. The major portion of this amount was expended through the European Children's Fund for supplies for German child feeding. In addition to this, the E.C.F. from time to time set up further large credits for the Friends work in Germany. Up to the end of 1922 when the Quakers officially withdrew from Germany, the European Children's Fund had furnished supplies for German child feeding amounting to 28,720.1 tons, valued at \$6,728,989.92.

The sources of the finance for these operations were as follows:

Direct contributions from E.C.F. ....	\$5,031,582.14
Allotment from European Relief Council ..	861,022.31
Cash collected by A.F.S.C. ....	836,385.47
Total .....	\$6,728,989.92

Because of the urgent need for additional child feeding in Germany beyond anything that could be done with the funds already collected, the Friends Committee called a meeting of a group of Americans, of German descent, at Philadelphia in April, 1921. At this meeting it was

<sup>1</sup> The methods of distribution were similar to those used by the E.C.F. described on pages 84-86. Also see discussion of relief in Germany, pages 198-99, for further details.

agreed to organize a campaign for a fund of three million dollars, to be solicited from Americans of German descent. By July, 1922, approximately \$1,500,000 had been raised, which was sufficient to continue the child-feeding program from January, 1922, to September 30, 1922. The supplies for this latter program were purchased chiefly in America by the Friends Service Committee, in co-operation with the purchasing committee of the E.C.F. From these latter funds also the sum of \$100,000 was used to purchase clothing in Germany, which was distributed to needy children.

In addition to its principal work of child feeding, the Friends Committee also handled the distribution of clothing and materials for clothing which were contributed from various American sources. During 1921 and 1922, 416 bales of clothing and 989 bales of flannels were donated to the Friends and were distributed to children and needy mothers in Germany. Of the flannels, 547 bales were the gift of the American Red Cross. The estimated tonnage of this clothing and cloth amounted to 175.6 metric tons, with a total estimated value of \$287,000.

In the early part of 1922 the Friends Committee considered that the most urgent need for German child relief would be over with the next harvest and they made plans to withdraw from further operations. This was accomplished by the end of July, 1922, but they left in the hands of the Deutscher Zentrallausschuss für die Auslandshilfe (the German Central Committee for Foreign Relief) in Berlin sufficient supplies to continue the feeding until the end of September, 1922.

Throughout the whole of these operations the German Government had co-operated closely with the child-feeding work and had made very substantial contributions both in commodities and in services. The German Food Ministry undertook to furnish free of charge all flour and sugar used in the child-feeding work from October, 1920, to September 30, 1922. The total contribution of the German Government of these two commodities amounted to:

	Metric Tons	Total Value
Flour .....	12,663.0	\$1,627,005.56
Sugar .....	4,170.0	765,015.69
Total .....	16,833.0	\$2,392,021.25

In addition, the German Government undertook to furnish free transportation and express service for all internal shipments of relief supplies; to supply warehouse and handling services; to furnish free transportation to members of the Friends Mission when on relief business; and to furnish preferential telephone service. In addition, the preparation and serving of the meals and all costs of operating the local kitchens were taken care of by local committees and by volunteer services. The value of these contributions by the German Government and the German people exceeded \$2,500,000.

Although the Quakers withdrew from Germany in the middle of 1922 it soon became evident that conditions had not yet become sufficiently normal to avoid much serious suffering among German children. In 1923, recurring reports of the condition of these children aroused the sympathies of a number of prominent Americans. Under the leadership of the late Major General Henry T. Allen, formerly commander of the American Army of Occupation in Germany, a committee was formed to undertake the collection of funds to feed 1,000,000 German children through the winter of 1923-1924. This committee, known as the American Committee for Relief of German Children, was sponsored by more than 100 Americans prominent in all walks of life. Their appeal for funds was backed by President Coolidge, Mrs. Woodrow Wilson, Cardinal Dougherty, Rabbi Wise, Mr. Hoover, and many others. Unsuccessful efforts were made to get Congress to appropriate funds for this work. However, the Committee was successful in raising more than \$4,300,000 in the United States for this relief. This made it possible to feed more than 1,000,000 German children until the end of 1924 and to arrange a program for feeding several hundred thousand children during the winter of 1924-1925. Although the European Children's Fund had completed most of its work and had exhausted most of its available funds in the Russian relief before the work of this committee was started, it made a cash contribution of \$50,000 to the Committee's fund.

The American Friends Service Committee played a prominent part in collecting the funds for General Allen's American Committee for Relief of German Children, and this committee

turned over to the Quakers the work of purchasing all supplies and the supervision of the relief work in Germany. The actual distribution in Germany was carried out by the German Central Committee for Foreign Relief (Deutscher Zentralausschuss für die Auslandshilfe), which had co-operated in the earlier work undertaken by the Quakers.

In connection with the work of General Allen's Committee a food draft service similar to that formerly conducted by the A.R.A. Warehouses and the E.C.F. was organized. This service, under the directorship of W. Gordon Brown, made sales totaling 17,200 packages, valued at \$172,000.

The total child relief work in Germany under the direction of the American Friends Service Committee may be summarized as follows:

SUMMARY OF AMERICAN FRIENDS SERVICE COMMITTEE  
RELIEF TO GERMAN CHILDREN

Source of Relief	Total Metric Tons	Total Value
Purchases in 1919 by A.F.S.C.	60.9	\$ 29,687.25
In co-operation with E.C.F...	28,720.1	6,728,989.92
German-American contribution .....	.....	1,500,000.00
American Committee for Relief of German Children..	.....	4,300,000.00
Food draft service.....	495.5	172,000.00
Clothing distribution .....	175.6	287,000.00
Total from America.....		\$13,017,677.17
German Government commodities .....	16,833.0	\$ 2,392,021.25
German Government service .....	.....	2,500,000.00
Grand total .....		\$17,909,698.42

In addition to work in Germany, the American Friends Service Committee conducted extensive post-Armistice relief operations in Austria, Poland, Russia, Danzig Free City, and in Yugoslavia. Many of these operations were not connected with the American Relief Administration. Such, for example, were the building of houses for Serbian families, the improvement of agricultural conditions in Yugoslavia, Poland, and Austria, and the anti-typhus work in Poland.

The A.F.S.C. worked jointly with the English Quakers in most countries, pooling supplies and personnel. According to the reports of these committees the total amount actually handled

by them for relief purposes totaled considerably more than \$50,000,000.<sup>1</sup>

However, the food relief work by the American Friends Service Committee was very closely co-ordinated with the work of the European Children's Fund. The latter organization attended to the purchasing and shipping of a considerable portion of these supplies from the United States.

Table 69 shows the total deliveries during the Reconstruction Period credited to the American Friends Service Committee in this report as 33,713.9 metric tons, valued at \$7,056,966.68. The distribution of these commodities by countries of destination is given in Table 71.

TABLE 71

RELIEF FURNISHED BY AMERICAN FRIENDS SERVICE COMMITTEE IN CO-OPERATION WITH THE EUROPEAN CHILDREN'S FUND—RECONSTRUCTION PERIOD, 1919-1924

Country of Destination	Total Metric Tons	Total Value
Danzig Free City.....	158.3	\$ 30,291.26
Germany .....	28,720.1	6,728,989.92
Poland .....	633.3	30,291.26
Russia, Soviet Republics.....	4,202.2	267,394.24
Total .....	33,713.9	\$7,056,966.68

This, however, does not cover all of the work in which the American Friends Service Committee was associated with the E.C.F. But in the case of the other operations, credit had already been given to the A.R.A. Warehouses for bulk sales or to the European Children's Fund on special programs so that to include these deliveries here would mean a duplication. For the sake of completeness the tabulation in the next column shows the deliveries by the Friends organization for which credit is given elsewhere. (See also Table 159, pages 340-41.)

Of the relief definitely credited to the American Friends Service Committee in Table 71, the deliveries to the Free City of Danzig represent child-feeding operations carried on there by the Friends which were taken over by the E.C.F. in April, 1921. The relief to Poland represents cottonseed meal which was turned over to the Friends by the E.C.F. These operations, which

are somewhat involved, are described more in detail under Special Programs and under the discussion of relief deliveries to Danzig and to Poland.

Country	Total Metric Tons	Total Value
Austria .....	248.6*	\$ 62,112.08*
Poland .....	106.7†	49,999.48†
Russia, Soviet Republics...	468.2‡	196,672.20‡
Total .....	823.5	\$ 308,783.76
Total from Table 71.....	33,713.9	7,056,966.68
Grand total .....	34,537.4	\$7,365,750.44

\* Of this amount, 183.8 tons, valued at \$50,000, is included in Special Programs. The remainder represents bulk sales from A.R.A. Warehouses.

† Represents part of the special program operation as discussed on page 109.

‡ Special program for Russia described on page 108.

The delivery of 28,720.1 tons of supplies to Germany, valued at \$6,728,989.92, represents the child-feeding work carried on there in co-operation with the E.C.F. as described above. Of this amount, 1,237.2 metric tons, with a value of \$341,309.7, represent bulk sales from the A.R.A. Warehouses and has been included in the warehouse reports. This duplication is included here to give full credit to the Friends for their German operations. This is included in the deduction to arrive at the net total relief delivered as in Table 51 (page 80).

The relief for Soviet Russia shown in Table 71 represents commodities which the European Children's Fund transported for the Friends from Hamburg to Baltic ports in 1922. The detail of these shipments is given in Table 525.

In addition to all of the operations by the Friends referred to here, it is to be remembered that they carried on much additional work entirely independent of the E.C.F. or affiliated organizations, which is not included in this report.

The total contribution to the Quaker relief work from the European Children's Fund, including the European Relief Council, may be summarized as follows:

Direct contribution for German child feeding .....	\$5,031,583.14
Allotment from European Relief Council .....	861,022.31
Special programs (Austria, Poland, and Russia) .....	326,962.94
Contribution to General Allen's Committee .....	50,000.00
Total .....	\$6,269,567.39

<sup>1</sup> For a description of this work, see *A Quaker Adventure*, by A. Ruth Fry; *Service of Love in War Time*, by Rufus M. Jones; *Quakers in Action*, by Lester M. Jones; and *Quaker Adventures*, by Edward Thomas.

## THE COMMONWEALTH FUND

The origin of the Commonwealth Fund and its activities in European relief have been discussed under Special Programs. It is shown there that the Commonwealth Fund made nine separate appropriations to the European Children's Fund for special relief in Europe. These nine appropriations totaled \$2,149,000, of which seven, amounting to \$1,249,000, were earmarked for food relief to the intellectual classes in Central European countries. These latter appropriations were used either to purchase food drafts or bulk food from the A.R.A. Warehouses. These transactions are, therefore, accounted for under the A.R.A. Warehouse operations and in this report are not again specifically credited to the Commonwealth Fund.

Of the two remaining appropriations by the Commonwealth Fund, one, the first to be made, was for \$750,000 to be used for children's relief in Armenia. The other, the sixth Commonwealth Fund appropriation, was for \$150,000 to be used to furnish clothing for the intellectual classes in Central European countries. These two appropriations, totaling \$900,000, involved special purchases of commodities by the E.C.F. and are not accounted for elsewhere in this report.

Table 69 (page 113) gives the Commonwealth Fund credit for 3,836.7 metric tons of supplies, valued at \$890,642.46. The difference between this amount and the \$900,000.00 appropriated was used to purchase food through the A.R.A. Warehouses, as explained below.

The following table summarizes the distribution of the commodities credited to the Commonwealth Fund by countries to which they were distributed. Further details are given in Table 160 and in the discussion under Special Programs.

SUMMARY OF RELIEF DELIVERIES CREDITED TO THE COMMONWEALTH FUND—RECONSTRUCTION PERIOD, 1919–1924

Country of Destination	Total Tons	Total Value
Armenia (child feeding).....	3,762.0	\$746,107.12
Austria (clothing) .....	31.8	62,475.26
Hungary (clothing) .....	12.5	24,527.59
Poland (clothing) .....	30.4	57,532.49
Total .....	3,836.7	\$890,642.46

The deliveries to Armenia of 3,762.0 metric tons, worth \$746,107.12, were child-feeding sup-

plies purchased from the first Commonwealth appropriation of \$750,000.00. The balance of \$3,892.88 from this appropriation was later used to purchase food drafts for destitute intelligentsia in Austria and Danzig Free City, as explained on page 97.

The clothing relief to Austria, Hungary, and Poland, totaling 74.7 metric tons valued at \$144,535.34, was from the sixth Commonwealth Fund appropriation of \$150,000.00, which was designated for the purchase of clothing for the intellectual classes in these countries. Of the balance of this appropriation, \$5,000.00 was used for the purchase of greatly needed food supplies for Austrian intelligentsia and \$464.66 was used to purchase kitchen equipment for professors' and students' messes. These transactions, together with further detail regarding the clothing distribution, are given in the section under Special Programs.

## JEWISH JOINT DISTRIBUTION COMMITTEE

Reference has been made to the work of the American Jewish Joint Distribution Committee and the important part which it played in the relief work in the Armistice Period. This organization continued its work throughout the Reconstruction Period, but for the most part these later operations were entirely separate from the work of the European Children's Fund, although at all times the two organizations worked in close co-operation. The J.D.C. made extended use of the A.R.A. Warehouses and a large portion of the bulk and food draft sales in certain countries was made to this committee. Unfortunately, no tabulation is available showing the amount of these purchases, which are all credited under the A.R.A.W. operations (page 94) by countries to which they were delivered. Some indication of the purchases made by the J.D.C. is given in connection with the discussion of relief to Poland and Russia.

Table 69 (page 113) shows that only 537.0 metric tons of relief supplies, valued at \$273,555, are credited to the J.D.C. in this report for the Reconstruction Period. This represents a contribution of milk and soap made to the European Children's Fund for the children's relief work in Poland.

Reference should also be made here to the part taken by the J.D.C. in the intelligentsia

relief to Austria and Poland by which they contributed the sum of \$250,000 for the purchase of food packages and bulk food. This money was expended through the A.R.A. Warehouses and is included in the report of those operations. This work is discussed in more detail under Special Programs.

#### NEAR EAST RELIEF

The work of the Near East Relief has been discussed briefly under the Armistice Period and is referred to in more detail in the discussion of relief to Armenia. As in the case of other similar organizations, this report covers only that small portion of the work of the Near East Relief which was carried on in close affiliation with the A.R.A. or the E.C.F.

Table 69 (page 113) shows that during the Reconstruction Period the Near East Relief is credited in this report with the delivery of 7,404.3 metric tons of supplies, and with a total money expenditure of \$1,944,119.91. All of this relief was for Armenia.

Table 30 (page 56) shows that of this total amount expended in the Reconstruction Period \$532,790.01 was for the payment of freight and other miscellaneous charges. This represented the payment of a portion of the freight on flour furnished to Armenia by the U.S. Grain Corporation under the Act of Congress of March 30, 1920.

The remainder of the relief credited in this report to the Near East Relief during the Reconstruction Period consisted of 7,404.3 metric tons of food and clothing shipped to Armenia by the European Children's Fund in 1920 and 1922 and paid for by the Near East Relief. The total delivered value of these supplies was \$1,411,329.90 (see Table 205).

Reference should also be made here to the work of distributing 215.2 tons of U.S. Government surplus medical supplies in the Caucasus, which was handled by the Near East Relief. Many other activities carried on by the Near East Relief are beyond the scope of this report.

#### OTHER AMERICAN ORGANIZATIONS

While there were numerous other American organizations which rendered important assistance to these European countries during the

difficult period of reconstruction, the work of most of these lies entirely outside the scope of this report. Some phases of the work of the Y.M.C.A. and the Y.W.C.A., together with the World's Student Christian Federation, are referred to under Special Programs. Many others might be mentioned, but even then the list would be incomplete, and except for purchases of supplies through the A.R.A. Warehouses the work of these bodies was quite independent of the organizations which form the basis of this report.

Table 69 (page 113) shows small deliveries by two American organizations operating in Yugoslavia which are not accounted for elsewhere in this report. These are the Serbian Child Welfare Association of America and the American Women's Hospital in Serbia. These two organizations purchased clothing supplies from the stocks imported by the European Children's Fund and attended to the internal distribution of these. The total amount of these supplies for the two organizations was 103.1 metric tons, valued at \$113,081.13. The distribution between the two organizations was as follows:

Organization	Metric Tons	Total Value
Serbian Child Welfare Association*	79.3	\$ 77,869.94
American Women's Hospital.....	23.8	35,211.19
Total .....	103.1	\$113,081.13

\* Included 1,000 blouses or 1.6 metric tons, valued at \$1,303.12, for Dr. Reeder of the Welfare Association.

The details of these operations are given in Tables 361 and 362.

### III. RELIEF FROM COUNTRIES OTHER THAN THE UNITED STATES—RECONSTRUCTION PERIOD, 1919-1924

Much of the relief work of the Reconstruction Period discussed in this report was of the nature of private charitable operations and, consequently, there was no occasion for the type of international co-operation which was found in the Armistice Period. This, of course, does not mean that other nations were not undertaking important relief measures but rather that these were carried on quite independently of the organizations which form the basis of this report.

It should also be pointed out that individuals in many countries contributed to the funds which were available to the European Children's Fund and its affiliated organizations. This was particularly true of the purchases of food remittances and also of the sales of bulk food to foreign relief organizations. These sales are included in the A.R.A. Warehouse operations and it is impossible to make any separate tabulation.

Throughout its work in Central Europe and Russia the European Children's Fund made it a condition of supplying relief that each country should contribute in accordance with its ability. As a result, these countries furnished large quantities of food in addition to transportation, warehousing, and the personal services which made this work possible.

Table 51 (page 80) shows the total contributions from countries other than the United States during the Reconstruction Period as 266,229.1 metric tons with a total value of \$44,222,231.22. Table 72 segregates this by sources of the contributions.

TABLE 72

SUMMARY OF RELIEF SUPPLIED FROM COUNTRIES OTHER THAN THE UNITED STATES—RECONSTRUCTION PERIOD, 1919–1924

Source	Total Metric Tons	Total Value
United Kingdom (freight) . . . . .		\$18,212,473.88
Central European Govern- ments . . . . .	96,540.2	14,652,432.21
Russia, Soviet Republics . . . . .	169,688.9	11,357,325.13
Total . . . . .	266,229.1	\$44,222,231.22

#### RELIEF FROM THE UNITED KINGDOM

After Congress passed the Act of March 30, 1920, authorizing the U.S. Grain Corporation to sell up to 5,000,000 barrels of flour for the relief of Europe, there arose the important problem as to how this flour was to be transported from the United States to countries which needed it. The Grain Corporation was prepared to sell the flour to these countries on credit but it had no authority and no funds to pay for the ocean transportation. None of these countries were themselves able to finance these transportation charges. In this emergency the European Children's Fund sought the aid of the British Government, which had available some unexpended funds for relief

work. The British Treasury was finally persuaded to undertake the payment of the freight and other charges on these flour shipments, and in return to accept the obligations of the Central European governments for payment. As a result, the United Kingdom paid out a total of \$18,212,473.88 for such freight, insurance, and miscellaneous charges. These were divided among the several countries as follows:

#### FREIGHT PAYMENT BY THE UNITED KINGDOM—RECONSTRUCTION PERIOD, 1919–1924

Country	Amount Paid
Armenia . . . . .	\$ 560,000.00*
Austria . . . . .	8,032,991.88
Czechoslovakia . . . . .	952,362.08
Hungary . . . . .	564,561.60
Poland . . . . .	8,102,558.32
Total . . . . .	\$18,212,473.88

\* Represents approximately one-third of the transportation charges on Armenian flour; remainder paid by the American Red Cross and the Near East Relief. See footnote to Table 203.

Further details of these freight and transportation charges will be found in Table 162 and in the discussion of the relief to the separate countries.

The United Kingdom carried on various other relief activities during the Reconstruction Period which form no proper part of this report.<sup>1</sup>

#### RELIEF SUPPLIED BY CENTRAL EUROPEAN GOVERNMENTS

As indicated above, one of the conditions under which the European Children's Fund undertook relief work in any country was that the government of the country should undertake to render all the assistance possible. This meant in addition to transportation, warehousing, and personal services in preparing meals, etc., that the governments should contribute such food supplies as they were able to furnish. These contributions came both from the Central governments and from local governmental bodies. The most important commodities donated from these sources were flour, sugar, and fresh vegetables.

Table 72 shows that the total of such contri-

<sup>1</sup> See *Economic Conditions in Central Europe*, Misc. Series (I), 1920 [Cmd. 521], LI, 173; and *Economic Conditions in Central Europe*, Misc. Series (II), 1920 [Cmd. 641], LI, 189.

butions amounted to 96,540.2 metric tons, with a total equivalent value of \$14,652,432.21. Table 73 summarizes these donations by the countries from which they came. Such donations were naturally used within the country contributing the supplies with the exceptions noted.

TABLE 73

SUMMARY OF RELIEF CONTRIBUTED BY CENTRAL EUROPEAN GOVERNMENTS, INCLUDING LOCAL DONATIONS—  
RECONSTRUCTION PERIOD, 1919-1924

Country	Total Metric Tons	Total Value
Austria .....	12,703.3	\$ 1,364,656.01
Czechoslovakia .....	3,955.8	693,099.02
Danzig Free City.....	74.0	8,574.44
Esthonia* .....	1,693.0	299,547.58
Finland .....	936.4	195,949.00
Germany .....	16,833.0	2,392,021.25
Hungary .....	1,733.0	265,806.84
Jugoslavia .....	2,634.0	533,677.16
Latvia* .....	478.6	85,137.24
Norway† .....	6.6	3,960.00
Poland* .....	52,579.2	7,749,374.77
Roumania .....	2,327.0	1,024,322.26
Northwest Russia .....	32.3	6,280.00
Russia, Soviet Republics....	554.0	30,026.64
Total .....	96,540.2	\$14,652,432.21

\* All commodities were distributed within the country making the contributions in these instances with the following exceptions: Esthonia, Latvia, and Poland donated warehouse space for supplies going to Soviet Russia of which the estimated value was:

Esthonia .....	\$ 1,102.94
Latvia .....	24,257.69
Poland .....	90,000.00

† The contribution of 6.6 tons of miscellaneous food from Norway was delivered to Latvia.

Further details of these contributions are given in Table 161 and in the discussion of the relief to the respective countries.

In addition to the commodities donated by these Central European governments and accounted for above, each country made valuable contributions in the form of intangible services and facilities, including local transportation of supplies and personnel, warehousing, handling, office facilities and supplies, kitchen facilities and equipment, fuel, and the personal services of many thousands of individuals in preparing and serving the daily meals for children. It is impossible to make even approximate estimates of the total value of such contributions. It was estimated by many of the E.C.F. men in the field that the money value of such contributions if they had been paid for would have equaled the

contributions from the European Children's Fund, which totaled nearly \$85,000,000. No attempt is made to estimate the total value of these intangible contributions from all countries, although in the discussion of relief to certain individual countries some estimates made by the E.C.F. representatives in the field have been included.

#### RELIEF CONTRIBUTED BY THE SOVIET REPUBLICS

Shortly after the relief work had started in the great famine-stricken regions of Soviet Russia, Mr. Hoover learned that the Soviet authorities had several million dollars' worth of gold and platinum, and he immediately suggested that this should be used for the purchase of food and seed grain. The Soviet officials were not antagonistic to this suggestion but it required several months of negotiations before this gold was placed at the disposition of the American Relief Administration on December 30, 1921. The total value of this gold was estimated at \$10,000,000. A few days later the Ukrainian Soviet Republic turned over nearly \$2,000,000 additional gold, making a total of nearly \$12,000,000.

The food situation had become so serious in Russia before this was received that the A.R.A. had found it necessary to anticipate its receipt and had delivered food to the value of \$4,322,450.83 (57,823.0 metric tons) against the expected receipt of this gold. This delivery has been carried in the record as part of the work of the European Children's Fund and is also included in deliveries by the Soviet Republics. In Table 51 (page 80) this duplication is deducted to arrive at a net total of the relief delivered in the Reconstruction Period.

Table 72 shows the total relief furnished by the Soviet Republics as 169,688.9 metric tons, valued at \$11,357,325.13. This is made up of two operations, as follows:

Operation	Total Tons	Total Value
Food delivered in advance		
by A.R.A. ....	57,823.0	\$ 4,322,450.83
Seed grain handled by A.R.A.	111,865.9	7,034,874.30
Total .....	169,688.9	\$11,357,325.13

Further details of the deliveries against these credits are given in Tables 165 and 519, and in the discussion of the relief deliveries to Russia.

## TRANSPORTATION, COMMUNICATION, AND FINANCE

### TRANSPORTATION AND COMMUNICATION

Of the many problems which had to be met in connection with the furnishing of relief to Europe during and after the war, one of the most serious was that of adequate transportation, both overseas and overland. The problems were different in the several operations reported in this volume and can best be covered under the four major groups of activities.

#### C.R.B. PERIOD

Transportation was one of the major problems in the Belgian relief work. This has been discussed so fully in previous publications<sup>1</sup> that only a few of the more important points are referred to here.

In the first months of the relief, i.e., the latter part of 1914 and the early months of 1915, no difficulty arose as tonnage was readily available and could be chartered through the usual commercial channels. The Commission gradually secured, under a continuous charter, a fleet of some twenty-three Belgian vessels totaling to 117,355 dead weight tons. This fleet was entirely inadequate to handle the necessary food imports and the Commission was continuously in the market for something like 179,000 dead weight tons in order to fulfil its minimum program. By the end of 1915 the growing world shortage of tonnage began to make itself felt. Charters began to be more difficult to obtain and their costs rose rapidly. In December, 1916, the Germans announced their proposed policy of unrestricted submarine warfare. This immediately altered the whole shipping situation. The Allies were threatened with imminent starvation and disaster; they needed every available ton of shipping for their own purposes. But the most immediate effect upon the Commission was the withdrawal of all neutral shipping from

the seas. The Commission was left with only the Belgian vessels, which also had to be moved with extreme caution. Of necessity all cross-Channel service from the United Kingdom was suspended.

During all of 1917 the greatest problem for the relief work was to secure necessary tonnage. The Allies had by this time instituted a complete control of all shipping, including neutral charters, and it was only by appeal to the Allied Governments that the Commission could obtain any tonnage. Finally on December 5, 1917, at an Inter-Allied conference in Paris it was decided that the Commission's needs should be placed on a priority list. Even then it was the end of April, 1918, before this decision could be put into effect.

Of course, all shipping operations required the agreement of all the belligerent governments to exempt the Commission's vessels from attack. All C.R.B. vessels were plainly marked, and flew the Commission's own distinctive flag. Nevertheless, the Commission's vessels had to pass through the most dangerous areas of the English Channel and the North Sea, both of which were filled with mine-strewn areas and German submarines. Safe conduct passes had to be secured for every vessel. Notwithstanding all these guaranties, the Commission lost a total of thirty-eight cargoes, of which twenty were torpedoed, fourteen sunk by mines, three sunk by submarine fire, and one by collision. Fourteen other vessels and cargoes were damaged. The total cargo lost through these fifty-two accidents amounted to 114,000 tons.

Rotterdam in neutral Holland, with its excellent harbor and equipment, and its direct canal connections with both Belgium and Northern France, was used as the principal port from which the relief commodities were transshipped to the interior. Antwerp, Dunkirk, and Lille were also used, but to a minor extent. The tabulation on the following page shows the total tonnage of Belgian relief supplies which passed through these four Northern European ports.

<sup>1</sup> George I. Gay, *Commission for Relief in Belgium—Statistical Review of Relief Operations* (Stanford University Press, 1925), pages 28-44; and, by the same author, *Public Relations of the Commission for Relief in Belgium—Documents*, 2 volumes (Stanford University Press, 1929).

Port	Metric Tons
Rotterdam .....	4,686,359
Antwerp .....	462,502
Dunkirk .....	15,826
Lille .....	9,744
Total .....	5,174,431

The internal distribution of supplies in Belgium was greatly facilitated by the excellent system of canals. However, during the German invasion in 1914, many of these canals had been destroyed, locks blown up, or the canals obstructed by destroyed bridges, sunken lighters, etc. The Germans had requisitioned most of the serviceable lighters, as well as the railroad rolling stock. Much preliminary work had to be accomplished in putting the most necessary canals in shape to operate and in securing equipment. In the early work the Commission chartered such Dutch- and Belgian-owned equipment as could be obtained, but, later on, the Commission began to purchase both tugs and lighters, and before the close of the work it had acquired a fleet of 495 lighters and 36 tugs.

The Commission also made use of rail shipments, particularly to move supplies to provinces not reached by the canal system and for emergency shipments when the canals were frozen.

In addition to the internal movement of relief supplies, the Commission also had to transport bunker coal for its vessels to the extent of some 20,000 tons per month, and an additional 12,000 tons per month from Belgian mines for the flour mills which the Commission operated in various parts of Belgium.

It was only natural that, with the Allied food blockade firmly clamped down on the Netherlands, there should occasionally be some difficulty because of the large volume of food going into Belgium through Rotterdam. Walter L. Brown<sup>1</sup> tells of a midnight visit to his apartment by two dignitaries of the city of Rotterdam to inform him that the Dutch Food Minister had instructed the Mayor of Rotterdam to stop all C.R.B. shipments to the Belgians until arrangements had been made to share supplies with the Dutch. Reinforced by the representatives of the American, British, French, and Belgian embassies, Mr. Brown called at the Dutch Foreign Of-

fice the next morning and the embargo was soon lifted. At another time a strike of the Dutch stevedores threatened the whole program, until arrangements were made to have Belgian stevedores who were interned in Holland do the work under the protection of Dutch soldiers, with the result that the Rotterdam stevedores soon resumed their duties.

It is of interest to record that the development of the "dispatch" clause in ships' charters originated in the Rotterdam office of the C.R.B. Charters had always provided for demurrage, permitting a certain number of days for loading or unloading and charging a specified sum for each day in excess of the number allowed. Rotterdam was breaking all records in unloading, and the C.R.B. officials conceived the idea that the ship should pay for every day that could be saved out of the minimum allowed. While the vessel owners objected at first, such a plan was finally put into operation with practically all C.R.B. ship charters. Since then a "dispatch" clause has appeared in many charters. By this arrangement the C.R.B. effected a saving of more than \$1,250,000 and set a new pace for the turn-around of cargo vessels between Atlantic ports and Rotterdam.

The paragraphs above describe very inadequately a few of the many transportation difficulties experienced in the Belgian relief work.

#### U.S.F.A. PERIOD

The problem of supplying the Allied countries with food during the period of our participation in the war was to a large extent a problem of marine transportation. The sinking of food and passenger ships, in the unrestricted submarine campaign of Germany, more than any other one thing, was responsible for bringing the United States into the war at the time she entered. It was this same submarine campaign that had reduced the world's available shipping tonnage to a minimum, and that prevented the Allied Governments from sending vessels on the longer voyages to the Southern Hemisphere and the East where surplus food supplies existed. Instead, it concentrated the demand for food upon North America, where the ocean voyage required only one-half to one-third the time necessary to make a round trip to South America or Australia. Besides, the Allies urgently

<sup>1</sup> *C.R.B. Bulletin*, October 22, 1930, page 16.

required munitions equipment and American soldiers, all of which were competing for ocean transport space. The Allies had already found it necessary to pool their shipping interests, which were controlled by the Allied Maritime Transport Council. Through this organization all Allied tonnage was allotted to the respective needs so far as these could be met.

One of the first requests which the Allies made of the United States in 1917 was for more ships. This was responsible for the organization of the Emergency Fleet Corporation and our vast shipbuilding program. It was not until the latter part of 1918 that this gigantic program began to bear significant fruit. If the war had continued a few months longer, the United States would have been able to replace with emergency vessels much of the tonnage destroyed by the war. During all of 1917 and the first half of 1918, the Allies had to depend upon their own tonnage and such neutral vessels as they could persuade, with exorbitant rates, to risk the hazards of the submarine-infested and mine-strewn passages.

Thus, during the war period, the problem of overseas transportation was almost entirely a responsibility of the Allied Governments. The United States Food Administration through its several agencies arranged for the sale of such foodstuffs as could be spared to the Allied buying organizations in this country. Our direct responsibility ceased when these commodities had been moved to seaboard. However, the Food Administration co-operated with the Allied agencies, as far as possible, to insure proper junctions between rail and water shipments, and to provide those commodities which could be handled with the least delay of the vessels in port. By these measures the rate of "turn around" of the available vessels was increased.

However, we had many problems of internal transportation which taxed our ability to the utmost. The great industrial activity in the United States, due to the Allied demand for munitions and supplies, together with the rapidly expanding war operations of the Government itself, had placed a heavy strain on our internal transportation system, for which it was totally unprepared.

Difficulties in securing deliveries began to appear by the middle of 1917. By fall they had become serious. The Government began to use

its authority for priority movement not only for strictly army and navy movements but for many commercial activities connected with the war. These priority requests resulted in upsetting whatever plans the transportation companies had devised for handling the traffic and conditions became chaotic.

The Food Administration could no longer secure movement of foodstuffs either for the Allies or for domestic needs. Embargoes were placed on loadings from certain territories in an effort to straighten out conditions, but such measures merely temporized with a vitally serious problem. Finally, on December 29, 1917, President Wilson directed that the Government take over the management of all railroads, and appointed William G. McAdoo, then Secretary of the Treasury, as director general of railroads.

This action, designed to bring unity of control and the formulation of a consistent policy for all rail transportation lines, might have been successful had the new administration not been met with the most severe adverse operating conditions. January, 1918, was a month of extremely severe blizzards, heavy snows, and unusually low temperatures. With the transportation situation already at the breaking point, this severe weather became the last straw. These conditions resulted in drastic freight embargoes and still more drastic fuel embargoes. Industries closed and conditions became chaotic.

In the meantime, the war program of the Allied countries was on the verge of collapse, due to inadequate supplies of food.<sup>1</sup> The United States was unable to bring the full measure of its assistance to them because of this transportation breakdown, which prevented movement of foodstuffs both from the farms to terminal markets and from these terminals to seaboard.

On January 6, 1918, Mr. Hoover wrote the Director General of Railroads<sup>2</sup> pointing out the extremely urgent needs of the Allies and suggesting a plan by which these needs could be met. This plan was not adopted until much later, and in the meantime it was only with the very greatest difficulty that the Food Administration was able to meet the Allied minimum demand.

<sup>1</sup> Compare letters from Allied officials cited on page 16.

<sup>2</sup> For copy of this letter and further details of transportation difficulties, see F. M. Surface, *The Grain Trade during the World War*, chapter 13.

It was not until March, 1918, that conditions improved perceptibly. By that time the Director General of Railroads had met the crisis by arranging with the Grain Corporation to operate under a permit system for grain movements, and this greatly simplified the whole problem.

Throughout the war and in the immediate post-war period transportation remained inadequate to meet the needs of the country during this period of accelerated activity.

#### ARMISTICE PERIOD

Of the many major problems which faced the Director General of Relief in the Armistice Period there were none more serious than that of transportation. This was true of both overseas shipping and of overland internal transportation in Europe.

*Overseas transportation.*—The Armistice resulted in some relief to world shipping since it was no longer necessary to transport a vast tonnage of munitions and war supplies. However, Europe was filled with the armies and navies of the Allies and these still required a large tonnage for their support and for their repatriation. The food supply of the Allied countries had been on a hand-to-mouth basis for many months, and still required a vast tonnage, particularly if normal stocks were to be accumulated. These needs were more than enough to occupy all available mercantile tonnage for many months to come.

For a few months immediately after the Armistice no special difficulty was experienced in obtaining tonnage, but by February, 1919, the freight market had tightened so that it was only with great difficulty that the Grain Corporation was able to secure the required shipping for relief work. In many instances serious delays in forwarding supplies were caused by this factor.

It was because of this acute shortage in shipping that the Allies insisted that Germany and Austria must turn over all their merchant tonnage to be operated by the Allies, as a precedent to the delivery of any food to these countries. After the German and Austrian vessels were placed in commission the situation eased somewhat, but this did not appreciably affect the tonnage position until near the end of the official relief operations in 1919.

Throughout the work of the American Relief Administration, the uncertainty as to whether

the provisional programs for a given country were adequate, as well as the uncertainty of internal conditions, rendered it impractical to allocate vessels at the time they left American ports. Consequently, the great majority of relief ships sailed with orders to report either at Gibraltar or at Falmouth, England, and were then directed to the ports where their cargoes were most needed at that time. In this way there was established what was known as the Southern Relief through Gibraltar, and the Northern Relief through Falmouth.

Mr. Hoover foresaw the probable difficulty in securing adequate shipping, and before he left the United States in November, 1918, used the authority granted him by President Wilson to make definite arrangements for two large relief programs, totaling approximately 240,000 tons of foodstuffs with definite commitments that shipping for these would be available. One of these programs was to be carried out and financed by the United States Army Quartermaster while the other was to be handled and financed by the Food Administration Grain Corporation. The shipping for both programs was to be supplied by the War Department with vessels no longer needed for the movement of munitions or troops from the United States.

*a) Grain Corporation shipment — First program:* The program undertaken by the Grain Corporation, also known as the First Northern Relief Program, consisted of some nineteen cargoes loaded in vessels furnished by the War Department. The first ship on this program, the "Ossineke," sailed from New York on December 15, 1918, or long before any definite arrangements for the relief work had been perfected. These Northern Relief vessels all left the United States bound for Falmouth, England, as a port of call. Before they arrived they were directed by wireless to final destinations.

Inasmuch as no definite relief programs for the various countries had been agreed upon when these vessels began to arrive in European waters, it was decided to store these early cargoes in Rotterdam. Owing to disturbed conditions it was not considered safe to build up stocks of foodstuffs in other Northern European ports during January and February, 1919. During January nearly 80,000 metric tons of food were unloaded into warehouses in Rotterdam.

Of the nineteen vessels which were loaded by the Grain Corporation on this first program, one, the "Piave," was sunk en route and the cargo sold for insurance. Of the other eighteen, all but two, the "Westward Ho," I, and the "West Humhaw," I, discharged at Rotterdam. The two last-mentioned vessels proceeded to Danzig, where the cargo of the "Westward Ho," I, was sold to the Jewish Joint Distribution Committee, while that of the "West Humhaw," I, consisting entirely of fats and milk, was delivered to the Government of Poland.

The tabulation below lists the steamers which sailed on the First Northern Relief Program, together with date of arrival and total cargo. The 115,059 metric tons shown here, together with the cargo of the "Piave," made approximately 120,000 tons as originally planned.

Steamer	Date of Arrival 1919	Cargo in Metric Tons
Fairmont .....	January 4	6,283.0
West Shore .....	January 4	6,482.0
Ossineke .....	January 5	6,085.0
West Madaket .....	January 8	6,683.0
Absaroka, I .....	January 14	6,370.0
Western Hero .....	January 14	6,945.0
Indianapolis .....	January 16	9,439.0
Nantasket .....	January 21	6,422.0
Western Sea .....	January 25	6,756.0
West Mead .....	January 26	6,936.0
Western Maid, I .....	January 31	6,263.0
Eastern Star .....	January 31	4,672.0
Morristown .....	February 3	4,829.0
Western Light .....	February 10	6,153.0
Pequoi .....	February 18	6,591.0
Newburg .....	February 18	6,331.0
Westward Ho, I .....	February 25	6,486.0*
West Humhaw, I .....	March 5	5,333.0*
Total .....		115,059.0†

\* "Westward Ho," I, and "West Humhaw," I, discharged at Danzig; other vessels at Rotterdam. The cargo of the "Westward Ho," I, was sold to the Joint Distribution Committee and distributed by them and the American Polish Committee.

† This tonnage (except "Westward Ho" and "West Humhaw") went into storage in Rotterdam. Shipments were made ex-stock. Therefore, few of these steamers appear in the Appendix tables.

b) *U.S. Army shipments:* As noted above, Mr. Hoover, before he sailed for Europe in November, 1918, had arranged with the War Department for the United States Army Quartermaster to ship from Army stocks in the United States approximately 120,000 metric tons of foodstuffs for the relief work. The arrangements made were to ship approximately 120,000 short tons of wheat flour, 20,000 short tons of pork prod-

ucts, and 4,000 short tons of preserved milk. These supplies were shipped by the Army in its own tonnage and constituted what was known as the First Southern Relief Program. These ships all sailed for Gibraltar as a port of call and from there were directed to Adriatic or Black Sea ports. These vessels arrived in January, February, and March, 1919, for the most part before definite relief programs had been arranged for the individual countries. Most of the cargoes were unloaded into warehouses by the Army and were then invoiced by the Quartermaster to the Food Administration Grain Corporation at a c.i.f. price, as they were needed for the relief work. In all of these transactions the London office of the Grain Corporation acted as the business agent of the American Relief Administration, attending to all details of receipts and settlements from the receiving governments and the settlement with the Army Quartermaster.

#### U.S. ARMY SHIPMENTS, FIRST SOUTHERN RELIEF PROGRAM

	Date of Arrival 1919	Cargo in Metric Tons

Total ..... 50,465.0\*

\* This tonnage went into storage in Adriatic and Black Sea ports and was delivered to the A.R.A. on Q.M. invoices, ex-Army stock. Therefore, but few of these steamers appear in the Appendix tables.

These reserve supplies built up in Southern European ports proved to be extremely important in relieving famine conditions in those countries.

The Army ships which sailed on this First Southern Relief Program and which were discharged under this agreement are shown in the list on page 129, together with their dates of arrival and total cargoes. Further details will be found in Table 111, pages 282-99.

c) *Grain Corporation shipment—Later programs:* After the completion of the original programs by the Grain Corporation and the Quartermaster General, the American Relief Administration sent to the New York office, each month in advance, an estimate of the amount and of the kind of supplies that would be required. The New York office of the Grain Corporation then arranged for the purchase of the supplies, the chartering of the ships, and attended to their dispatch. As each ship sailed, the Paris office of the Relief Administration was advised by cable of the fact, and of the approximate cargo, also whether sailing for Falmouth or Gibraltar.

The allocation of the ships to the various countries and relief programs was done in the Paris office. Before a ship was due at its port of call, the Paris office advised the London office of the Grain Corporation of the final destination. The Grain Corporation then transmitted the order to the ship and directed its course.

In the matter of communication with the ships at sea the co-operation of the American Navy was of inestimable service. Admiral Sims placed all Navy wires and means of communication at the disposal of Mr. Hoover, and made the statement that he could reach any vessel at any time and in any European waters. This statement was upheld by over seven months' operation. The facility with which supplies were diverted from a port jammed with excessive freight, as was Trieste during the third week in March, to more open ports in Roumania, or by which the program of one nation was decreased and another immediately increased by the change of destination of vessels in passage, testifies to the efficiency of our Naval communications.

During the period between December, 1918, and August, 1919, more than three hundred car-

goes from America were handled and, at the peak of the operation, as many as seventy relief cargoes were on passage at one time.

In all, the American Relief Administration delivered supplies at thirty-seven different European ports. Nineteen of these were in Northern Europe and eighteen on the Southern route. The map on page 132 shows the location of these ports and the main lines of internal transportation.

At each of these ports the Grain Corporation had an agent who, ordinarily, was also the agent of the United States Shipping Board. It was the duty of these agents to look after the discharge of the ship, to check its cargo, and to forward the supplies, or to obtain a receipt from the purchasing government.

Many difficulties were encountered by these agents. In some instances, owing to the demoralization of internal transportation, it was necessary to use ports unaccustomed to discharging large ships. This was the case at Gravosa (Ragusa), Cattaro, and Spalato. In other ports, such as Trieste and Danzig, the discharge was complicated by political differences and jealousies.

The table on the opposite page shows a summary of the weekly sailings from the United States, and the weekly arrivals in European ports, of the shipments made during the 1919 relief operations.

*Transshipping operations.*—One other phase of the marine transportation remains to be discussed. It has already been noted that the early relief shipments to the north were discharged at Rotterdam because other ports could not be used for storage. During January, February, and March, 1919, approximately 120,000 metric tons were discharged there. In order to deliver these supplies to the liberated countries, it was necessary to transship the major portion by sea. Small amounts were sold to Holland and some was sold to Finland, for which the Finns provided their own transportation.

In February, 1919, the recognition of the serious food scarcity in Poland rendered it necessary to send some of these supplies to that country. To do this, ten American ships of the Lake-boat type (a boat of 2,000 to 3,000 tons, developed for use on the Great Lakes) were chartered from the United States Shipping

Board, at \$600 a day for the bare boat, and arrangements made with the Navy to furnish the crews at cost. These boats were used to move the accumulated stocks from Rotterdam to Danzig and other northern ports. Later on, some of

them were used to transport United States Liquidation Commission supplies from French ports.

Early in March, two more boats of this type were added to the American Relief fleet. The

Map showing movement of A.R.A. relief supplies, 1919-1923, steamer routes, ports, overland shipments, and warehouses.

twelve Lake boats finally put in use for this work were:

Lake Mary	Lake Catherine
Lake Clear	Lake Dancey
Lake Traverse	Lake Eckhart
Lake Wimico	Lake Tulare
Lake St. Clair	Democracy
Lake St. Regis	Kerowlee

By employing Lake boats in this movement, eight days were cut off of the voyage of trans-Atlantic liners, which otherwise would have had to proceed direct to Danzig and other Baltic ports. It was also possible to ship to Danzig considerable quantities of supplies purchased from the C.R.B., which were urgently needed in Poland. The additional cost of transshipment was charged against the purchasing government. In all, more than 160,000 tons of food and other supplies were moved by these Lake boats.

It is perhaps not generally realized that the freight movements under the direction of the American Relief Administration and the Grain Corporation were possibly the largest ever carried on under a single operating head. It is extraordinary that there was not a single serious error in execution of any of the programs outlined at Paris, in spite of the frequent changes required by the state of affairs in Europe.

Much credit for this accomplishment is due to Colonel A. B. Barber and his assistant, Captain H. L. Bodman, who were in charge of the allocation of ships in the Paris office, but more especially to Edward M. Flesh, in charge of the London office of the Grain Corporation, and his able assistant, Captain Roger D. Lapham. To these latter gentlemen fell the responsibility of issuing all orders to all ships and of seeing that they followed these instructions.

Table 137 shows a summary of the monthly arrivals at each port, giving both the number of ships and the total cargo tons. The shipments from American ports, and the transshipments from European ports, are shown separately.

*Overland transportation.*—Among other serious difficulties encountered in 1919 were those connected with the overland transportation of relief supplies in the devastated territories. Mention has already been made of the chaotic political and economic conditions which prevailed in Central Europe after the Armistice.

The transportation systems had suffered particularly. In old Serbia, for example, practically all railroads were destroyed and to put these in operation would require the construction of bridges, tracks, etc., as well as the acquisition of rolling stock. In Roumania, out of 900 locomotives remaining after the Armistice, only 160 were in working order. The number of tank and freight cars had been very much reduced.

Overland transportation of American Relief supplies. Transporting American flour from Lieksa, Finland, into Russian Karelia for a distance of one hundred kilometers.

Even in such regions as Czechoslovakia, Austria, and Poland, where the actual destruction had not been so complete, there was practically no rolling stock worth the name. Added to this were the serious political difficulties caused by the breaking up of the former Austro-Hungarian Empire and the existing national and racial animosities. Practically all boundary lines of the new states were closed to traffic.

Nevertheless, the problem of the maintenance of human life and the preservation of order through adequate food supplies depended fully as much upon its proper internal distribution as it did on the proper amount of imports.

In view of these difficulties, Mr. Hoover in a memorandum to the Supreme War Council, March 5, 1919, proposed the following solution:

The solution which I propose, after elaborate investigation by American Railway Engineers, is one that I not only believe is feasible but will meet the various exigencies of the political situation. To this end the following plan is proposed: (a) All the states of the old Austrian Empire, including the areas held by the Italians on the Adriatic, should be called upon to furnish a definite contribution of railway rolling stock;

(b) This rolling stock should be marked as belonging to the Relief Administration and used solely for its purposes; (c) The Director General of Relief should be made the mandatory for the disposition of this rolling stock; (d) A regular train service should be established under his direction that will carry out the necessary programmes of food to the different localities; (e) This service should have entire freedom of movement over all railways regardless of political boundaries and in complete priority to other services; (f) The railway servants of any nationality may be employed in operations over any territory regardless of nationality or political boundaries; (g) Definite portions of port facilities should be assigned to the Relief Administration at Trieste and Fiume for the consumption of these ends; (h) The rolling stock should not be demanded by any of the Allied Governments until this service is completely equipped; (i) That the railway officials of each state and port officials in each port should be called upon to co-operate in maintenance of this service.

Transporting American flour above the Arctic Circle, Finland.

The Supreme War Council approved this plan on March 7, 1919, and directed each of the Central European states to contribute its quota of cars and locomotives. The organization of an Inter-Allied mission, known as the "Allied Railway Mission," with broad powers to control the movement of relief traffic in Central Europe, was also approved.

This Mission was organized under the direction of Mr. Hoover with an American, Lieutenant Colonel William B. Ryan, T.C., U.S.A., at its head. Later, it was necessary to relieve Colonel Ryan for other work, and Lieutenant

Colonel W. B. Causey, Engineers, U.S.A., was designated to replace him. Colonel William G. Atwood was the American representative on the Communication Section of the Supreme Economic Council and under Mr. Hoover was in charge of the communication work at the Paris office.

The first work initiated by the Allied Railway Mission was the opening of through freight service from Trieste to German Austria and Czechoslovakia. When the Mission commenced its operations in March, there were some 40,000 tons of supplies in Trieste and 12,000 in Fiume, and the average daily movement was only 700 tons out of Trieste, and nothing out of Fiume. From March 23 to June 15, under the operation of the Allied Railway Mission, a total of 178,200 tons, or a daily average, including holidays, which are numerous in Italy, of 2,121 tons, was moved from Trieste. On several days during this period, the daily movement exceeded 4,000 tons.

A study of the transportation systems showed that supplies for Czechoslovakia could be handled with greater economy and expediency through the German port of Hamburg, and then by barge down the Elbe. As soon as the necessary transportation and political arrangements could be made, supplies for Czechoslovakia were routed this way. The first barge left Hamburg on April 1, and arrived at Schandau near the Czechoslovakian border April 9. To the end of August more than 240,000 tons of supplies were shipped by the Elbe. (Cf. Table 240.)

The Mission also exercised general supervision over the transportation systems of the several Central European states. In particular, they assisted in the distribution of the available coal supply and assisted in obtaining an increased production of coal.

*Communications.*—Another important problem for the Director General of Relief was that of overland communication between the different countries in which relief missions were established. Following the political upheavals after the Armistice, all forms of communication including the postal service were interrupted between many of these Central European nations. Yet, if relief operations were to be directed in these countries, it was necessary to have an adequate means of communication between Paris and the field offices. At first, this had to be maintained entirely by the A.R.A.

courier service, and more than twenty courier routes were established and maintained between Paris and various European points. Even here great difficulty was experienced in maintaining schedules because of the irregular and intermittent train service between many points.

Telegraphic and telephone communications between most of the newly established governments had been interrupted and there seemed no likelihood of any early resumption of such service. Even where telegraph lines were established, international complications made the service almost impossible. For example, between Trieste and Vienna, the telegraph lines were controlled part of the distance by the Italian Government, part by Yugoslavia, and part by Austria. Deliveries were slow and uncertain. It was not unusual for the confirmation copy to be delivered by courier, before the message itself arrived.

Because of these conditions Mr. Hoover secured the services of a group of officers from the U.S. Army Signal Corps and undertook to establish a workable communication system. In some places the A.R.A. had to build new telegraph lines, but in most cases they were able to secure the lease or control of already existing lines and by negotiations with adjoining countries were able to establish satisfactory circuits throughout most of Central and Southern Europe. American operators, secured either from the Army Signal Corps or from the U.S. Navy, were installed at all points and the lines operated entirely by the A.R.A. Before the close of the relief work in July, 1919, upward of 10,000 miles of telephone and telegraph lines were being operated in this manner. The communication work was in charge of Major Frank H. Fay, Signal Corps, in the Paris office, while the negotiations for, and the establishment of, most of the circuits in Central and Southern Europe were handled by Captain Paul S. Clapp, Signal Corps, with headquarters in Vienna.

The map on page 136 shows the principal lines under the control of, or affiliated with, the American Relief Administration.

*Freight and insurance charges paid by American Relief Administration.—*

*a) Red Cross shipments:* The question of transportation of relief supplies for other relief organizations was of particular importance during the Armistice Period. For example, the

American Red Cross assembled large quantities of secondhand clothing in the United States but had no way of sending this to the countries in Europe where it was needed. Since practically no commercial vessels were running to continental ports during the Armistice Period, the A.R.A. undertook to transport a large portion of this clothing and also other miscellaneous supplies, chiefly medical and hospital materials, from the United States and to superintend their distribution in the countries where they were urgently needed.

During the period of the Armistice the A.R.A. transported a total of 4,494.8 metric tons of Red Cross clothing and medical and hospital supplies, on which the freight charges amounted to \$369,404.95. The following tabulation shows the quantities of these commodities going to each of the relief countries, with total freight charges. Table 143 gives the detail of these shipments.

FREIGHT ON AMERICAN RED CROSS CLOTHING AND OTHER SUPPLIES PAID BY AMERICAN RELIEF ADMINISTRATION

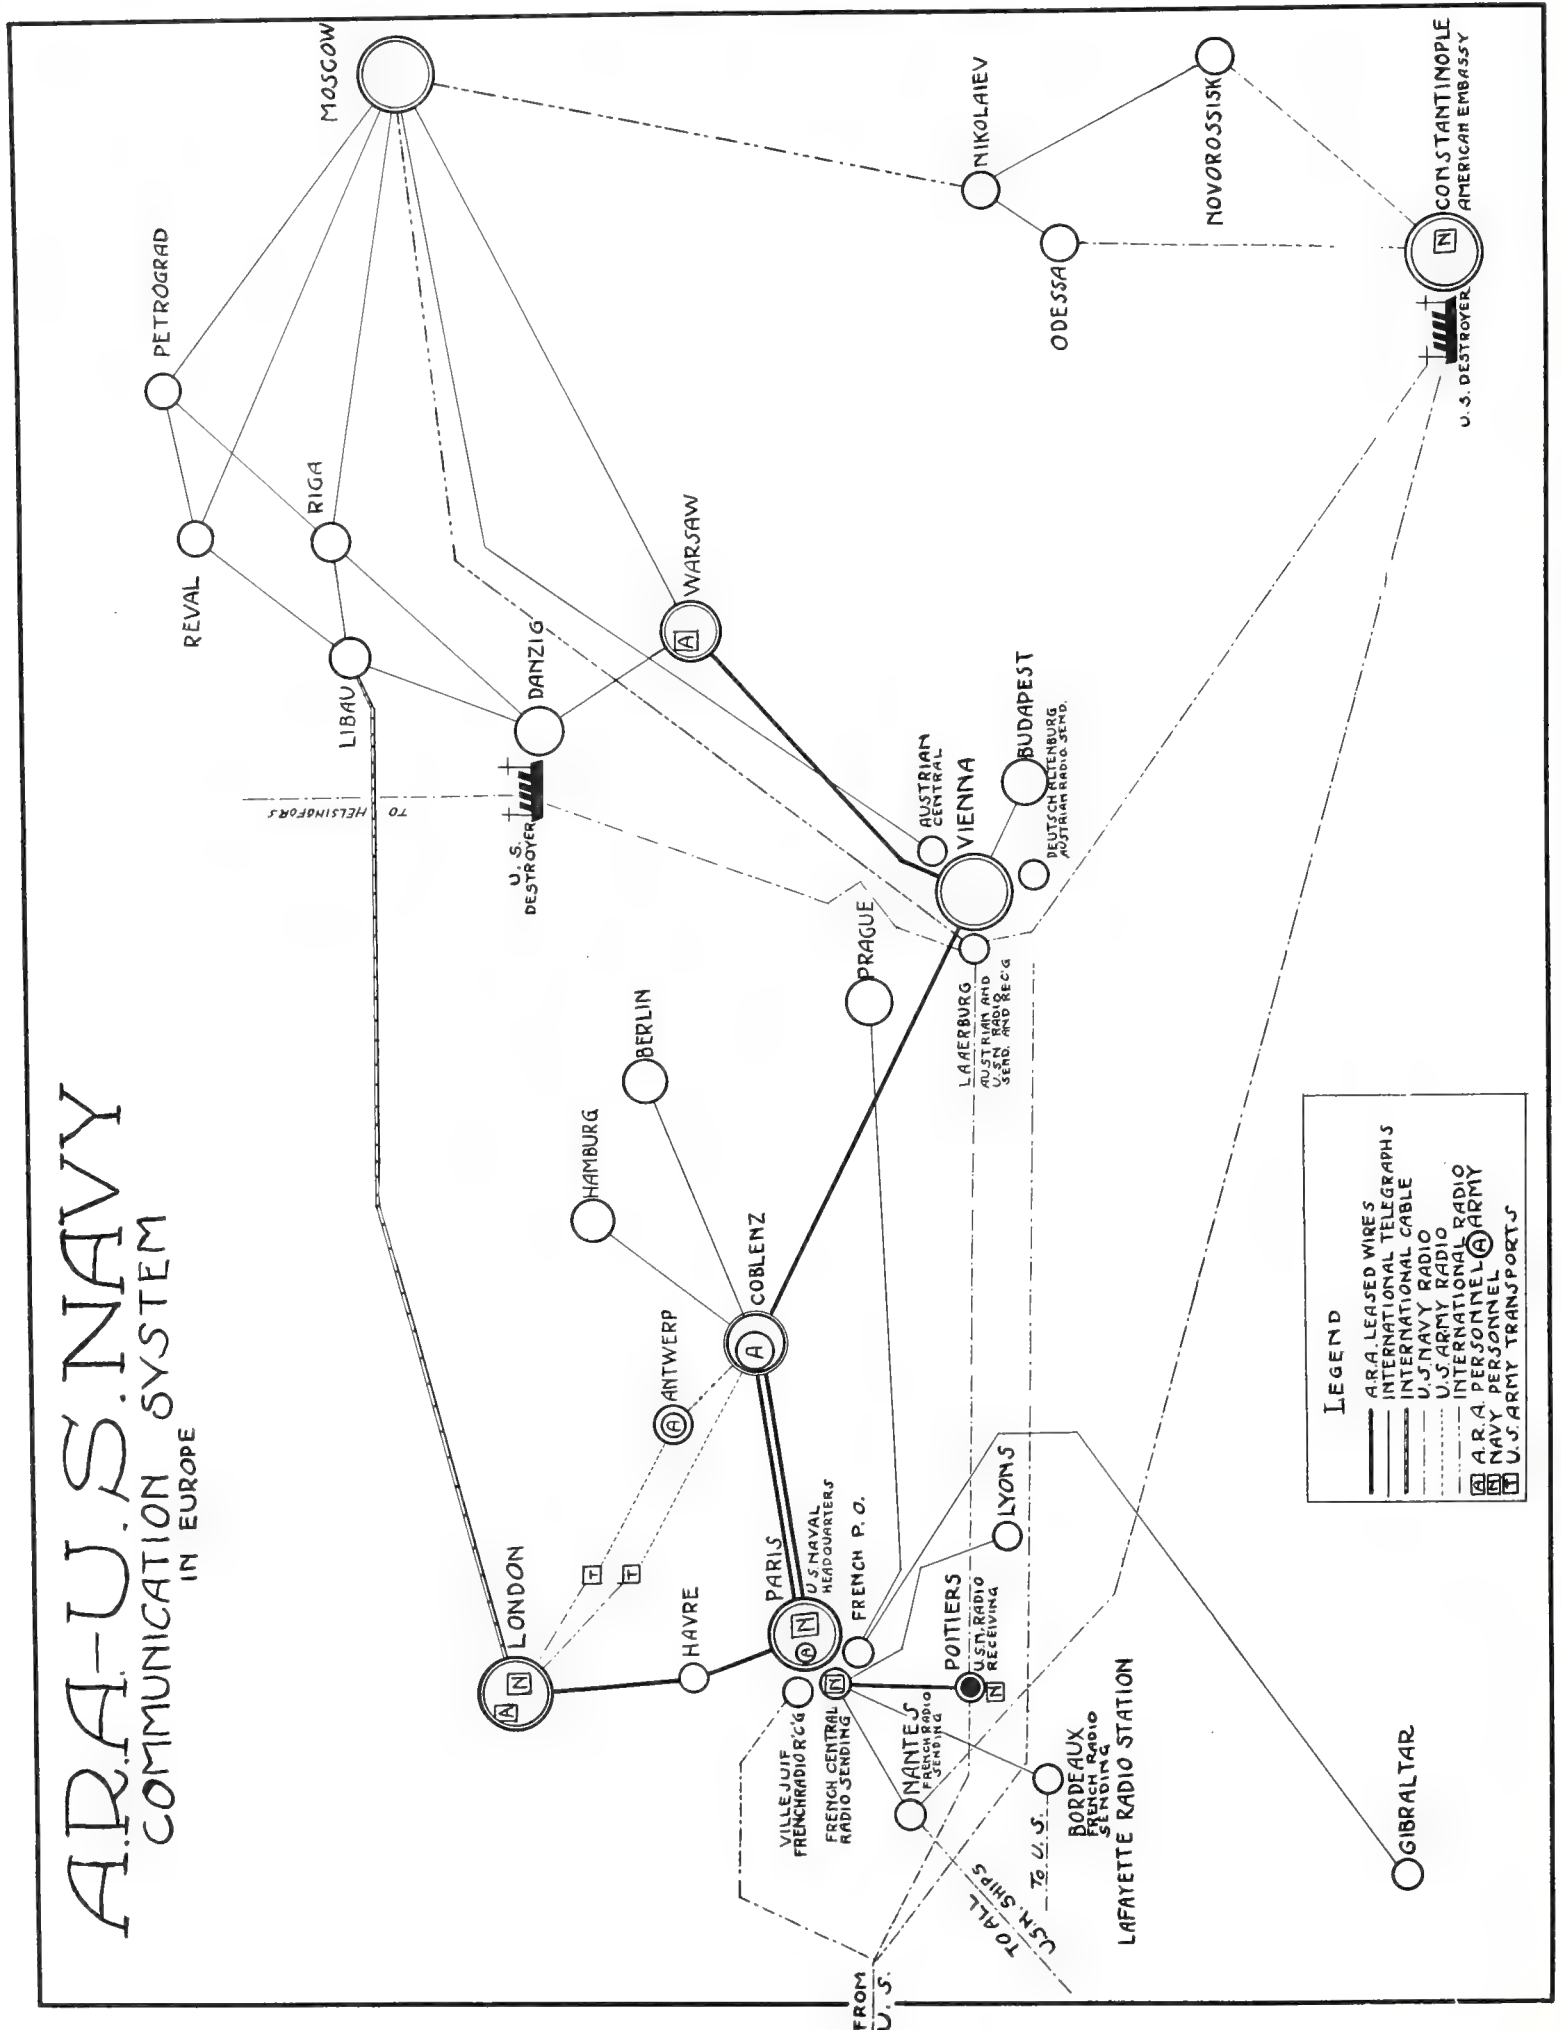

Country	Type of Commodity	Metric Tons	Freight and Other Charges
Armenia . . . . .	Clothing	754.1	\$ 47,688.48
Czechoslovakia . .	Clothing	301.2	18,681.81
Esthonia . . . . .	Medical	312.3	50,490.02
Finland . . . . .	Clothing	282.0	22,584.24
Jugoslavia . . . . .	Clothing	667.6	81,140.98
Poland . . . . .	Medical	2,177.6	148,819.42
Total . . . . .		4,494.8	\$369,404.95

In addition to the transportation of these Red Cross supplies, the A.R.A. also transported and distributed minor donations from other organizations, including 25.0 metric tons of cod-liver oil which was a gift from the Norwegian Government. These transactions, showing the countries to which they were distributed and the value of the transportation charges, are given in detail in Tables 143 A and B, and may be summarized as follows:

FREIGHT ON OTHER MISCELLANEOUS CHARITY SHIPMENTS PAID BY AMERICAN RELIEF ADMINISTRATION

Country	Commodities Donated by	Metric Tons	Misc. Charges
Poland . . . . .	Polish League of Women . . . . .	4.1	\$216.56
Poland . . . . .	Russo Carpathian Committee . .	0.5	28.01
Austria . . . . .	Norwegian Government . . . . .	8.3	178.47
Czechoslovakia .	Norwegian Government . . . . .	10.1	217.18
Latvia . . . . .	Norwegian Government . . . . .	6.6	159.72
Total . . . . .		29.6	\$799.94

Map showing communication system of the A.R.A. and the United States Navy, in Europe.

The total freight and other charges on the Red Cross and other miscellaneous charity shipments thus totaled to \$370,204.89, which was paid by the A.R.A. and charged against the Congressional Appropriation for European Relief as a gift to these countries from the American people.

b) *Supplies sold direct by the U.S. Liquidation Commission:* As pointed out elsewhere (see page 52) the U.S. Liquidation Commission (War Department) sold large quantities of food, clothing, and miscellaneous supplies from surplus stocks to various European governments, including the newly liberated countries. These supplies were sold on credit, f.o.b. the warehouses where they were located, chiefly in France, at the ports of Bordeaux and St. Nazaire. The newly formed governments were without shipping facilities of their own, and under the conditions during the Armistice Period they found great difficulty in getting these supplies transported to their own borders. The American Relief Administration therefore undertook to transport a portion of these commodities, which consisted of pork products and miscellaneous Army and medical supplies. Altogether, 26,777.6 metric tons of such supplies were transported, on which the freight and insurance charges amounted to \$765,455.15. The value of these supplies, exclusive of transportation, is included in the sales by the U.S. Liquidation Commission shown in Table 122. The details of the tonnage moved and the freight and insurance paid by the American Relief Administration are given in Tables 144 and 145. The following tabulation summarizes these transportation charges by the countries to which the supplies were delivered.

Of the supplies going to Poland, 10,000 tons of typhus equipment were sold on credit by the U.S. Liquidation Commission and the shipment by rail from Coblenz to Warsaw was attended to, and paid for, by the A.R.A. The total freight charges on this shipment, of approximately 900 carloads, amounted to \$113,785.52, which was charged against the Congressional Appropriation as a gift to Poland from the American people.

The freight and insurance costs against the other commodities, totaling \$651,659.63, were charged against the respective governments, and notes covering these costs were obtained by the American Relief Administration.

c) *Jewish Joint Distribution Committee supplies:* As shown elsewhere in this report (see pages 56-58) the J.D.C. worked very closely with the Director General of Relief throughout the Armistice Period. From time to time the A.R.A. was able to assist the J.D.C. by transporting supplies which they had purchased but for which they could not readily furnish transportation. This was particularly true of supplies purchased from the U.S. Liquidation Commission which the J.D.C. wished to move to Hamburg and Danzig. The A.R.A. handled a total of 1,112.1 metric tons of such supplies for this organization at a total cost of \$81,588.23 for freight and insurance. The value of the commodities purchased from the Liquidation Commission, but without transportation costs, is included in Table 125. The detail of this movement, together with the cost of freight and insurance, is shown in Table 146. The summary at the top of page 138 shows the transportation cost by countries to which the supplies were delivered.

The J.D.C. later reimbursed the A.R.A. for these charges.

FREIGHT AND INSURANCE PAID BY THE A.R.A. ON SUPPLIES SOLD BY THE U.S. LIQUIDATION COMMISSION

Distributed to	Total Metric Tons*	Cost of Insurance	Cost of Freight	Total Freight and Insurance
Czechoslovakia .....	4,954.5	\$18,613.70	\$165,992.93	\$184,606.63
Esthonia .....	2,020.4	10,881.95	140,231.10	151,113.05
Lithuania .....	6,096.3	.....	48,930.00	48,930.00

Total .....	26,777.6	\$50,142.54	\$715,302.61	\$765,445.15

\* The supplies to Czechoslovakia, Esthonia, and 3,357.2 tons to Poland consisted of pork products. All other supplies are listed

as miscellaneous Army supplies, except the 10,000 tons of typhus equipment shipped to the American Typhus Commission in Poland.

FREIGHT AND INSURANCE ON SUPPLIES PURCHASED BY  
JOINT DISTRIBUTION COMMITTEE FROM U.S. LIQUIDATION  
COMMISSION AND TRANSPORTED BY  
AMERICAN RELIEF ADMINISTRATION

Distributed to	Total Metric Tons	Cost of Insurance	Cost of Freight	Total Freight and Insurance
Austria . . .	319.3	\$ 410.96	\$14,813.15	\$15,224.11
Poland . . .	792.8	2,824.12	63,540.00	66,364.12
Total . . .	1,112.1	\$3,235.08	\$78,353.15	\$81,588.23

The following tabulation summarizes the total amounts paid for freight and insurance in relief shipments for various governments and other relief organizations which are not accounted for in any of the regular commodity movements shown in this report. Of the total of \$1,217,238.27, the sum of \$651,659.63 was furnished on credit to the liberated governments while the remainder of \$565,578.64 was furnished as a gift. Of this latter amount, \$493,990.41 was supplied by the American Relief Administration and \$81,588.23 by the Jewish Joint Distribution Committee.

RECONSTRUCTION PERIOD

*European Children's Fund.*—The problems of overseas shipment of the supplies for child feeding after August 1, 1919, were by no means so difficult as those of the preceding period. This was due partly to the fact that the world tonnage situation had become somewhat easier, and as the operation was on a smaller scale no special difficulty in securing tonnage was experienced. The supplies were purchased by the New York office and shipped as either full or partial cargo on ordinary liner terms. Hamburg and Danzig were the principal ports of discharge for the

child-feeding supplies for Central Europe. A small portion of the shipments was sent direct to north Baltic ports and a few shipments of clothing for Yugoslavia were discharged at Salonica. For the Russian operations, the ports of Reval in the north and Novorossisk in the south were the most important, although relatively large shipments were also handled at several other ports.

The children's relief work was carried on entirely through feeding kitchens. In order to keep these kitchens supplied with current needs, it was necessary to maintain warehouse stocks in near-by positions. The Relief Administration therefore established a system of central or district warehouses to which supplies were shipped in large quantities and also a series of sub-district warehouses which in turn were kept supplied from the district warehouses. One of the conditions of the relief work was that the several governments would handle and finance the transportation of supplies from the port of arrival to the district warehouses and to the feeding stations. No serious difficulties arose in connection with the internal transportation although there were annoying details from time to time. The shipment of food supplies through countries in which people were actually suffering for lack of food naturally made these supplies subject to pilfering or other unaccountable losses. This frequently resulted in shortages which disturbed the plans for the feeding work. Finally, the Relief Administration negotiated agreements with each of the governments in Central Europe by which the latter agreed to make good any losses in relief supplies whether suffered en route or in the warehouses. For ex-

ample, in August, 1922, the Polish Government assigned credits for the purchase of flour and beans to make up for shortages of 1,159.5 metric tons of foodstuffs which had occurred during the preceding year.

*Russian Relief.*—The pouring of more than 700,000 tons of relief supplies into Russia in a relatively short period during the famine of 1921–1922 brought forth a vast array of difficulties which could not be foreseen. At times, these difficulties became so serious as to threaten the success of the whole operation, but by some means or other they were overcome and the work carried through with only annoying and threatening delays.

The first problem was to secure satisfactory ports with accompanying rail facilities and connections. The major portion of the supplies had to go through northern ports on the Baltic. None of the Baltic ports had sufficient equipment to handle all of the supplies, and in many cases facilities were so limited as to make it very expensive to send ocean-going vessels to them, where demurrage costs were likely to become prohibitive before the vessels could be unloaded. It was soon found that considerable savings could be effected by discharging trans-Atlantic cargoes at Hamburg and then reshipping these to the Baltic on small steamers. Consequently, the American Relief Administration maintained a large warehouse at Hamburg throughout this operation, and altogether more than 101,000 metric tons of supplies were transshipped in this manner. Tables 513, 517, 519, 521, 523, and 525 give some indication of the extent to which Hamburg and some other North Sea ports were used for the primary discharge of these cargoes.

Altogether, ten ports were used as final points of discharge for the Russian supplies. Six of these, Petrograd (Leningrad), Reval, Riga, Windau, Libau, and Danzig, were on the Baltic Sea, while four, Odessa, Theodosia, Novorossisk, and Batoum, were on the Black Sea and were used for supplies to Southern Russia and the Ukraine. The heaviest tonnages were handled through Riga and Novorossisk.

The majority of these ports, particularly those in the south, had remained inactive for so many years of the war that it was with difficulty that local officials, and particularly the railroad

officials, could be brought to believe that a period of renewed activity was at hand. The rapid handling of a large tonnage of supplies required adequate preparations, including the overhauling of discharging equipment, the renovation of warehouses long unused or filled with all sorts of debris, the provision for stevedoring, checks against pilferage, arrangements for the handling of bulk grain, etc.

All these could be accomplished through the perseverance and persistence of the A.R.A. port officials, but the thing they could not do was to provide freight cars and locomotives where none existed and that was where the great difficulty came. When a program of relief and seed amounting to 100,000 tons and more per month was projected, the Russian officials expressed entire confidence in their ability to handle the rail movement. The first cargoes were moved

Petrograd port canal with 250-ton floating crane. Transshipping A.R.A. food for relief of Russian famine sufferers. Scene taken last week in March, when winter's ice nearly blocked the harbor.

promptly and then difficulties began to pile up. When the first lot of empty cars were filled, the roads were unable to get these emptied and returned in time, and port stocks began to mount, reaching more than 120,000 tons in March, 1922. Train movement was incredibly slow. The first train of forty-three cars of food out of Odessa took a month to reach Simbirsk, fifteen hundred miles away. Trains from Baltic ports to Moscow took from one to four weeks to cover a distance made by a passenger train in fourteen hours.

This situation was due first to the run-down

condition of the railway equipment, but also to the ineffective method of administration in those early days of the Soviet Government, and finally to the underpaid and undernourished railway employees. The latter situation was remedied in a measure through the loan of some 5,000 tons of corn and rye to the Soviets for special relief of the railway workers (cf. page 250). This had a marked effect upon railway movement and upon conditions generally.

the famine areas. Yet constant pressure on the Soviet authorities finally overcame the difficulties and the food came in time to save millions of lives and the seed arrived in time for planting.

As soon as the ice was out of the Volga this great river was used to supplement the rail transportation, but even here the equipment was so depleted that great difficulties were experienced. However, the river movement speeded up distribution greatly.

Map showing Russian transport lines used by A.R.A.

The spring months of 1922 were dark days for the A.R.A. officials, who had to witness men and women on the verge of starvation with the knowledge that thousands of tons of food were in Russian ports which could not be moved to

Other problems of transportation in Russia involved the movement of supplies from railhead to the famine districts. This was a matter mainly of man and animal power. Pack animals, droskies, camel caravans, and other

A peasants' camel caravan crossing the frozen Volga in Saratov District, returning to the village with relief supplies.

methods were used to get this food to areas remote from rail or water connections.<sup>1</sup>

### SOURCES OF RELIEF FINANCE

To secure the enormous sums required for these vast relief operations was no small undertaking. It will be worth while at this point to tabulate the sources from which the money was secured, although the detail involved in securing particular sums has been discussed when the operations themselves were being considered.

The financial structure of the several undertakings can best be presented from the standpoint of gross basic capital. It will be understood that on many of these operations, where sales were made to governments or organizations, it was possible to charge a margin to cover the cost of operation and some measure of the commercial risk involved. In some instances, these resulted in surpluses which were used to supply still further relief to the countries concerned. These surpluses are discussed in connection with the several operations.

Dividing the relief work into the four major periods, it is possible to tabulate the total gross basic capital for each, as shown in the following table:

TOTAL GROSS BASIC CAPITAL FOR EUROPEAN RELIEF BY MAJOR PERIODS OF OPERATION—1914 TO 1924

Major Period	Total Basic Capital
Commission for Relief in Belgium....	\$ 759,159,607.19
U.S. Food Administration.....	3,050,496,599.23
Armistice Period .....	1,135,131,158.68
Reconstruction Period .....	212,385,557.59
Grand total .....	\$5,157,172,922.69

It will be noted that the total basic capital amounted to \$5,157,172,922.69 for the entire period, whereas the total deliveries (Table 1) amounted to \$5,234,028,208.56. The difference as discussed above was covered by the surplus earning on certain of the operations.

<sup>1</sup> For further detail regarding transportation in Russia, see *A.R.A. Bulletin*, Series 2, No. 42, November 1923.

<sup>2</sup> *Annual Report of the Secretary of the Treasury for 1920*, pages 330 ff.

### C.R.B. PERIOD

Taking each of the major periods separately, it is possible to show the sources of the basic capital for the various operations. The following tabulation summarizes the source of the funds available for the Commission for Relief in Belgium.

COMMISSION FOR RELIEF IN BELGIUM—SOURCE OF BASIC CAPITAL

Source of Capital	Total Basic Capital
Government subsidies	
United States .....	\$386,632,260.44
United Kingdom .....	109,045,328.73
France .....	204,862,854.21
Total subsidies .....	\$700,540,443.38
Benevolence	
United States .....	34,521,026.99
United Kingdom .....	16,641,034.85
Other countries .....	1,128,773.67
Total benevolence .....	52,290,835.51
Commercial exchange .....	6,328,328.30
Grand total .....	\$759,159,607.19

### U.S.F.A. PERIOD

For the deliveries to the Allied Governments during the Food Administration Period we have taken only the actual expenditures for food paid for from U.S. Treasury loans. These expenditures by fiscal-year periods, as shown by the records of the United States Treasury,<sup>2</sup> may be summarized as follows:

UNITED STATES FOOD ADMINISTRATION—EXPENDITURES BY ALLIED GOVERNMENTS FOR FOODSTUFFS, FROM U.S. TREASURY LOANS

Period	For Cereals	For Other Food	Total
Apr. 6, 1917, to Dec. 31, 1917	\$ 362,761,098.41	\$ 175,661,662.66	\$ 538,422,761.07
Jan. 1, 1918, to June 30, 1918	386,921,956.94	484,893,090.59	871,815,047.53
July 1, 1918, to Dec. 31, 1918	467,901,495.91	367,904,188.12	835,805,684.03
Jan. 1, 1919, to June 30, 1919	165,384,156.38	519,695,805.12	685,079,961.50
July, 1, 1919, to Nov. 1, 1920	39,507,998.50	79,865,146.60	119,373,145.10
Total .....	\$1,422,476,706.14	\$1,628,019,893.09	\$3,050,496,599.23

### ARMISTICE PERIOD

During the Armistice Period funds for the relief work were obtained from government subsidies and credits, from the sale of commodities for cash or its equivalent, and from benevolence.

The sources of the basic capital for the work during this period, under these headings, and by the countries from which the funds were supplied, were as follows:

SOURCES OF BASIC CAPITAL FOR RELIEF OPERATIONS—  
ARMISTICE PERIOD, 1919

Source of Capital	Total Basic Capital
Government subsidies and credits	
United States .....	\$624,171,094.59
United Kingdom .....	59,500,000.00
Canada .....	5,000,000.00
Newfoundland .....	1,500,000.00
France .....	5,600,000.00
Italy .....	2,100,000.00
Total subsidies .....	\$ 697,871,094.59
Sales for cash or barter	
United States .....	\$234,377,089.09
United Kingdom .....	77,187,500.00
France .....	23,800,000.00
Italy .....	35,511,000.00
Other countries .....	51,666,000.00
Total cash .....	422,541,589.09
Benevolence	
United States .....	\$ 14,560,469.00
United Kingdom .....	149,000.00
Norway .....	9,000.00
Total benevolence .....	14,718,475.00
Grand total.....	\$1,135,131,158.68

The funds supplied by the United States Government for relief work during the Armistice Period amounted to \$624,171,094.59. The detail of the sources of these funds is given below:

DETAIL OF U.S. GOVERNMENT SUBSIDIES AND CREDITS FOR  
RELIEF—ARMISTICE PERIOD, 1919

Source of Capital	Total
Act of Congress, February 25, 1919....	\$100,000,000.00
Direct Treasury Loans .....	89,450,000.00
Joint Allied Finance * .....	48,000,000.00
President's National Security and De-	
fense Fund .....	5,000,000.00
U.S. Liquidation Commission (credits) .	381,721,094.59
Total .....	\$624,171,094.59

\* Represents U.S. Treasury loans to the United Kingdom, France, and Italy of \$16,000,000 each, with which they in turn furnished relief supplies to Austria on credit.

Early in 1919 the British Treasury voted relief credits of £12,500,000, which was equivalent to \$59,500,000. This was used to supply relief to a number of countries in Central and Southern Europe, as shown in Table 133.

Canada and Newfoundland each granted credit to Roumania for the purchase of urgently needed supplies. The French and Italian credits were for the payment of freight on supplies for Austria and in the case of France also for relief to Russian war prisoners in Germany.

Under sales for cash or barter there are included those transactions where the receiving country made immediate payment for the supplies furnished, either in the form of cash or by the exchange of other commodities or concessions. All of the relief furnished to Germany during the Armistice Period comes under this heading and accounts for the major portion of the deliveries from the United Kingdom, France, and Italy. The deliveries from "Other countries" were all in the nature of barter.

In the case of the United States, the sum shown includes sales made to Germany and to such organizations as the Near East Relief, the Jewish Joint Distribution Committee, and to certain commercial establishments like J. W. Whittall and Company, in Turkey. In addition to the sums received as actual payment for the commodities, there is also included cash advanced by these governments to cover certain expenses of distribution under the Congressional Appropriation. These receipts had the effect of decreasing the expenses of the American Relief Administration, which otherwise would have required other funds.

Under benevolence during the Armistice Period, there is included such operations of various charitable organizations as were carried out in co-operation with the Director General of Relief. The contribution from Norway covers the value of 25 tons of cod liver oil which the Norwegian Government contributed to the children's relief work.

RECONSTRUCTION PERIOD

The sources of the funds for relief work during the Reconstruction Period may be divided under two general headings, government subsidies and benevolence. Under the former are included all direct contributions by governmental authority and under the latter all funds contributed by either individuals or organizations. The following tabulation summarizes the source of the basic capital available in this

period under these two heads and by the countries from which the contributions came:

#### SOURCES OF BASIC CAPITAL FOR RELIEF OPERATIONS— RECONSTRUCTION PERIOD

Source of Capital	Total Basic Capital
Government subsidies	
United States .....	\$81,782,118.20
United Kingdom .....	18,212,473.88
Central European governments....	14,652,432.21
Soviet Republics .....	11,464,948.18
Total subsidies .....	\$126,111,972.47
Benevolence	
United States .....	\$57,586,406.01
World charity .....	28,687,179.11
Total benevolence.....	86,273,585.12
Grand total .....	\$212,385,557.59

Subsidies from the United States were provided by three separate acts of Congress, as follows:

Act of Congress, March 30, 1920 *.....	\$57,782,118.20
Act of Congress, December 22, 1921 †... ..	20,000,000.00
Act of Congress, January 20, 1922 ‡.....	4,000,000.00
Total .....	\$81,782,118.20

\* Authorizing the U.S. Grain Corporation to sell 5,000,000 barrels of flour on credit to relieve the food famine in Central Europe.

† Appropriating \$20,000,000 of the capital of the U.S. Grain Corporation for the relief of Russia.

‡ Authorizing the gift of surplus medical supplies to Russia.

Subsidies from the United Kingdom were used for the payment of freight and insurance charges on the flour furnished by the United States Grain Corporation under the Act of Congress of March 30, 1920.

Subsidies from Central European governments include the donations of commodities for the child-feeding programs in their own countries and also contributions of services in connection with the relief of Russia. This statement does not include any allowance for services and facilities contributed by each country in connection with the child-feeding work in that particular country. It does, however, include commodity donations from local as well as national governmental organizations.

The contribution from each country as accounted for under this heading was as follows:

#### CONTRIBUTIONS BY CENTRAL EUROPEAN GOVERNMENTS— RECONSTRUCTION PERIOD

Country	Commodities for Child Feeding	Facilities for Russia	Total
Austria .....	\$ 1,364,656.01	.....	\$ 1,364,656.01
Czechoslovakia .....	693,099.02	.....	693,099.02
Danzig Free City.....	8,574.44	.....	8,574.44
Estonia .....	298,444.64	\$ 1,102.94	299,547.58
Finland .....	195,949.00	.....	195,949.00
Germany .....	2,392,021.25	.....	2,392,021.25
Hungary .....	265,806.84	.....	265,806.84
Jugoslavia .....	533,677.16	.....	533,677.16
Latvia .....	64,839.55	24,257.69	89,097.24*
Poland .....	7,659,374.77	90,000.00	7,749,374.77
Roumania .....	1,024,322.26	.....	1,024,322.26
Russia			
Northwest Russia ...	6,280.00	.....	6,280.00
Soviet Republics ....	30,026.64	.....	30,026.64
Total .....	\$14,537,071.58	\$115,360.63	\$14,652,432.21

\* Includes \$3,960, value of cod liver oil donated by Norwegian Government.

A large proportion of the contributions by these Central European governments consisted of flour which in most instances they agreed to furnish as their contribution to the child-feeding work. In many instances, they contributed other commodities as well. In addition to those commodity contributions which can readily be evaluated, these countries also made large contributions to the child-feeding work of a more intangible nature which are not included in these tables. These contributions consisted of the services of thousands of volunteer workers in conducting the feeding kitchens, of free transportation, handling, and warehousing of relief supplies. Some estimates of these contributions are given in the discussion of the relief work in the separate countries.

In the above tabulation the contribution of \$30,026.64 from the Soviet Republics represents commodities contributed for the child-feeding work in Russia.

The first table in column one on this page shows as a subsidy from the Soviet Republics the sum of \$11,464,948.18, which represents a direct contribution of Soviet gold to the American Relief Administration for the purchase of seed and food during the famine of 1921 and 1922.

Benevolence from the United States during the Reconstruction Period includes the charitable contributions from a large number of organizations and individuals in this country. The following tabulation summarizes the contributions from the principal sources.

BENEVOLENT CONTRIBUTIONS FOR RELIEF FROM THE  
UNITED STATES—RECONSTRUCTION PERIOD

Source	Amount
Director General of Relief.....	\$25,109,988.64
Commission for Relief in Belgium.....	25,000.00
European Relief Council .....	15,669,899.59
Jewish Joint Distribution Committee...	4,209,684.34
American Red Cross .....	3,754,587.38
American Friends Service Committee..	1,964,802.02
The Commonwealth Fund .....	1,565,211.20
Near East Relief .....	1,944,119.91
Laura Spelman Rockefeller Memorial....	367,392.88
All other American organizations.....	113,081.13
Sundry cash donations (individuals)....	2,862,638.92
Total .....	\$57,586,406.01

The funds listed under the Director General of Relief represent the surplus accumulated by the Food Administration Grain Corporation under the terms of the agreement between that organization and the American Relief Administration. Under this agreement as quoted on page 46, any surplus developed by the Grain Corporation in its European operations was to be turned over to the Director General of Relief, or his successor, to be used for additional relief in the respective countries. (See also agreement with individual countries as referred to on pages 76-77.)

Contributions of these various organizations are discussed in detail in other sections of this report and need no further reference at this point.

Under "World charity" in the first table on page 144 are included two operations for which the funds were derived from a number of different countries. These operations were as follows:

Exchange remittances .....	\$ 6,360,140.89
Food drafts and bulk sales, net *....	22,327,038.22
Total .....	\$28,687,179.11

\* Food drafts and bulk sales to organizations listed in the preceding table have been deducted from the total of these sales and credited to the respective organizations.

Exchange remittances carried on by the A.R.A. during the Armistice Period are discussed in a separate section (cf. pages 69-70). While the major portion of these remittances came from the United States, individuals in other countries also participated. The same comment may be made with regard to sale of food drafts and the bulk sale operations. These represented purchases by individuals all over the world.

At the end of these activities the problem which confronted the directors of the Adminis-

tration was a dual one. In the first instance the stupendous operations carried on in "Food Remittance" transactions and in transportation of food supplies for distribution to children involved large liabilities for shipping, for maintenance of insurance on food stocks, reserve for bank guaranties, etc. Of necessity there was distinct responsibility to safeguard the integrity of the organization by insuring that there should be no default on any of those liabilities and righteous claims which might arise in respect to the several hundred million dollars for which it had been responsible.

The liquidation of these matters required a period of some two or three years, and then it was found that the residue of funds in hand amounted to less than one per cent of the charitable and other income of the organization, indicating the close margin between income and disbursements with which the operations were conducted and the liquidation consummated.

As final liquidation approached, the directors were faced with the problem of allocating this residue, which gave indications of approaching \$5,000,000. As monies had been provided by the efforts of various committees and large donors, a plan was presented to them to hold these funds in reserve for a few years, to be expended on children should further calamities occur similar to that growing out of the World War, and ultimately, the funds being entirely in origin from American charity, to distribute them for the benefit of American children. In the interim it was further suggested that the income should be expended on the study of children's problems in the United States, utilizing the vast experience gained by the organization in handling such problems. Unanimous approval was given to this plan.

There was thereupon created the A.R.A. Children's Fund, into which all sums remaining after liquidation were paid. In accordance with the plan, the funds were held intact for over five years and the income expended largely through the American Child Health Association. Finally, large gifts of the capital were made to such agencies as the Girl Scouts, Boy Scouts, Conference on Child Health, Red Cross relief for American children, Porto Rican children and various subsidiary gifts for the benefit of American children.

It is expected that the whole of this fund will be distributed at an early date to agencies

actively interested in child health problems, including the American Child Health Association, and the fund closed out.

As indicating the time and patience required in the liquidation work, deferred payments are still being received on insurance claims instituted ten years previously.

#### DELIVERIES FOR CREDIT, CASH, AND BENEVOLENCE

It has been pointed out that in order effectively to relieve the distress in Europe during the war and afterward, it was necessary to take advantage of every possible method of financing the operations. Wherever funds or the equivalent were available, the relief supplies were sold for cash or bartered for other commodities or services. Where this was not possible, arrangements could frequently be made to extend credit from some other government. Where neither of these methods was possible, it was necessary to mobilize charitable contributions and to furnish supplies as a direct gift.

Tables 188-89, pages 398-401, show in detail the segregation of the relief deliveries to each country and by major periods, on the basis of deliveries for credit, cash, and benevolence.

Table 74 A summarizes these deliveries under these three headings and by major operations, while Table 74 B shows the percentage of relief furnished for credit, cash and benevolence under each of the four major periods and the total.

From these tables it will be noted, considering the total, that 85.3 per cent of the supplies were furnished on credit, 8.5 per cent for cash, and only 6.2 per cent as benevolence. This total is, of course, very greatly influenced by the large deliveries to the Allied Governments by the U.S. Food Administration, all of which were furnished on United States Treasury credits.

However, in two other periods, viz., the Commission for Relief in Belgium and the Armistice, the major portion of the relief supplies was furnished on government credits. During the Armistice Period, cash sales represented 37.3 per cent of the total, whereas benevolent deliveries were relatively unimportant, accounting for only 1.5 per cent of the total.

During the Reconstruction Period benevolent deliveries represented a much larger proportion and accounted for 53.1 per cent of the total.

It should be noted that for the entire period benevolent deliveries amounted to the very large sum of \$325,829,202.38. The mobilization of charitable contributions on such a vast scale represents in itself a noteworthy accomplishment and gives a measure of the public interest in the European relief work and of the confidence in the operating organization.

For further detail of the deliveries for credit, cash, and benevolence, the reader is referred to Tables 188-89 and the discussion under the separate countries.

TABLE 74 A

#### SUMMARY OF RELIEF OPERATIONS SEGREGATED AS TO DELIVERIES FOR CREDIT, CASH, AND BENEVOLENCE

## PART II

## ARMENIA

(Appendix Tables 200-205)

### ARMISTICE PERIOD

The American public is familiar in general with the conditions in Christian Armenia. For many years before the war these people had suffered from the Mohammedan Turks. With the entrance of Turkey into the war on the side of the Central Powers, all restraint was removed from the Turkish forces. The terrible conditions that resulted in Armenia have been described by Henry Morgenthau and others. It is not necessary to repeat them here. Hundreds of thousands of Armenians were driven from their homes, a large majority of the able-bodied men were killed, and the women, children, and old men were driven out as refugees.

The condition of these refugees was terrible beyond description. A report from a member of the American Committee for Armenian and Syrian Relief in March, 1919, reads as follows:

There is no bread anywhere; the Government has not a pound. Forty-five thousand in Erivan are without bread. The orphanages and troops throughout Erivan are in terrible condition. Not a dog, cat, camel, or any living thing is to be found in all the Igdir region. I have seen refugee women stripping flesh from dead horses with their bare hands today. Thirty deaths a day are reported from Ashtarag; twenty-five from Etchmiadsin. Another week will score ten thousand lives lost. We have enough food now in the country at Bakou and Batoum to keep the starving people alive for a time, and the railways are doing all they possibly can to get food to the people. We hope to weather the storm, but snow is our enemy at present.

The first relief to this stricken territory was undertaken by the American Committee for Armenian and Syrian Relief, which was the outgrowth of an effort started by Henry Morgenthau, American ambassador to Turkey, to secure some relief for the suffering in the Near East during the war. This committee was later reorganized and incorporated under the name of the "Near East Relief." As such, it has done a wonderful work to relieve the suffering in this territory. However, neither their funds nor their personnel were sufficient to care for this enormous problem in 1919.

A report to Mr. Hoover by Howard Heinz, who was in charge of the American Relief Administration work in the Near East, showed still further evidence of the terrible conditions in that country. Mr. Heinz reported that in many parts of the country there was absolutely no food and the people were existing on grass roots and bark. Even cannibalism was reported as not uncommon in some sections. Mr. Heinz estimated that there were at least 500,000 refugees in need of food and that 200,000 to 250,000 of these were at the point of starvation.

The former Turkish provinces of Armenia and Kurdistan occupied an area of about 72,000 square miles, with a population of approximately 2,500,000 persons. Of this, probably half the area and somewhat more than half the population belonged to Armenia. The principal products of this territory were tobacco, wheat and other cereals, some cotton, nuts, and fruit. Agriculture was in a very primitive state, but, if unmolested, these people were industrious and produced more than sufficient food for their own requirements.

Estimates indicated that at least 6,000 tons of breadstuffs per month, or between 30,000 and 40,000 tons, would be required until the 1919 harvest. The Near East Relief was able to take care of a part of these requirements. The cargo of the "Western Belle," one of the early ships to sail on the Southern Relief Program, was purchased by the Near East Relief through the New York office of the Grain Corporation. Two other cargoes of relief supplies, on the "Mercurius" and the "Pensacola" (see Table 123) were shipped from New York in January, 1919, by the Near East Relief and formed a substantial nucleus of relief.

The A.R.A. had no means of financing relief to Armenia until the Congressional Appropriation for Relief in Europe became available at the end of February, 1919. It was then planned that the A.R.A. would make a total contribution of about 20,000 tons of flour and small quantities of milk for Armenia. It was proposed to send one cargo of about 5,000 tons during each

month from March to June. During this period the American Relief Administration actually delivered 22,202.8 metric tons of food for Armenia (Table 201). It was then found that the 1919 harvest in Armenia would be far from adequate to care for the population; consequently, additional shipments were made, making a further contribution of more than 28,000 tons. Altogether, the A.R.A. furnished 50,558.9 metric tons of food for Armenia, with a total value of \$10,630,872.19 (Table 201). This food was paid for by funds from the Congressional Appropriation for Relief; however, the A.R.A. secured notes from the Armenian Government which were turned over to the U.S. Treasury.

As shown by Table 201 these supplies were all shipped from the United States with the exception of the cargo of the "Kickapoo," which carried 49 tons of pork and 107.7 tons of miscellaneous supplies for Armenia from Marseilles. These supplies were purchased from the U.S. Liquidation Commission. The "Kickapoo" also carried 915.5 metric tons of miscellaneous supplies, chiefly hardware and agricultural implements, from Marseilles to Novorossisk in Southern Russia (see Table 508) to be bartered for wheat for Armenia.

The conditions which led to this latter transaction were as follows. In the early summer of 1919, it became apparent that the lack of seed in Armenia would seriously decrease the 1920 harvest unless some immediate steps were taken to relieve this shortage. Reports from the Caucasus indicated that there was considerable surplus wheat in certain parts of Southern Russia, particularly in the Kouban. Lack of transportation to the seaboard prevented the distribution of much of this, but it was ascertained that considerable amounts could be obtained near the coast if some method of finance could be devised. This grain was in the hands of the peasants, and they absolutely refused to part with it for any kind of currency. Most of the currency with which they were familiar was so depreciated as to be of little value, but more important than this was the fact that nothing could be purchased with the money. As in so many other parts of Europe, the supply of manufactured articles, clothing, hardware, implements, etc., was entirely exhausted.

Reports from A.R.A. officials in this part of Europe indicated that by bringing in commer-

cial articles for barter much larger supplies of grain could be obtained for the same money value than if purchased in the regular markets. Accordingly, the A.R.A. purchased a cargo of hardware, clothing, implements, etc., amounting roughly to 915 tons and costing, together with transportation charges, approximately \$500,000. These supplies were loaded on the S.S. "Kickapoo" at Marseilles and sent to Novorossisk on the far eastern edge of the Black Sea. An American Relief Administration Mission accompanied the cargo and superintended the exchange of these supplies for Kouban wheat. In all, approximately 8,000 tons of wheat were secured for the \$500,000 cargo.

By this operation more than twice as much wheat was made available for Armenia for the same money as would have been the case if it had been purchased in America and shipped to the Black Sea. Furthermore, it saved both shipping and food at a time when there was a serious scarcity of both.

A portion of the wheat thus secured was carried directly to an Armenian port by the "Kickapoo." The remainder was shipped on Russian boats. The cargo of the "Kickapoo" was of material assistance to the peasants of the Kouban, who, although not suffering for food, were in serious need of the articles supplied.

In addition to the deliveries to Armenia, the A.R.A. sold 1,994.3 tons of foodstuffs from Constantinople stocks to the Near East Relief for a total value of \$511,422.34.

During the period of the Armistice the Near East Relief delivered a total of 32,651.3 metric tons of relief supplies to Armenia, with a total value of \$9,222,894.34. This included the supplies purchased from the A.R.A. as shown above. If the supplies paid for by the A.C.R.N.E. are deducted from the total to avoid duplication, the net deliveries by the Near East Relief made in co-operation with the Director General of Relief but exclusive of commodities handled by the A.R.A., totaled 30,657.0 metric tons valued at \$8,711,472.00, as shown in Table 123.

The American Red Cross furnished 754.1 metric tons of clothing, with a total estimated value in New York of \$258,600.00. The A.R.A. undertook to transport this clothing from New York to Armenia. The total cost of this freight charge was \$47,688.48, which was charged against the Congressional Appropriation for Re-

TABLE 75  
SUMMARY OF TOTAL RELIEF DELIVERIES TO ARMENIA

lief as a gift to Armenia from the United States Government. (Cf. Table 20, page 48).

The total relief to Armenia from the United States during the Armistice Period amounted to 83,964.3 metric tons, with a total value of \$20,160,055.01. Of this amount, \$10,630,872.19 represented a sale on credit, while the remaining \$9,529,182.82 was, in the last analysis, a benevolent gift to Armenia.

No other governments contributed directly to the relief of Armenia during the Armistice Period. Nevertheless, the British army, which occupied this territory, did much to assist the Armenians. At one time it was stated that the British Intelligence Service was spending between \$30,000 and \$40,000 per month for the relief of Armenian sufferers. No definite report was received as to the amount actually spent by the British military forces in this work. The British Government assisted in transportation of relief supplies to Armenia to the extent of about £15,000 (\$71,400), as shown in Table 133.

The relief of Armenia was in the nature of benevolence to alleviate actual suffering. It was impossible to do much toward putting the Armenian people on their feet, thus enabling them to take care of themselves. The most serious drawback to this latter object, which is the real purpose of all constructive relief work, was the

lack of an established government and the absence of stable currency.

The total value of all relief to Armenia during the Armistice Period, as accounted for in this report, amounted to \$20,231,455.01, as summarized in Table 75.

## RECONSTRUCTION PERIOD

### COLONEL HASKELL'S MISSION

In the period following the Armistice, the political and military situation in the Caucasus was particularly difficult and confused. The American public had become interested in the fate of the Armenian people and numerous requests reached President Wilson and other American officials urging that some steps be taken to continue relief to Armenia after the Armistice. As a result of conferences between Henry Morgenthau and Mr. Hoover, a joint recommendation was made to President Wilson that an Allied resident commissioner be appointed to Armenia through which the Allied and Associated governments could direct their assistance to Armenia and make some attempt toward its economic rehabilitation. This recommendation bore fruit in the appointment of Colonel William N. Haskell as Allied High Com-

missioner to Armenia by the Supreme Council of the Allied and Associated Powers, on July 5, 1919. Under the terms of his appointment Colonel Haskell was to act not only as High Commissioner, but also as the agent for the various relief organizations working in Armenia. The Near East Relief agreed to pay for local purchases, salaries of personnel, and the administrative and operating expenses of the relief in Armenia after August 1, which were estimated at \$500,000 per month. The personnel of the Haskell Mission consisted chiefly of officers and enlisted men from the U.S. Army and Navy.

Colonel Haskell had charge of the distribution of a portion of the American relief supplies which had been purchased from the Congressional Appropriation as outlined above, but had not yet been distributed. In October, 1919, the Commonwealth Fund made an appropriation of \$750,000 to the European Children's Fund for child feeding in Armenia. With this money the European Children's Fund sent four cargoes (Table 204) of child-feeding supplies to Armenia, which were distributed under Colonel Haskell's direction. At one time more than 75,000 Armenians were being fed daily from these supplies.

In March, 1920, Congress passed an act authorizing the U.S. Grain Corporation to sell up to 5,000,000 barrels of flour for cash or credit to relieve famine conditions in Europe and contiguous territory. Of this, 40,633.7 metric tons, valued at \$4,813,744.45 f.o.b. New York, were sold to Armenia for which notes of the Republic of Armenia were taken in payment. The Near East Relief agreed to finance the freight and other charges on this flour and for this purpose they received from the American Red Cross a donation of \$500,000. The freight and other charges on three cargoes of the Armenian flour, viz., "River Araxes," "Sheafmead," and "Pol-demnis" (Table 203), were paid by Great Britain, at a cost of about \$560,000. The balance of the freight, approximately \$533,000, was paid by the Near East Relief. This latter amount was in addition to the Red Cross contribution. (See note to Table 203.)

The distribution of the Grain Corporation flour in Armenia was handled by the Haskell Mission. No details of the internal distribution of this flour are available, but the comprehensive reports by Colonel Haskell show that the

distribution of this flour to the Armenian population was strictly supervised by his organization, with the assistance of the Near East Relief personnel.

Colonel Haskell's Mission also superintended the distribution of contributions for Armenian relief from other countries, including the Canadian Fund of \$50,000 which was used to buy oxen to facilitate the planting of crops; the Manchester (England) Clothing Fund, by which several consignments of clothing were sent for distribution in Armenia; the Lord Mayor's Fund of approximately \$5,000, and the Friends of Armenia Society, in England, which also donated approximately \$5,000. These funds and contributions are included in the Near East Relief Contributions through which they were expended, but under the direction of Colonel Haskell.

Colonel Haskell's Mission withdrew from Armenia on July 1, 1920, leaving all further relief to that country in the hands of the Near East Relief.

The present report accounts for a total expenditure in Armenia during the Reconstruction Period of \$8,563,971.48, including 51,799.8 metric tons of relief supplies. This by no means includes all of the relief extended to Armenia, even up to the closing of Colonel Haskell's Mission, but it accounts for that portion which was handled in close co-operation with the American Relief Administration and its associated organizations. The Near East Relief on its own responsibility has expended large sums for Armenian relief which are not taken into account here. It is also probable that a portion of the supplies credited to Southern Russia (see page 250) through the U.S. Grain Corporation Russian Relief, and through the Surplus Medical Supplies (page 252), were used in Armenia, but no exact record of these can be obtained.

The total relief to Armenia during the whole period from January, 1919, to July, 1920, as accounted for in this report, amounted to 135,764.1 metric tons, with a total value of \$28,795,426.49.

On the basis of the conditions on which these supplies were furnished to Armenia, they may be divided as follows:

Delivered on credit .....	\$16,076,016.64
Benevolence .....	12,719,409.85
Total .....	\$28,795,426.49

## AUSTRIA

(Appendix Tables 206-232)

### ARMISTICE PERIOD

Perhaps no one of the new countries of Central Europe was in such a serious plight after the Armistice as was the Republic of Austria. This country comprised the provinces of old Austria, known as Upper and Lower Austria, Salzburg, Vorarlberg, Carinthia, and parts of Styria and Tyrol. These provinces, with a total area of about 35,000 square miles, compose less than 15 per cent of the former Austro-Hungarian territory. The total population of this territory was approximately 6,500,000, of which 2,500,000 lived in Vienna.

Vienna, as the capital of the old Empire, comprised the business, financial, educational, and social center of the 242,000 square miles of territory formerly ruled by the Hapsburgs. In the days before the war, Vienna ranked as the third city of Europe and second only to Paris in beauty and social splendor. In 1915, Vienna, with less than 5 per cent of the total population of the Austro-Hungarian Empire, paid fully 50 per cent of the corporate taxes and between 40 and 50 per cent of the business and industrial taxes. For the most part these enterprises represented business outside of Vienna, that is, located in what is now Czechoslovakia, Hungary, Jugoslavia, etc. With the loss of the war, all of these outside properties were confiscated and their former owners were left in Vienna with no income.

To a large extent, the territory left to Austria is mountainous and non-productive. It was estimated after the Armistice that only 1,500,000, or less than 20 per cent of the population, were producers of breadstuffs, leaving nearly 5,000,000 inside the bread ration.

In 1918, the entire crop of wheat, rye, and barley, exclusive of seed and the allowance of 120 kilograms for each producer, amounted to only 145,000 tons. Imports and contributions from Hungary before the Armistice amounted to about 75,000 tons. This made a total cereal supply of only 220,000 tons, or less than 40 kilograms (88 pounds) per person for the year, provided

equal distribution could be obtained. Compare this with a normal ration of, say, 150 kilograms (330 pounds) of breadstuffs per year and we have some idea of the depleted supply.

After the Armistice, the Austrian ration cards called for a total of about 1,200 tons of flour per day, with a minimum ration of 165 grams of bread per person. This demand was equivalent to some 500,000 tons of grain for the year, of which they possessed only about 200,000 tons. This would require the importation of 25,000 tons per month, but the ration was far too low, and really needed to be raised to 60,000 tons per month to give a daily ration of something like 240 grams of flour.

The fat ration had been 40 grams per week, but in January, 1919, this was raised to 60 grams. The potato ration was 1½ kilos per week, but no one received more than 1 kilo, and the majority of the people none. Ninety-seven thousand tons of potatoes had been promised from Galicia, but only 18,000 tons were delivered. Milk, eggs, and meat could be obtained only with great difficulty and then at prices so high that the majority of the people made no attempt to secure them. Throughout all these early days of the Republic, Vienna lived from hand to mouth, never with more than two or three weeks' minimum allowance of food in sight and often much less. The death-rate rose from 14 to 38 per thousand. Suffering was as great as anywhere in Europe.

The problem of supplying food to Austria was the most difficult of all Central European countries. Yet it was self-evident that food must be supplied, not only to prevent starvation, but to prevent the establishment of a hot-bed of bolshevism in the very center of Europe.

Austria was regarded as the remnant of the old Hapsburg Empire. For this reason she was doomed to bear much of the burden of the Austro-Hungarian war debt, although her resources were only a fraction of those of the former Empire. Under the terms of the Armistice it was impossible for her, an enemy country, to dispose of such securities as she might possess. Her depreciated kronen would buy but

little in the world's markets. Further, the appropriations for relief, both by the United States and by England, had been so worded that none of these funds could be used for Austria. The United States Treasury could not loan money to Austria, as it did to various liberated countries, because of Austria's status as an enemy country. The financial condition of England, France, and Italy precluded the idea that they could of themselves finance any large portion of Austria's requirements.

Under these difficult conditions, Mr. Hoover finally succeeded in making a joint financial arrangement between the United States and England, France, and Italy, by which our Treasury agreed to advance \$10,000,000 to each of the three Allies to be used for the purchase of food in America for Austria. The Allies, in turn, agreed to finance the overseas transportation and to accept German-Austrian credit in payment for both food and transportation. The amounts of the Treasury loans to England, France, and Italy for this purpose were later increased to \$48,000,000 in all, or \$16,000,000 to each Ally (cf. pages 59-61).

In addition to this, the American Relief Administration sold over 8,000.0 metric tons of supplies to Austria for cash. Italy delivered relatively large amounts outside the Joint Allied Finance program, for which she secured concessions equivalent to cash payment. Also through the efforts of Mr. Hoover, comparatively large amounts of food and other materials were delivered to Austria from the other Central European states.

Table 76 shows that the total relief deliveries to Austria during the Armistice Period under the direction of the Director General of Relief amounted to 561,705.7 metric tons, with a value of \$98,771,595.93. Of this amount, only 9,226.6 tons, with a value of \$3,657,230.93, was furnished directly by the United States. The major portion of this consisted of miscellaneous cash sales to the Austrian Government by the A.R.A. from stocks at Trieste. The detail of these sales is shown in Table 207. The remainder of the direct relief from the United States consisted of 901.3 tons of supplies furnished by the Jewish Joint Distribution Committee, the detail of which is given in Table 208. Of this amount, 319.3 metric tons were purchased by the Joint Distribution Committee from the U.S. Liquidation Commis-

sion in France. These supplies were transported by the A.R.A. from Bordeaux to Hamburg on the "Lake Clear," V, and the "Coperas." (See note to Table 208.) The cost of freight, insurance, and other charges on these cargoes amounted to \$15,224.11. The A.R.A. also transported 8.3 tons of cod liver oil given to Austria by the Norwegian Government. The charges on this, amounting to \$178.47, were paid by the American Relief Administration as a gift to Austria.

Although the amount of relief furnished directly to Austria by the A.R.A. in the Armistice Period was relatively small, nevertheless it was Mr. Hoover's exertion and the co-operation of the United States Treasury that made possible the delivery of \$48,000,000 worth of supplies under the Joint Allied Finance as pointed out above. The Allies, on the other hand, accepted Austrian notes in payment for these deliveries in lieu of notes given by them to the U.S. Treasury. Each of the three Allies financed the freight on the supplies delivered by them under this arrangement and accepted Austrian notes for this amount also.

The total deliveries under the Joint Allied Finance plan consisted of 345,839.8 metric tons of food, chiefly flour and bread grain, as follows:

Commodity	Metric Tons
Flour .....	180,363.4
Grain .....	151,259.4
Pork products .....	11,374.0
Milk .....	2,843.0
Total .....	345,839.8

At the time these arrangements with the Allies were completed, the food situation in Austria was so serious that Mr. Hoover arranged to turn over to the United Kingdom 47,371.9 metric tons of foodstuffs which the American Relief Administration had in store at Trieste. This enabled the British to begin deliveries to Austria immediately.<sup>1</sup> The remainder of the British deliveries to Austria, as well as those by France and Italy, consisted chiefly of foodstuffs transported from the United States in tonnage turned over to the Allies by Austria for this purpose.

In addition to the operations under the Joint Allied Finance, both the United Kingdom and

<sup>1</sup> For further details regarding this transaction see page 60 and Tables 128-131.

TABLE 76

SUMMARY OF TOTAL RELIEF DELIVERIES TO AUSTRIA  
(For detail see Table 206)

Operation	Total Metric Tons	Total Value

Total, Reconstruction Period.....	260,494.4	\$ 46,709,626.37
Grand total relief deliveries.....	822,200.1	\$145,481,222.30

Italy delivered large amounts of relief supplies to Austria. The deliveries by the United Kingdom amounted to approximately 18,000 metric tons, with a total value of \$1,916,640, made up as follows:

Commodity	Metric Tons
Bread grains .....	1,000.0
Pork products .....	500.0
Potatoes .....	10,000.0
Non-foods .....	6,500.0
Total .....	18,000.0

Italy furnished large quantities of food supplies to Austria during the Armistice Period. The total tonnage of these foodstuffs, as reported to the Director General of Relief, amounted to 64,061.0 metric tons, valued at \$18,856,872. These supplies were financed chiefly by the surrender of commodities and other concessions to Italy by Austria. These transactions, therefore, essentially were sales for cash. The commodities delivered to Austria during this period according to the Italian reports were as follows:

Commodity	Metric Tons
Flour .....	12,808.0
Grain .....	16,761.0
Rice .....	9,852.0
Beans and peas .....	4,209.0
Pork products .....	18,168.0
Milk .....	728.0
Miscellaneous foods .....	1,535.0
Total .....	64,061.0

These, of course, are in addition to the deliveries under the Joint Allied Finance.

#### DELIVERIES BY OTHER COUNTRIES

As pointed out on page 65, Mr. Hoover made every effort to re-establish some portion of the pre-war trade between the several territories of the former Austro-Hungarian Empire and other contiguous countries. Because of the distressing situation in Austria, special efforts were made to secure commodities from neighboring countries. In this the Director General of Relief was particularly successful, and according to reports submitted to the Supreme Economic Council a total of 124,578.3 metric tons of relief supplies, with an estimated value of \$15,059,603, were furnished to Austria by countries other than the major Allies. Czechoslovakia furnished large quantities of sugar and coal, Jugoslavia supplied large quantities of wheat and other foods from the Banat region, and important assistance was rendered by many other countries. The following table summarizes the deliveries from each of these countries. Further details may be obtained from Tables 136, 206, and 209.

#### SUMMARY OF DELIVERIES TO AUSTRIA BY COUNTRIES OTHER THAN THE UNITED STATES AND THE MAJOR ALLIES—ARMISTICE PERIOD, 1919

Country	Total Metric Tons	Total Value
Czechoslovakia .....	62,898.0	\$ 9,914,858.00
Denmark .....	19.0	10,108.00
Germany .....	330.0	13,200.00
Hungary .....	8,878.0	805,063.00
Jugoslavia .....	33,886.0	2,464,561.00
Netherlands .....	2,810.0	112,400.00
Norway .....	8.3	4,980.00
Poland .....	4,026.0	204,896.00
Switzerland .....	11,723.0	1,529,537.00
Total .....	124,578.3	\$15,059,603.00

In the main these deliveries were made in exchange for manufactured articles or for concessions from Austria to the various governments. In principle they were deliveries against cash payment. However, the delivery of 8.3 tons of cod liver oil by Norway was a direct gift from the Norwegian Government for children's relief.

The total relief supplies furnished to Austria during the Armistice Period and under the direction of the Director General of Relief (exclusive of children's relief) may be summarized according to the basis upon which they were furnished, as follows:

Sold for cash.....	\$37,189,563.35
Delivered on credit.....	61,197,890.00
Benevolence .....	384,142.58
Total.....	\$98,771,595.93

The successful fulfillment of this Austrian food program in the face of almost overwhelming financial difficulties marks this as probably the greatest triumph of the Director General of Relief in the entire Armistice Period.

## RECONSTRUCTION PERIOD

### CHILDREN'S RELIEF

It was inevitable that with food conditions so serious in Austria the children should be the greatest sufferers. In 1919 Dr. August Bohm, chief of the Vienna Board of Health, reported that, "as a consequence of the War and particularly of the lack of food, children between the ages of six and eighteen have suffered considerably, and in many cases irreparable damage has been done. Their physical development has been practically arrested. Children of twelve and fourteen are developed physically only to the extent of the normal child of eight and ten years." It was estimated that 80 to 85 per cent of the children up to three years of age, from the middle and working classes, were more or less affected from rickets, and many had tuberculosis because of the prolonged undernourishment.

Yet the Lodge Amendment to the Congressional Appropriation for Relief (Act of February 25, 1919) had been so worded as to exclude the use of any of these funds for ex-enemy countries. Consequently, children's relief could not be fur-

nished to Austria from this fund, as was being done in other Central European countries. There was never any question in Mr. Hoover's mind but that some form of relief must be supplied to the Austrian children. Consequently, in the spring of 1919 he obtained President Wilson's consent to use a portion of the allotment of \$5,000,000 from the President's National Security and Defense Fund for child relief in Austria.

The first program for relief of Austrian children provided for one meal a day for 60,000 children for a period of about four months. This was found to be totally inadequate, and the second program provided for approximately double that number. Later on, due to political difficulties in certain countries, and to the improvement of conditions in others, it was possible to divert certain child-feeding supplies to Austria which had been ordered and allocated originally for those countries. The first two programs for Austrian children's relief as originally made out were as follows:

#### AUSTRIAN CHILDREN'S RELIEF PROGRAMS—1919

(Metric Tons)

Commodity	First Program	Second Program
Wheat flour .....	425	600
Rice .....	...	450
Beans and peas .....	45	360
Pork products .....	90	250
Milk .....	300	675
Sugar .....	180	465
Cocoa .....	90	99
Cod liver oil .....	15	...
Total .....	1,145	2,899

Child-feeding operations were begun in Austria on May 5, 1919, with 15,500 children receiving a daily ration. The number of children rapidly increased until 213,600 were on the lists in November, 1919. Even then, only a small proportion of the undernourished were being fed. On August 1, 1919, the European Children's Fund took over the administration of the Austrian children's relief, and it was under their direction that most of the supplies allotted during the Armistice Period were actually delivered.

The total children's relief for Austria paid for from the President's National Security and

Defense Fund amounted to 7,536.1 metric tons, valued at \$2,847,892.23. In addition to these supplies, it happened that under the administration of the European Children's Fund a portion of the supplies purchased by the Congressional Appropriation was actually used in Austria, although this was forbidden by the act of Congress. In reality, these supplies were merely substituted in place of other commodities which the European Children's Fund furnished from charitable contributions. Altogether, 746.3 metric tons of supplies from the Congressional Appropriation, valued at \$319,471.90, were delivered in Austria. These supplies had been originally ordered for Yugoslavia and Czechoslovakia, but conditions had changed in the former country so that all of these supplies were not needed there. The need was still urgent in Czechoslovakia, but with the location of these supplies it was more economical for the European Children's Fund to send them to Austria and supply other commodities in their place to Czechoslovakia.

The commodities delivered under the two funds are shown in detail in Tables 211 and 212. They may be summarized as follows:

#### SUMMARY OF COMMODITIES FOR AUSTRIAN CHILDREN'S RELIEF PAID FOR FROM U.S. GOVERNMENT FUNDS

(Metric Tons)

Commodity	President's National Security and Defense Fund	Congressional Appropriation	Total
Flour .....	1,503.7	....	1,503.7
Rice .....	1,079.5	....	1,079.5
Beans and peas.....	815.4	....	815.4
Pork products .....	323.6	....	323.6
Milk .....	2,805.0	553.7	3,358.7
Cocoa .....	367.3	76.6	443.9
Sugar .....	517.4	116.0	633.4
Cod liver oil .....	14.0	....	14.0
Soap .....	110.2	....	110.2
Total .....	7,536.1	746.3	8,282.4

#### *Deliveries by European Children's Fund.*—

The children's relief supplies furnished from U.S. Government funds as listed above were sufficient to carry on this work until the early spring of 1920. In April, 1920, a careful medical survey of child health was made by the Austrian National Committee. The deplorable situation

even after a year of mass child feeding is shown by the following figures:

	Austria, Including Vienna	Percent- age	Vienna Alone	Percent- age
Total child population under 15 years.....	1,182,000	100	340,000	100
Undernourished chil- dren .....	930,000	78	327,000	96
Undernourished children receiving American meals .....	300,000	32	160,000	49

Under these conditions it was necessary that redoubled efforts should be made to improve the health of these children. The European Children's Fund entered upon an enlarged program which extended over the next three years. The number of children fed increased until a maximum of 356,214 was reached in June, 1921. This increase occurred in spite of the fact that a close control was kept on the condition of all children at the feeding stations and only those urgently requiring additional food were permitted to remain.

Selecting children by the Pelidisi system who should receive relief, in Austria.

The method of selecting children who should receive relief was developed in a highly scientific manner in Austria, under the direction of Dr. Clemens Pirquet of Vienna University Children's Hospital. Dr. Pirquet's method, known as the Pelidisi formula, consisted in determining the ratio between the sitting height and the weight of the child. With adults the normal Pelidisi<sup>1</sup> was expressed as 100, but with children

who do not carry as much fat the normal Pelidisi is 94.5. Children with a Pelidisi of 94 were considered underfed and those showing 93 or less were admitted to feeding at once. This method, which eliminated all personal opinion and all local influence, proved extremely simple and satisfactory. The examinations were repeated at frequent intervals and all children showing sufficient improvement were eliminated to make room for those whose needs were greater.

Dr. Pirquet also devised a simple method of calculating the nutritive value of the feeding rations used. This was called the "Nem" system (an abbreviation for the expression "Nutritive Element Milk" or the German "Nahrungs-Einheit-Milch"). A "Nem" represented the quantity of any food which had the same nutritive value as one gram of average human milk. One kilonem, therefore, represented a meal with the equivalent nutritive value of a liter (a little more than a quart) of milk. All allocations of child-feeding supplies were made on the "Nem" basis, which greatly simplified all operations.

During the period from 1920 to 1923 the European Children's Fund furnished 25,963.4 metric tons of food and other supplies for children's relief in Austria. The total value of these supplies was \$6,695,693.43 (cf. Table 76).

Throughout this period the Austrian Government co-operated wholeheartedly in the child-feeding work. Among other things, the central government and many of the provincial governments made important contributions of supplies. The donations from the central government totaled 10,816.0 metric tons, with a value of \$1,323,948.55, while those from the several provincial governments amounted to 1,887.3 tons, with a value of \$40,707.46.

In order to assist in the expense of distribution a small charge, which never exceeded the value of one cent a meal, was made by the local

<sup>1</sup> Of a normal adult the cube of the sitting height, measured in centimeters, equals the 10-fold weight in grams. This is computed as follows: divide the weight in grams, multiplied by 10, by the cube of the sitting height in centimeters. Thus, an adult weighing 72.9 kilograms, or 72,900 grams, with a sitting height of 90 centimeters, would have a normal Pelidisi of 100, computed as follows:  $72,900 \text{ (grams)} \times 10 \div 90^3 = 729,000 \div 729,000 = 1$ , or the equivalent of 100 Pelidisi.

A complete explanation of this can be found in *An Outline of the Pirquet System of Nutrition*, by Dr. Clemens Pirquet (W. B. Saunders Company, Philadelphia, 1922).

committees against the parents of the children. As elsewhere, however, no child was excluded because its parents were unable to make this contribution.

In addition to the donation of tangible commodities, the Austrian Government and people made many very important contributions, both in facilities and services, which it is difficult to evaluate. It has been estimated by those in charge of the Austrian work that these intangible contributions amounted to more than \$2,500,000, which may be divided as follows:

Contribution	Estimated Value
Parents contributions .....	\$ 418,555.00
Quarters furnished .....	204,092.00
Light and heat .....	102,497.00
Transportation .....	300,551.00
Miscellaneous donations .....	692,566.00
Volunteer services (7,800 workers) ..	782,969.00
<b>Total .....</b>	<b>\$2,501,230.00</b>

The commodities delivered by the European Children's Fund and the Austrian Government donations are shown in detail in Tables 213, 215, and 216. The totals of these deliveries in metric tons may be summarized as follows:

Commodity	European Children's Fund	Government Donations, Including Provincial Governments	Total
Flour .....	5,030.7	10,389.8	15,420.5
Rice .....	3,743.1	.....	3,743.1
Beans and peas .....	3,417.8	.....	3,417.8
Corn grits .....	970.3	.....	970.3
Pork products .....	1,806.6	.....	1,806.6
Milk .....	6,232.9	.....	6,232.9
Cocoa .....	640.7	.....	640.7
Sugar .....	2,773.7	638.0	3,411.7
Miscellaneous foods ..	418.9	.....	418.9
Soap .....	98.7	.....	98.7
Clothing .....	830.0	.....	830.0
Coal .....	.....	1,675.5	1,675.5
<b>Total .....</b>	<b>25,963.4</b>	<b>12,703.3</b>	<b>38,666.7</b>

The total children's relief supplies delivered to Austria from May, 1919, to the close of operations in 1923 amounted to 46,949.1 metric tons, valued at \$11,227,713.57, including supplies for more than 200,000,000 meals served to Austrian children. Of this amount, \$9,863,057.56 came from the United States as a benevolent donation to the Austrian children.

Tables 211-216 show the detail of the arrivals

of these supplies by steamers and ports. Tables 222-231 show in detail the distribution from Austrian warehouses to the local feeding kitchens by receipt numbers. The total distribution of the food supplies by provinces, as shown by the receipts, may be summarized as follows (cf. Table 218):

Province	Warehouse	Total Metric Tons
Lower Austria .....	Vienna	28,888.4
Upper Austria .....	Linz	3,912.9
Carinthia .....	St. Veit	1,604.2
Salzburg .....	Salzburg	1,753.6
Styria .....	Graz	5,214.9
Tyrol .....	{Lienz	
	{Innsbrück	2,225.4
Vorarlberg .....	Bregenz	850.8
Turnover to committees...	.....	1,668.9
<b>Total .....</b>		<b>46,119.1</b>

The files of the American Relief Administration contain abundant evidence of the deep appreciation of the Austrian Government and the Austrian people for this work. A national Austrian commission was appointed by the government to co-operate in this work, and before the close of the child-feeding operations the Austrian Legislature passed an act (Act of June 2, 1922) providing for the permanent continuation of child feeding. This law created an organization known as "Amerikanisch-Österreichisches Kinderhilfswerk" (the "American-Austrian Children's Relief") in recognition of the aid given Austria by America. The law provides for the periodic examination and feeding of school children through the co-operation of the central government and the provinces.

#### WAREHOUSE AND BULK SALES

As may be evident from the preceding discussion the distress in Austria was by no means confined to the children. There was terrible suffering in the post-Armistice years, particularly among the educated and upper classes. In 1920 the adults of the cities were living from hand to mouth upon a ration scarcely more than enough to maintain emaciated individuals in a resting condition. Physical labor was out of the question. The country was barely able to exist on supplies furnished through Allied credits.

Under these conditions the A.R.A. undertook to secure such assistance for Austrian adult

relief as it could muster without making appeal to American public charity, which was already contributing heavily to the children's relief work. Among other things, the plans for food drafts were put into operation and these proved of great assistance to Austria. The sale of drafts for Austria far exceeded those for any other Central European country. Through these drafts, 6,030.7 metric tons of food, with a total value of \$2,444,510, was provided for more than 150,000 Austrian families. The detail of these deliveries is shown in Table 219.

In order to provide still further aid to needy adults the A.R.A. undertook to interest various philanthropic organizations in Austrian relief, particularly for the educated classes. Among the organizations which made noteworthy contributions to Austrian relief in this period were the Commonwealth Fund, Jewish Joint Distribution Committee, American Friends Service Committee, and the World's Student Christian Federation. The work of these organizations has been discussed under the heading of Special Programs. Their contributions were used chiefly to make bulk purchases of food from the American Relief Administration Warehouses.

The Commonwealth Fund made a total contribution of \$691,333.04 toward Austrian relief. Of this amount, \$200,000 was used to purchase food drafts and is included under that heading above. Another item of \$62,475.26 was used for clothing for Austria and is referred to below. This left a total of \$428,857.79 from the Commonwealth Fund which was used to purchase bulk food for Austria. The other three organizations used their funds entirely for bulk food purchases from A.R.A. Warehouses. These purchases may be summarized as follows:

#### BULK FOOD PURCHASES FOR AUSTRIA

Commonwealth Fund.....	\$428,857.79
Joint Distribution Committee.....	200,000.00
American Friends Service Committee.....	50,000.00
Student feeding—W.S.C.F. and A.R.A. *....	95,147.34
Total .....	\$774,005.13
Bulk sale purchases by other organizations.	112,120.35
Total bulk sales to Austria.....	\$886,125.48

\* See A.R.A. contribution to Special Programs.

As shown in detail in Table 220 the total net bulk sales for Austria from the A.R.A. Ware-

houses amounted to 5,765.1 metric tons of food, with a total value of \$886,125.48.

Altogether, the food drafts and bulk sales operations resulted in making available to the Austrian people 11,795.8 metric tons of food, with a total value of \$3,330,635.48 (Table 76 above).

#### COMMONWEALTH FUND CLOTHING

Reference has been made to the efforts of the Commonwealth Fund to relieve the suffering in Austria. The sixth Commonwealth Fund appropriation of \$150,000 was to be used for clothing for the intellectual classes. Of this amount, \$62,475.26 was used for the purchase of 31.8 tons of clothing materials for Austria. The detail of the items purchased and their distribution within Austria are given in Tables 221 and 222.

#### OTHER RELIEF

Other items shown on the Summary Table 76 (also Table 206, Appendix) include the cash sale of approximately 1/10 ton of surplus clothing from the children's relief operations for \$101.26 and needs no further comment.

The item on commodity exchange is shown in detail in Table 218 C. It results from the fact that in the children's relief work there was a surplus of certain commodities and a shortage of others. Arrangements were made whereby 800.0 metric tons of flour were exchanged for 600.0 metric tons of sugar, while 38.2 tons of milk and 54.6 tons of cocoa were exchanged for 243.0 metric tons of other commodities consisting of 84.1 tons of beans, 30.7 tons of pork products, and 128.2 tons of sugar (cf. Tables 213 and 218). No money was involved in these exchanges.

#### U.S. GRAIN CORPORATION FLOUR

The circumstances under which Congress passed an act (Act of March 30, 1920) authorizing the United States Grain Corporation to sell up to 5,000,000 barrels of flour to relieve the food shortage in Europe have been set forth in an earlier section (page 113). In no part of Europe were conditions worse than in Austria and, consequently, that country received a large portion of this flour. The total deliveries to Austria under this Act amounted to 2,258,867 barrels of

flour, equivalent to 200,824.8 metric tons, with a total value f.o.b. New York of \$24,055,708.92. Notes of the Republic of Austria were taken for this amount and turned over to the United States Treasury by the Grain Corporation.

The Grain Corporation was not authorized to finance the freight and other transportation charges on this flour from American ports to Europe, nor was the Austrian Government in a position to do this. The European Children's Fund was successful in getting Great Britain to finance the freight and other charges on this flour which amounted to \$8,032,991.88, as shown in Tables 162 and 217. The United Kingdom accepted Austrian notes for this amount. The detail of these flour deliveries is shown in Table 217.

This flour enabled the Austrian people to pass the difficult food crisis in the spring and summer of 1920 and saved untold suffering during that period.

## TOTAL RELIEF DELIVERIES

Total relief deliveries to Austria during the Reconstruction Period amounted to 260,494.4 tons of food and other supplies, with a delivered value of \$46,709,626.37, as shown in Table 206. This, together with the relief furnished during the Armistice Period, made a grand total of 822,200.1 metric tons, with a value of \$145,481,222.30. In no country of Europe, with the possible exception of Poland, was the post-war distress so severe or relief measures of such vital importance. The total deliveries to Austria during the period from 1919 to 1923 may be summarized, according to the basis on which they were furnished, as follows:

Sold for cash .....	\$ 38,554,320.62
Delivered on credit .....	93,286,590.80
Benevolence .....	13,640,310.88
Total .....	<hr/> \$145,481,222.30

## BELGIUM

(Appendix Table 233)

### C.R.B. PERIOD

The work of the Commission for Relief in Belgium has been discussed in earlier sections of this report (cf. pages 12-14 and 55) and references have been given to the detailed statistics of this operation. What this Commission did for Belgium is so well known that little needs to be added here. In spite of the many almost insuperable obstacles the Commission carried on its work for nearly five years (November 1, 1914, to August 31, 1919). During most of this time the Commission stood between the warring powers as the only gateway through which food could flow to nearly 10,000,000 people in the occupied territory of Belgium and Northern France.

Table 77 shows that the total deliveries to Belgium<sup>1</sup> by the Commission for Relief in Belgium, including the deliveries to Belgian refugees in Holland and at Le Havre, amounted to 3,896,180.0 metric tons, with a total value of \$641,056,693.69. Of this amount, 3,036,317 metric tons were delivered in the period from November 1, 1914, to the Armistice. During this whole period of the war, the function of the Commission was to keep the destitute people of this country from starvation. After the signing of the Armistice and the evacuation of this territory by the Germans, the character of the work changed somewhat, the object then becoming the organization of the Belgian people and their industries so that they could take care of themselves. At the time of the Armistice both the Belgian and French governments requested the Commission to continue in charge of the food and relief supplies until the governments themselves could organize and take it over. The Commission therefore continued its shipments of supplies until May, 1919. By this time, through the insistence of Mr. Hoover, the Belgian and French governments had made arrangements to take charge of delivering these supplies to their respective territories. After May the Commission was engaged in liquidating its stocks, a por-

<sup>1</sup> Deliveries to Northern France by the C.R.B. are given in the section on France.

tion of which was sold to Germany (cf. page 197) and the remainder distributed in the relief territories.

The following tabulation summarized from Mr. Gay's report (*loc. cit.*) shows the total tonnage of relief supplies delivered to Belgium each year by the Commission.

Time of Delivery	Total Metric Tons
Nov. 1, 1914, to Oct. 31, 1915.....	802,103.0
Nov. 1, 1915, to Oct. 31, 1916.....	905,946.0
Nov. 1, 1916, to Oct. 31, 1917.....	576,394.0
Nov. 1, 1917, to Oct. 31, 1918.....	751,874.0
Total prior to Armistice.....	3,036,317.0
Nov. 1, 1918, to Aug. 31, 1919.....	858,624.0
Grand total .....	3,894,941.0

Throughout its whole work, the Commission devoted special attention to the feeding of undernourished children. Canteens were established in all parts of the occupied territory at which children secured one meal a day, consisting largely of cocoa, milk, bread, and fats. In order that this work could go on without interruption until more stable food conditions were established, the Commission agreed to continue the child feeding after May 1 until the beginning of the next harvest. The supplies for this work were in stock on May 1, and required no further shipments.

### U.S.F.A. PERIOD

In accordance with his plans to place the responsibility on each government of caring for its own people as soon as possible, Mr. Hoover made arrangements in May, 1919, by which the U.S. Treasury extended loans to the Belgian Government direct instead of through the C.R.B. Under this arrangement the Belgian Government purchased food supplies in the United States totaling 251,902.3 metric tons, for which the Treasury extended credits totaling \$27,533,982.47. Although all of these purchases were made from May to September, 1919, they formed a part of the program of the United States

TABLE 77  
SUMMARY OF TOTAL RELIEF DELIVERIES TO BELGIUM  
(For detail see Table 233)

Operation	Total Metric Tons	Total Value
C.R.B. Period		
Occupied Belgium .....	3,894,941.0	\$639,692,817.25
Belgium refugees in Holland and Le Havre.....	1,239.0	1,363,876.44
Total C.R.B. deliveries.....	3,896,180.0	\$641,056,693.69
U.S.F.A. Period		
U.S. Treasury loans—direct.....	251,902.3	27,533,982.47
Armistice Period		
U.S. Liquidation Commission.....	50,774.0	28,549,672.75
Grand total relief deliveries.....	4,198,856.3	\$697,140,348.91

Food Administration for supplying the Allies with food during the war. In the case of all the Allies, these purchases were continued during the Armistice Period. As shown in Table 106, these purchases by the Belgian Government consisted chiefly of flour and bread grains which were obtained through the U.S. Grain Corporation.

#### ARMISTICE PERIOD

The relief to Belgium listed in Tables 77 and 233 under the Armistice Period includes only the sale to the Belgian Government of 50,774.0 metric tons of food and clothing by the United States Liquidation Commission from surplus Army stocks in France. These supplies, valued at \$28,549,672.75, were sold to Belgium on credit; notes covering this amount were taken by the Liquidation Commission.

From a strictly chronological standpoint the relief to Belgium during the Armistice Period should include the following:

	Metric Tons
Post-Armistice deliveries by C.R.B.....	858,624.0
Belgian Government purchases (U.S. Treasury credits) .....	251,902.3
U.S. Liquidation Commission.....	50,774.0
Total .....	1,161,300.3

For the purpose of tying these to the various

relief operations it is simpler to regard them as deliveries under the headings given in Table 77.

Table 540 shows a cash sale by the American Relief Administration of 668.3 metric tons of flour for \$122,638.77 which was used for relief in Belgium. This is accounted for under the C.R.B. sales and hence is omitted from the summary in Tables 77 and 233, where it would constitute a duplication.

The total relief deliveries to Belgium as summarized in Table 77 include 4,198,856.3 metric tons, valued at \$697,140,348.91. All of the operations during the Food Administration and the Armistice periods represent purchases on credit. The deliveries by the C.R.B. were partly on government credit and partly as benevolence, while a total of \$6,328,328.30, representing exchange remittances to individuals in Belgium (Table 105), may be regarded as cash purchases. On this basis the total relief to Belgium may be summarized as follows:

Sold for cash .....	\$ 6,328,328.30
Delivered on credit .....	504,078,737.22
Benevolence .....	186,733,283.39
Total .....	\$697,140,348.91

Of the total credits extended to Belgium during this period, \$315,715,915.66 came from the United States and the remainder from Great Britain and France (cf. Table 105).

## BULGARIA

(Appendix Tables 234-235)

### ARMISTICE PERIOD

Bulgaria, like the other Central and Eastern European states, had an acute food situation in 1919, the result not only of the World War, but also of the Balkan wars from which Bulgaria had not recovered in 1914. As an ex-enemy state, Bulgaria was excluded from the benefits of the Congressional Appropriation for Relief, but this, of course, did not keep the Director General of Relief from taking steps to prevent suffering among women and children in that country.

Before the war, Bulgaria was able to export considerable amounts of wheat, maize, and live stock. Detailed statistics are lacking for the war years, but production of wheat, which in 1913 was about 1,300,000 tons, fell below 900,000 tons in 1918. The production of other crops probably suffered more in proportion. It was estimated by British authorities in Bulgaria that about 50,000 tons would be needed before the 1919 harvest. At any rate, there can be no question of the severe suffering in certain internal sections.

In February, the Bulgarian Government requested assistance. It was finally arranged that some \$2,000,000 worth of Bulgarian gold should

be delivered to the Director General of Relief and in return he agreed to deliver American flour to its full value.

In all, 22,862.4 metric tons of flour for Bulgaria were delivered at Varna by the American Relief Administration. Additional amounts of Bulgarian gold were later deposited to cover the cost of the foodstuffs delivered. This gold was placed aboard an American destroyer and held at Constantinople with the idea of allowing the Bulgarian Government to buy it back, if foreign credits could be obtained. Bulgaria was unable to realize these credits by the time the A.R.A. closed its operations, and at the direction of the U.S. Grain Corporation this gold was transported to New York by an American destroyer, where it was sold to the Federal Reserve Bank. The total sum realized from the sale of this gold was \$5,210,357.57. After paying all expenses incident to the transaction, the balance above the cost of the flour was returned to the Bulgarian Government by the U.S. Grain Corporation.

This transaction represented a cash sale of 22,862.4 metric tons of flour for \$4,856,647.53 delivered at Bulgarian ports. For detail of these deliveries see Tables 234 and 235.

# CZECHOSLOVAKIA

(Appendix Tables 236-279)

## POST-ARMISTICE NEEDS

Of the six territorial divisions resulting from the succession states of the Austro-Hungarian Empire, the Republic of Czechoslovakia possessed the greatest resources. However, the division of the old Empire was along national rather than industrial or economic lines. Czechoslovakia was fortunate in that she possessed some of the best coal mines of the old monarchy. This meant that she also possessed large manufacturing and industrial plants, but she was dependent, to some extent, on outside sources for agricultural products and raw materials. For example, while most of the beet sugar factories of the old Empire were located in Czechoslovakia, on account of the coal, the beets which supplied these factories were, to a large extent, grown in Hungary. Under normal conditions it would have been easy to exchange coal for beets, or sugar for potatoes or grain. However, after the Armistice, the innumerable restrictions in the form of embargoes upon the operation of trade, finance, and travel prevented all this.

As a matter of fact, Czechoslovakia at this time was actively continuing military operations on two sides of the Republic. These operations were against the Hungarians on the south, and the Poles in Teschen on the north. Although Czechoslovakia recognized that the final determination of her boundaries would be made by the Peace Conference in Paris, she was acting on the old adage that possession is nine points of the law. She was particularly anxious to extend her boundaries to the south, in order to secure more agricultural land to balance her industrial facilities.

The Republic of Czechoslovakia embraces Bohemia, Moravia, Slovakia, Ruthenia, and a portion of Silesia. The population of the territory thus outlined was approximately 13,000,000. Of this number, probably 7,000,000 would be classed as non-producers of food. This includes some 110,000 miners and their dependents, or a total of, say, 450,000; about 400,000 soldiers; some 2,000,000 so-called heavy workers; and 4,000,000 to 5,000,000 light workers, including their dependents. Of this total number, excluding the soldiers, about 4,500,000 were in Bohemia, 1,500,000 in Moravia, 500,000 in Silesia, and the remainder in Slovakia. The district of Silesia, for which but few statistics are available, was considered able to take care of its own population.

The following table shows the approximate figures for the production of some of the more important crops in Bohemia, Moravia, and Silesia prior to the war. All figures are in metric tons.

The normal cereal supply, excluding oats, from this territory was thus approximately 3,000,000 tons.

The war had seriously interfered with agricultural production. According to information furnished by our secret service during the war, the crops of the old Empire in 1918 were between 50 and 60 per cent of normal. These figures were later confirmed in general by data presented to the A.R.A. by the authorities at Prague. According to the Czechoslovakia military authorities, the available supply of bread grains from Bohemia and Moravia in February, 1919, would total to only 560,000 tons. The conditions in Slovakia and Silesia were such that they were

APPROXIMATE PRE-WAR PRODUCTION OF THE MORE IMPORTANT COMMODITIES  
(Metric Tons)

District	Wheat	Rye	Maize	Barley	Oats	Potatoes
Bohemia .....	461,800	990,700	300	644,300	846,900	3,050,000
Moravia .....	169,800	329,300	16,900	328,900	260,700	1,600,000
Silesia .....	13,000	61,800	.....	29,800	71,900	270,000
Total .....	644,600	1,381,800	17,200	1,003,000	1,179,500	4,920,000

compelled to regard these simply as self-supporting. It was the experience of the authorities that not over 70 per cent of these supplies could be requisitioned. This would amount to only 390,000 tons of grain, equivalent to some 300,000 tons of flour.

Counting the population to be supplied as 7,000,000, an average ration of 12 kilograms of flour per month would require at least 550,000 tons of flour before the next harvest. Of this, 250,000 to 275,000 tons must be imported. This amounted to an average monthly requirement of about 45,000 tons until the 1919 harvest.

A serious defect in the food supply of Czechoslovakia after the Armistice was the failure of the potato crop. A considerable portion of the population depended upon this commodity for their main food. Normally Bohemia imported its potatoes from Galicia, but this was now impossible. In January, 1919, it was impossible to procure potatoes in the public markets in Prague. The health of the people in the districts which depend largely upon potatoes for food was in a very deplorable condition.

Live stock, with the exception of sheep and goats, had decreased greatly. In April, 1918, the number of cattle was 25 per cent less than in 1910, and the number of swine 70 per cent below the pre-war figure. By 1919 the numbers were undoubtedly much lower, because the army had combed the country again in July, 1918.

While food conditions in Czechoslovakia were not so absolutely terrible as in Poland and some other liberated territories, this does not mean that the people were not suffering. Furthermore, in no other section of Europe was food so important for combating the spread of bolshevism. Work was available in the mines and foundries, and upon the output of these depended to a critical extent not only the fate of Czechoslovakia, but that of the other countries of Central Europe as well.

Another district whose final affiliations were not determined at this time was that around Mährisch Ostrau, in the Teschen-Silesian coal region. This district, with a population of 1,450,000, was in serious need not only of food, but of clothing and other supplies. With the exception of a special child-feeding program, discussed later, provisions for this region were supplied through Czechoslovakia.

The final program for the general relief of

Czechoslovakia in the Armistice Period consisted of 45,000 tons of breadstuffs per month, 4,000 tons of fats, and about 1,000 tons of milk. As shown in Table 13 on pages 32-33, this program was frequently changed, either because of available supply or because of special requirements.

#### DIFFICULTIES ENCOUNTERED

Like the other newly established governments of Central Europe, Czechoslovakia had no funds with which to purchase these needed foodstuffs. The first task which faced the Director General of Relief was to find some means of financing these relief supplies. This was accomplished by arranging for credits to Czechoslovakia from the United States Treasury under the acts of Congress authorizing credits to countries engaged in war with the enemies of the United States. The first of these Treasury loans was established in January, 1919, and shipments of foodstuffs from stocks at Trieste were started at once. The demoralized condition of the railroads leading out of Trieste made this movement slower than had been anticipated. Up to the end of February, 1919, only 6,594 tons of foodstuffs had been delivered.

Thus the provisioning of Czechoslovakia, with no access to the sea, offered special difficulties, because of the complete demoralization of the transportation systems of Central Europe. It was originally intended to send all supplies by way of the southern route to Adriatic ports and then overland to Prague and other centers. It soon became apparent that the rail facilities from this port would not be adequate, even under the most favorable conditions, to handle these supplies, together with the shipments to Austria and other more southern regions. By the end of March, the Brussels Agreement had been signed, by which food supplies were to be sold to Germany. One of the conditions of this agreement was that supplies to Czechoslovakia and other countries should be landed at Hamburg and shipped by barge down the Elbe to Prague. This arrangement, although requiring much diplomacy and constant watchfulness, worked very satisfactorily. In all, more than 240,000 tons of relief supplies were delivered at Hamburg for the Czechs, and transported by the Elbe. Table 240 gives the weekly barge movements from Hamburg for Czechoslovakia and

gives some idea of the task carried out by the American Relief Mission at Hamburg.

At no time, however, were the shipments to Czechoslovakia from Trieste abandoned. In all, nearly 80,000 tons of American supplies were shipped to the Czechs from the south. Table 241 gives the summary of the monthly shipments from Trieste to Prague.

In addition to the delivery of food supplies, the Director General of Relief took an active part in reorganizing and establishing economic relations between Czechoslovakia and the neighboring nations as well as other foreign countries. Through the assistance of the American Relief Administration a contract was signed in April, 1919, between the Polish and Czechoslovakian governments whereby the Poles agreed to exchange 4,000 cars of potatoes from Poznań for 215 carloads of sugar. Other exchanges of this character were also initiated by which the Czechs were able to exchange their sugar and coal for much-needed supplies.

March 11, 1919, Mr. Hoover addressed a letter to the Czechoslovakian Minister of Foreign Affairs in which he pointed out certain steps which he believed the government ought to undertake in order to rehabilitate their normal economic life, and promised the co-operation of the United States Government to that end.<sup>1</sup> This was part of the general program of getting these newly formed governments started on a firmly established basis so that they would be in a position to care for their own people.

### ARMISTICE PERIOD

As shown in Table 78 (page 168), total relief deliveries to the Government of Czechoslovakia during the Armistice Period under the Director General of Relief amounted to 503,230.0 metric tons, with a total value of \$105,545,794.40. Of this amount, 352,585.59 tons, with a value of \$77,876,410.40, were furnished from the United States, thus constituting 73.8 per cent of the value of all relief delivered during this period. In addition to this amount the 6,476.2 metric tons (valued at \$2,837,748.69), of children's relief from the A.R.A. was delivered during the Armistice Period, but since a large portion of this was consumed after the peace treaty this

is accounted for under child feeding in the Reconstruction Period.

The deliveries to the Government of Czechoslovakia by the A.R.A. during the Armistice Period totaled 311,360.7 tons, with a total value of \$58,602,496.13. Of this amount, 70.5 tons, worth \$33,778.62, represented cash sales by the A.R.A. from supplies purchased from U.S. Army Stocks in Trieste, the detail of which is shown in Table 239.

The sum of \$203,505.62 represents charges for insurance and freight, partly on the transportation of commodities purchased from the U.S. Liquidation Commission in France and transported by the A.R.A., and partly for the transportation of American Red Cross clothing and of Norwegian cod liver oil as explained elsewhere. The detail of these transshipments is shown in Tables 143 and 144. Of these charges, the sum of \$18,898.99 was a direct gift to Czechoslovakia and the remainder charged against the government as a credit operation.

The remainder of the supplies from the A.R.A. totaling 311,290.2 metric tons and valued at \$58,365,211.89, were delivered on credit to the Czechoslovakian Government. The major portion of this credit of \$50,113,572.61, as indicated in Table 78, was obtained by direct U.S. Treasury loans to the Government of Czechoslovakia, while the remainder was delivered on credit authorized by Congress in the Act for the Relief of Europe (approved February 25, 1919).

The detail of the shipments of these supplies by vessels, and cargoes of each, is given in Tables 237 and 238. The movement of these supplies from the ports to Czechoslovakia is summarized in Tables 240 and 241. Deliveries of these supplies were made to the Government of Czechoslovakia upon arrival in the country, and receipts, signed by authorized government officials, were obtained for each shipment. The internal distribution of these supplies was entirely in the hands of the Czechoslovakian Government, although officials of the A.R.A. kept a general oversight of these operations. No further details are available on the internal distribution of these supplies.

Deliveries to Czechoslovakia by the United States Liquidation Commission amounted to 40,350.0 metric tons of food, clothing, and miscellaneous supplies, valued at \$19,098,874.27 (see Table 122). These supplies were sold to

<sup>1</sup> Quoted in *American Relief Administration Bulletin* No. 2, March 24, 1919.

<b>Grand total, Reconstruction Period .....</b>	<b>41,904.6</b>	<b>\$ 9,892,557.58</b>
<b>Grand total relief deliveries .....</b>	<b>545,134.6</b>	<b>\$115,438,351.98</b>

Czechoslovakia on credit, and notes for the foregoing amount were obtained by the Liquidation Commission.

The American Red Cross furnished 875.2 metric tons of clothing for Czechoslovakia. The estimated value of these supplies, exclusive of transportation charges, was \$175,040.00. Of this amount, 301.2 tons were transported from the United States by the American Relief Administration at a cost of \$18,681.81 included in payments on freight discussed above. Table 127 shows the detail of the Red Cross shipments.

Table 78 shows a total of 150,644.1 metric tons of relief supplies, valued at \$27,669,384, which were furnished to Czechoslovakia during the Armistice Period by countries other than the United States. Of this amount, the three principal Allies, United Kingdom, France, and Italy, contributed 99,564.0 metric tons, with a total value of \$25,794,674. Of the 7,132.0 metric tons delivered from the United Kingdom, 300 tons of milk were given by the Lady Muriel Padget Mission, and 70 tons of flour, rice, and miscellaneous supplies were furnished as a gift by the British

Red Cross. These two gifts of 370 tons were valued at approximately \$149,006. The remaining 6,762 tons, valued at \$1,450,830 represented commodities sold on credit by the British Government and paid for from British relief funds. For detail of the commodities delivered by the United Kingdom, see Table 242.

The deliveries from France to Czechoslovakia amounted to 16,571.0 metric tons, valued at \$7,540,918. Of this amount, 20 tons of flour and 20 tons of rice, valued at approximately \$5,138, represented a gift from the French Government to the Czechoslovakian children's relief. The remainder of the supplies from France, consisting chiefly of rice, beans, and pork products, were sold for cash and in exchange for 20,000 tons of sugar. For detail of commodities delivered by France, see Table 236.

The deliveries from Italy to Czechoslovakia during the Armistice Period consisted of 75,861.0 metric tons of foodstuffs, including flour, rice, pork products, and milk, with a total value of \$16,653,920. These supplies were practically all exchanged for other commodities on a barter basis. Coal and sugar were the two principal commodities exchanged by Czechoslovakia. In principle, these deliveries may be regarded as cash sales. The detail of the commodities delivered by Italy is given in Table 135.

Of the other deliveries of foodstuffs to Czechoslovakia during the Armistice Period, the most important was 50,000 tons of miscellaneous food, chiefly potatoes, from Poland in return for coal and sugar. Small quantities of fats and miscellaneous food were also furnished by Austria and Yugoslavia in exchange for coal and other commodities. The 10.1 tons of cod liver oil from Norway was a direct gift of the Norwegian Government to Czechoslovakian children's relief. For further detail of these deliveries see Table 136.

The total relief supplies furnished to Czechoslovakia during the Armistice Period and under the direction of the Director General of Relief (exclusive of the children's relief) may be divided, according to the basis upon which they were furnished, as follows:

Sold for cash .....	\$ 26,092,128.62
Delivered on credit .....	79,099,522.79
Benevolence .....	354,142.99
Total .....	\$105,545,794.40

## RECONSTRUCTION PERIOD

The Czechoslovak Republic began its existence after the Armistice with a staggering national debt, including a third of the Austro-Hungarian pre-war debt, a portion of the reparation fund, and debts incurred by military operations and by the purchases of relief supplies and raw materials during the Armistice Period. The country had suffered comparatively slightly from actual war devastation, but the economic stagnation of Europe in 1919 and 1920 had disorganized its industries and trade, resulting in serious unemployment, increased prices, and scarcity of such necessities as food and clothing. These conditions affected particularly the urban and industrial population and were reflected in the undernourished condition of the children. The government was in no position to take care of these needs and it was imperative that some outside help should be extended.

### CHILDREN'S RELIEF

The A.R.A. had begun its child-feeding work in Czechoslovakia in the spring of 1919 and in co-operation with the government had created an organization known as the Czechoslovak Péče o Dítě (P.O.D.), or National Child Welfare Committee, under the patronage of the President of the Republic. This organization provided for close co-operation with the government.

At the start, the active direction of the details of child feeding was carried out by the A.R.A. officials, but it soon became possible to turn this over to the National Committee, and the American representatives acted only in an advisory capacity.

Child feeding in Czechoslovakia was started in April, 1919, with about 4,000 children in the vicinity of Prague. The demands rapidly increased, and the first child relief program provided for the feeding of about 60,000 children until September, 1919. It soon became apparent that this was not sufficient, and a second program provided for nearly 80,000 additional children up to September 1. A third program was prepared by the A.R.A. designed to furnish sufficient food to feed about 140,000 children from September 1 to December 31, 1919.

These three programs prepared by the A.R.A. were as follows:

## A.R.A. PROPOSED PROGRAMS

(Metric Tons)

Commodity	First Program	Second Program	Third Program	Total
Wheat flour . . . . .	500	700	300	1,500
Rice . . . . .	100	150	200	450
Beans and peas . . . . .	45	184	200	429
Pork products . . . . .	...	300	100	400
Milk . . . . .	425	300	1,200	1,925
Sugar . . . . .	200	...	400	600
Cocoa . . . . .	100	69	200	369
Cod liver oil . . . . .	10	...	...	10
Total . . . . .	1,380	1,703	2,600	5,683

In addition to these programs, special arrangements were made for feeding the children of the coal miners in Mährisch Ostrau. These mines were being operated by an Interallied Coal Commission, and it was found that food conditions there were especially serious before the arrival of the American mission.

Before the close of the official relief work in 1919, reports indicated that still further child feeding would be needed in Czechoslovakia. Arrangements were made with the Czechoslovakian Government to donate supplies of flour and sugar, and the A.R.A. agreed to increase its supplies of fats and milk. As a result, the A.R.A. delivered a total of 6,476.2 tons of foodstuffs for Czechoslovakian child feeding which were paid for out of the Congressional Appropriation for Relief, and were a direct gift from the American Government to Czechoslovakia. The value of these supplies amounted to \$2,837,748.69, as shown in Tables 78 and 236.

The urgent need for these supplies was clearly demonstrated in the winter of 1919-1920. By December, 1919, more than 465,000 children were being fed, and this was continued until May, 1920.

In April, 1920, a very careful food survey was carried out by the National Child Welfare Committee, which disclosed serious undernourishment in large classes of the population. The European Children's Fund was urgently appealed to for a continuation of the child-feeding work. With the funds which were available, this organization furnished supplies to enable them to continue the work until the end of the year. From April, 1919, to the end of 1921 the total number of meals for which supplies were distributed amounted to approximately 151,522,000.

*Internal deliveries of child-feeding supplies.*

—As shown by Table 78, the total deliveries for child feeding in Czechoslovakia from April, 1919, to the close of operations in September, 1921, amounted to 15,427.0 metric tons of food and clothing. Of this amount, 6,476.2 tons came from the A.R.A., paid for from the Congressional Appropriation for the Relief of Europe (Act of February 25, 1919) and represented a gift from the American Government to Czechoslovakia to the value of \$2,837,748.69. The European Children's Fund furnished 4,995.0 tons of food and clothing, with a value of \$1,906,945.54, while the Czechoslovakian Government made donations of commodities, chiefly flour and sugar, which totaled to 3,955.8 metric tons, valued at \$693,099.02.

The delivery of these commodities for child feeding under the A.R.A. was started during the Armistice Period in April, 1919. At that time the urge for help for these suffering children was very great, and deliveries had to be started with relatively inexperienced organizations in each country. During this period all commodities were receipted for by the P.O.D., but no receipts were required for the commodities turned over to each feeding station. Later on and particularly with the organization of the European Children's Fund, the P.O.D. not only receipted for the foodstuffs as received in bulk but also secured receipts for commodities turned over to each feeding station. Altogether, seventeen zone warehouses were operated in Czechoslovakia which served 2,623 kitchens operated by 2,445 local committees and supervised by 161 district committees. Table 250 shows the tabulation from the receipts of the total deliveries from each zone warehouse.<sup>1</sup> These receipts account for 11,543.1 metric tons of food, or approximately 75 per cent of the total children's relief deliveries. The remainder is accounted for partly by supplies delivered before the institution of feeding-station receipts, partly by government donations, the receipts for which were turned over to Czechoslovakian officials, and by the commodities turned over to the Péče o Dítě at the time the E.C.F. withdrew from Czechoslovakia. The detail of these operations is shown in Table 250 and may be summarized as follows:

<sup>1</sup> Tables 255-279 give the detail of these deliveries in each district by receipts.

## SUMMARY OF CHILD-FEEDING DELIVERIES

Operation	Total Metric Tons
Deliveries by A.R.A. in Armistice Period (no feeding-station receipts).....	1,607.7
Deliveries accounted for by feeding-station receipts .....	11,543.1
Government donations (receipts to govern- ment) .....	982.2
Stock turned over to Péče o Dítě.....	1,074.7
Deliveries of clothing by E.C.F.....	210.7
Warehouse adjustment .....	8.6
Total .....	15,427.0

In connection with its child-feeding operations the P.O.D. made arrangements with local bakers, to whom they turned over flour and other ingredients and received, without charge, an equivalent amount of biscuits. The total number of biscuits thus received was 29,707,476, with a total weight of 753.2 metric tons (see Table 250 and supporting tables in Appendix). The amount of flour turned over to the bakers to produce these biscuits was 702.2 metric tons. Salt, sugar, baking powder, and other ingredients were supplied as part of the donations by the Czechoslovakian Government.

*Food drafts and bulk sales.*—The sales of food drafts for delivery in Czechoslovakia were not as large as those for many other countries. As shown in Table 251 (see also page 94), the total number of food packages delivered in Czechoslovakia was 21,231, amounting to 815.0 metric tons and valued at \$347,750. Table 251 shows the detail of these deliveries by months and that the period of heaviest delivery was from May to August, 1920. After the early months of 1921 the number of packages declined sharply, reflecting the somewhat less urgent need after that period.

Under bulk sales operations the total net deliveries for use in Czechoslovakia, as shown in Table 252, amounted to 561.4 metric tons, with a total value of \$85,682.69. Table 252 also gives the detail of the bulk sales in Czechoslovakia by months. The intelligentsia feeding from the Commonwealth Fund for \$82,501.10 (cf. page 100) and the student-feeding program for \$23,511.71 (cf. page 111) are included in the food draft and bulk sales operations. The food draft sales also include relatively large purchases by various Czechoslovakian organizations in the United States, such as The Sokols, The National Lutheran Council, and others.

In addition to the bulk sales accounted for above, the European Children's Fund sold 1,018.4 metric tons of flour to the Czechoslovakian Government and received in payment 472.0 metric tons of sugar which were used for child feeding, 443.0 in Poland and 29.0 in Austria (cf. Tables 400 and 213). Also, 245.7 tons of milk were sold to Czechoslovakia, making total sales to the government of 1,264.1 metric tons, valued at \$174,549.84. A further sale of 28.0 tons of pork products was made to the Czechoslovakian State Fat Institute.

As shown in Table 78, the total warehouse and bulk sale operations in Czechoslovakia amounted to 2,668.6 metric tons, with a value of \$629,164. These transactions were all cash sales in principle. As explained previously, such profits as were realized of the food draft and bulk sale operations were used to extend the child-feeding work in that country.

The total deliveries of child feeding, warehouse and bulk sale operations during the Reconstruction Period amounted to 18,095.6 metric tons, valued at \$6,066,957.25 (Table 78). As shown by data given in Table 243, the total arrivals of commodities for child feeding, warehouse and bulk sales, amounted to 18,068.3 metric tons, with a value of \$5,965,279.78. The excess of deliveries over arrivals of 27.3 metric tons is apparently accounted for by the increase in the weight of biscuits due to water and other ingredients added by the bakers. The excess in value is due to profits on the bulk sale operations; which as stated above were turned back into child feeding (cf. page 94). Detail of the arrivals by steamers and cargoes for Czechoslovakian child feeding, warehouse and bulk sale operations is given in Tables 244–248.

*Czechoslovakian contributions to children's relief.*—Reference has been made to the commodities donated by the Czechoslovakian Government for children's relief which totaled \$693,099.02. In addition to tangible gifts, the people of Czechoslovakia rendered much other valuable aid to the European Children's Fund, without which it could not have accomplished its work. For the most part this assistance was of an intangible nature difficult to evaluate properly. The following tabulation represents estimates by those in charge of the children's relief work in Czechoslovakia of the more important contributions. It does not, however, make any

allowance for supplies and equipment contributed locally for kitchens or for the quarters occupied by the kitchens, which frequently were donated.

#### CZECHOSLOVAKIAN CONTRIBUTIONS TO CHILD RELIEF

Transportation, insurance, and warehousing .....	\$ 537,362.00
Expenses of E.C.F. Mission.....	4,437.00
Contributions from citizens.....	229,920.00
Special charges .....	8,376.00
Estimated value of volunteer services (9,246 workers) .....	1,529,816.00
<hr/>	
Total non-commodity contributions .....	\$2,309,911.00
Commodity contributions (Table 78) .	693,099.02
<hr/>	
Grand total .....	\$3,003,010.02

*Continuation of child feeding.*—The work of the American Relief Administration European Children's Fund in Czechoslovakia did more than merely relieve the suffering of these children during this difficult Reconstruction Period. By working in close co-operation with the government it brought about a recognition by the government, and by the people, that it was a public duty to provide for the physical development of the child, as well as for his mental development. The country was so impressed with the results of this child-feeding work that a law was passed providing for a continuation of the work on a permanent basis through co-operation of the national government with individual cities which cared to avail themselves of the opportunity. This has had a marked influence on child health in the Republic.

#### U.S. GRAIN CORPORATION DELIVERIES

The Act of Congress approved March 30, 1920 (cf. page 113), authorized the United States

Grain Corporation to sell for cash or credit up to 5,000,000 barrels of flour to European countries to relieve the severe food shortage from which they were suffering at that time. As shown in detail in Table 249, a total of 267,803 barrels of flour, equal to 23,809.0 metric tons, was sold to Czechoslovakia. This flour was sold on credit, and notes to the extent of \$2,873,238.25 were obtained by the Grain Corporation and turned over to the United States Treasury.

The Act of Congress provided only for the sale of this flour f.o.b. American ports and made no provision for its overseas transportation. Czechoslovakia had no shipping of its own and was not in a position to pay the costs of transportation at that time. The American Relief Administration undertook negotiations with the United Kingdom which resulted in their granting credits to cover the freight and insurance on this flour. These freight and other charges amounted to approximately \$952,362.08, for which the British Government accepted Czechoslovakian notes.

#### TOTAL DELIVERIES

As shown in Table 78 (details in Table 236, Appendix), the total deliveries of relief supplies to Czechoslovakia during the period from 1919 to 1922 amounted to 545,134.6 metric tons, with a total value of \$115,438,351.98. Of this amount, \$82,925,123.12, or 71.8 per cent, represented sales on credit; \$26,980,958.95, or 23.4 per cent, represented sales for cash; and \$5,532,269.91, or 4.8 per cent of the total, constituted gifts from public and private benevolence. The officials of the Czechoslovakian Government have given evidence on many occasions of their appreciation of the help rendered during the dark and distressing days which followed the birth of this new Republic.

## THE FREE CITY OF DANZIG

(Appendix Tables 280-289)

### RECONSTRUCTION PERIOD

The Free City of Danzig was established by the Treaty of Versailles. Danzig, which before the war was a part of Germany, was made a free city by the treaty as a compromise between the claims by Poland for an outlet to the sea and the opposition of the German inhabitants to become a part of Poland. The Free City of Danzig comprises an area of about 754 square miles and a total population of 386,000, most of which is concentrated in the city of Danzig and its environs. The Free City is, of course, not self-supporting and must import the major portion of its food supplies from its neighbors or from overseas through its very excellent port.

Like other sections of Europe the food situation was extremely bad in Danzig territory after the Armistice. At that time a separate government had not been created, and it was necessary to provide food for the Danzig population through one of the other nations. A portion of the relief food delivered to Poland during the Armistice Period was used in Danzig, but since this was all credited to Poland it is impossible to set up any separate statement of the Danzig deliveries.

The port of Danzig was used almost exclusively as the gateway through which Polish food moved. It was of importance to Poland, therefore, that the Danzig people should be taken care of, and she assumed that responsibility.

### CHILDREN'S RELIEF

No special provisions were made for Danzig child feeding by the European's Children's Fund at the beginning of their operations after the Armistice Period. Instead, the American Friends Service Committee, which was operating in Germany, assumed responsibility for the Danzig territory also. They continued to care for undernourished children in this region until April, 1921, and during this time were feeding about 3,000 children. As shown in Table 79 (page 174), the Friends delivered during this period a total of 158.3 metric tons of child feeding supplies, valued at \$30,291.26.

In the spring of 1921 an acute situation developed in Poland due to the refugees from the Bolshevik invasion. The European Children's Fund had no money which could be used for adult relief and, in order to take care of the Polish situation, it was proposed by the Friends that the E.C.F. take over the Danzig child feeding and thus free the Quakers' funds for refugee relief in Poland. This was agreed to and the European Children's Fund took over this work on April 11, 1921.

In taking over this work the E.C.F. undertook to reimburse the Friends for the child-feeding supplies they had used in Danzig. In order to do this they turned over to the Friends 633.0 metric tons of cottonseed meal, which the Friends delivered to Poland.<sup>1</sup> In the present report the American Friends Service Committee is given credit for the child-feeding supplies used in Danzig and for the cottonseed meal for Poland, while the E.C.F. is credited with a donation of \$30,291.26 to the Friends, under Special Programs. This is in accordance with the way these transactions have been handled in the accounts.

A careful physical examination of Danzig children in the spring of 1921 indicated that there were many who needed relief but who were not being reached by the program in effect. By July, 1921, the number of children fed had been increased to 7,274, in addition to a small amount of feeding in schools by the local organization for which the E.C.F. furnished the supplies.

Danzig child feeding was continued until April, 1922, when the E.C.F. withdrew. During the year in which they operated in Danzig, the E.C.F. furnished 108.0 metric tons of foodstuffs, valued at \$17,749.51. To this the Free City of Danzig added 74.0 tons of flour and sugar worth \$8,574.44. The total number of meals furnished to Danzig children was 957,374.

The Free City of Danzig co-operated liberally in this relief work and, in addition to the

<sup>1</sup> See discussion under Special Programs, page 109, and also under American Friends Service Committee, page 120.

supplies furnished as noted above, it assumed all expenses of distribution and maintenance of kitchens, as well as donations of vegetables and other commodities to local feeding stations. It has been estimated that the value of these services and commodities aside from those accounted for in Table 79 would have amounted to \$5,758.

The total children's relief for the Free City of Danzig amounted to 340.3 metric tons, with a total value of \$56,615.21. The detail of the arrivals and of the internal distribution of these supplies is shown in Tables 280-289.

TABLE 79

SUMMARY OF TOTAL RELIEF DELIVERIES TO THE FREE CITY OF DANZIG

(For detail see table 280)

Operation	Total Metric Tons	Total Value
Reconstruction Period		
American Friends Service Committee .....	158.3	\$ 30,291.26
European Children's Fund.....	108.0	17,749.51
Donation from the Free City of Danzig .....	74.0	8,574.44
Total children's relief.....	340.3	\$ 56,615.21
A.R.A. Warehouses (food drafts and bulk sales).....	232.9	71,085.48
Grand total relief deliveries.	573.2	\$127,700.69

## OTHER RELIEF

In addition to the children's relief work, the American Relief Administration maintained a warehouse in Danzig through which a relatively large volume of relief, both as food drafts and as bulk sales, was supplied.

The total volume of food drafts and bulk sales for the Free City of Danzig was 232.9 metric tons, valued at \$71,085.48. These were divided as follows:

Operation	Metric Tons	Total Value
Food drafts .....	63.6	\$25,920.00
Bulk sales .....	169.3	45,165.48
Total .....	232.9	\$71,085.48

In addition to the above-listed bulk sales for the Free City of Danzig, the Danzig warehouse handled sales to the Government of Poland totaling 7,720.3 metric tons, valued at \$864,562.40 (cf. Table 394, Poland, and page 231).

Included in the bulk sales and food drafts for the Free City of Danzig are the purchases by the Commonwealth Fund, totaling \$14,752.84, for intelligentsia relief discussed under Special Programs. Bulk sale purchases by the Jewish Joint Distribution Committee and other charitable organizations accounted for most of the remaining supplies furnished from the A.R.A.W. operations.

Although the A.R.A.W. operations represented cash sales so far as the A.R.A. was concerned, the commodities for the most part were donated as gifts to the Danzig people by the purchasers. From this standpoint, therefore, the whole of the Free City of Danzig operations, with the exception of the government donation, may be regarded as benevolence, giving the following division:

Sold for cash .....	\$ 8,574.44
Benevolence .....	119,126.25
Total .....	\$127,700.69

## DENMARK

(Appendix Tables 290-291)

### ARMISTICE PERIOD

In March, 1919, the supplies of grain in Denmark reached a dangerously low level, and the Danish Government appealed to the Director General of Relief for assistance. Inasmuch as the American Relief Administration was using Copenhagen as a storage port for certain supplies intended for the north Baltic countries, it was considered advisable to deliver sufficient supplies to provide against suffering by the Danish population. Accordingly, arrangements were made by which the Danish Government purchased 10,000 tons of rye grain for cash.

In the latter part of April, the cereal situation became serious in Finland, and, since the American Relief Administration had no near-by cargoes, Mr. Hoover appealed to the Danish Government to help out the situation by furnishing 10,000 tons of barley to Finland (cf. page 183). The American Relief Administration promised to replace this barley to Denmark at

an early date;<sup>1</sup> consequently, the cargo of barley of 9,912.0 metric tons on the S.S. "Talabot" was delivered to Denmark in the latter part of May. In reality, this transaction represented an advance delivery of American supplies to Finland, but is treated here as a separate transaction.

The total deliveries of rye and barley grain to Denmark during the Armistice Period, as shown in Tables 290-291, amounted to 19,912.0 metric tons, with a total value of \$2,147,059.30. This was entirely a cash transaction.

Food conditions in Denmark were never such as to require any other assistance from the relief organizations. Like other countries of Europe, Denmark suffered during the Reconstruction Period but was always able to take care of her own people.

<sup>1</sup> At the request of the Director General of Relief, Denmark also furnished 1,989 tons of barley and oats seed grain to Esthonia in May, 1919. Denmark was paid for this in cash. (See pages 177-78.)

## ESTHONIA

(Appendix Tables 292-305)

### ARMISTICE PERIOD

The western edge of Russia where it formerly bordered on the Baltic Sea and the Gulf of Finland is fringed by a series of new independent countries which arose as a result of the Russian debacle. This territory, crossed and recrossed by the German and Russian armies, suffered untold miseries during the war. Following the Armistice three provisional governments, Esthonia, Latvia, and Lithuania, were formed from this territory.

Esthonia, the smallest of the three Baltic countries, has an area of 18,358 square miles and possesses a population of about 1,100,000 people. Approximately 50 per cent of the population are engaged in agriculture, of which dairying and grain and flax raising form important parts.

Following the Russian revolution the country had been occupied by German troops. When they withdrew after the Armistice, they took with them almost all readily movable goods, including agricultural machinery, live stock, etc. A provisional government was formed immediately after the Armistice and by February, 1919, they had succeeded in driving out the Bolshevik troops which had attempted to occupy the country. In this process, however, still more food supplies had been carried away by the retreating army.

In response to reports of the deplorable conditions in these countries, Mr. Hoover sent representatives of the American Relief Administration to the Baltic states. Arriving in Reval (Tallin), Esthonia, on April 19, 1919, the A.R.A. representatives found that conditions were even worse than had been reported. This was true not only in the cities, but in the outlying districts as well. The population had existed during the winter chiefly on a meager supply of potatoes which the invading armies had left. These were now practically exhausted and the de facto government, with a worthless currency, dismantled industrial plants, and without seed for the spring planting, was facing a serious situation.

On the receipt of a report on the conditions in this country, Mr. Hoover immediately arranged a relief program for Esthonia of approximately 5,000 tons of food per month to be sold to Esthonia on credit and paid for out of the Congressional Appropriations for Relief. Deliveries were begun immediately from A.R.A. stocks in store in Copenhagen and from supplies purchased from the U.S. Liquidation Commission in France. Later on, cargoes direct from the United States were directed to Reval. Table 80 shows that under the Congressional Appropriation a total of 21,129.9 metric tons of foodstuffs were furnished to Esthonia, with a total value of \$4,299,650.87. Table 293 shows the detail of these deliveries by steamers and source of supplies. In addition to these deliveries, the A.R.A. sold to the Esthonian Government 862.0 tons of rye grain for which they paid \$116,371.62 in cash (cf. Table 294). This grain was urgently needed to provide for the spring planting. The commodities furnished to the Esthonian Government by the A.R.A. during the Armistice Period may be summarized as follows:

Commodity	Total Metric Tons
Flour .....	15,649.9
Grain .....	5,328.5*
Rice .....	91.6
Pork products .....	725.3
Milk .....	127.5
Sugar .....	55.0
Prunes .....	14.1
Total .....	21,991.9*

\* Included 862.0 tons sold for cash.

At Mr. Hoover's request the U.S. Liquidation Commission sold to Esthonia on credit 30,120.0 metric tons of supplies, including 26,000 tons of miscellaneous food, and 4,120.0 tons principally clothing, for \$12,262,818.99. Esthonia had no means of transporting these supplies from the French ports where they were located, and the A.R.A. undertook to transport 2,020.4 tons of pork products on which the freight and insurance charges amounted to \$151,113.05 (cf. Table 144 for details). This was paid for from the Con-

gressional Appropriation for Relief and was covered by notes from the Esthonian Government.

The American Red Cross had accumulated certain medical and hospital supplies in New York in 1919, a portion of which were needed in Esthonia. The A.R.A. undertook to transport 312.3 tons of these supplies to Esthonia, on which the freight and other charges amounted to \$50,490.02. This freight charge was paid for from the Congressional Appropriation as a gift to Esthonia from the American people. The Red Cross supplies, valued at \$89,800.00, also constituted a benevolent donation by that organization.

Early in February, 1919, the United Kingdom had undertaken to afford some relief to Esthonia and had negotiated the sale of certain food-stuffs in return for Esthonian flax. Under this arrangement approximately 1,000 tons of herring, a quantity of salt, and 600 tons of wheat were delivered and paid for in flax. The estimated value of these shipments was \$500,000, representing a cash transaction.

The United Kingdom also made certain grants to Esthonia from the British Relief Fund, from which three cargoes, the "Baltonia," "Kajax," and the "George Fisher," carried 5,574.0 tons of relief supplies, valued at \$1,003,000. This, together with the deliveries ex-stock, made a total of 6,274.0 tons, valued at \$1,532,960, which was sold to Esthonia on credit. As shown in Table 295, the total relief deliveries to Esthonia by Great Britain during the Armistice Period amounted to 8,624.0 metric tons, worth \$2,032,960.

In addition to these deliveries of commodities, the United Kingdom financed the movement of a large portion of the supplies sold to Esthonia by the U.S. Liquidation Commission. The total value of the freight and other charges amounted to \$309,400, making the total British contribution to Esthonian relief \$2,342,360.

Under arrangements entered into between the A.R.A. and the Danish Government, the latter delivered to Esthonia 1,983.4 metric tons of barley and oats seed grain to the value of

TABLE 80  
SUMMARY OF TOTAL RELIEF DELIVERIES TO ESTHONIA  
(For detail see Table 292)

Operation	Total Metric Tons	Total Value
Armistice Period (Director General of Relief)		
A.R.A. (Congressional Appropriation) .....	21,129.9	\$ 4,299,650.87
A.R.A. (cash sales) .....	862.0	116,371.62
A.R.A. (freight finance) .....	.....	201,603.07
U.S. Liquidation Commission .....	30,120.0	12,262,818.99
American Red Cross .....	312.3	89,800.00
Total from the United States .....	52,424.2	\$16,970,244.55
United Kingdom (commodities) .....	8,624.0	\$ 2,032,960.00
United Kingdom (freight finance) .....	.....	309,400.00
Denmark .....	462.6	35,207.92
Total from other countries .....	9,086.6	\$ 2,377,567.92
Total relief, Armistice Period .....	61,510.8	\$19,347,812.47
Reconstruction Period		
A.R.A. (Congressional Appropriation) .....	2,029.9	\$ 701,520.82
European Children's Fund .....	1,831.3	522,929.39
Esthonian Government donation .....	1,693.0	298,444.64
Total children's relief .....	5,554.2	\$ 1,522,894.85
A.R.A. Warehouses (bulk sales) .....	293.5	146,556.24
Total relief, Reconstruction Period .....	5,847.7	\$ 1,669,451.09
Grand total relief deliveries .....	67,358.5	\$21,017,263.56

\$150,955.90. In part settlement for this delivery, the Government of Esthonia made a cash payment to the Danish Government of the equivalent of \$35,207.92, representing the value of 462.6 metric tons of grain. This represents a cash sale to Esthonia by Denmark, but the A.R.A. paid the Danish Government for the balance of this cargo and charged the amount to Esthonia as part of the deliveries under the Congressional Appropriation.

Small amounts of supplies were delivered to Esthonia during the Armistice Period by Finland and Sweden, but on account of the incompleteness of the record these are not included in the tables.

The total relief deliveries to Esthonia during the Armistice Period, exclusive of children's relief, amounted to 61,510.8 metric tons, valued at \$19,347,812.47. This may be divided as follows according to the basis upon which it was delivered:

Sold for cash .....	\$ 651,579.54
Delivered on credit .....	18,555,942.91
Benevolence .....	140,290.02
Total .....	\$19,347,812.47

## RECONSTRUCTION PERIOD

### CHILDREN'S RELIEF

The relief work in Esthonia and the other Baltic countries did not get started until after similar work had been well organized in most of the Central European countries. Shortly after the arrival of the A.R.A. representatives, a preliminary survey was made which showed the urgent need for some special relief for the children. A central committee on child feeding was formed in Reval known as the Esthonian Children's Relief Association. Later on, the Esthonian legislature passed a law making this one of the permanent government departments.

The A.R.A. prepared a preliminary child-feeding program, designed to furnish one meal a day to about 20,000 children for three months. As in the other countries, this soon proved inadequate, and a second program nearly twice as large as the first was prepared. Later, a third program was planned to continue the child-feeding work until the end of 1919. These three programs as originally outlined were as follows:

### CHILDREN'S RELIEF PROGRAMS

Commodity	(Metric Tons)			Total
	First	Second	Third	
Wheat flour .....	90	120	60	270
Rice .....	10	55	40	105
Beans and peas .....	10	40	40	90
Pork products .....	12	17	20	49
Milk .....	60	85	240	385
Sugar .....	40	55	80	175
Cocoa .....	20	40	40	100
Total .....	242	412	520	1,174

Even these programs proved quite inadequate, and before the close of the official relief work in 1919 the Esthonian Government offered to donate relatively large amounts of flour and other commodities for this work if the A.R.A. would increase its contribution of milk and certain other commodities. As a result, the total deliveries for Esthonian child feeding by the A.R.A. were nearly double the amount originally planned in the child-feeding programs. As shown by Table 80, these deliveries totaled 2,029.9 metric tons, valued at \$701,520.82, all of which was paid for from the Congressional Appropriation for Relief as a gift to Esthonian children from the United States Government.

The European Children's Fund took over the distribution of the children's relief supplies in August, 1919, and continued that work until June, 1920. With the coming of the 1920 harvest it was believed that Esthonia would be able to take care of her own food supply. The records of the Government Health Office showed that child mortality, which had been constantly increasing since 1914, began to decline in the fall of 1919 and by the middle of 1920 had almost reached normal. The E.C.F. therefore closed its operations, leaving sufficient food in the hands of the local organization to continue the feeding until the fall of 1920.

However, the 1920 harvest again proved to be short of requirements, and by December it was seen that supplies would not last through the winter. An investigation made in January, 1921, disclosed great need among the children. This condition was aggravated by the large number of Russian refugees which pressed into Esthonia from areas to the east. It was estimated some 43,000 children would need to receive supplementary feeding during the winter and spring. Consequently, a new program for the feeding of this number was undertaken in February, 1921,

and continued until August, 1922. After August, 1921, the amount of feeding was greatly reduced.

As shown in Table 80 the total children's relief delivered to Esthonia amounted to 5,554.2 metric tons, valued at \$1,522,894.85. Of this amount, the A.R.A. furnished 2,029.9 tons, valued at \$701,520.82; the E.C.F. furnished 1,831.3 tons worth \$522,929.39; while the donations by the Esthonian Government totaled 1,693.0 tons, valued at \$298,444.64.

The commodities delivered from each of these sources is shown in Table 292 and may be summarized as follows:

ESTHONIAN CHILDREN'S RELIEF DELIVERIES  
(Metric Tons)

Commodity	A.R.A. Congressional Appropriation	E.C.F.	Esthonian Government Donation	Total
Flour .....	288.0	551.3	1,504.0	2,343.3
Rice .....	250.1	266.7	15.0	531.8
Beans and peas....	222.4	225.1	.....	447.5
Pork products ....	61.6	169.0	1.0	231.6
Milk .....	787.7	408.0	153.0	1,348.7
Cocoa .....	104.4	39.4	.....	143.8
Sugar .....	284.6	104.6	10.0	399.2
Miscellaneous foods. ....	.....	.....	10.0	10.0
Soap .....	31.1	7.3	.....	38.4
Clothing .....	.....	59.9	.....	59.9
Total.....	2,029.9	1,831.3	1,693.0	5,554.2

Tables 297-301 show the arrival of these supplies by steamer and source, while Tables 304-305 show the internal deliveries of clothing by committees, and of child-feeding supplies by kitchens or districts, by months, as compiled from the local committee receipts.

The method of child feeding was to furnish a supplementary meal daily, including Sunday, to all undernourished children. Children over six years were fed in public kitchens, while the younger children were fed in their homes. During December, 1919, and January, 1920, about 1,700 Russian refugee children in camps near the Esthonian border were fed two meals a day. The maximum number of children for whom supplies were provided at any one time was 84,000. It is estimated that the total number of meals provided was 35,935,350.

The Esthonian winters are particularly cold, and in the early days of the operation it was found that many children suffered severely in making the daily trip from their homes to the feeding kitchens. Many of them came in oddly

assorted outfits, coats belonging to older relatives, shawls, blankets, boots many sizes too large, etc. On November 3, 1919, it was decided that in addition to the food program the E.C.F. would supply shoes, stockings, and cloth for heavy coats for some 40,000 Esthonian children. As shown in Table 299, there were 59.9 metric tons of shoes and clothing materials delivered to Esthonia. The detail of the internal distribution of these supplies is shown in Table 304. The total supplies furnished may be summarized as follows:

CLOTHING DELIVERIES FOR ESTHONIAN CHILDREN

Commodity	Quantity
Shoes .....	50,012 pairs
Shoe laces.....	41,840 pairs
Stockings .....	52,426 pairs
Woolens .....	60,638 yards
Thread .....	6,799 spools
Needles .....	35,000 number
Buttons .....	139,600 number
Total (metric tons).....	59.9

The Esthonian Government co-operated in the children's relief work in every way possible. In addition to the commodities donated for this work, the Esthonian Government undertook to furnish storage and transportation for all supplies and the expenses incurred in handling the feeding operations. District and local committees were composed entirely of volunteers, as was much of the service in the kitchens. It has been estimated by those in charge of the Esthonian child feeding that these intangible contributions amounted to approximately \$432,632. These may be divided as follows:

ESTHONIAN CONTRIBUTIONS\* TO CHILDREN'S RELIEF

Rail transportation .....	\$ 23,086.00
Warehousing and handling.....	14,399.00
Administration expense .....	21,556.00
Kitchen expense .....	49,522.00
Paid personnel .....	45,071.00
Volunteer services .....	278,998.00
Total .....	\$432,632.00
Commodity donations (Table 80).....	298,444.64
Grand total .....	\$731,076.64

\* In addition to these contributions toward the relief of its own people, Esthonia also furnished warehouse facilities valued at \$1,102.94 in connection with relief deliveries to Soviet Russia in 1922. (See page 263.)

## OTHER RELIEF

No food drafts were sold for delivery in Esthonia, but certain small bulk sales were made to organizations engaged in Esthonian relief. Table 80 shows that the total bulk sales were 293.5 metric tons, valued at \$146,556.24. The detail of these sales is shown in Table 303. Of the total, approximately 10 tons were sold for student feeding at Dorpat (Tartu) University (see Special Programs), while the remainder was sold to the British Quaker organization, the Friends Emergency and War Victims Relief Committee.

The total relief supplied to Esthonia during the Armistice and Reconstruction periods, as summarized in Table 80, amounted to 67,358.5 metric tons, valued at \$21,017,263.56. Segregated according to the basis on which the supplies were furnished, this relief may be summarized as follows:

Sold for cash.....	\$ 950,024.18
Delivered on credit.....	18,555,942.91
Benevolence .....	1,511,296.47
Total .....	<hr/> \$21,017,263.56

## FINLAND

(Appendix Tables 306-319)

### ARMISTICE PERIOD

Finland, geographically isolated in the north-west section of Europe, had suffered relatively much less than other liberated territories. She had been subject to no direct invasion by the German Army, nor had Bolshevist military forces been able to penetrate more than a short distance into her territory. She had, however, not wholly escaped. During the later years of the war she suffered a food shortage because of the growing disorganization in Russia, and in 1918 Finland was the scene of a short but devastating civil war between the Reds, supported by the Russian Bolsheviks, and the Whites, aided by the German forces of General von der Goltz.

The population of Finland was approximately 3,275,000, of whom about 50 per cent were engaged in agriculture. Her total area is some 82,000,000 acres, but less than 5 per cent of this is under cultivation. The people live to a large extent upon fish, but have to depend upon outside sources for from one-fourth to one-third of their cereal supply. The average pre-war net imports of cereals and potatoes amounted to about 650,000 metric tons. To a very large extent, this had been cut off during the war. At the time of the signing of the Armistice, the situation in Finland with regard to breadstuffs was very serious. There had already been much suffering and, if outside supplies had not been available, there would have been actual starvation before spring.

A survey of the food situation showed that, while undoubtedly the want in the cities was great, it was not so severe as in the timberlands of the eastern and northeastern districts.

Finland had to her credit several million dol-

lars deposited in the National City Bank in New York before the Russian revolution. However, there was no way in which this money could be drawn until there was some recognition of the new Finnish Government. The United States and England recognized the de facto Government of Finland in May, 1919, but until this time their American credits were useless.

The emergency caused by this situation was taken care of by the A.R.A. Early in January, wheat and cereal flour and some fats were sold on credit to Finland from Rotterdam stocks. Finland had sufficient shipping of her own, which was sent to Rotterdam and transported these supplies to Finnish ports. In all, 23,244.8 metric tons were delivered to Finland at Rotterdam.

At about the same time arrangements were made to ship cereal supplies from United States ports direct to Finland. Finland had her own flour mills, which were well distributed in the various provinces. A considerable saving was therefore effected by shipping unmilled rye grain to them. In all, nineteen ships, carrying 103,039.0 tons of rye and barley grain, were discharged at Finnish ports. (See Tables 81 and 306).

Nearly 23,000 tons of food were sold to Finland from Copenhagen stocks, and a small amount from the stores at Danzig. A total of 166,842.7 tons of food, valued at \$25,853,991.86, were delivered to the Government of Finland by the A.R.A. These were all sold on credit, but later a considerable portion was paid for from the Finnish credits in America. Supplies to the value of \$9,849,587.73 were paid for from the Congressional Appropriation for Relief. Obliga-

#### AMERICAN RELIEF ADMINISTRATION DELIVERIES TO THE GOVERNMENT OF FINLAND DURING THE ARMISTICE PERIOD

Port of Delivery	Congressional Appropriation		Cash Sales		Total

\* Helsingfors, Hango, Abo, and Mantyluoto.

tions were obtained from the Finnish Government to repay this amount to the United States at a later date. The total operation with Finland was on a credit basis, but a portion of this debt, amounting to \$16,004,404.13, was discharged prior to the close of the relief work.

The tabulation on page 181 summarizes the deliveries of relief supplies to the Government of Finland by the A.R.A. by ports of delivery. The detail of these arrivals by steamers and by commodities will be found in Tables 307 and 308.

As indicated above, Finland's greatest need was for cereal supplies and these made up the great bulk of the commodities furnished by the A.R.A. The tabulation to the right summarizes these deliveries, the details of which are shown in the tables cited above.

In addition to the deliveries to Finland by the A.R.A. in the Armistice Period, the American Red Cross collected a quantity of clothing in New York, a portion of which they wished to send to Finland because of the suffering reported there. The A.R.A. undertook to transport 282 tons of this clothing on the "Lake Hemlock,"

which arrived at Hango on July 12, 1919. The estimated value of this clothing was \$56,400.00, and cost for freight and other charges amounted to \$22,584.24. The A.R.A. charged this freight cost against the Congressional Appropriation for Relief as a gift from the United States to the Finnish people. The Red Cross of course donated the clothing.

#### SUMMARY OF AMERICAN RELIEF ADMINISTRATION DELIVERIES TO FINLAND

E.C.F.—Purchased by local committee * .....	350.1	37,662.13
Government donation (Finland) .....	936.4	195,949.00
Total deliveries, Reconstruction Period .....	3,487.2	\$ 1,109,991.80
Grand total relief deliveries .....	188,520.9	\$30,282,047.90

\* This transaction represents, in a sense, a duplication in value. The A.R.A. had shipped cocoa, sugar, and milk to Finland in excess of the requirements for these commodities, and they authorized the local committee to dispose of these supplies (112.2 metric tons, valued at \$37,662.13—E.C.F. sale in local market) and replace them by an equivalent value of flour.

relief to Finland during both the Armistice and Reconstruction Periods. This table shows that the total deliveries to Finland from the United States during the Armistice Period amounted to 167,124.7 metric tons with a total value of \$25,932,976.10.

Under the direction of the Director General of Relief, supplies were furnished to Finland from certain other countries. Thus, 3,467.0 metric tons of beans, rice, milk, sugar, and miscellaneous foods were sent to Finland from Great Britain in return for cash payments. These transactions were handled by private English firms at the solicitation of the Director General of Relief in order to meet urgent needs.

The delivery of 4,442.0 tons of rice and pulses from Norway in March, 1919, represents a cash transaction similar to that carried out by British exporters referred to above. The delivery of 10,000.0 tons of barley by Denmark represents a transaction carried out at the urgent request of Mr. Hoover in order to tide over an acute food shortage in Finland in March, 1919. Denmark herself had no surplus food, and she undertook this delivery only after the specific promise that it would be replaced by a later cargo of grain from the United States. This was done by the cargo of the S.S. "Talabot," which arrived in Copenhagen May 29, 1919. This later transaction in reality represents an advance delivery to Finland by the United States.

As shown in Table 81 the total relief deliveries to Finland during the Armistice Period by countries other than the United States amounted to 17,909.0 metric tons with a value of \$3,239,080.00. The grand total of all relief delivered during this period under the direction of the Director General of Relief, exclusive of children's relief, amounted to 185,033.7 metric tons, valued at \$29,172,056.10. The detail of these deliveries is shown in Table 306 and supporting tables.

## RECONSTRUCTION PERIOD

### CHILDREN'S RELIEF

It was always difficult in any country to obtain accurate information on the number of children who actually required relief. This difficulty was especially marked in Finland because so large a proportion of the worst distress was in the timberlands of the eastern and north-

eastern districts where distances are great and the means of travel limited. There was also a large amount of suffering in the industrial cities. A survey of conditions in Finland was made by the A.R.A. in February, 1919, and it was estimated that 50,000 children were in need of relief which could not be supplied from native sources. On this basis it was decided to include Finland in the list of countries to which children's relief should be furnished. The first children's relief program was based on the needs of 50,000 children until the next harvest, but it was soon found that this was inadequate, and a second program was arranged to supplement the first. A third program was prepared before the close of the A.R.A. which was designed to continue the child-feeding work until the end of 1919 under the direction of the European Children's Fund. These three programs as originally prepared were as follows:

#### AMERICAN RELIEF ADMINISTRATION—CHILDREN'S RELIEF PROGRAMS FOR FINLAND (Metric Tons)

Commodity	First	Second	Third	Total
Wheat flour .....	670	310	150*	1,130
Rice .....	75	125	100*	300

Cocoa .....	40	...	100	140
Total .....	1,185	860	1,300	3,345

\* To be furnished by Finland.

The actual allocation of supplies varied somewhat from these programs, and of the supplies actually delivered to Finland it was found necessary to exchange certain items for others which were more suitable. For example, it was found that the Finnish people were totally unaccustomed to cocoa, which formed an important part of the child-feeding ration in other territory. As a result, certain of these commodities were exchanged through a local committee for flour which was needed to balance the ration. Also, it was found that conditions improved more rapidly than had been anticipated, and at a later time it was possible to transfer certain child-feeding supplies from Finland to Esthonia and to Northwest Russia where they were more urgently needed. However, in order to balance the child-feeding supplies in Finland the Euro-

SUMMARY OF CHILD FEEDING COMMODITY OPERATIONS BY A.R.A. AND E.C.F. IN FINLAND  
(Metric Tons)

Total value .....	\$696,412.22	\$216,205.33	\$912,617.55	\$37,662.13	\$36,236.88	\$838,718.54

pean Children's Fund furnished 35.4 metric tons of food and also 56.0 tons of clothing. A summary of these transactions by commodities is shown in the preceding tabulation.

In return for the 112.2 metric tons of supplies turned over to the local Finnish committee they furnished 350.1 metric tons of wheat flour which was the equivalent value of the foodstuffs turned over to them, viz., \$37,662.13. The total tonnage and value of the children's relief supplies furnished by the American Relief Administration and the European Children's Fund should therefore be increased by these amounts, making a total of 2,438.6 metric tons with a value of \$876,380.67.

The Government of Finland co-operated wholeheartedly in these child-feeding operations. For a number of years there had been organized societies in Finland whose purpose it was to look after the welfare of children. Early in 1919 the government organized the Central Children's Relief Committee of Finland under the direction of Professor Robert Tigerstedt, an eminent physiologist. The committee functioned very efficiently, and among other things made possible the difficult task of getting relief to the suffering children in isolated districts. As shown in Table 81 (cf. also Table 306), the Government of Finland made substantial donations of commodities for the child-feeding work. The total of these commodity donations amounted to 936.4 metric tons, chiefly flour, with a value of \$195,949.

In addition to these tangible donations, the Finnish Government and people made substan-

tial contributions of services and facilities for which no exact accounting can be rendered. It was estimated by those in charge of the relief work in Finland that these intangible contributions, exclusive of many local services, would have cost approximately \$685,000. These may be summarized as follows:

Shipping, transportation, and handling costs .....	\$ 70,570.00
Administration and distribution costs..	39,870.00
Establishment and maintenance of school kitchens .....	293,880.00
Volunteer services (700 volunteers)...	280,000.00
Total .....	\$684,320.00

Child-feeding operations in Finland were begun in March, 1919. In the first month, approximately 19,000 children were receiving rations. This number was gradually increased until the maximum number of 127,770 was reached in January, 1920. From this time on conditions improved, and the number was gradually reduced until June, 1920, when the European Children's Fund withdrew from Finland. Altogether, approximately 35,000,000 meals, averaging about 600 calories each, were provided through this relief. The detail of the internal deliveries of all child-feeding supplies in Finland, by districts and kitchens, as shown by the receipts, is given in Tables 316 to 318.

In addition, it was found imperative to provide some assistance in the form of warm clothing in this rigorous climate if the health of the children was to be preserved. Altogether, 56.0 metric tons of clothing material was supplied

which was sufficient for more than 40,000 outfits, each consisting of material for one heavy coat, pants or dress, one pair of stockings, and one pair of boots. The detail of the distribution of this clothing is given in Table 319.

As shown in Table 81, the net grand total of all relief deliveries to Finland during both the Armistice and Reconstruction periods amounted to 188,520.9 metric tons with a total

value of \$30,282,047.90. Divided according to the method on which these supplies were furnished to Finland, these may be summarized as follows:

Sold for cash.....	\$18,335,395.26
Delivered on credit .....	10,991,287.73
Benevolence .....	955,364.91
Total .....	<hr/> \$30,282,047.90

# FRANCE

(Appendix Tables 320-322)

## C.R.B. PERIOD

The tragic fate of Belgium in the early days of the war was shared equally by the northern provinces of France, which were invaded early in September, 1914, by the German Army and were occupied continually for more than four years. As soon as the Commission for Relief in Belgium had organized its work in that country, it was found necessary to extend it to these provinces of Northern France. This extension of the Commission's activities occurred in March, 1915, and at that time there was formed an organization known as "The Comité d'Alimentation du Nord de la France," also called the "Comité Français," which was responsible, under the direction of the Commission for Relief in Belgium, for the internal administration of relief in occupied sections of France.

The invaded area in Northern France for which relief was supplied comprised six districts, with 2,133 communes having a total area of 8,100 square miles and 1,794,506 in population. The administration of relief in this area was similar to that in Belgium and has been described in many publications of the Commission for Relief in Belgium.<sup>1</sup>

As shown in Tables 82 and 320, summarized from Mr. Gay's report, the *Statistical Review of Relief Operations* of the C.R.B., there was a total of 1,091,580.0 metric tons of relief supplies furnished to the invaded districts of Northern France during the five years that the Commission operated. The total value of these supplies was \$220,203,521.62, of which the French Government paid \$110,681,443.43. Of the remainder, \$104,572,409.90 may be regarded as paid from credit extended to France by the United States and Great Britain. The balance of \$4,949,668.29 represents relief supplies paid for from benevolent contributions.

The deliveries of relief supplies to the invaded districts of Northern France may be sum-

marized from Mr. Gay's report by years as follows:

## C.R.B. DELIVERIES TO NORTHERN FRANCE BY YEARS (Metric Tons)

	Total
Mar. 1, 1915, to Oct. 31, 1915 .....	129,195.0
Nov. 1, 1915, to Oct. 31, 1916 .....	373,000.0
Nov. 1, 1916, to Oct. 31, 1917 .....	191,501.0
Nov. 1, 1917, to Oct. 31, 1918 .....	289,383.0
Total to Armistice .....	983,079.0
Nov. 1, 1918, to Aug. 31, 1919 .....	108,501.0
Grand total .....	1,091,580.0

In addition to the deliveries to Northern France, the Commission also furnished 299.0 tons of relief supplies, valued at \$80,028.90, for French refugees in Holland, which included not only interned adults, but also children and French prisoners of war (cf. Table 103). These were paid for from benevolent contributions.

The total deliveries of relief commodities by the Commission for the French account therefore amounted to 1,091,879.0 metric tons, valued at \$220,283,550.52. These deliveries may be summarized by commodity groups as follows:

## COMMISSION FOR RELIEF IN BELGIUM DELIVERIES FOR THE FRENCH ACCOUNT, 1914-1919 (Metric Tons)

Commodity	Total
Flour .....	75,813.0
Grain .....	509,011.0
Rice .....	102,044.0
Beans and peas.....	49,329.0

Soap .....	24,639.0
Clothing and miscellaneous.....	18,373.0
Total .....	1,091,879.0

<sup>1</sup> See Bibliography, pages 989-90.

## U.S.F.A. PERIOD

With the entrance of the United States into the World War in April, 1917, one of the most important contributions expected by the Allied countries was additional food supplies. As discussed in an earlier section of this report (page 15), the United States Government began immediately to grant large loans to the Allies for the purchase of various commodities needed in the prosecution of the war, including foodstuffs. The duty of seeing that the Allied countries obtained the food supplies needed was delegated to Mr. Hoover as United States Food Administrator. Some of the difficulties encountered in this work have been outlined in previous sections of this report and in the publications there referred to (cf. page 16).

As summarized in Table 82 (page 188), a total of 6,781,317.6 metric tons of foodstuffs were furnished to France during the period from April, 1917, to the middle of 1919, all of which was financed by U.S. Treasury loans to France to the extent of \$850,715,632.84. These commodities were all sold f.o.b. American ports to the Allied buying organizations and no details as to their shipment or distribution are available. Table 320 shows the types of food commodities furnished and the quantities of each. These may be summarized as follows:

U.S. FOOD ADMINISTRATION DELIVERIES TO  
FRANCE, 1917-1919

Commodity	Total Metric Tons
Flour .....	1,738,079.8
Grain .....	1,549,746.1
Rice .....	104,589.9
Beans and peas .....	78,625.8
Pork products .....	264,290.4
Milk .....	235,657.7
Sugar .....	378,018.0
Miscellaneous food .....	389,594.7
Forage (oats) .....	2,042,715.2
Total .....	6,781,317.6

## ARMISTICE PERIOD

Table 82 (see also Table 320) shows that the American Relief Administration made a cash sale of 31,106.1 metric tons of flour to France for a total value of \$5,031,830.08. As explained elsewhere (pages 68-69), this transaction came

about because the U.S. Liquidation Commission (War Department) had sold this flour from surplus Army stocks in France to Esthonia. But because of the shortage of food supplies in France at that time, the French Government refused to permit this flour to be shipped out of the country. The A.R.A. solved this difficulty by agreeing to accept cash payment for this flour from France, and in turn undertaking to deliver an equivalent amount of food to Esthonia from the United States. The detail of the deliveries of this flour to France is shown in Table 322.

In closing out the operations of the American Expeditionary Forces the U.S. Liquidation Commission disposed of large quantities of supplies to France. A brief description of the work of the Liquidation Commission has been given in an earlier section (pages 52-55). It was pointed out there that specific commodities were sold on credit to the Government of France to the value of \$132,665,996.93 (Table 27), and that, in addition, a bulk sale of equipment of all kinds, with an estimated value of \$400,000,000.00, was turned over to France to offset French claims for supplies used by the American Army, claims for damages, etc. The total sales to France were thus in the neighborhood of \$533,000,000.00. But many of these commodities were in the nature of munitions, machinery, telephone lines, etc., which could not be considered relief supplies in the sense used in this report. Making a careful segregation of the foods, clothing, and miscellaneous items to be used for the relief of the French people, particularly in the devastated areas, we have included a total of 519,775.0 metric tons of supplies, valued at \$213,067,400.00, as the portion of these transactions which should be included and for the sale of which Mr. Hoover was in part responsible. The whole of this operation was a credit transaction.

One other item included in the Armistice Period deliveries to France has to do with relief to Russian prisoners of war held in Germany. France had assumed the responsibility of furnishing food to these prisoners pending their repatriation, but at the time of urgent need France did not have this food to spare. Mr. Hoover arranged to furnish 1,622.0 metric tons of supplies, valued at \$390,209.03, and paid for out of the President's National Security and Defense Fund. This was advanced as a loan to France and was later paid by the French Gov-

TABLE 82  
SUMMARY OF TOTAL RELIEF DELIVERIES TO FRANCE

Operation	Total Metric Tons	Total Value
C.R.B. Period		
C.R.B.—Northern France .....	1,091,580.0	\$ 220,203,521.62
C.R.B.—French Refugees in Holland.....	299.0	80,028.90
Total C.R.B. deliveries.....	1,091,879.0	\$ 220,283,550.52
U.S.F.A. Period		
U.S. Treasury Loans .....	6,781,317.6	\$ 850,715,632.84
Armistice Period		
A.R.A.—President's National Security and Defense Fund .....	1,622.0	\$ 390,209.03
A.R.A. (cash sales).....	31,106.1	5,031,830.08
U.S. Liquidation Commission.....	519,775.0	213,067,400.00
Total, Armistice Period.....	552,503.1	\$ 218,489,439.11
Grand total relief deliveries.....	8,425,699.7	\$1,289,488,622.47

ernment. This transaction, which forms part of the total relief to Russian prisoners of war from France, is included here as a delivery to France by the American Relief Administration and later under Sundry Accounts (page 269) as a delivery to the Russian prisoners. This duplication is deducted in arriving at the total relief furnished in the Armistice Period (Table 14).

Table 82 shows that the total deliveries to France from the beginning of the war in 1914 to the close of the Armistice Period, accounted for in this report, amounted to 8,425,699.7 metric tons, valued at \$1,289,488,622.47. Considering the basis upon which these supplies were

originally delivered, this may be divided as follows:

Sold for cash .....	\$ 5,031,830.08
Delivered on credit .....	1,279,427,095.20
Benevolence .....	5,029,697.19
Total .....	\$1,289,488,622.47

However, inasmuch as the French Government contributed \$110,681,443.43 toward the work of the Commission for Relief in Belgium, this would increase the deliveries for cash to \$115,713,273.51 and reduce the amount furnished on credit to \$1,168,745,651.77.

# GERMANY

(Appendix Tables 323-333)

## ARMISTICE PERIOD

### FOOD CONDITIONS IN 1919

In December, 1918, Mr. Hoover asked the Germans for a complete statement of their food situation as a preliminary to the furnishing of any supplies. A special commission was appointed by the Germans, which submitted a detailed report in January, 1919, showing their supplies for the three crop years 1916, 1917, and 1918, together with much other relevant data.

After the receipt of this report, Mr. Hoover sent a mission consisting of Dr. A. E. Taylor and Dr. Vernon Kellogg to Berlin and elsewhere in Germany to study the conditions and to determine as far as possible the accuracy of the data submitted. The results of this investigation showed that apparently the Germans had placed all their cards on the table, and that the statement of their requirements was approximately correct.

It is of interest to note that, in explaining certain discrepancies between the crop figures submitted and the official war-period returns for previous years, the Germans stated that the earlier crop returns had been systematically increased from 10 to 20 per cent to make it appear that Germany was self-supporting.

The data which were made available showed very clearly how great a part the food situation had played in the collapse of the German military régime. In the light of these figures it appears that the slogan, "Food will win the war," was not so far from the truth.

The accompanying table gives the approximate production of cereals in Germany for the years 1913 to 1918, inclusive. This shows that the total cereal production decreased from over 30,000,000 metric tons in 1913 to only 15,000,000 in 1917 and 16,500,000 in 1918. The average pre-war consumption of these four cereals in Germany was approximately 32,500,000 tons, of which on the average about 4,500,000 tons were

imported.<sup>1</sup> The principal import was barley, used for brewing purposes.

### APPROXIMATE PRODUCTION OF THE PRINCIPAL CEREALS IN GERMANY

	<i>(Thousand Metric Tons)</i>					
	1913	1914	1915	1916	1917	1918
Wheat . . . . .	4,656	3,972	3,886	3,288	2,386	2,590
Rye . . . . .	12,222	10,427	9,152	9,109	6,591	7,447
Barley . . . . .	3,673	3,138	2,484	2,797	2,003	2,085
Oats . . . . .	9,714	9,038	5,986	7,696	4,038	4,459
Total . . . . .	30,265	26,575	21,508	22,890	15,018	16,581

The pre-war consumption of bread grains (wheat and rye), including seed and those for industrial uses, was, according to German figures, approximately 16,850,000 tons. Of this amount, the average net imports supplied about 1,150,000 tons. Thus, on this showing Germany normally produced about 93 per cent of her required bread grains.

For the three years 1916, 1917, and 1918, the total production of wheat and rye was only 30,500,000 tons, or an average of 10,200,000 tons per year. This was only 60 per cent of her pre-war consumption. After deducting seed and the absolutely necessary industrial requirements, which would amount to approximately 2,000,000 tons, there were on the average only about 8,200,000 tons available for food. Calculating a ration of 12 kilograms per month for 70,000,000 persons would require for bread alone more than 10,000,000 tons.

During 1917-1918 and 1918-1919 the ration was reduced far below 12 kilograms per month. In 1918-1919 the rations may be taken as follows: for "self-producers," 9 kilograms of grain per month, while the regular ration for persons entitled to receive supplies was 260 grams of flour per day milled to 94 per cent extraction, equivalent to about 8½ kilograms of grain per month. From the data submitted by the Germans it is possible to determine the approxi-

<sup>1</sup> The 1913 crop was considerably above the average.

mate requirements for the year 1918-1919 as follows:

APPROXIMATE BREAD-GRAIN REQUIREMENT IN GERMANY  
FOR THE CROP YEAR BEGINNING AUGUST 15, 1918

	Metric Tons
16,000,000 self-producers at 9 kilograms per month .....	1,728,000
49,000,000 persons rationed at 8½ kilograms per month .....	4,900,000
Seed .....	1,400,000
Army and navy.....	1,000,000
Additional rations for heavy workers and other industrial classes.....	1,200,000
Industrial uses, dealers' stocks, and illicit trading .....	500,000
Total .....	10,728,000
Crop, less amount used previous to August 15, 1918 .....	9,520,000
Deficit .....	1,208,000

On this calculation, which represents almost the minimum requirement, Germany had a deficit of 1,208,000 tons of bread grains. The Germans argued that their people had been undernourished for so long that they should be given an increased ration. If the ration were to be raised to 12 kilograms per month after January, another million tons would be required. It was on this basis that they asked for 400,000 tons of breadstuffs per month, or a total of 2,400,000 tons. In view of the world food situation and the needs of the Allies and the liberated territories it was impossible to meet this demand and, consequently, this sort of ration had to be refused.

The Germans were worse off in regard to their supply of meats, and particularly of fats, than of cereals. Chart VIII, copied from a diagram submitted with the report of the Germans to Mr. Hoover, shows a comparison of the civilian rations in 1917-1918 with the consumption in 1912-1913.

Expressed in another way, the 1917-1918 ration shows the following percentages of the pre-war consumption:

	Percent- age
Cereal products .....	64
Meats .....	18
Fats .....	12

Thus, while the consumption of cereals was only 36 per cent less than normal, the consump-

tion of fats was reduced by 88 per cent. This reduction in fat consumption was due largely to the decline in the number of hogs and to the lack of imports. With the exception of hogs, Germany's supply of animals did not decrease as much during the war as might be expected.

CHART VIII

PER CAPITA YEARLY CONSUMPTION OF IMPORTANT  
FOODS IN GERMANY 1912-13 AND 1917-18

The decrease in the number of cattle in 1918 compared with 1913 was only a little over 11 per cent, but for swine the decrease was nearly 58 per cent, or if we take the low point in the hog supply in March, 1918, the decrease was almost 80 per cent of the pre-war number.

A comparison of the number of animals does not, however, give a true picture of the possible supply of meats and fats. The shortage in feeding stuffs (particularly concentrated feeds) had seriously reduced the weight per head. The following table, compiled from the report of the Germans, shows the extent of this reduction in the dressed weight per head.

	Average Pre-War Weight in Kilograms	Average Weight in Kilograms for First 9 Months of 1918	Percentage Decrease
Cattle .....	250	137	45
Calves .....	40	29	27
Swine .....	85	55	35
Sheep .....	22	17	22

Naturally, this decrease in weight per animal resulted in a very much greater decrease in the fat content.

The total pre-war annual consumption of all meats and animal fats in Germany may be taken as about 112 pounds per person, or say 3,300,000 metric tons. The imports of all meat products in 1912 were 440,000 metric tons, leaving for home production about 2,860,000 tons. The best estimate obtainable for the total annual meat production in Germany in 1918 and 1919 is less than 1,000,000 tons, or less than 33 per cent of their pre-war consumption.

Milk production also decreased, although the reduction in the number of milch cows was less than the reduction in other cattle. Between December, 1916, and December, 1918, the number of milch cows decreased from 9,502,000 to 8,782,000, a decrease of less than 8 per cent. But the lack of proper feed decreased the milk flow in very much greater proportion. In 1916 the average production per milch cow, per year, in Germany was 1,800 liters, or 475 gallons. In 1918 this had fallen to 1,300 liters, or 344 gallons, a decrease of about 28 per cent. On this basis the total milk production of the empire for the three years was as follows:

	Gallons
1916 .....	4,130,000,000
1917 .....	3,510,000,000
1918 .....	3,010,000,000

The serious reduction in the food supply was evident in the appearance of the German population. It was estimated that the population as a whole was 20 per cent under weight, and travelers in Germany after the Armistice say that this reduction was very evident to the eye.

Of far more importance than this was the reported increase in the death-rate and the increasing prevalence of constitutional diseases. This, according to the post-Armistice report of the Germans, was due to the lack of sufficient and proper food. The figures which they submitted in support of these claims were indeed

startling. The increase in the death-rate and the decrease in births is shown strikingly by the figures for the city of Berlin between 1913 and 1917, as follows:

Year	Per 1,000 Population		Excess of	
	Births	Deaths	Births	Deaths
1913 .....	19.6	13.5	6.1	...
1914 .....	18.5	14.6	3.9	...
1915 .....	16.5	15.2	1.3	...
1916 .....	12.6	15.1	...	2.5
1917 .....	10.1	19.6	...	9.5

Chart IX, copied from the German report, shows the absolute figures for births and deaths in Berlin for each year since 1913.

CHART IX  
BIRTHS AND DEATHS IN THE CITY OF BERLIN

The death-rate was highest in young children and in persons over sixty years of age. The death-rate in 1918 was even greater than in 1917, largely because of the influenza epidemic. In December, 1918, it was stated that on the average over 800 persons were dying daily in Germany because of undernourishment and the diseases resulting therefrom.

The chief cause of the increased death-rate, according to the German physicians, was the lowered resistance against infectious diseases, especially tuberculosis, caused by insufficient and improper food. Other causes were diseases of the alimentary canal, and such diseases as oedema, caused particularly by the lack of fats.

Chart X presents graphically some figures showing the increase in the death-rate from tuberculosis.

CHART X

TUBERCULOSIS DEATH RATE FOR 380 GERMAN CITIES OF OVER 15,000 INHABITANTS

#### THE ALLIED BLOCKADE

With a knowledge of these conditions Mr. Hoover urged the Allies to provide some arrangements by which Germany could secure the food she needed so badly.<sup>1</sup> Article XXVI of the Armistice Convention of November 11, 1918,<sup>2</sup> read as follows:

The existing blockade conditions set up by the Allied and Associated Powers are to remain unchanged, and all German merchant ships found at sea are to re-

main liable to capture. The Allies and United States contemplate the provisioning of Germany during the Armistice as shall be found necessary.

By this article the Allied and Associated Powers expressed their conviction that it was impossible to establish peace with a section of Europe in serious want of food, even though this section contained a powerful enemy. Quite apart from its political aspects, modern civilization could not permit actual, preventable starvation to take place.

On the other hand, the Allies were equally convinced that it was the first duty of the world to see that the food supply was assured to the liberated and Allied territories. If there was any food left, the question of feeding Germany should then be considered.

No move was made toward the provisioning of Germany until the Armistice Convention at Treves, on January 16, 1919. At this convention the Armistice was extended from January 17 to February 17, 1919. The Associated Governments stated that it must be regarded as a condition precedent to the importation of food into Germany that the German mercantile shipping should be placed at the disposal of the Associated Powers. Article VIII of this Armistice extension<sup>3</sup> stated that:

In order to secure the provisioning of Germany and of the rest of Europe, the German Government shall take all necessary steps to place the German fleet, for the duration of the Armistice, under the control and the flags of the Allied Powers and the United States, who shall be assisted by a German delegate. . . .

The Associated Powers also informed Germany at this convention that, in the first instance, they would permit the importation of 200,000 tons of breadstuffs, and 70,000 tons of pork per month in such manner and from such places as the Associated Governments might prescribe.

No movement was made by Germany toward placing her ships at the Allies' disposal and, consequently, no arrangements were made for the

<sup>1</sup> For a further discussion of Mr. Hoover's point of view, and of the steps taken by him at this time, see Frank M. Surface, *American Pork Production in the World War* (Chicago, A. W. Shaw Company, 1926), pp. 123-158; and Sidney Brooks, *America and Germany, 1918-1925*, Second Edition, revised (Macmillan Company, 1927), pages 144 ff.

<sup>3</sup> *Loc. cit.*, pages 479-480.

shipment of food until the conference called at Spa on the sixth of February, 1919. At this conference it was arranged that the British authorities should supply certain foodstuffs to Germany, up to the value of 6,000,000 pounds sterling, this being the approximate value of 100,000,000 German gold marks and 25,000,000 gold francs, florins, and kroner which Germany agreed to deposit at the Nederlandsche Bank in Rotterdam for British credit. The quantities and prices of the foodstuffs to be furnished were 30,000 metric tons of pork products, at 180 pounds sterling per ton c.i.f. Rotterdam; 250,000 cases (4,763 metric tons) condensed milk, at 32 shillings per case c.i.f. Rotterdam; and such additional pork as the balance of the gold would buy.

The delivery of the first consignment of these commodities was delayed until the end of March, both because of Germany's reluctance to part with her ships and because of her delay in sending the gold to Rotterdam.

At the Spa Conference, Germany stated that her requirements for each month from March to August, 1919, inclusive, were 400,000 tons of wheat, 170,000 tons of maize, and 100,000 tons of fats and meats.

This quantity was far beyond the ability of the Allied Powers to supply from available stocks, or to transport with the available shipping. Germany was therefore told that she would have to get along with much smaller amounts. The maximum quantities which would be allowed were later fixed by the Brussels Agreement.

#### THE BRUSSELS AGREEMENT

Several other conferences were held with the German representatives, ending in the Brussels Conference of March 13 and 14, 1919. At this conference it was made clear to Germany that no food would be delivered to her until she had first complied with her agreement to turn over that part of her merchant fleet specified by the Naval Armistice Commission and, in addition, had deposited with the Director General of Relief sufficient gold to cover the value of the food.

Germany was very loathe to part with her merchant ships, inasmuch as she regarded these as her last card and was determined to secure all the advantages possible with them. But,

after having sidestepped the issue for over two months, she finally accepted the inevitable, signed the Brussels Agreement, began the delivery of her ships, and on March 22 made the first deposit of gold.

The following is the memorandum from the Supreme Economic Council<sup>1</sup> which was read at the Brussels Conference and which was accepted by Germany. All food deliveries to Germany during the Armistice Period were made under the terms of this Agreement:

#### MEMORANDUM OF THE SUPREME ECONOMIC COUNCIL STATING THE INTENTIONS OF THE ASSOCIATED POWERS

1. The Associated Governments reiterate their decision to deliver to Germany the food now available in Europe for which payment has been arranged as soon as Germany shows her genuine intention to carry out her obligations, by sending to sea for that purpose the ships to be selected by the Associated Governments. The Associated Governments will themselves provide (as quickly as transportation can be arranged) or will give permits for import from neighboring neutrals for the balance of the 270,000 tons agreed on, as soon as the ships already named by the Germans as being ready have been sent to sea and as soon as payment for such food has been arranged.

2. She shall have the right to purchase and import up to (300,000) tons of breadstuffs or their equivalent in other human foodstuffs, and (70,000) tons of fats including Pork products, vegetable oils and condensed milk monthly until September 1st.

3. She must pay for this food and may pay in any of the following ways:—

(a) By export of commodities and the sale of cargoes of German ships now in neutral countries.

(b) By credits in neutral countries.

(c) By the outright sale of foreign securities or properties.

(d) By the arrangement of advances against the use of foreign securities or properties as collateral.

(e) By the hire of ships.

(f) Further gold also may be used as collateral for loans to be released as other means of payment provide means of liquidating such loans. The outright sale of gold can only be permitted in the event of its being agreed by the Associated Powers that the above named means of payment are inadequate.

4. She may export commodities (except those that will be enumerated in a prohibited list) to any neutral or other approved destination. The proceeds from these exports must, however, be converted into payments for foodstuffs.

<sup>1</sup> Food Document 128 of Supreme Economic Council, Appendix II, Paris, 1919.

5. When the German ships are delivered, and subject to continuous performance by Germany of the whole of her obligations in relation to the subject matter of this memorandum the carriage of German supplies, up to the amount specified above for the period to 1st. September, will be a first charge upon their use.

6. She may purchase and import foodstuffs within the limits above stated, from neutrals who will, when necessary, be allowed to re-import equivalent quantities.

7. It is understood that the declaration of the Associated Governments under this communication will be null and void, should Germany break the terms of the Armistice, or in any way fail to carry out her obligation as respects the delivery of her mercantile marine.

*Food deliveries under the Brussels Agreement.*—Under the terms of the Brussels Agreement, Germany was to be allowed to purchase and import food up to 300,000 tons of breadstuffs and 70,000 tons of fats, including milk, per month. In other words, the Allied blockade was raised to this extent. It was clear that such quantities could not be purchased by Germany without the assistance of the Associated Governments. Germany, however, had the right to refuse or accept any particular lot of food offered by the Allies or other nations.

In order to facilitate the operations with Germany, the Associated Governments established a commission at Rotterdam, known as the Rotterdam Food Commission. This Commission was charged particularly with seeing that Germany's purchase of food did not exceed the total monthly ration allowed to her, and also to facilitate commercial transactions in foods between Germany and the outside world.

The Germans appointed a delegate to work with the Rotterdam Commission. This delegate was empowered to accept or refuse particular lots of food offered for sale to Germany.

Under the terms of the Brussels Agreement, Germany was to pay for all food purchased from the Allies by deposits of gold in banks in Allied or neutral countries, which were to be placed to the credit of the Director General of Relief. This gold was to be used as collateral and Germany was to be given the opportunity to repurchase it from the proceeds of exports or the sale of securities. Under the original agreement, 125,000,000 gold marks were to be sent to the Nederlandsche Bank in Rotterdam for British credit, and 220,000,000 gold marks

deposited at the Banque Nationale in Brussels for American credit. These amounts proved inadequate to cover the quantities needed, and from time to time further deposits of gold were required to cover the cost of food ordered.

The gold deposits were received as follows:

Date of Receipt 1919	British Account, Marks	American Account, Marks	Place Received
Mar. 22...	50,000,000	.....	Rotterdam
Mar. 25...	50,000,000	.....	Rotterdam
Mar. 26...	.....	220,000,000	Brussels
Apr. 1...	25,000,000	.....	Rotterdam
Apr. 15...	80,000,000*	70,000,000*	Brussels
May 21...	.....	200,000,000	Amsterdam
June 4...	.....	210,000,000	Amsterdam
June 11...	120,000,000	30,000,000	Amsterdam
Total			
marks	325,000,000	730,000,000	
Equivalent in dol-			
lars . . .	\$77,187,500	\$173,645,000	

\* This total of 150,000,000 marks was originally deposited for American credit, but 80,000,000 marks were later transferred to the British account.

In all, Germany deposited 1,055,000,000 gold marks, worth approximately \$250,000,000 to cover the value of food delivered by the A.R.A., the Commission for Relief in Belgium, and the British Government. An examination of the gold deposited showed that it was worth approximately 23.75 cents per mark. In spite of the fact that this was gold, it proved exceedingly difficult to realize American dollars for it. The gold deposited for American credit was finally sold to the Federal Reserve Bank in New York for dollar credit in New York. The cost of melting and distributing the gold meant a considerable reduction on the pure gold value.

Immediately on receipt of the first indication that the Germans would carry out their agreements, the Director General of Relief diverted to Hamburg the S.S. "West Carnifax," then afloat for relief purposes. This steamer carried a cargo of 6,626.7 tons of wheat flour and arrived in Hamburg on March 25, anticipating by one day the arrival of the first consignment of gold for American credit.

Immediately after the signing of the Brussels Agreement, the Associated Governments indicated the following amounts of food available, all of which were accepted by the Germans:

From the A.R.A. stocks, and near-by afloat:

Commodity	Metric Tons
Wheat flour .....	35,000
Cereal flour .....	14,000
Rye grain .....	25,000

From C.R.B. stocks:

Commodity	Metric Tons
Cereal flour .....	15,000
Rice .....	10,000
Peas and beans .....	15,000
Barreled beef .....	4,000
Lard substitute .....	1,000

From the British Government:

Commodity	Metric Tons
Bacon .....	30,000
Condensed milk .....	10,000
Vegetable oil .....	20,000
Margarine .....	2,000
Drippings .....	2,000
Rice .....	35,000
Rangoon beans .....	50,000
Oatmeal .....	15,000
Cereal flour .....	10,000

From the French Government:

Commodity	Metric Tons
Palm kernels * .....	50,000

\* In addition to the palm kernels, which were estimated to contain 15,000 tons of palm kernel oil, smaller amounts of mandioca flour, codfish, etc., were available.

In addition, the A.R.A. indicated their willingness to load for May delivery 25,000 tons of cereal flour and 100,000 tons of rye grain, beans, and peas. As a matter of fact, this provisional program was changed several times because of the supplies available in the home markets.

Furthermore, Germany was allowed to purchase supplies in any markets she chose, up to the limits of the allowed ration per month, provided she could make satisfactory financial arrangements. Considerable quantities were purchased from the Netherlands and other near-by countries and, in addition, arrangements were made to purchase grain from Argentina.

Table 83 summarizes the total supplies furnished to Germany from the time of the Brussels Agreement to September, 1919. As shown by this table, 1,215,217.8 metric tons, valued at \$282,410,999.21, were delivered during the Armistice Period under the direction of the Director General of Relief. Of this total, 618,135.8 metric tons, worth \$158,109,448.21, were furnished by American organizations.

The deliveries by the A.R.A. amounted to 483,094.9 metric tons, for which Germany paid \$113,728,950.49. The detail of these deliveries

by steamers and the commodities carried on each is given in Table 324. The C.R.B. also made substantial deliveries to Germany, partly from surplus stocks in Antwerp, and partly by direct shipments from the United States. The total deliveries to Germany by the C.R.B. included 134,980.0 metric tons, for which they received cash from the proceeds of the German gold in the amount of \$44,350,810.47. The detail of these deliveries is given in Table 326. This operation made it possible to supply, immediately, fats which were so badly needed in Germany. The supplies from the C.R.B. were sold to Germany for the most part f.o.b. Antwerp and Rotterdam and were transported to German ports in their own ships.

The total deliveries from the United States in the Armistice Period may be summarized by commodities as follows:

DELIVERIES TO GERMANY FROM THE UNITED STATES  
ARMISTICE PERIOD, 1919

(Metric Tons)				
Commodity	American Relief Administration Cash Sales	Quakers	Commission for Relief in Belgium	Total
Flour .....	241,865.1	....	16,065.0	257,930.1
Grain .....	131,748.3	....	44,581.0	176,329.3
Rice .....	9,209.6	....	21,245.0	30,454.6
Beans and peas ..	42,200.0	....	19,567.0	61,767.0
Pork products ..	46,956.1	10.0	32,995.0	79,961.1
Milk .....	11,115.8	26.7	.....	11,142.5
Cocoa .....	.....	13.2	.....	13.2
Miscellaneous food .....	.....	....	527.0	527.0
Clothing and miscellaneous .....	.....	11.0	.....	11.0
Total .....	483,094.9	60.9	134,980.0	618,135.8

The A.R.A. made a further sale of 60.9 metric tons to the American Friends Service Committee (cf. page 117) which undertook to furnish benevolent relief to German children. This was used for supplementary meals to children under the direction of the Quaker personnel in much the same manner as the child feeding carried on by the A.R.A. in other countries. In a sense this was the forerunner of the extensive child-feeding operations under the Quakers in the Reconstruction Period as discussed below. The details of this sale are shown in Table 325. In the present report this is regarded as a sale by the A.R.A., but the American Friends Service Committee is given credit with a cash donation of this amount.

#### DELIVERIES FROM OTHER COUNTRIES

The total deliveries to Germany during the Armistice Period from countries other than the United States amounted to 597,082.0 metric tons, valued at \$124,301,551. Of this amount, the United Kingdom furnished 299,144.0 tons for a total of \$75,653,861. These deliveries were for the most part made from surplus stocks of food which Great Britain had accumulated during the latter period of the war, but which, with the rearrangement of her food supply, were not so readily disposed of in England. Part of the British deliveries were from Canada and Australia, and, in addition, approximately 100,000 tons of potatoes were from England. No detailed record of the shipment of these supplies was furnished to the Director General of Relief, but Table 327 shows the deliveries by months. All deliveries

to Germany by the United Kingdom were paid for in cash from the German deposits of gold.

The French Government undertook to deliver to Germany certain quantities of French Colonial products, consisting of 55,000 tons of palm kernels and 6,000 tons of pork and other fats. Smaller quantities of other Colonial products were also offered for sale. These supplies were not paid for by German gold, as in the case of the United States and England, but instead, German commodities, including iron ore and coal, were imported into France to cover their value. Table 83 shows the total deliveries from France as 69,404.0 metric tons, with a valuation of \$16,262,889. The only detail available regarding these transactions is the record of the deliveries, by months, as shown in Table 328.

Germany purchased small quantities of food from neighboring neutrals, such as Holland and

DELIVERIES TO GERMANY FROM COUNTRIES OTHER THAN THE UNITED STATES  
ARMISTICE PERIOD, 1919  
(Metric Tons)

Switzerland. The chief supplies received from Holland were lard and potatoes. In May, Germany was able to contract for the purchase of 200,000 tons of wheat and linseed from Argentina. To take care of the transportation of these supplies the Freight Committee of the Supreme Economic Council allocated German tonnage to go to the Plate region. Up to September, 1919, Germany had received 135,000 tons of wheat and 20,000 tons of linseed from Argentina.

These supplies from neutral countries were financed by the surrender of German securities or by the sale of ships and cargoes in neutral ports, and therefore represent cash transactions.

The total deliveries from these countries are shown above, and available details are given in Table 329. The tabulation above summarizes deliveries to Germany during the Armistice Period from countries other than the United States.

The total supplies delivered to Germany in terms of breadstuffs and fats amounted to approximately 600,000 tons of the former and 175,000 tons of the latter. These deliveries cover a period of five months. Under the terms of the Brussels Agreement, Germany would have been allowed to import in five months 1,500,000 tons of cereals and 350,000 tons of fats. Her importations were thus far below the allowed ration. She did, however, purchase all that the world supply of food and shipping would permit and all for which she could provide finance.

There can be no question but that the delivery of these supplies to Germany saved that country from the fate of Russia. We have already pointed out that food conditions in Germany after the Armistice had reached a point where deaths resulting from starvation were of daily occurrence among the civilian population. No country could long resist bolshevism under such conditions. From the middle of February

and well into the month of March, Germany was staggering on the verge of this curse. It is significant that soon after the first food ship arrived the political situation made a decided change and, after that time, steadily improved.

If bolshevism had secured a position in the center of Europe it must have seriously threatened all other Western European countries, and it is only a step from the Eastern to the Western Hemisphere.

## RECONSTRUCTION PERIOD

### CHILDREN'S RELIEF

Reference has been made to the work in Germany by the American Friends Service Committee (cf. pages 117-20) and other Quaker organizations. This work was begun almost immediately after the Armistice. A survey made by the Friends at that time indicated that 75 per cent of the children in Germany were undernourished and in need of supplementary feeding. It was impossible to undertake much of this work during the Armistice Period, partly because the Allied Powers were unwilling to permit it and partly because public opinion in America and the Allied countries was not ready to approve of it. However, with the peace treaty definitely signed public opinion was no longer willing to see women and children suffer needlessly. As expressed by Mr. Hoover<sup>1</sup> in a memorable statement during the Armistice Period, when asked why we were feeding Germany:

From the point of view of my Western upbringing, I would say at once, because we do not kick a man in the stomach after we have licked him. . . .

<sup>1</sup> For complete statement see Sidney Brooks, *America and Germany*, Second Edition, revised (Macmillan, 1927), pages 73 ff.

From the point of view of a humanitarian, I would say that we have not been fighting with women and children and we are not beginning now. . . .

Taking it by and large, our face is forward, not backward on history. We and our children must live with these seventy millions of Germans. No matter how deeply we may feel at the present moment our vision must stretch over the next hundred years, and we must write now into history such acts as will stand creditably in the minds of our grandchildren.

In November, 1919, Mr. Hoover asked the A.F.S.C. to undertake the responsibility for German child-feeding and promised full co-operation from the E.C.F. An agreement was drawn up between the two organizations by which the E.C.F. undertook to attend to the purchasing and shipping of commodities required in the child-feeding work in Germany while the A.F.S.C. was to handle all details of distribution within the country. The funds for this work were provided from the proceeds of the European Relief Council drive, and from the nominal surplus derived from the food draft sales in Germany referred to below. The overhead expenses of the Quaker mission were paid out of other funds. In addition to this work by the American Friends, the British Quakers undertook similar work in the part of Germany occupied by the British Army. This was handled entirely by funds collected in Great Britain and by British personnel and is not included in this report.

The original mission from the A.F.S.C. was composed of fifteen volunteers who arrived in Germany in January, 1920. The first shipment of child-feeding supplies under these arrangements arrived in Hamburg on February 13, 1920 (Table 167), and child feeding was started on February 26. By the first of July, 1920, the Quakers were feeding 632,000 children from 3,392 feeding stations, in 88 German cities and districts. The number of children fed reached its peak a year later in June, 1921, when 1,026,856 were receiving the supplementary meal.

The methods employed by the Quakers were almost identical with those used in other countries by the E.C.F. One meal a day (excluding Sundays) was furnished to undernourished children, and to expectant and nursing mothers. Children over six were fed mostly in schools, while the younger children and mothers ob-

tained their meals at kindergartens or similar institutions. The details of cooking and distribution were handled chiefly by local German committees. In crowded localities the food was cooked in large central kitchens, and distributed to feeding centers in large thermos kettles. Thus, two kitchens in Berlin cooked for 35,000 and 25,000, respectively.

Children and mothers to be fed were selected in accordance with regulations prepared by an advisory committee of the leading child specialists in Germany. No distinction was made on account of race, religion, politics, or social position.

Very strict regulations were enforced by the Quakers requiring that all food furnished to each kitchen must be accounted for by the proper number of meals actually served as recorded by meal-ticket attendance. Weekly reports were rendered by each local committee.

The total supplies furnished to the Friends by the E.C.F. for German child feeding amounted to 28,720.1 metric tons, valued at \$6,728,989.92 (Tables 83 and 323). The detail of the arrival of these supplies in Germany and their delivery to the Friends Committee is shown in Tables 167 and 331. The records of the internal deliveries of these supplies are in the archives of the A.F.S.C. in the Haverford College Library at Haverford, Pennsylvania.

The map on page 190 shows the location of the district offices and the feeding stations maintained by the Quakers.

*Co-operation of the German Government.*—Throughout this work the German Government co-operated in a wholehearted manner with the A.F.S.C. A committee was formed, known as the German Central Committee for Foreign Relief (Deutscher Zentralausschuss für die Auslandshilfe), headed by Dr. Bose of the German Food Ministry, which co-ordinated the work of all welfare organizations in Germany. The German Government made substantial contributions of commodities (flour and sugar) for the children's relief work to the extent of 16,833.0 metric tons, valued at \$2,392,021.25. In addition to these amounts, Germany also paid for the transportation, handling, and warehousing of all relief supplies, and through volunteer services for the cooking and distribution of the food. On the next page is a rough estimate of the total German contribution to this work.

## GERMAN CONTRIBUTION TO CHILD FEEDING

Transportation, warehousing, etc.....	\$ 175,000.00
Volunteer services (30,000 workers) .	2,375,000.00
<hr/>	
Total services .....	\$2,550,000.00
Commodity donations (Table 83)...	2,392,021.25
<hr/>	
Total .....	\$4,942,021.25

The Friends withdrew from German child-feeding operations at the end of 1922, but, as previously related, they later returned to Germany to continue their child-feeding operations with funds raised through a committee headed by Major General Henry T. Allen. This work lies outside the scope of the present report. It should also be pointed out that in addition to the relief work discussed here the American Friends Service Committee and other Quaker organizations carried on a large amount of relief work in Germany, as well as elsewhere, entirely on their own responsibility, which we have not attempted to cover. For information regarding this the reader is referred to the publications of the A.F.S.C. and also to an interesting book by Ruth Fry,<sup>1</sup> which deals particularly with the work of the English Quakers.

## FOOD DRAFTS AND BULK SALES

The food draft plan was inaugurated in 1920, as a means of supplying the people of Central Europe with food which their relatives and friends in America wished to provide. The large German population in the United States quickly availed themselves of this method of assisting their relatives in Germany. The sale of food drafts for delivery in Germany was the second largest in Central Europe, being exceeded only by the sale of drafts for Austria. As shown in Table 332, the number of food drafts for Germany was 142,873, representing 5,242.8 metric tons of food with a total value of \$2,096,410.

Extensive bulk sales of food were also made from the Hamburg warehouse for Germany. Table 333 shows that these sales amounted to 4,104.6 metric tons of food with a total value of \$724,010.47. These sales were made to various organizations in Germany, including local relief bodies, and also to certain commercial houses which undertook to resell the commodities at a nominal profit. Included in this amount are

1,237.2 metric tons, valued at \$341,309.37, which were delivered to the A.F.S.C. for child feeding and represents the profits by the E.C.F. on the total food draft and bulk sale business in Germany. As pointed out in an earlier section (page 94), all profits from the warehouse operations were returned for child feeding in the countries in which these sales were made. The only way this could be done in Germany was to turn over commodities to the Quaker organization.

Table 83 shows that the total food draft and bulk sales operation in Germany amounted to 9,347.4 metric tons, valued at \$2,820,420.47. Inasmuch as the deliveries to the Quakers for child feeding discussed above are included in this and also in the Friends child-feeding operations, it has been necessary to deduct the bulk sale to the Quakers to obtain the figure for net deliveries to Germany (cf. Table 83 and Table 323).

Table 83 also shows an item of sundry sales for the liquidation of the stock in Hamburg warehouses. This represents the final closing of the Hamburg warehouses in the late summer of 1923. Hamburg had been used as a transshipping point for supplies going into Russia, since it was cheaper to unload trans-Atlantic steamers there and forward supplies by small ships than to direct the large steamers to the Baltic ports. After the completion of the Russian operations there were certain stocks of supplies remaining which could not be used in Russia, and since all other relief operations had ceased these stocks were sold for cash to German dealers. The total quantity sold was 4,053.0 metric tons (including some damaged commodities) for which the Administration received \$362,571.27.

The total net relief deliveries to Germany during the Reconstruction Period was 57,716.3 metric tons, valued at \$11,962,693.54. Adding this to the deliveries during the Armistice Period gives a grand total of all relief to Germany accounted for in this report of 1,272,934.1 metric tons with a total value of \$294,373,692.75. This may be summarized as follows:

Sold for cash.....	\$285,135,904.48
Benevolence .....	9,237,788.27
<hr/>	
Total .....	\$294,373,692.75

As pointed out above there were still other relief deliveries to Germany by the Quakers, the Red Cross, and other organizations which are not included in this report.

<sup>1</sup> A. Ruth Fry, *A Quaker Adventure*, Nisbet and Company, London, 1926.

## GREECE

(Appendix Tables 334-335)

### RECONSTRUCTION PERIOD

The end of the World War in Europe did not mean the end of fighting in European and Anatolian territories formerly a part of the Turkish Empire. There were complex and bitter struggles in which the Great Powers, Greece and Turkish nationalists, were involved. The conflict reached its climax in the Greco-Turkish War of 1920-1922. After early successes the Greeks were finally defeated in the autumn of 1922, and were forced to retire from Anatolia. After these military disasters, great numbers of Greek residents of Eastern Thrace and Anatolia were forced to leave the Turkish territories.

By the early part of October these panic-stricken refugees began to arrive in Greek territory in enormous numbers. The majority of the refugees traveled by ox cart or on foot, with only meager supplies. By the time they reached Greek territory, they were a mass of exhausted and starving men, women, and children, which presented a tremendous relief problem calling for prompt and decisive action.

The Near East Emergency Fund was organized as a co-ordinating committee to reinforce the appeal of the American Red Cross and the Near East Relief for money with which to meet this Greco-Turkish emergency. These two relief organizations were already operating in the Near East field and were in a position to administer the relief if funds were available. President Harding issued an appeal to the American people for contributions, and Mr. Hoover, then Secretary of Commerce, supported the movement. The American Relief Administration offered the facilities of its experienced purchasing and shipping organization in handling the supplies. The funds contributed were handled and accounted for by the American Red Cross.

Between November, 1922, and May, 1923, the

American Relief Administration purchased and shipped 20,374.0 metric tons of foodstuffs which were paid for by the American Red Cross. Table 334 shows the summary of these deliveries, while Table 335 gives the detail of the shipments by steamers. The total amount of money provided by the American Red Cross was \$1,211,949.95, which included the f.o.b. value of these commodities at New York and \$33,786.10 in payment of freight and miscellaneous charges. All insurance and the balance of the freight and other charges were paid directly by the American Red Cross. Of this we have no record.

The total commodities handled for the American Red Cross in this operation may be summarized as follows:

SUMMARY OF RELIEF SHIPMENTS FOR THE AMERICAN RED CROSS FOR GREECE

Commodities	Total Metric Tons
Flour .....	12,886.0
Grain .....	2,451.0
Rice .....	203.0
Beans and peas .....	1,269.0
Corn grits .....	2,642.0
Pork products .....	102.0
Milk .....	162.0
Cocoa .....	409.0
Sugar .....	203.0
Miscellaneous food .....	45.0
Soap .....	2.0
Total .....	20,374.0

During this operation, the relief organization cared for and fed more than 1,000,000 refugees. In addition to the food relief accounted for here, the American Red Cross and other relief organizations provided large amounts of medical and sanitary relief, housing facilities, etc., with which the American Relief Administration had no connection.

## HUNGARY

(Appendix Tables 336-351)

### ARMISTICE PERIOD

Pre-war Hungary was an exporter of food-stuffs. After the war, large sections of the kingdom, exercising the right of self-determination, broke away and attached themselves to the neighboring states of Czechoslovakia, Roumania, and Jugoslavia. Even in the territory that remained to Hungary there were considerable stocks of supplies in 1919, but as many regions were the scene of armed conflict, and as transportation was broken down and the revolutionary government in confusion, there was acute suffering in the large centers, particularly in Budapest.

As in the case of other ex-enemy countries in Central Europe, the Director General of Relief arranged to sell needed supplies to the Hungarians. Negotiations were begun for the sale of some 2,000 tons of fats and some milk for delivery to the Karolyi Government, which had taken over the power when the old régime fell in November, 1918. On March 21, 1919, the Karolyi Government fell, and a new government under Bela Kun took the power with the program of setting up a soviet government on the Russian model. The supplies contracted for by Karolyi were delivered, to the extent of 114.7 tons of pork products and 204.4 tons of lard and substitutes with a total value of \$245,519.96, all of which was paid for in cash. No further deliveries were made, as the Supreme Council set up a blockade against Soviet Hungary.

The soviet régime under Bela Kun attempted to establish a system of communism, which involved the complete overthrow of individual production and which, in addition, became involved in war-like maneuvers. The latter finally led to the occupation of Hungary by Roumanian troops in August, 1919, which lasted until November of that year. All of these operations tended to increase state expenditures, without introducing constructive measures for finding funds with which to meet these burdens.

When the new Hungarian Government took control in November, 1919, it was necessary for

them to take possession of all food supplies and to issue rations to the people. Even if each inhabitant had been able to obtain the full amount called for on the ration card, it would have provided less than 1,300 calories, compared with 1,800 calories necessary to maintain a motionless man, or 2,700 calories as the minimum for the ordinary light worker.

The conditions in Budapest were particularly bad. In addition to its normal population of some 880,000, the city was filled with refugees from Bukovina and Galicia, which with the returning soldiers brought the population to more than 1,000,000. Industry was at a standstill, no work could be obtained, and, with the depreciated currency, prices of the few commodities that were available rose to prohibitive levels. Health conditions were bad, contagious diseases prevalent, and the death-rate far exceeded the birth-rate. As always, the infants and children were heavy sufferers.

### RECONSTRUCTION PERIOD

#### CHILDREN'S RELIEF

Immediately following the downfall of the Soviet Government, the A.R.A. sent a representative to Budapest. He arrived on August 7, 1919, and found conditions so serious that supplies were shipped immediately from stocks in Vienna, and feeding for the neediest children and for expectant mothers was started on August 13. During the first month approximately 36,000 children received the supplementary daily meal.

Hungary, like Austria, being regarded as an enemy country, could not participate in the food furnished from the Congressional Appropriation. Mr. Hoover, with the permission of President Wilson, allotted certain child-feeding supplies to Hungary from the stocks purchased with the President's National Security and Defense Fund. Table 84 shows that a total of 287.0 metric tons of food, valued at \$101,325, were furnished to Hungary from this source. These supplies, however, were sufficient to last only until

the end of September, 1919, when child feeding in Hungary had to cease because no other funds were available for use in that country.

Because of the distressing conditions in Budapest, an effort was made to raise funds for feeding children in that city. This effort was successful chiefly through contributions by Hungarians in the United States, and by November, 1919, it was again possible to resume the feeding. This new operation started with nearly 45,000 children, which was gradually increased to a maximum of 110,000 in April, 1920. With improved conditions, this number was reduced to 32,000 in June, and after the harvest in September to only 8,000. A survey made in January, 1921, showed that again there was great suffering among the children for lack of essential food, and the program was therefore increased to 47,000. The number was again reduced in the summer of 1921 to about 18,000, and from then on the number receiving relief gradually fell off until May, 1922, when all feeding from American supplies was finally discontinued.

Table 84 shows that during this period the European Children's Fund supplied 3,298.1 metric tons of relief supplies, with a value of \$1,190,832.53, to which the Hungarian Government added 1,733.0 tons of flour, beans, and pork with a value of \$265,806.84. The total children's relief furnished to Hungary, including the President's National Security and Defense Fund,

amounted to 5,318.1 metric tons, valued at \$1,557,964.37, all of which was a direct gift to Hungarian children. The total number of meals provided from these supplies was approximately 28,500,000.

The detail of the child-feeding supplies for Hungary is summarized in Table 336 and may be set forth briefly as follows:

CHILDREN'S RELIEF SUPPLIES FOR HUNGARY  
(Metric Tons)

Commodity	President's National Security and Defense Fund	European Children's Fund	Hungarian Government Donation	Total
Flour .....	98.0	459.2	1,441.0	1,998.2
Rice .....		430.2	.....	430.2
Beans and peas..		326.9	242.0	568.9
Corn grits .....		23.4	.....	23.4
Pork products ..		135.0	50.0	185.0
Milk .....	95.0	1,049.0	.....	1,144.0
Cocoa .....	27.0	125.6	.....	152.6
Sugar .....	30.0	476.3	.....	506.3
Misc. food .....		55.2	.....	55.2
Clothing .....		217.3	.....	217.3
Soap .....	37.0	.....	.....	37.0
Total .....	287.0	3,298.1	1,733.0	5,318.1

No Hungarian organization existed which was in a position to manage the child-feeding operations. It was necessary, therefore, for the E.C.F. to exercise close supervision over all of this work. A number of committees were formed, composed of prominent Hungarians of

TABLE 84  
SUMMARY OF TOTAL RELIEF DELIVERIES TO HUNGARY  
(For detail see Table 336)

Operation	Total Metric Tons	Total Value
Armistice Period		
American Relief Administration (cash sales).....	319.1	\$ 245,519.96
Reconstruction Period		
American Relief Administration (President's National Security and Defense Fund) ..	287.0	\$ 101,325.00

Grand total relief deliveries.....	21,393.5	\$4,607,139.37

all faiths and parties, who greatly assisted in this work. All feeding was confined to the city of Budapest and its suburbs. Great assistance was rendered by a group of retired Hungarian army officers of high rank who acted as inspectors of the various kitchens, and thus gave the relief mission a direct control on all operations.

*Hungarian Government co-operation.*—Officials of the Hungarian Government showed

Selecting children who should receive relief in Hungary.

every desire to co-operate in the child-feeding work, although frequent changes in the ministry made this co-operation more difficult. At all times, however, they provided funds for transporting, warehousing, and administering the relief supplies. It is undoubtedly true that the Hungarian Government contributed more funds for the relief work than it could well afford under the circumstances. The following estimates give some idea of the Hungarian contribution to this work.

#### HUNGARIAN CONTRIBUTIONS TO CHILDREN'S RELIEF

Transportation, warehousing, etc. ....	\$ 55,528.00
Administration and kitchen expense.....	21,982.00
Volunteer services (1,190 workers).....	98,976.00
Clothing contribution .....	8,044.00
Cash contributed by the government.....	23,912.00
Total .....	\$208,442.00
Commodity contributions (Table 84)....	265,806.84
Grand total .....	\$474,248.84

#### WAREHOUSES AND MISCELLANEOUS SALES

Table 84 shows that the total food draft and bulk sale operation in Hungary amounted to 1,629.6 metric tons, valued at \$527,939.41. About

three-fourths of this consisted of food drafts purchased chiefly by Hungarians in the United States for relatives and friends in the old country. Table 349 shows that 26,129 food drafts were delivered in Hungary, furnishing 912.6 metric tons of food and valued at \$373,850.00.

Bulk sales in Hungary totaled 717.0 metric tons with a sales value of \$154,089.41 (Table 350). These sales were made chiefly to a number of charitable organizations, including the International Red Cross, the Jewish Joint Distribution Committee, the World's Student Christian Federation, and others.

A portion of the contributions by the Commonwealth Fund were used for food relief in Hungary. The total amount of this relief was \$102,466.71, of which \$62,500.00 was used to purchase food drafts, and the remainder in bulk sales, all of which was used for relief to the intellectual classes.

In co-operation with the European Children's Fund, the World's Student Christian Federation used \$28,300.16 of the funds turned over to them by the European Relief Council for the purchase of bulk food for student feeding in Hungary.

Table 84 shows that 12.5 tons of clothing, valued at \$24,527.59, were distributed in Hungary from the Commonwealth Fund. The detail of this contribution to Hungarian intelligentsia is discussed under the Commonwealth Fund (pages 102-3). The sale of 0.2 tons of surplus clothing for \$790.83 represents a cash transaction in closing out the children's relief operations.

The E.C.F. recognized the necessity of furnishing suitable clothing to maintain the health of the needy children they were feeding. Early in 1920 they began to supply shoes, stockings, and cloth for coats and dresses. Altogether, 217.3 metric tons of shoes and clothing were furnished for Hungarian children. The detail of the distribution of these commodities to the Hungarian committee is shown in Table 347. This clothing distribution may be summarized as follows:

Commodity	Quantity
Shoes .....	101,261 pairs
Laces .....	66,000 pairs
Stockings .....	98,426 pairs
Woolen cloth .....	248,976 yards
Thread .....	7,052 spools
Needles .....	53,000 number
Buttons .....	759,600 number
Blouses .....	3,926 number

## GRAIN CORPORATION FLOUR

The conditions under which Congress passed the Act of March 30, 1920, authorizing the U.S. Grain Corporation to sell surplus flour on credit for the relief of European countries, has been set forth in an earlier section of this report. Hungary, or in particular the city of Budapest, was suffering from a severe food shortage in the spring of 1920. The Grain Corporation therefore sold to the Hungarian Government on credit 158,754 barrels of flour, or 14,114.0 metric tons, with a total value of \$1,685,835.61 at American ports. Hungary had no means of transporting this flour, or of paying for its transportation in cash. Through the auspices of the American Relief Administration, Great Britain was persuaded to undertake the movement of this flour from the United States to Hungary, at a cost of approximately \$564,561.60. The United Kingdom accepted Hungarian notes in payment for this freight and other charges.

As shown in Table 84, the total relief extended to Hungary, as covered by this report, amounted to 21,393.5 metric tons of supplies,

valued at \$4,607,139.37. On the basis of the conditions under which these supplies were delivered, the total may be divided as follows:

Sold for cash.....	\$ 512,117.63
Delivered on credit.....	2,250,397.21
Benevolence .....	1,844,624.53
Total .....	\$4,607,139.37

This is by no means a complete statement of all the relief furnished to Hungary from foreign countries during this period. Medical and hospital supplies were furnished from British naval and military stocks in Italy and from American Army stocks in France, and by the American Red Cross. The International Red Cross, the Jewish Joint Distribution Committee, and others were also active in Hungarian relief. Many of these organizations secured such food supplies as they distributed from the A.R.A. Warehouses and this is included in the total above. Other operations were entirely independent of the A.R.A. or E.C.F. and no authoritative report of these is available.

# ITALY

(Appendix Tables 352-353)

## U.S.F.A. PERIOD

Italy, as one of the major Allies in the war against the Central Empires, received large grants of credit from the United States Treasury in the period between April, 1917, and the end of 1919. These credits were used for the purchase in the United States of supplies which were needed in the prosecution of the war and included, of course, foodstuffs. Italy purchased these supplies through the Allied buying organizations such as the Wheat Executive, the Inter-allied Meats and Fats Executive, the Royal Commission on Sugar Supplies, etc. The foregoing organizations in turn secured their American supplies through the United States Food Administration.

The total loans granted to Italy by the United States Treasury for the purchase of foodstuffs amounted to \$796,762,249.59, for which they were furnished approximately 7,464,749.6 metric tons of supplies (Tables 85 and 352). These supplies were sold to Allied organizations f.o.b. American ports and no further information is available regarding their transportation or distribution.

The following tabulation summarizes the commodities furnished to Italy:

### U.S. FOOD ADMINISTRATION DELIVERIES TO ITALY, 1917 TO 1919

Commodity	Total Metric Tons
Flour .....	1,804,252.8
Grain .....	5,039,879.8
Rice .....	14,634.7
Beans and peas.....	6,355.7
Pork products .....	141,867.9
Milk .....	13,152.7
Sugar .....	30,682.1
Miscellaneous food .....	93,341.9
Forage (oats) .....	320,582.0
Total .....	7,464,749.6

## ARMISTICE PERIOD

Throughout the Armistice Period the food supplies for the Allied countries were taken care

of through the Allied buying organizations as outlined above. Consequently, the Director General of Relief was not concerned with shipments to these countries. However, in April, 1919, the supply of cereals for Italy reached an alarmingly low level. Due to the world shortage of commercial shipping, the Wheat Executive had been able to furnish Italy only 70,000 tons of wheat in March, 1919, against a minimum monthly import requirement of approximately 250,000 tons. From the allocation of ships, then loading, there was little hope of immediate relief. In response to urgent requests from Italy, the Director General of Relief turned over to the Italian Government 5,000 tons of flour from American stocks at Trieste and also diverted two near-by American cargoes of flour to Italian ports. The 15,031.1 metric tons of flour thus delivered to Italy served to prevent the threatened serious suffering by the Italian population. The Italian Government paid \$2,846,014.42 for this flour, which may be regarded as a cash transaction.

Table 353 shows the detail of the delivery of this flour from American Relief Administration supplies.

The total deliveries to Italy accounted for in this report (Table 85) amounted to 7,479,780.7 metric tons, valued at \$799,608,264.01. Of this, the sum of \$2,846,014.42 represents sales for cash, and the remainder, sales on credit.

# JUGOSLAVIA

(Appendix Tables 354-368)

## ARMISTICE PERIOD

The map of the Balkan peninsula has had many vicissitudes in recent years, but the changes wrought as a result of the world war were most profound. Of the seven independent governments, exclusive of Turkey, which occupied this region in 1914 but five now remain. Montenegro and Serbia united with the Balkan possessions of the old Austro-Hungarian Empire to form the Kingdom of Yugoslavia (formerly the Kingdom of the Serbs, Croats [Hroa-tia], and the Slovenes and sometimes referred to as Greater Serbia). The Balkan possessions of the Austro-Hungarian Empire were divided between Yugoslavia and Roumania, so that these two countries now overshadow in area and population the remaining Balkan states. The former Austro-Hungarian provinces which have been included in Yugoslavia are Bosnia and Herzegovina, Dalmatia, Slavic Carinthia, Slavic Styria, Carniola, Croatia-Slavonia, and a portion of the Banat, including parts of Batchka and Baranya. The following table gives the approximate areas and population by districts of the Kingdom of Yugoslavia.

APPROXIMATE AREA AND POPULATION OF JUGOSLAVIA

District	Area in Square Miles	Population
Serbia .....	33,891	4,500,000
Montenegro .....	5,603	400,000
Bosnia and Herzegovina.....	19,768	2,000,000
Slavic Carinthia .....	900	85,000
Slavic Styria .....	3,000	450,000
Carniola .....	3,845	524,000
Dalmatia .....	4,956	655,000
Croatia and Slavonia.....	16,421	2,680,000
Banat, Batchka, and Baranya.....	10,000	1,500,000
Total .....	98,384	12,794,000

From a relief point of view, Yugoslavia presented a peculiar situation in 1919. In common with the other countries of Central Europe, a large part of this territory was suffering from semi-starvation, almost total lack of internal transportation, scarcity of coal, financial chaos, and industrial disorganization. This imposing array of economic disorders, together with sev-

eral others not mentioned, were sufficient cause for worry over the future. Yet, within the confines of Yugoslavia there are some of the richest agricultural lands of Europe. The territory of the old Banat had been practically untouched by the war. Travelers reported that in this region the granaries were full, the fields were in a high state of cultivation, and the landscape was literally dotted with fattening cattle, sheep, and

The market place in historic Sarajevo, Bosnia, Yugoslavia.

swine. That there should be starvation in a country with these resources may seem strange until one considers the transportation and coal facilities. The situation in southern and western Yugoslavia was somewhat similar to what might happen in the United States if the flow of supplies from the Mississippi Valley to the Atlantic States was interrupted through railroad disorganization.

The normal pre-war production of that portion of the Banat on either side of the Tisza River and now included in Yugoslavia was about 3,500,000 tons of grains and large amounts of live stock. The 1918 crop in this region was estimated by the Hungarian authorities to be about 2,500,000 tons of grain. Prior to the Armistice, only 200,000 tons had been removed from this territory. There should have been at the beginning of 1919 between 600,000 and 800,000 tons of exportable surplus still remaining. The Serbian authorities denied the existence of such large supplies but did not deny that at least 200,000 tons of grain could be obtained. Normally, this

would go to Roumania, Hungary, and Austria. Transportation facilities were never well developed to the south unless supplies could be moved by barge down the Danube and up the Save.

The fact that these movements did not take place is due, in the first instance, to lack of coal and other transportation facilities, but perhaps more than anything else to the political condition in the new government. Mr. Hoover, both through the American Relief officials, and through the Interallied Supreme Economic Council, repeatedly had to insist that some means must be found by which this food could be used to provision those areas in serious need.

As a result of these measures, a considerable portion of these supplies were finally moved, and in addition to shipments to northern Yugoslavia large quantities were forwarded to Austria to provide for the starving masses in Vienna.

Regardless of these supplies from northern Yugoslavia, those sections in southern Serbia and along the Dalmatian coast could not be supplied from inland points. The first survey of this territory indicated that southern Serbia would require between 3,000 and 5,000 tons of flour per month; central Serbia would need an equal

amount; while Dalmatia, Montenegro, Bosnia, and Herzegovina would require 12,000 to 15,000 tons per month. A portion of these supplies could be sent from the Banat surplus. The original program for overseas relief shipments to Serbia included 12,000 tons of breadstuffs, 2,500 tons of beans and peas, and 500 tons of milk per month. This program was very much modified by later developments.

Arrangements were made whereby the British Government agreed to furnish supplies to southern Serbia through Salonica, and the United States would thus have only the Dalmatian coast and contiguous territory to supply. Owing to shortage in the arrivals from the United Kingdom, it was necessary to send a few American cargoes to Salonica to insure a continuous supply.

Table 86 gives a summary of all relief deliveries to Greater Serbia. This table shows that the total relief deliveries to Yugoslavia during the Armistice Period consisted of 121,249.8 metric tons of food and relief supplies with a total value of \$43,596,570.69. Of this total, the United States furnished 87,594.8 tons, valued at \$33,961,378.69, while the United Kingdom sup-

plied the remaining 33,655.0 tons with a value of \$9,635,192.00.

Of the supplies coming from the United States, the A.R.A. furnished 55,077.2 metric tons, worth \$13,191,246.46, which were paid for by direct loans to Serbia (Jugoslavia) from the United States Treasury. For the most part these supplies were delivered at the Adriatic ports of Trieste, Fiume, Gravosa, Spalato, Zelenike, and Cattaro, but three cargoes were discharged at Salonica for southern Serbia, while one small lot of flour was moved from Constantinople by local shipping. The details of these arrivals, by steamer, and the cargo of each are shown in Table 355. A large portion of these supplies represents cargoes shipped by the U.S. Army Quartermaster under the arrangements made by Mr. Hoover in November, 1918 (cf. page 129). Serbian Government officials signed receipts for all of these supplies, but no further detail of their internal distribution is available.

The A.R.A. also spent the sum of \$81,140.98 in transporting the 667.6 tons of clothing donated to Yugoslavia by the American Red Cross. This charge for freight and insurance from the United States to Adriatic ports was made against the Congressional Appropriation for Relief as a gift to the people of Yugoslavia from the United States. The Red Cross supplies, valued at \$224,800.00 were also a gift from that organization.

As pointed out in connection with other countries, the U.S. Liquidation Commission made extensive sales of surplus Army stocks to numerous European countries. These sales were all made on credit. The sales to Serbia (Jugoslavia) consisted chiefly of clothing and subsistence mate-

rials and totaled approximately 31,850.0 metric tons with a total value, at French ports, of \$20,464,191.25. Yugoslavia had no facilities for transporting this material to her own borders, and, at the suggestion of Mr. Hoover, the United Kingdom undertook to move a large portion of this material at a cost of \$373,660.00, which was paid for out of the British relief credits.

In addition to the finance on freight referred to above, the United Kingdom furnished a large quantity of relief supplies to Yugoslavia, which was also sold on credit and paid for out of the British appropriation for relief. Table 86 shows the total quantity of this material as 33,655.0 metric tons, valued at \$9,261,532.00. The tonnage of the various types of commodities furnished by the United Kingdom is shown in Table 354, while the detail by steamers is given in Table 356.

The total relief tonnage furnished to Yugoslavia during the Armistice Period, exclusive of children's relief discussed below, is summarized by commodities in the table above.

## RECONSTRUCTION PERIOD

### CHILDREN'S RELIEF

In southern Serbia and in the territory reached from the Dalmatian coast the suffering of the children was as great as anywhere in Europe. The story of the suffering of old Serbia and of Montenegro during the invasion of Austro-Hungarian and German armies is well known. The occupation of this country by the enemy forces had left it destitute of supplies. The demoralization of the transportation systems had

prevented such supplies being replenished. The same reasons that made it necessary to furnish general relief supplies to these sections of Yugoslavia, also made it necessary to furnish some special relief for the children.

It was estimated that 150,000 children in Greater Serbia were seriously in need of relief. Since Serbia had been associated with the Allied Powers in the war, it was possible to utilize funds from the Congressional Appropriation for Relief for child feeding in this country. The first program for this work in Yugoslavia was made out

Returning Serbian war prisoners, Yugoslavia.

in April, 1919, and contemplated sufficient food to give 70,000 children one meal a day for three months. This was later supplemented by a second program providing for nearly twice as many children up to September 1, 1919. A third program was designed to carry this work to the end of 1919. The accompanying tabulation shows these three programs as originally planned by the A.R.A.

#### CHILDREN'S RELIEF PROGRAMS FOR JUGOSLAVIA

The difficulties of conducting children's relief in Yugoslavia were probably greater than in any

other country of Europe. This was due chiefly to the lack of transportation and communication facilities, making much of the population almost inaccessible, and, also, to the disorganization and inexperience of the government officials.

The Kingdom of Yugoslavia was an aggregation of territories which had previously had little economic communication. Such transportation systems as were available had been designed to serve another economic territorial scheme. All of these transportation lines were in so dilapidated a condition that they could scarcely function at all. Many places were accessible only by extremely poor mountain roads, some of which could only be traversed by pack animals. Motor transportation was extremely scarce and gasoline difficult to obtain. Telegraphic service was almost useless and mail often took weeks for delivery.

Conditions were somewhat better in the provinces taken over from the old Austro-Hungarian Empire for some attempt had been made there to build better roads and there were available some forms of child welfare organizations which could be used as a basis for this work.

In old Serbia and in Montenegro conditions were far worse. It was estimated that in Serbia alone half of the adult male population had been lost in the two years of the Balkan War and the four years of the World War. This had left some 500,000 fatherless children, of whom many were entirely destitute. The population had always been poor and the officials had difficulty in comprehending the necessity of furnishing any relief.

The lack of local physicians made it impossible to put into effect any policy of selecting children for feeding through medical examination. Similarly, it was impossible to enforce any rigid policy of conducting feeding in central kitchens. Many of the children in greatest need lived in mountain homes miles from the nearest village. Feeding in cities and villages was always conducted in central kitchens where the children were required to eat their meals on the premises. Many of these kitchens consisted only of a huge outdoor kettle to which the children brought their own utensils, and consumed their meals while seated on near-by stones.

In Serbia and Montenegro practically no child welfare organizations existed, and the American officials were required to organize

committees and to supervise the feeding in detail. In Bosnia and along the Dalmatian coast it was possible to make somewhat greater use of local organizations.

The first American supplies for child feeding arrived in the latter part of April, 1919, and feeding was started the first of May. The number of children cared for rapidly increased to approximately 200,000 by September, 1919. The results of the new harvest permitted the number to be reduced to 150,000, but this number had to be continued until May, 1920, when it was possible to make a further reduction to 50,000. The 1919 harvest was disappointing in many respects and, consequently, a much greater amount of feeding was required than had been originally anticipated. The 1920 harvest was much better and it was believed that the country could take care of its own problems after that. The E.C.F., which had taken over the child-feeding work in August, 1919, was able to close its mission in Yugoslavia in August, 1920, but it left sufficient food to continue the feeding up to the end of September of that year. The children's relief work in Yugoslavia supplied a total of approximately 56,500,000 meals.

*Yugoslavian Government co-operation.*—The indifference and inexperience of some of the Yugoslavian Government officials in the early part of the relief work placed many obstacles in the path of the A.R.A. representatives. But later on, most of these officials became much interested and ably assisted in the work. The government was induced to contribute certain food-stuffs for the child feeding and to pay all warehousing and transportation charges and other local expenses. Table 86 shows that the Yugoslavian Government donated a total of 2,634.0 metric tons of food, chiefly flour, for this work with a total value of \$533,677.16.

Excellent co-operation was also secured from volunteer workers, chiefly teachers and priests, who understood the value of this work for their people. While it is impossible to evaluate accurately many of these intangible services, the estimates in the next column made by those in charge of the Yugoslav Mission give some idea of the contributions by the government and the people of that country.

Table 86 shows that the total supplies used for children's relief in Yugoslavia amounted to 6,006.1 metric tons, valued at \$2,188,999.61. Of

#### CONTRIBUTION BY JUGOSLAVIA TO THE CHILD- FEEDING OPERATIONS

Transportation .....	\$ 270,113.00
Warehousing and kitchen expenses.....	45,000.00
Fuel and light .....	25,000.00

Commodity contribution (Table 86)....	533,677.16
<hr/>	
Grand total .....	\$1,326,317.16

this, the Yugoslavian Government furnished 2,634.0 tons, while the A.R.A. supplied 3,054.3 tons, worth \$1,164,617.41, paid for from the Congressional Appropriation for Relief as a direct gift to the children of Yugoslavia. The original allocation of child-feeding supplies to Yugoslavia from the Congressional Appropriation amounted to 3,445.4 metric tons, valued at \$1,335,783.36, but in the latter part of 1919 conditions became so much worse in Austria than in the other countries that a portion of these supplies was transferred there (cf. page 157). The total transfer to Austria from Yugoslavian supplies amounted to 391.1 tons, valued at \$171,165.95.

The European Children's Fund found it necessary to furnish only 317.8 metric tons of supplies to Yugoslavia. These supplies, chiefly sugar and clothing, were valued at \$490,705.04.

The detail of the supplies used for children's relief in Yugoslavia is shown in Table 357, and the further details of arrivals by steamers and sources are shown in Tables 358 to 360. The accompanying summary shows the commodities delivered from each of the three sources.

#### SUMMARY OF CHILDREN'S RELIEF SUPPLIES FOR JUGOSLAVIA

Total net deliveries from American supplies 3,372.1

\* Delivered to all sections of Yugoslavia; added here to include in cross-total.

During the fall of 1919 the field reports showed a great need for children's clothing, particularly in the mountain districts. The American Red Cross, the British Relief, and the activities of many other organizations had helped to furnish clothing to the adult population, but many of the children were still unprovided for. The European Children's Fund, therefore, decided to ship in material for some 70,000 outfits consisting of shoes, stockings, and cloth for coats or suits. The latter were to be made up locally. Unfortunately, this material did not arrive until the first of 1920, and then, through port delays and the difficulties in making up the garments, part could not be delivered before spring. It was then decided to hold the remainder over and distribute it the following autumn.

A further investigation in the fall of 1920 showed that there was still great need for clothing, in addition to the material which the E.C.F. had held over. Arrangements were made by

which the Serbian Child Welfare Association and the American Women's Hospital purchased a quantity of clothing and material from the stocks held by the E.C.F., which they distributed. As shown in Table 86, the total quantity purchased by these organizations was 103.1 metric tons, valued at \$113,081.13. The details of these clothing operations are shown in Tables 360-362 and may be summarized as follows:

\* Special purchase by Dr. Reeder of the Serbian Child Welfare Association.

The relief work in Yugoslavia, during both the Armistice and the Reconstruction Periods was greatly assisted by various charitable organizations operating in Serbia. These included the Serbian Child Welfare Association (an association of foreign child welfare missions operating in Serbia), the Serbian Relief Fund (British), the Society of Friends, the American Red Cross, the American Commission to Serbia for Restoration of Serbian Youth, the Society of Serbian Mothers, the American Women's Hospital, the Dutch Mission, and many other private and public organizations. Without the co-operation of these organizations it would have been impossible to establish and maintain the child-feeding and other relief activities.

As shown by Table 86, the total relief deliveries to Yugoslavia from the Armistice until 1921, as accounted for in this report, amounted to 127,359.0 metric tons of supplies with a total value of \$45,898,651.43. This may be divided,

according to the basis upon which it was delivered to Yugoslavia, as follows:

Sold for cash .....	\$ 533,677.16
Delivered on credit.....	43,290,629.71
Benevolence .....	2,074,344.56
Total .....	<u>\$45,898,651.43</u>

#### OTHER RELIEF

The record above is by no means complete with regard to all of the relief furnished to Yugoslavia during this period. All of the organizations referred to above and many others were making contributions to Yugoslavian relief on their own account. Many commodities were also supplied to Yugoslavia from neighboring countries, such as coal and some foodstuffs from Roumania, Czechoslovakia, and Austria, as well as supplies from Hungary and Italy. No comprehensive report on the extent of such transactions was ever furnished to the Director

General of Relief or to the other organizations considered in this report. The supplies obtained from these countries were paid for chiefly by the shipment of foodstuffs from the Banat region. Every effort was made by the interallied relief missions to encourage private trading. The demoralization of the currency systems in these countries practically reduced such operations to the level of bartering. Producers were unwilling to sell their products for currency, when none of the things which they wanted were to be had in return for this money. Lack of manufactured articles, or of surplus raw material, hindered even this kind of trading.

The military occupation of this country by the Allied armies was also a hindrance to open trading because of the lack of free communication, the strict censorship, and the uncertainty of the future. Under the direction of the relief missions considerable progress was made toward the re-establishment of normal commercial operations.

## LATVIA

(Appendix Tables 369-381)

### ARMISTICE PERIOD

The Republic of Latvia, made up of the former Russian provinces of Courland and part of Livonia, comprises an area of 25,402 square miles, with a population in 1920 of about 1,600,000. This territory, lying in the pathway between northern Russia and Germany, had been fought over seven times during the World War. The hardships which these people had suffered had left them and their country destitute. The death-rate had more than doubled during the winter of 1918-1919, and it looked as if many more must perish before new supplies of food could be produced.

Although the Armistice was signed in November, 1918, the war in these northern countries did not cease. The Russian Bolsheviks were ever pressing westward and the Letts and Germans were in conflict with each other, and with the Russians. Even on April 9, 1919, when the first American Relief Administration representative arrived at Riga, he found the larger part of this country in the hands of German troops, and the city of Riga itself in the possession of the Bolsheviks. The provisional government which had been formed in November, 1918, had been driven out of Riga, and had even been forced to leave the country for a time, but had recently returned and set up the government at Libau. During the next nine months, Latvia was the scene of many bitter armed conflicts between the contending nationalities.

Throughout all of this, the civilian population suffered untold agonies. How badly they suffered may perhaps be illustrated by the following extracts from reports by A.R.A. representatives in Riga. One report written by Captain Evan H. Foreman, May 27, 1919, contains the following:

Freed from Bolshevism, after four months of "Red Terror," the city of Riga, hungry and helpless, without national or city government, turned yesterday to the American Relief Administration as the only barrier against famine. The story of what this once prosperous old Russian port has undergone during the years of the war and the months of the more horrible Bolshevism, when the social structure of the city was turned

topsy-turvy, is incredible to one who is not here on the ground to see what the "red" handiwork has wrought. Although the Bolshevik Army has now been cleared from the environs of the city, the red flag has left Riga only a shell of a city. The people, feeble and foodless, counting themselves fortunate to have survived, stalk the silent streets in a ghastly sort of a way, and hundreds of emaciated children besiege the food kitchens for scraps. Corpses are being cleared from the prison yards, which were strewn with the bodies of intelligent, well-dressed citizens, including seven pastors and many women, all murdered by the Bolsheviks. . . .

Another report from this same city in the early part of June, written by Lieutenant Colonel A. J. Carlson, serves to bring home to us the indescribable suffering of these people.

. . . 5. Scores of children and old people lined up on the quay all day long before the American food ship "Lake Mary" and the British destroyer "Vancouver" in mute appeal for food. They fought for garbage from the ships' kitchens. With old tin cans tied to a stick they picked up the garbage that was thrown overboard, even to raw potato peelings, a piece of gristle or a crust of bread. Children and old women begged for the privilege of sweeping the quay where American flour was being unloaded and put in the warehouse. With their bare hands, or with a rag, they would sweep the stones for the little flour that dusted through the sacks, then pick out the larger particles of dust or dirt and put the remaining meagre gleanings into their pockets, in a handkerchief, or even directly into their mouths. After viewing these distressing scenes, I could not help thinking of my home city (Chicago), where enough good food to support more than half the population of Riga is thrown out as garbage every day. . . .

It was under conditions such as these that Mr. Hoover determined to do what he could to relieve the suffering of these people. The vessel which carried the first A.R.A. representative to Latvia, "Lake Wimico," III, unloaded at Libau 1,166.3 tons of flour, which were turned over to the Latvian authorities. Other commodities were rushed from stocks at Copenhagen, and as soon as the Bolshevik forces were driven from Riga other steamers were directed to that port.

As shown by Table 370, 13,313.7 metric tons of food, valued at \$3,323,818.79, were delivered to the Latvian Government, and paid for out of the Congressional Appropriation. This food was

sold to Latvia on credit, for the general relief of the population.

In order still further to supplement the food supply of Latvia, Mr. Hoover arranged for the U.S. Liquidation Commission to sell the Latvian Government 6,296.0 tons of supplies from surplus Army stocks in France, and he further arranged with the British Government to transport these supplies to Latvian ports. As shown by Table 369, the value of the Liquidation Commission supplies at French ports was \$2,556,952.84, and the United Kingdom expended \$80,920.00 in transporting these. Both transactions were on a credit basis with the Latvian Government.

The A.R.A. undertook to transport 6.6 tons of cod liver oil which were donated for children's relief in Latvia by the Government of Norway.

The total deliveries of relief to Latvia during the Armistice Period, as accounted for in this report, amounted to 19,609.7 metric tons, valued at \$5,961,851.35.

## RECONSTRUCTION PERIOD

### CHILDREN'S RELIEF

The conditions which made it so imperative to furnish assistance to the Latvian people made it doubly important to render special aid to the suffering children who could not stand these hardships as well as the adults. The early esti-

mates indicated that some 30,000 children needed to be fed immediately, and the first program was designed to carry them through the month of May, 1919. Before this was completed a second program was established to supply these children until September and a third program to continue until the end of 1919. The three programs as originally planned by the American Relief Administration were as follows:

CHILDREN'S RELIEF PROGRAMS FOR LATVIA  
(Metric Tons)

Commodity	First	Second	Third	Total
Flour .....	50	58	60	168
Rice .....	5	30	40	75
Beans and peas .....	4	30	40	74
Pork products .....	6	8	20	34
Milk .....	30	45	240	315
Sugar .....	24	27	80	131
Cocoa .....	9	17	40	66
Total .....	128	215	520	863

The needs of the Latvian children proved to be much greater than these programs provided. At a later time it was possible to transfer to Latvia a considerable portion of the supplies originally allotted for children's relief in Northwest Russia, which could not be used there owing to political developments.

Table 87 shows that the total of children's

TABLE 87  
SUMMARY OF TOTAL RELIEF DELIVERIES TO LATVIA  
(For detail see Table 369)

Operation	Total Metric Tons	Total Value
Armistice Period		
American Relief Administration (Congressional Appropriation) .....	13,313.7	\$3,323,818.79
American Relief Administration (freight finance) .....		159.72
U.S. Liquidation Commission .....	6,296.0	2,556,952.84
Total American Relief .....	19,609.7	\$5,880,931.35
United Kingdom (freight finance) .....		80,920.00
Total, Armistice Period .....	19,609.7	\$5,961,851.35
Reconstruction Period		
American Relief Administration (Congressional Appropriation) .....	2,142.3	\$ 753,774.72
European Children's Fund .....	4,020.3	752,076.08
Norwegian Government donation .....	6.6	3,960.00
Latvian Government donation .....	478.6	60,879.55
Total children's relief .....	6,647.8	\$1,570,690.35
A.R.A. Warehouses (food drafts and bulk sales) .....	75.6	\$ 14,759.37
European Children's Fund (sale to Latvian Government) .....	33.5	2,720.62
Total other than children's relief .....	109.1	\$ 17,479.99
Total, Reconstruction Period .....	6,756.9	\$1,588,170.34
Grand total relief deliveries .....	26,366.6	\$7,550,021.69

relief in Latvia from the Congressional Appropriation amounted to 2,142.3 metric tons, valued at \$753,774.72. Table 113 shows that the original allocation from the Congressional Appropriation to Latvia was only 1,763.3 tons, valued at \$632,826.90. Consequently, there was transferred from other allocated destinations a net total of 379.0 metric tons, worth \$120,947.82.

These commodities were received in Latvia from stock originally allocated to Northwest Russia, Esthonia, and Finland. The detail of the various transfers is shown in the arrival statements for the several countries.

Conditions in Latvia continued to be such that the European Children's Fund had to supply relatively large amounts of relief supplies in 1920 and again in 1921. As shown in Table 87, the total deliveries by the E.C.F. comprised 4,020.3 metric tons, worth \$752,076.08.

The Latvian Government was not in a position to render extensive aid in this work, although they did contribute commodities to the extent of 478.6 metric tons, valued at \$60,879.55. Also the Norwegian Government made a contribution of 25.0 tons of cod liver oil for child feeding, of which 6.6 tons were sent to Latvia.

The total supplies used for children's relief in Latvia amounted to 6,647.8 metric tons, worth \$1,570,690.35. With the exception of the relatively small government donations, this all represented a benevolent gift to Latvian children from the United States. The details of these deliveries are shown in Tables 380-381, and may be summarized by commodities as follows:

#### CHILDREN'S RELIEF DELIVERIES IN LATVIA

(Metric Tons)

Commodity	A.R.A.	E.C.F.	Government Donation	Total
Flour .....	260.2	2,114.3	....	2,374.5

Clothing .....	....	57.7	....	57.7
Total .....	2,142.3	4,020.3	485.2	6,647.8

\* Gift from the Government of Norway.

It was the original plan to continue child feeding in Latvia only to the middle of 1920, when it was expected that the new crops would enable the people to take care of themselves. The feeding was discontinued in June, 1920, but the new harvest proved to be insufficient, and, since the provisional government was unsuccessful in arranging foreign credits for food, the children's situation again became very bad in the winter of 1920-1921. In February, 1921, the E.C.F. resumed child feeding in Latvia, furnishing a supplementary meal to about 40,000 children. This was continued until June, 1922, when it was possible finally to withdraw from Latvia.

The peak of the operations in Latvia occurred in June, 1920, when 81,000 children were being fed at the relief kitchens. During the whole period of child feeding approximately 39,616,000 meals were furnished.

*Latvian Government co-operation.*—Although handicapped by lack of funds, the Latvian Government co-operated splendidly throughout this work. They assisted greatly in organizing committees, furnishing quarters, and taking care of the warehousing and transportation of supplies. The estimated value of these contributions may be summarized as follows:

#### CONTRIBUTIONS TO CHILDREN'S RELIEF BY LATVIA

Warehousing, transportation, etc. ....	\$136,925.00
Kitchens and administration. ....	13,160.00
Paid personnel .....	22,942.00
Volunteer services (840 workers) ....	117,946.00
Total services .....	\$290,973.00
Food donations .....	60,879.55
Total* .....	\$351,852.55

\* In addition to these contributions, the Latvian Government donated warehouse space for the storage of relief supplies in transit to Russia, from June, 1922, to June, 1923. Estimated value of contribution, \$24,257.69.

The severe Latvian winters and the ragged clothing of many of the children induced the E.C.F. to plan an extensive clothing program. The major portion of this distribution was carried out in the winter of 1919-1920, but some additional outfits were supplied in 1921. The details of the arrival and the internal distribution of the 57.7 tons of clothing allotted to Latvia are shown in Tables 374 and 381. This distribution may be summarized as follows:

## CLOTHING DISTRIBUTION TO LATVIAN CHILDREN

Commodity	Quantity
Shoes .....	48,736 pairs
Shoe laces .....	35,208 pairs
Stockings .....	45,049 pairs
Woolens .....	80,564 yards
Thread .....	800 pounds
Thread .....	1,000,000 yards
Needles .....	50,000 number
Buttons .....	140,832 number
Total (metric tons) .....	57.7
Total value .....	\$198,763.64

## WAREHOUSES OPERATION

Food draft sales for Latvia were negligible, amounting to only two drafts for a total of \$20. The A.R.A. Warehouses, located at Riga, made bulk sales of 84.0 metric tons of food, valued at \$15,666.15. Of this amount, 8.4 tons were sold for \$926.78 for student feeding in Lithuania (cf. page 219). Of the 75.6 metric tons remaining in Latvia and accounted for in Table 378, approximately 40.0 tons were sold for student feeding

in Latvia as discussed under Special Programs, pages 110-11. The remainder represents sales to the Latvian Government and to a few charitable organizations.

Table 87 shows a further sale to the Latvian Government of 33.5 metric tons of food, chiefly rice, for \$2,720.62 by the E.C.F. This transaction represented a cash sale and was made after the Warehouses operation had been discontinued.

The total relief deliveries to Latvia during the Reconstruction Period amounted to 6,756.9 metric tons, valued at \$1,588,170.34. Adding this amount to the deliveries during the Armistice Period gives a grand total of all relief to Latvia accounted for in this report of 26,366.6 metric tons, valued at \$7,550,021.69. These deliveries may also be summarized as follows:

Sold for cash .....	\$ 69,215.62
Delivered on credit .....	5,961,691.63
Benevolence .....	1,519,114.44
Total .....	<u>\$7,550,021.69</u>

# LITHUANIA

(Appendix Tables 382-391)

## ARMISTICE PERIOD

Lithuania, like the other Baltic countries, had served as the pathway for the contending armies during the conflict between Germany and Russia and in the subsequent encounters with the Bolsheviks. As in the case of Latvia, German troops were in possession of much of the country during the early part of 1919, and their requisitions served still further to deplete the supplies of food. Notwithstanding the great suffering caused by the war, Lithuania was in a better position with respect to food supplies than any of the other Baltic countries. This was due largely to the predominantly agricultural character of the country, with its comparatively rich soil, normally abundant crops, and the absence of large cities or any industrial population of consequence.

The area of present Lithuania is 21,440 square miles, with a population in 1923 of 2,028,971. However, in 1919 the provisional government laid claims to a considerably larger area, with

an estimated population of over 3,000,000, of which nearly two-thirds were under Bolshevik domination. The devastation had been greatest in the east and northeast sections of the country, and in those regions as well as some others there was an acute lack of foodstuffs. The insecure position of the provisional Lithuanian Government and its lack of resources made it difficult to render much assistance.

The first American Relief Administration representative arrived in Memel in March, 1919, and after a tour of investigation reported the need for some relief to prevent acute suffering and starvation. Based on this and the appeal for assistance from the provisional government, Mr. Hoover arranged to deliver a small amount of food to the Lithuanian Government on credit from the Congressional Appropriation for Relief. The "Lake Wimico," III, which had been sent to the Baltic countries, discharged 1,078.5 tons of flour at Memel on April 15, 1919. This was followed by several smaller shipments during May to July, making a total delivery from

TABLE 88

Grand total relief deliveries .....	12,877.7	\$5,980,781.39

the Congressional Appropriation of 3,357.0 metric tons, valued at \$996,093.08. As shown by Table 383, these supplies consisted of 2,565.9 tons of flour, 84.2 tons of rice, 185.1 tons of beans and peas, 425.0 tons of pork products, and 96.8 tons of milk. All supplies were receipted for by Lithuanian officials and were distributed by them under the direction of the A.R.A. officials, but no records of the internal deliveries are available.

In addition to these deliveries, Mr. Hoover arranged with the U.S. Liquidation Commission to sell surplus stock of Army food and clothing to Lithuania to the extent of 8,320.0 metric tons, valued at \$4,414,861.39 at French ports. As in the case of the other liberated countries, the transportation of these Army supplies was a difficult problem. The A.R.A. undertook to transport a portion of these supplies, consisting of 6,096.3 metric tons (cf. page 137), at a cost of \$48,930.00, which was charged against the Lithuanian Government as a further credit from the Congressional Appropriation. Mr. Hoover arranged with the British Government to transport the remainder of these supplies. As shown in Table 88, the total charges for freight and insurance on relief commodities transported for Lithuania by the United Kingdom amounted to approximately \$57,120.00, which was also made on a credit basis and paid from the British relief credits.

The total of all relief supplies furnished to Lithuania under the Director General of Relief amounted to 11,677.0 metric tons, valued at \$5,517,004.47, all of which was furnished on credit.

## RECONSTRUCTION PERIOD

### CHILDREN'S RELIEF

The reports from Lithuania showed that in many districts the people were existing on black bread and thin soup. This diet, at its best, was sapping the health of infants and children. It seemed important, therefore, that some attempt should be made to maintain child health. Programs for child feeding were therefore outlined similar to those for Esthonia. The first shipment of child-feeding supplies for Lithuania arrived at Pillau about the middle of April, 1919, and feeding was started during that month. Consid-

erable difficulty was experienced in organizing this work because of the limited number of citizens able and willing to take charge of the local committees. It was therefore found impossible to organize the child-feeding work in the manner used for most other countries. The government, however, stood ready to assist in every way possible, and the Department of Social Affairs, of the Ministry of the Interior, undertook general direction of the work from the Lithuanian side. For this work the government established four warehouses, located at Mažeikiai, Šiauliai, Panevėžys and Kaunas (Kovno). Relief supplies were transported from the ports to these warehouses by the Lithuanian Government. From these warehouses, supplies were distributed to the towns and districts included in the feeding scheme. This distribution was under the control of the Department of Social Affairs, but deliveries were made only on orders stamped and approved by the A.R.A. representative.

All feeding was conducted in school kitchens, or specially arranged public kitchens, financed and managed by the state or a municipality. In many towns this was the first time in history that the people had been aroused to a sense of their responsibility for their own poor children. One meal a day was served, excluding Sundays.

Table 88 shows that the total deliveries for Lithuanian children's relief amounted to 1,192.3 metric tons, valued at \$462,850.14. Of this amount 1,005.4 tons, worth \$351,789.53, were paid for out of the Congressional Appropriation, and as in the case of children's relief to other countries was a direct gift from the United States. The remainder of the child-feeding supplies, amounting to 186.9 tons and worth \$111,060.61, was furnished by the European Children's Fund. In addition to these amounts, 8.4 tons, valued at \$926.78, were used for student feeding. This represents a bulk sale from the Riga (Latvia) warehouse, and forms part of the student-feeding operations discussed under Special Programs (pages 110-11).

The total supplies furnished to Lithuania during the Reconstruction Period amounted to 1,200.7 metric tons, with a value of \$463,776.92. The details of the arrivals of these supplies at Lithuanian ports are shown in Tables 385-387, while Tables 389-391 show the details of the distribution of these commodities by districts and towns as shown by the feeding-station receipts.

The maximum number of children fed with American rations was 22,900 in August, 1919. In May, 1920, conditions had improved, and the E.C.F. believed it would be possible to withdraw from further work in Lithuania. Feeding ceased at the end of May, 1920, but in the winter of 1920-1921 considerable suffering developed in certain parts of the country and feeding on a restricted scale was again undertaken in March, 1921. Owing to the lack of funds of the Lithuanian Government, it was necessary for the E.C.F. to finance and manage the feeding kitchens during April and May of that year. The small quantity of food remaining at the end of May, 1921, was turned over to orphanages and children's hospitals in Kaunas (Kovno) which had sufficient endowment to insure their operation during the summer. All operations were completed and the American aid withdrawn from Lithuania by August, 1921.

The total deliveries of children's relief supplies and those for student feeding may be summarized as follows:

LITHUANIAN RELIEF IN THE RECONSTRUCTION PERIOD  
(Metric Tons)

Commodity	Children's Relief		Students' Relief	Total
	A.R.A.	E.C.F.		
Flour .....	351.0	42.6	3.2	396.8
Rice .....	83.0	15.9	.8	99.7
Beans and peas ...	77.8	25.4	1.7	104.9
Pork products....	28.0	19.1	.5	47.6
Milk .....	307.5	58.2	1.3	367.0
Cocoa .....	57.2	3.4	.2	60.8
Sugar .....	95.9	9.3	.7	105.9
Soap .....	5.0	....	...	5.0
Clothing .....	....	13.0	...	13.0
Total .....	1,005.4	186.9	8.4	1,200.7

*Lithuanian Government co-operation.*—It will be noted that the Lithuanian Government made no donation of supplies to the child-feeding work such as occurred in most of the other countries. This was due to the very difficult situation in which the government found itself during this period and its lack of finance. The government did, however, do everything possible to encourage and assist in this work and as in other

countries made substantial contributions in intangible services which are difficult to evaluate, including, however, a cash contribution of \$1,000 toward the expenses of the operations. The following estimate was prepared by those in charge of the Lithuanian child feeding:

ESTIMATE OF LITHUANIAN CONTRIBUTIONS TO  
CHILD FEEDING

Cash contribution .....	\$ 1,000.00
Transportation, warehousing, etc.....	13,443.00
Distribution and kitchen expense.....	18,148.00
Administration and personal services...	20,164.00
Total.....	\$52,755.00

*Clothing.*—In the fall of 1919, the distressing appearance of many of the children attending the feeding kitchens showed that there would be great suffering from cold unless some means were found to supply needed clothing. The E.C.F. allocated approximately 12,500 clothing outfits to Lithuania. These were distributed during the winter of 1919-1920. The total clothing distribution may be summarized as follows:

CLOTHING DISTRIBUTED TO LITHUANIAN CHILDREN

Commodity	Quantity
Shoes .....	13,939 pairs
Shoe laces .....	12,528 pairs
Stockings .....	12,588 pairs
Woolens .....	19,044 yards
Thread .....	5,034 spools*
Needles .....	15,000 number
Buttons .....	49,680 number
Total (metric tons) .....	13.0

\* Equivalent to 350 pounds.

#### TOTAL RELIEF

The total deliveries for Lithuanian relief from 1919 to 1921, as shown by Table 88, comprised 12,877.7 metric tons, valued at \$5,980,781.39. This may be divided as follows, according to the basis upon which it was furnished:

Delivered on credit.....	\$5,517,004.47
Benevolence .....	463,776.92
Total .....	\$5,980,781.39

## THE NETHERLANDS

(Appendix Tables 392-393)

### ARMISTICE PERIOD

The responsibility for the food supply of the Allied and Neutral countries during the Armistice Period rested with the Wheat Executive and the other organizations of the Interallied Food Council. However, the extreme shortage in world tonnage immediately after the Armistice frequently made it impossible for the Allied organizations to furnish supplies in time to prevent serious shortages in some countries. As also pointed out on page 128, Mr. Hoover had arranged to have relief supplies shipped from American stocks in advance of arrangements for their distribution, knowing that there would be need for all the food that could be delivered. The early vessels that sailed on the Northern Relief Program were directed to Rotterdam and the cargoes put into storage there until further arrangements had been perfected.

Late in January, 1919, it was found that the Wheat Executive was delayed in making deliv-

eries of flour and grain to the Netherlands, and that a serious shortage would develop in that country unless some assistance could be furnished. The Netherlands Government approached Mr. Hoover asking that they be permitted to obtain a portion of the flour then stored in Rotterdam by the American Relief Administration. They offered to buy this flour for cash and, if necessary, to replace it later from other arrivals.

Mr. Hoover acceded to this request, partly to prevent suffering, and partly to insure stability in the Netherlands, which had to be depended upon to handle many of the relief supplies which were being forwarded through their ports to other European countries.

Altogether, 25,027.4 metric tons of flour were sold to the Netherlands Government for which the American Relief Administration received \$4,219,498.41 in cash. The details of these deliveries by steamers and cargoes are given in Table 393.

## POLAND

(Appendix Tables 394-490)

### ARMISTICE PERIOD

#### CONDITIONS IN POLAND

Of the many countries of Europe in dire need of relief, perhaps none appealed so strongly to the imagination as Poland. This country, famous for its heroic struggles for freedom, had emerged from the chaos of the World War a united and free nation. Under the leadership of M. Paderewski, the foremost pianist of the world, and of the great leader of the Polish Legions, Pilsudski, this little nation was struggling against the almost insuperable odds of famine, bolshevism, unemployment, and financial chaos. Poland had endured all that Belgium would have suffered without the relief work. While the Belgian relief was in progress Mr. Hoover attempted to bring aid to Poland under a similar arrangement with the belligerents. This, however, proved to be impossible because of the attitude of the hostile groups. Nothing could be done until after the Armistice, when the curtain of censorship was raised, exposing the terrible suffering that Poland had endured.

Yet, with it all, the indomitable spirit of this people was unbroken. One little story from an A.R.A. representative is typical of the courage of the common people. A poor woman at Łódź was asked how the people managed to hold out, and she replied: "It is very hard, but give us a little better bread, and a little more bread, and we'll manage for Poland." The meaning of this is better understood when one considers what they were living on. Take, for example, the Polish soldiers: they had very little clothing, often no shoes, and received a daily ration of coffee made from substitutes and a slice of black, stinking bread for breakfast; for dinner a liter of cabbage and potato soup, with occasionally a little piece of meat and another slice of that unthinkable bread; for supper, more so-called coffee and bread. On this they were fighting the Bolsheviks.

The civilian population fared even worse. In Łódź, 300,000 people were out of work, because

the Germans had destroyed all the machinery in the cotton mills. In other cities, conditions were similar. Hundreds of thousands were being fed, if it can be called that, at public soup kitchens, where they received a little vegetable soup and a little of the mixture which passed for bread. They were getting just enough to exist; the death-rate was double or triple the normal rate for adults, and among the children it was four or five times the normal.

Almost immediately after his arrival in Europe, Mr. Hoover arranged to send a mission to Poland to ascertain the needs of the people and to make arrangements for sending supplies. This mission consisted of Dr. Vernon Kellogg, Colonel W. R. Grove, and Captain Chauncey McCormick. From every side they heard the same story: a country devastated by the contending armies, drained of its material resources, and despoiled by the retreating Germans. This committee reported to Mr. Hoover in January, 1919, and immediately steps were taken to alleviate some of the most serious conditions. It was clearly apparent that the greatest distress was in the cities.

The situation in Lemberg was probably the most critical. The city was then under fire from the Bolsheviks, being contested by the Poles and Ukrainians. Only one outlet was maintained, and that by the most strenuous exertions. Trains could be run only at night, and were almost always fired upon. It was not unusual for passengers to be killed or wounded. Food supplies were almost exhausted. The city had been without a drop of milk for weeks, and the children and babies who had survived were in a terrible condition.

#### GENERAL RELIEF

Pending the arrival of shipments in quantities, arrangements were made to purchase some supplies in Switzerland from the American and British Red Cross, to be shipped by rail. A trainload of flour and condensed milk arrived the first week in February, and a portion was rushed to Lemberg, arriving there on the morn-

ing after the municipal stocks were completely exhausted. One can, perhaps, hardly imagine what a carload of condensed milk means to the children of a city which has had no milk of any kind for many weeks.

It was apparent, from the preliminary investigation, that the only route by which supplies could reach Poland in quantity was from the port of Danzig and then through Germany to the Polish border. By the terms of the Armistice, Germany had agreed that supplies to the Polish population could be sent from Danzig. Nevertheless, it required considerable diplomacy, and some threats from the Supreme War Council, to get this provision actually carried out.

The A.R.A. already had a supply of food at Rotterdam and, in order to avoid the long delay necessary in shipping directly from America, it was decided to transship some of these stocks. Accordingly, ten ships of the "Lake" type were chartered from the United States Shipping Board (cf. page 130) and put to work transshipping these supplies to Danzig. During February and March practically all shipments to Poland were from Rotterdam to Danzig. Subsequently, direct shipments from American ports to Danzig were established. Three lake boats arrived in Danzig on February 19, and to the end of that month over 13,000.0 metric tons of American food arrived for the Poles. Although handicapped by the disorganized conditions of the railroads, the scarcity and poor condition of the rolling stock, and especially the numerous annoyances caused by the Germans, through whose territory it must pass, this food was promptly shipped from Danzig to Warsaw and other Polish cities.

The effect on the Poles of such prompt relief from America was wonderful. Food trains were all plainly marked and their passage through the country was triumphal. One prominent Pole remarked: "This is the first time in history that any government has made a promise to Poland and kept it."

The boundaries of the present Poland were not definitely determined, at this time, but for purposes of the relief work it consisted of the following six provinces or districts: the old Kingdom of Poland, the district of Białystok (Province of Grodno), Silesia, Galicia, Poznań (Posen), and West Prussia. This territory contained a population of approximately 27,000,000

people, and had normally perhaps 25,000,000 acres of land under cultivation. Normally, this territory produced about 8,000,000 tons of bread grains, about 2,500,000 tons of oats, and a similar quantity of potatoes. The production had, of course, been seriously decreased by the war. However, the preliminary investigation brought out the fact that the peasants had sufficient supplies to carry them through on a limited ration, and that it was only in the cities and industrial centers that serious suffering would ensue. It was further estimated that probably not more than 6,000,000 persons would be entirely dependent on relief. These were divided somewhat as follows: in the old Kingdom of Poland, about 2,750,000, of which 1,125,000 were in the Warsaw district; in Upper Silesia, about 1,250,000; in Galicia and Silesia approximately 1,000,000; while Posen and the remaining districts contained at least 1,000,000 more persons requiring relief.

On the basis of these estimates, a program for Poland was made up requiring about 55,000 tons of food per month. This was divided as follows: 45,000 tons of breadstuffs, 4,000 tons of beans and rice, 5,000 tons of fats, and 1,000 tons of milk. These supplies, while by no means sufficient to completely ration 6,000,000 people, did supply their cereal and fat requirements to a very large extent. Poland still had rather generous amounts of potatoes and certain vegetables with which to supplement these relief supplies.

This program, made out by the Director General of Relief in February, 1919, called for the delivery of 385,000 metric tons of supplies during the seven months from February to August, 1919. Table 89 shows that the total deliveries of supplies to Poland from all sources during the Armistice Period were 403,184.2 metric tons, exclusive of 16,700.9 metric tons of children's relief supplies from the A.R.A. which were also delivered during the Armistice Period but for reasons explained elsewhere are considered here with the Reconstruction Period.

The total deliveries of 403,184.2 metric tons during the Armistice Period were valued at \$135,023,140.98. The finding of the finance for this enormous operation, when the Polish Government was unable to pay for any of it in cash, was no small undertaking. The \$100,000,000.00 Congressional Appropriation for Relief in Eu-

rope (Act of February 25, 1919) was, of course, available for use in Poland, and was called upon to bear a large portion of the Polish burden. The total amount furnished to Poland from this Appropriation amounted to \$69,724,829.92, and may be summarized as follows:

General relief (credit).....	\$63,191,316.61
Freight finance (credit).....	328,607.29
Freight finance (gift).....	149,063.99
Children's relief (gift).....	6,055,842.03
Total .....	\$69,724,829.92

The deliveries to the Polish Government for general relief from the Congressional Appropriation totaled 260,843.2 metric tons, worth \$63,191,316.61 (Table 89). The detail of these deliveries by steamers and cargoes is given in Table 395. In addition to this, the A.R.A. financed the freight and other charges on various shipments of commodities to Poland to the total value of \$544,035.40. These freight charges, as shown in Tables 143, 144, and 146, may be summarized as follows:

Organization or Source of Supplies	Total Freight
American Red Cross and other benevolent organizations .....	\$149,063.99
U.S. Liquidation Commission.....	328,607.29
Joint Distribution Committee.....	66,364.12
Total .....	\$544,035.40

The A.R.A. paid the freight and other charges on 2,177.6 metric tons of medical supplies furnished by the American Red Cross. The cost of transporting these supplies from New York to Danzig amounted to \$148,819.42. The Administration also paid the freight on the shipments of clothing from New York for the Polish League of Women and the Russo-Carpathian Commission to the amount of \$244.57, making the total transportation charges of Red Cross and other benevolent shipments of \$149,063.99, as shown above. This amount was charged against the Congressional Appropriation as a gift to Poland from the United States Government.

Transportation charges on the shipment of 13,357.2 metric tons of supplies secured by Poland from the U.S. Liquidation Commission amounted to \$328,607.29 which was paid out of the Congressional Appropriation, but as a credit operation with Poland. As explained elsewhere these shipments included 3,357.2 metric tons of

pork products from French ports and 10,000 tons of typhus equipment shipped by rail from Coblenz to Warsaw for the American Typhus Commission in Poland.

The third item of freight charges paid by the A.R.A. includes the cost of shipping 802.8 metric tons of supplies purchased by the Jewish Joint Distribution Committee from the U.S. Liquidation Commission. The detail of this transaction is discussed on page 137 and shown in Table 146. The total cost of this movement was \$66,364.12, which was later paid by the Jewish Joint Distribution Committee.

In order to supplement the supplies going to Poland during the Armistice Period, Mr. Hoover arranged for the U.S. Liquidation Commission (War Department) to sell to the Polish Government on credit 107,126.0 metric tons of surplus Army food, clothing, and other supplies, the total value of which was approximately \$59,365,111.97. As shown by Table 122, the total sales to Poland by the Commission included 44,360.0 tons of foodstuffs, 13,719.0 tons of clothing, and 49,047.0 tons of other non-food commodities, among which were the 10,000.0 tons of typhus equipment and other badly needed hospital and medical supplies.

The Jewish Joint Distribution Committee was one of the relief organizations which began work in Poland immediately after the Armistice. They carried on a large portion of their work in this country on their own account, and of it we have no complete record. As explained elsewhere, this report takes into account only that portion of the Committee's work which was done in close co-operation with the Director General of Relief. The total deliveries to Poland during the Armistice Period by the J.D.C., made under the conditions outlined, amounted to 9,705.8 metric tons, with a total value of \$3,412,497. Table 125 shows the detail by steamers of these deliveries. As noted above, 802.8 metric tons of the supplies delivered by the J.D.C. were purchased from the U.S. Liquidation Commission and transported by the American Relief Administration. All of the Joint Distribution Committee's deliveries to Poland were benevolent gifts.

The American Red Cross donated 4,042.6 metric tons of clothing and medical supplies to Poland, on which the value was approximately \$813,800.00. As shown in Table 394, this consisted of 2,592.6 tons of medical supplies and

## SUMMARY OF COMMODITY DELIVERIES FROM THE UNITED STATES TO POLAND DURING THE ARMISTICE PERIOD\*

\* Exclusive of children's relief.

1,450.0 tons of clothing. The A.R.A. transported 2,177.6 tons of these supplies as a gift to Poland.

The total deliveries from the United States to Poland during the Armistice Period, as recorded in this report, amounted to 381,717.6 metric tons, valued at \$127,326,760.98. The detail of these deliveries is shown in Table 394 and related tables in the Appendix, and may be summarized by commodities as shown above.

Great Britain undertook to assist in the relief of Poland and early in February, 1919, dispatched a relief mission to Warsaw. The work of the United Kingdom, while not so extensive as that of the United States because of her own economic situation, served admirably to fill in the gaps with materials and assistance which the United States could not supply. The total supplies furnished by the United Kingdom during the Armistice Period, according to reports to the Director General of Relief, amounted to 21,462.0 metric tons, valued at approximately \$6,304,620. In addition to these supplies furnished from the British Relief Credits, the United Kingdom also undertook to finance on credit the freight and insurance charges on some 35,000.0 tons of the supplies sold to Poland by the U.S. Liquidation Commission. These supplies, located in French ports, could scarcely have been made available for consumption in Poland except for this British assistance. The total freight and other charges on this movement amounted to \$1,389,920, which was also furnished to Poland on credit.

The small amounts of clothing for use by the Polish League of Women and the Russo-Carpathian Commission (Table 89, page 226) were benevolent donations from these organizations, for which the A.R.A. provided transportation from the United States.

The commodities furnished to Poland by Great Britain are shown in Table 394, and by steamers, so far as this information is available, in Table 396. The total deliveries may be summarized as follows:

## DELIVERIES TO POLAND BY UNITED KINGDOM DURING THE ARMISTICE PERIOD

(Metric Tons)

Commodity	Total
Flour .....	3,239.0
Grain (including oats and seed).....	5,813.0
Beans and peas .....	1,362.0
Pork products .....	1,255.0

## RECONSTRUCTION PERIOD

## CHILDREN'S RELIEF

From this brief description of the food condition in Poland, it may well be imagined that the conditions for growing children were very bad. Rickets, scurvy, and tuberculosis ran riot. Where municipal soup kitchens were maintained, no especial attention could be paid to the needs of children, because the proper supplies were not available. Here, in common with other devastated countries, the children more than the adults showed the effects of undernourishment.

Their faces reflected the haunted look of unsatisfied hunger, they refused to play, or even to smile, but simply sat quietly, showing no interest in anything.

It was obvious that such conditions did not augur well for the future of Poland, nor of Europe. For these reasons, Mr. Hoover arranged to supply certain kinds of food to these children. The first program for the Polish children's relief was arranged the latter part of March, 1919, and the first supplies arrived early in April. This program consisted of 2,506.0 tons of food, worth about \$760,000, and capable of furnishing one

meal a day to 175,000 children for three months. After the work was well organized in the field, it was found that the original program was by no means sufficient to take care of the requirements; consequently, the second program, consisting of 6,230.0 tons of food, was arranged. The Polish Government had become so impressed with this work that it agreed to contribute a similar amount of food from the government supplies. By the middle of July, 500,000 Polish children were receiving one meal a day from the child welfare kitchens.

These two programs were regarded as sufficient to carry the work to the end of August. Before this time the American Relief Administration European Children's Fund had been organized to carry on this work, after the withdrawal of other relief from Europe. A third program was therefore prepared, which, with the aid given by the Polish Government, it was expected would carry the work to the end of 1919.

The detail of these three programs, as originally arranged for Poland, is given in the following table:

CHILDREN'S RELIEF PROGRAMS FOR POLAND

(Metric Tons)

\* To be furnished by the Polish Government.

*Polish Government co-operation.*—From the beginning, the Polish Government took a deep interest in the children's relief work. On March 23, 1919, at a conference between the Polish premier, M. Paderewski, and A.R.A. officials, arrangements were made for the formation of the Central Children's Relief Committee (Centralny Komitet Pomocy Dzieciom), of which Madame Paderewski accepted the presidency. This committee, which functioned under the general direction of the Ministry of Health, was

later (June, 1919) increased in size and the name changed to the National Children's Committee (Panstwowy Komitet Pomocy Dzieciom). Finally, in 1920, at the request of the Polish people, a statute was passed designating this the Polish-American Children's Relief Committee, often referred to in the relief work as the P.A.K.P.D. from the initials of its Polish name (Polsko-Amerykański Komitet Pomocy Dzieciom).

This committee played a most important part in the extensive children's relief work in Poland. They operated a complete system of interior administration, distribution, and control over all supplies received for children's relief. A thorough and regular system of inspection and control was carried out over each unit of the organization, including regional warehouses, regional inspection offices, district committees, subcom-

Children of the Zydaczow Orphan Asylum, Poland, having Easter dinner under supervision of Catholic Sisters.

mittee kitchens, and institutions. The various district and local committees were entirely non-partisan in character, including Christians and Jews, representatives of the various nationalities and social classes. The faithful work of this organization deserves the very greatest praise.

The selection of children to be fed was left to local committees of which one member, at least, had to be a physician. The principle that "food was to go only to the neediest children" was so thoroughly impressed upon the committee and the public that the pressure of public opinion was almost sufficient to insure that the children who most needed the food received it.

Table 89 shows that the total deliveries for children's relief in Poland from the Congressional Appropriation amounted to 16,700.9 metric tons, valued at \$6,055,842.03. This quantity, nearly 4,400.0 tons more than the original programs, fell far short of the terrible needs in this country. The E.C.F., which took over the distribution of these supplies on August 1, 1919, also made vast contributions to the relief program. The E.C.F. furnished a total of 59,242.5 metric tons of relief supplies for Poland, at a total cost of \$16,769,322.10. To this, the Polish Government itself donated commodities to the extent of 44,569.9 metric tons, worth \$6,702,221.02. Various provincial and city governments made further donations of commodities to the extent of 1,040.9 tons, worth \$40,094.51, while

One of the Jewish milk stations in Poland.

the J.D.C. contributed 537.0 tons of milk and soap, worth \$273,555.00.

As shown in Table 89, the total commodities used for children's relief in Poland from 1919 to the close of operations in May, 1922, amounted to 122,091.2 metric tons, valued at \$29,841,034.66. Vast as was this program of public and private charity, it was barely enough to mitigate the most severe suffering.

In the first month of child feeding (May,

1919), approximately 125,000 children were on the rationing list. This number rapidly increased, exceeding the 1,000,000 mark in December, 1919, and reaching its peak in May, 1920, when 1,315,500 children were receiving one meal a day. At this time there were 7,650 feeding stations operating in Poland, of which 6,289 were community kitchens and 1,361 were in children's institutions. Of the total number, 1,492 were operated exclusively for Jewish children.

After May, 1920, conditions improved and the number being fed was reduced to 327,000, but the prolongations of post-war conditions and the Bolshevik invasion made it necessary again to increase the program to 1,246,900 by April, 1921. From then on, the number of children admitted to feeding was gradually reduced, until June, 1922, when all feeding in Poland by the E.C.F. was discontinued. It is estimated that approximately 640,000,000 meals were provided during the thirty-eight months in which child-feeding work was carried on.

The Bolshevik offensive against Poland, which began in May, 1920, imposed a severe strain on the field organization of the child-relief work. During the invasion it was necessary to evacuate the relief supplies in advance of the Bolshevik army. At the beginning of the invasion supplies from the regional warehouses at Minsk, Vilna, Białystok, Brest, Chelm, Kowel, Lwów (Lemberg) were moved to a special depot at Modlin. This evacuation had no sooner been completed than the supplies had to be moved again to Thorn and Danzig. Thorn itself was threatened, and the supplies stored there had to be moved a third time to Danzig. Stocks from Warsaw and Lemberg were also evacuated to Działoszyce and Krakow near the Czechoslovakian border. In August, 1920, when the final attack of the Bolsheviks was repulsed, 6 of the 11 regional warehouses, 6 of the 15 regional offices, and 93 of the 207 district offices were in the hands of the invading army. Due to the heroic work of both Polish and American members of the relief organization, the loss of child-feeding supplies was negligible. However, the occupation of nearly one-half of Poland and the wanton destruction of food and other supplies set back the reconstruction work in Poland by nearly a year's time. This made it necessary for the relief organization to redouble its efforts in the winter of 1920-1921, and introduced the fur-

ther problem of caring for Russian and Polish refugees (cf. pages 111-13).

Reference has already been made to the whole-hearted way in which the Polish people and the Polish Government co-operated in this work of child relief. The total contributions of commodities by the national and local Polish governments amounted to 45,610.8 metric tons, valued at \$6,742,315.53 (Table 89). But in addition to this, the contributions of services and other assistance made the conduct of this work possible. It is impossible to make other than a rough approximation of the value of these intangible services. But the following tabulation, made by men intimately connected with the Polish work, will serve to give some indication of the extent of the Polish co-operation.

POLISH CONTRIBUTIONS TO CHILD RELIEF  
1919 to 1922

Contribution	Value
Rail transportation .....	\$ 1,127,627.00
Storage and handling .....	292,983.00
Administrative expenses .....	129,719.00
Private and local donations.....	1,632,892.00
Motor transportation .....	46,620.00
Telegraph facilities .....	7,016.00
Volunteer services (14,654 workers)	1,343,370.00
<b>Total services .....</b>	<b>\$ 4,580,227.00</b>
<b>Commodities donated .....</b>	<b>6,742,315.53</b>
<b>Total* .....</b>	<b>\$11,322,542.53</b>

\* In addition to the above, the Polish Government donated railway and transportation facilities for forwarding relief supplies to Russia, with an estimated value of \$90,000.

Before the E.C.F. withdrew from Poland in June, 1922, the Polish Government had adopted a plan for a permanent national organization to take charge of the development of child welfare work. Both the E.C.F. and the American Red Cross co-operated with the Polish Government in getting this work established on a permanent basis.

Many other foreign charitable organizations assisted in the children's relief work in Poland. The most important of these was the Jewish Joint Distribution Committee, which, in addition to the general relief during the Armistice Period discussed above, made important contributions of commodities and money for this work. Table 89 shows a contribution to the

E.C.F. of 537.0 tons of milk and soap, with a value of \$273,555.00, which was in addition to important distribution of commodities on their own account, some of which are referred to under Special Programs (page 105) and in the account of the work of the J.D.C. (pages 56-58).

Jewish war orphans of Sambor, Poland, proudly displaying clothing outfits received from the A.R.A.

OTHER RELIEF WORK DURING RECONSTRUCTION  
PERIOD

Food drafts and bulk sales from the American Relief Administration Warehouses (A.R.A.W) in Poland formed an important part of the food relief to that country. Table 89 shows the total food drafts and bulk sales by the A.R.A.W. in Poland as 7,839.5 metric tons, valued at \$1,675,087.41. These were divided as follows:

	Metric Tons	Total Value
Food drafts .....	1,571.3	\$ 624,910.00
Bulk sales.....	6,268.2	1,050,177.44
<b>Total .....</b>	<b>7,839.5</b>	<b>\$1,675,087.44</b>

The total number of food drafts of all sizes amounted to 48,643 (Table 400). These represented chiefly purchases by relatives and friends of Polish people in the United States. Some purchases by charitable organizations, such as the \$175,000 from the Commonwealth Fund for food drafts in Poland, were also included.

Bulk sales were made chiefly to other charitable organizations, which used this method of obtaining supplies rather than attempting to import them with their own organizations. Of the \$401,532.38 supplied for Poland by the

# CHART XI

TOTAL NUMBER CHILDREN AND NURSING MOTHERS FED, MONTH BY MONTH, FROM BEGINNING OF OPERATIONS TO AUGUST 1, 1922 (CF. TABLE 410)

← I ← Period of Organization

← II ← Bolshevik Invasion

← III ← Reorganization after Bolshevik Invasion

← IV ← Systematic Reduction following Improvement in General Economic Situation

Commonwealth Fund, a total of \$168,999.89 (excluding food drafts and clothing) was used for the purchase of bulk food from the A.R.A.W. for intelligentsia feeding. The Jewish Joint Distribution Committee also expended \$50,000 for food relief in Poland as discussed under Special Program. This food was purchased from the A.R.A. Warehouses. Another \$50,000 worth of food was purchased from the A.R.A.W. for Poland by the American Friends Service Committee. Other large sums were used in bulk food purchases by the World's Student Christian Federation, and for refugee relief in Poland after the Bolshevik invasion. These purchases are all discussed under Special Programs.

Some bulk sales of food were also made to the Polish Government to cover certain immediate needs. The most important sale of this nature is that of 7,720.3 metric tons by the A.R.A.W. at Danzig. Of the flour donated by the Polish Government for children's relief (Table 404), there was a total of 7,072.7 metric tons, valued at \$917,059.24, which was later transferred for use as adult relief.

Other items of relief deliveries shown in Table 394 include 30.4 tons of clothing for Polish intelligentsia, distributed through money supplied by the Commonwealth Fund. The detail of this distribution, amounting to \$57,532.49, has been discussed under the Commonwealth Fund. The transaction with the American Friends Service Committee, involving the delivery of 633.3 metric tons of cottonseed meal to Poland, has also been discussed elsewhere.

The details of all arrivals of relief supplies for child feeding, A.R.A.W. operations, and special programs in Poland are given in Tables 398-404. The distribution of all child-feeding supplies through the regional warehouses to the ultimate feeding stations, as shown by the receipts, is given in Tables 407-490.

Tables 408 and 409 give the details of the food draft and bulk sale deliveries to Poland.

#### U.S. GRAIN CORPORATION

The plight of Poland in the spring of 1920 had much to do with the passage of the Act of Congress of March 30, 1920, which authorized the United States Grain Corporation to sell up to 5,000,000 barrels of flour to European governments for cash or on credit in order to relieve the acute food shortage (page 113). Under this

authorization and that contained in the letter from President Wilson of November 14, 1919, the Grain Corporation sold to Poland 2,278,429 barrels of wheat flour (202,564.0 metric tons) for \$24,353,590.97, for which Polish notes were accepted and turned over to the United States Treasury. The Polish Government had no means of providing for the transportation of this flour from American ports and the United Kingdom undertook to provide the freight and other costs connected with this movement. The total value of the freight finance advanced to Poland on credit by the United Kingdom in connection with this transaction was approximately \$8,102,558.32 (Table 89).

This brief account of the major relief activities for Poland shows that a total of 225,861.2 metric tons, valued at \$36,000,682.09, was delivered during the Reconstruction Period outside of the children's relief work. Taking these two activities together gives a total for the entire Reconstruction Period of 347,951.4 metric tons, worth \$65,841,716.75. The major portion of this vast program was either furnished to Poland on credit or given as benevolence. That it has had an enormous influence upon the later development of Poland, and that this assistance was greatly appreciated by the Polish people is clear from innumerable letters and communications from the Polish people and the government.

The human interest connected with this story of tons and dollars has been clearly portrayed by H. H. Fisher in his book on *America and the New Poland*,<sup>1</sup> to which the reader is referred for further details of this effort to assist a struggling and courageous nation in a period of dire distress.

Table 89 shows that the total relief deliveries accounted for in this report, including both the Armistice and the Reconstruction Periods, amounted to 751,135.6 metric tons, valued at the enormous sum of \$200,864,857.73. On the basis of method on which these supplies were furnished to Poland, this total may be divided approximately as follows:

Sold for cash .....	\$ 8,523,937.17
Delivered on credit.....	163,035,725.16
Benevolence .....	29,305,195.40
Total .....	\$200,864,857.73

## ROUMANIA

(Appendix Tables 491-495)

### ARMISTICE PERIOD

#### CONDITIONS IN ROUMANIA

Roumania entered the list of belligerents in the World War at the end of August, 1916. During the fall and early winter of that year the Austro-Germans succeeded in occupying a large part of the country. On December 6, 1916, the capital, Bucharest, was captured and the government moved to Jassy. At the close of the 1916 campaign, the Austro-Germans occupied Wallachia and the Bulgarians occupied the Dobrudja. Behind the Roumanian army, in Moldavia, were vast numbers of Roumanian and Russian refugees. The collapse of Russia in 1917 left Roumania at the mercy of the Central Powers, and in May, 1918, she was obliged to sign the onerous Treaty of Bucharest. Germany remained master of the country until a few weeks before the Armistice of 1918.

In the areas occupied by the Germans all kinds of supplies were extorted from the inhabitants. In the territory retained by the Roumanians the supplies were exhausted because of the excessive population, including, besides the native population, the Roumanian refugees, the Roumanian army; part of the Russian army, and Russian refugees. Transportation was entirely disorganized, and the little rolling stock not taken by the enemy was in a deplorable condition.

With the signing of the Armistice, Roumania laid claim to large areas outside her old domain. In 1914, Roumania consisted of the provinces of Moldavia, Grand Wallachia, Oltenia, Dobrudja, and the department of Durostor. The latter province, including Caliacra, was acquired from Bulgaria during the Balkan War (Treaty of Bucharest, August, 1913). Old Roumania contained 53,489 square miles and had a population of approximately 7,500,000. The present Roumania contains, in addition, the province of Bukovina from Austria, a portion of the Banat and Transylvania from Hungary, and Bessarabia from Russia. This newly added territory

more than doubled the area of former Roumania, and added some 8,000,000 to its population.

The following table gives approximate areas and estimated population of the principal provinces at the time of the Armistice.

APPROXIMATE AREA AND POPULATION OF ROUMANIA  
BY PROVINCES

Provinces	Area in Square Miles	Population
Moldavia .....	15,200	2,145,464
Grand Wallachia .....	22,000	3,298,394
Oltenia .....	10,080	1,413,897
Dobrudja .....	3,240	381,306
Durostor and Caliacra.....	2,969	273,090
Total old Roumania.....	53,489	7,512,151
Banat and Transylvania.....	35,000	5,000,000
Bukovina .....	4,033	818,328
Bessarabia .....	17,143	2,686,600
Total present Roumania.....	109,665	16,017,079

The population of Roumania is essentially agricultural. Of the 7,500,000 people in old Roumania, only about 1,500,000 lived in cities. Only two classes of society existed: one, the small capitalistic ruling class; the other, a large peasant class with a very small income and a very low standard of living. Little in the way of organized charitable relief had ever been attempted by the upper class and if it had not been for the Allied missions it is unlikely that any adequate relief for the suffering peasants would have been undertaken. It should be said that King Ferdinand and particularly Queen Marie always took the greatest interest in the relief of their people. They worked honestly and tirelessly to improve the condition of the country.

The normal annual consumption of cereals in old Roumania, including seed, amounted to about 4,000,000 tons. The peasants lived largely upon corn, supplemented by some dairy and meat products. Roumania was thus able to export from 1,500,000 to 2,500,000 tons of cereals

each year. Nearly one-half of this was wheat. Prior to the war, Roumania ranked sixth among the nations in the export of wheat, and second in the export of corn.

For the three years 1916, 1917, and 1918, the combined grain crop amounted to less than 12,000,000 tons. Of this, the Central Powers are known to have exported 2,540,000 tons. At least 1,000,000 tons would be needed for seed, leaving at best but 8,500,000 tons for the support of the country for the three years. Their normal consumption, during these three years, would amount to at least 11,000,000 tons. There was thus a mean yearly deficit of nearly 900,000 tons, or almost 25 per cent of their requirement.

The live stock presented even a more serious problem. A reduction of more than 80 per cent in the number of domestic animals in old Roumania in 1919 compared with 1916 shows something of the destitution of the country. Conditions in Transylvania were almost as bad as in old Roumania. These facts, together with the appalling shortage of agricultural implements, made the situation very serious. In many places, plows and other implements were totally lacking, and the peasants were forced to cultivate the land with hoes. From such cultivation, it did not seem that much could be expected for the 1919 harvest. The work of the Allied missions in bringing in seed and agricultural implements did much toward increasing the Roumanian crops in that year.

At the time of the Armistice, the Roumanians were among the most destitute peoples in Europe. In many places the peasants had eaten all their seed and were forced to subsist on grass, leaves, and roots. They were without shoes or stockings, and had only patched and ragged clothing.

Dr. A. E. Taylor, who made several trips to Roumania to determine the needs of the people, has the following to say regarding the effect of the German occupation on the food supply:

... The Germans established a definite system of controlled agriculture. Out of the crop a ration of 300-350 grammes of native grain per person per day was allowed, a seed ration set aside and all other grain confiscated. More than this, for the crop of 1917 and 1918, the Germans decided exactly what acreage should be planted to the different grains, and in particular forbade the planting of clover and lucerne seed, the entire stock of which was shipped to Germany. In

addition, each German soldier was permitted, or indeed instructed, to ship home a five-kilo food parcel per week. This came in part out of the 350 gramme ration. All animal products, meats, oils and poultry products were reserved to the Central Powers. This placed the Roumanians theoretically on vegetarianism. . . . When the Roumanians recovered the rule of their country in November, 1918, they faced a greater relative and absolute depletion of the food production of the country than occurred in any other nation at war. . . .

In addition, the Germans had requisitioned agricultural equipment, work animals, and household equipment, until the Roumanian peasant had little left to work with.

Under such conditions there could be no question of the urgent need of relief. From the preliminary survey in January, 1919, the first program for the relief of Roumania was made out. It consisted of 20,000.0 tons of breadstuffs, and 500.0 tons of milk per month. The fulfilment of this program was shared between England, Canada, and the United States. By these deliveries the most serious deficiencies were met.

#### GENERAL RELIEF

Early in January, 1919, the Director General of Relief arranged for the British authorities to undertake a portion of the Roumanian relief and as far as possible to send supplies from Australia. At the same time, two cargoes of flour then on passage from American army stocks in the United States were directed to Constanza. The first of these cargoes arrived at the end of January, and the second by the middle of February. The British also sent in two cargoes of flour in February. The 27,000 tons of flour thus delivered to Roumania before the first of March saved untold suffering in the Dobrudja and along the Danube.

*Relief from the United States.*—In order to finance the delivering of supplies from the United States, Mr. Hoover arranged for Roumania to secure a direct loan from the United States Treasury, under the authority granted by Congress in connection with the Allied countries. Under this authority the American Relief Administration delivered a total of 102,942.5 metric tons of foodstuffs, with a total value of \$23,438,339.29 (Table 90). The detail of these deliveries by steamers and commodities is given in Table 492. These supplies were for the most

part delivered at the Roumanian ports of Constanza, Galatz, and Braila. The Roumanians had some shipping, and Mr. Hoover arranged for them to secure two cargoes ("Bucegi," I and "Regele Carol") from A.R.A. stocks at Constantinople and Derindje. He also arranged for them to send three small vessels to Marseilles and to transport certain supplies which the American Relief Administration had purchased from the U.S. Liquidation Commission. The total deliveries direct to Roumania from United States ports amounted to 93,655.7 metric tons. All of the supplies delivered by the A.R.A. were receipted for by Roumanian Government officials. The internal distribution was taken care of by the Roumanian Government but under general supervision of the A.R.A., who saw to it that the supplies reached the people in distress. No detail of the internal distribution of these supplies is available.

As in the case of other countries seriously needing relief, arrangements were made by which the U.S. Liquidation Commission sold surplus United States Army stocks to Roumania on credit. Table 90 shows the total of these sales to be 22,331.0 metric tons, worth \$13,012,689. Of this amount, 17,596.0 tons were food supplies, 4,500.0 tons were clothing, and 235.0 tons were miscellaneous non-foods (Table 122).

The Jewish Joint Distribution Committee made certain deliveries of commodities for Roumanian relief in co-operation with the Director General of Relief. The total of these deliveries, according to reports received, amounted to 382.0 metric tons of food, clothing, and soap, valued at \$256,000. The detail of these shipments is shown in Table 124.

The total deliveries to Roumania in the Armistice Period from all American sources working in co-operation with the Director General of Relief amounted to 125,655.5 metric tons, worth \$36,707,028.29.

*Relief from the British Empire.*—The United Kingdom assumed a relatively large responsibility for Roumanian relief. Early in 1919, in response to the reports of the serious food conditions in that country, the United Kingdom directed two cargoes of flour to Constanza. These two cargoes were unloaded early in February and were among the first relief cargoes to be actually distributed to any of the relief terri-

tories. During April, May, and June, 1919, the United Kingdom sent eight other cargoes to Roumania. These cargoes consisted chiefly of wheat and flour from Australia and from Indian ports. The total deliveries by the United Kingdom amounted to 59,248.0 metric tons, with a total value of approximately \$10,004,628. Of this amount, 7,000.0 tons were non-food material, chiefly railroad supplies, which were so badly needed in Roumania.

The detail of these deliveries by the United Kingdom is given in Table 493. Included in these supplies were 300.0 tons of meats and 5,240.0 tons of miscellaneous foods from British army stocks in Eastern Europe.

In addition to the delivery of these commodities, the United Kingdom financed the freight and other charges on a large portion of the commodities sold to Roumania by the U.S. Liquidation Commission. The expenditures for this purpose amounted to approximately \$21,420, making the total contribution to Roumanian relief by the United Kingdom \$10,026,048. This relief was extended on a credit basis and paid for from the British Relief Credit.

In March, 1919, Canada agreed to loan Roumania the sum of \$5,000,000 with which to purchase Canadian food supplies. To the end of August, 1919, 38,184.0 metric tons had been shipped from Canada. The value of these commodities was approximately \$3,836,600. The supplies from Canada consisted of wheat and wheat flour, and a partial cargo of agricultural implements, estimated at about 4,100.0 tons. Newfoundland also sent one cargo of fish, with a value of \$1,566,040. The detail of these shipments is given in Table 493.

The total relief sent to Roumania by the British Empire during the Armistice Period amounted to 99,788.0 metric tons, with a total value of \$15,428,688.

The combined relief from the United States and the British Empire during the Armistice Period, as accounted for in this report, amounted to 225,443.5 metric tons, valued at \$52,135,716.29.

*Other relief for Roumania.*—Aside from Great Britain, none of the other Allied countries assisted in the relief of Roumania. The Director General of Relief, adopting the same principles used with the other relief territories, made every

effort to re-establish trade with the neighboring states. Early in 1919, it was seen that the best solution of the Roumanian food situation was the shipment of supplies from the Banat region, a part of which was already occupied by Roumania with the remainder claimed by Jugoslavia. The chief difficulty here was the lack of transportation facilities. Another difficulty was the arrangement of satisfactory payment. The peasants, who held the surplus supplies of the Banat, were unwilling to part with them in return for the depreciated currency. What they wanted in return for their food was shoes, clothing, and implements. None of these were available. Many efforts were made to promote the exchange of Roumanian salt, petroleum, and other products for food from Serbia. Owing to friction between the two nations and the difficulties of transportation, only partial success attended these efforts. No satisfactory record has been obtained as to the amount of commodities received by Roumania through these exchanges, but it is known that several thousand tons of food were actually secured.

In March, Mr. Hoover proposed a Roumanian Commission for Food and Credit, similar to those

described for other countries. By these and other means, very definite steps were taken to re-establish Roumanian trade and to place the country upon a stable commercial basis.

It should, of course, be borne in mind that here, as in most of the other European countries, large quantities of materials and other forms of relief were supplied by other organizations not necessarily co-ordinated with the Director General of Relief. In Roumania, for example, the American Red Cross and the British Red Cross distributed large quantities of food and clothing, in addition to the medical and hospital relief. The same was true of many other organizations which did not report through the office of the Director General of Relief, and hence are not included here.

## RECONSTRUCTION PERIOD

### CHILDREN'S RELIEF

In many regions the diet almost exclusively of corn and the lack of dairy products had resulted in numerous cases of pellagra. Everywhere evidence of malnutrition in children was

Roumanian Government donation.....	2,327.0	1,024,322.26
Total children's relief.....	3,759.3	\$ 1,501,595.02
Grand total relief deliveries.....	229,202.8	\$53,637,311.31

to be found and reports showed that thousands had died from lack of nourishment.

The first report indicated that in Wallachia there were 60,000 children in need of assistance, while in Moldavia there were 40,000 more, with large numbers in the Dobrudja.

Mr. Hoover's plan for the relief of the children in Roumania met with the hearty response of the Queen. Owing to her tireless efforts, this movement was organized on a sound basis. An influential committee was formed, known as the Roumanian Children's Relief Association. The Queen secured the co-operation of the Roumanian Government which appropriated currency for local expenses and transportation. She also obtained their promise to supplement the American children's relief supplies with large quantities of foodstuffs. The Queen also issued a proclamation requesting each family to refrain from one meal per month and to contribute the proceeds to the relief of the suffering children.

The first program for children's relief in Roumania contemplated feeding about 70,000 children for three months. The second program contained supplies for 200,000 children. Supplies to cover both of these programs were shipped from America, but, owing to the rapid recovery of the country, a portion of these supplies was diverted to other destinations.

Many difficulties had to be overcome in the distribution of these children's relief supplies in Roumania. In the first place, the total disorganization of the railroad system rendered it difficult to get the supplies away from the ports. At the time of the Armistice, Roumania had only 216 locomotives left in the country. Of these, only 62 were in actual operation in April, 1919. The others could not be used because the copper, tin, nickel, etc., needed for their repair could not be obtained.

Other difficulties were encountered in securing transportation from rail distributing points to small places. The peasants were not accustomed to gifts or benevolence in any form and were suspicious. They could not understand that Americans were coming to their country to help them in their difficulty without the expectation of any return. A report, dated June 10, 1919, from Colonel W. N. Haskell, in charge of the Roumanian relief work says:

. . . . The people in the country have no notion of charity and will not furnish ox-teams, kettles, wood, or even axes to chop the wood for the establishment of canteens in their own villages to feed their own children. It is a most remarkable country. . . .

In one way or another, these difficulties were overcome and by July, 1919, there were 530 canteens in operation, giving one meal a day to over 200,000 undernourished children. The food delivered for the relief of the Roumanian children amounted to 1,432.3 tons, valued at \$477,272.76. These supplies were paid for from the Congressional Appropriation for Relief and were given to the Roumanian people without any obligation on the part of Roumania toward the United States. The detail of the arrivals of supplies for child feeding is shown by steamers and commodities in Table 494, while the detail of the internal deliveries is given in Table 495.

Central warehouses for child-feeding supplies were established at Constanza, Braila, and Bucharest, from which distribution was made to interior points. All food sent to subcommittees was convoyed by an officer of the Roumanian army. He was held strictly responsible to the A.R.A. officials for each kilo turned over to him, and was required to return receipts signed jointly by the prefect of the district and the subcommittee for child feeding. All district committees were required to account for receipts and issues weekly. One meal of approximately 750 calories was given to each child daily except Sunday.

*Roumanian Government co-operation.*—As indicated above, the Queen had been able to secure the co-operation of the Roumanian Government in this work, and they made very substantial contributions of commodities for the child-feeding work. Table 90 shows the total commodity donation by the government as 2,327.0 metric tons, worth \$1,024,322.26. This large contribution was made possible because Roumania is a surplus food-producing area, and with the harvest of 1919, meager though it was, conditions in the country improved very greatly.

In addition to these commodity donations, the Roumanian Government paid for transporting and warehousing the supplies, and local committees carried on the work of the canteens. The following is an estimate of the value of these services:

## ROUMANIAN CONTRIBUTIONS TO CHILD FEEDING

Transportation and warehousing.....	\$ 25,648.00
Administrative expenses .....	15,000.00
Local donations (towns and districts)...	151,000.00
Donation from Princess Cantacuzene....	378.00
Volunteer services (3,000 workers).....	90,000.00
<b>Total .....</b>	<b>\$ 282,026.00</b>
Commodity donations .....	1,024,322.26
<b>Grand total .....</b>	<b>\$1,306,348.26</b>

The details of the commodities used in Roumanian child feeding may be summarized as follows:

## ROUMANIAN CHILDREN'S RELIEF

May to November, 1919

(Metric Tons)

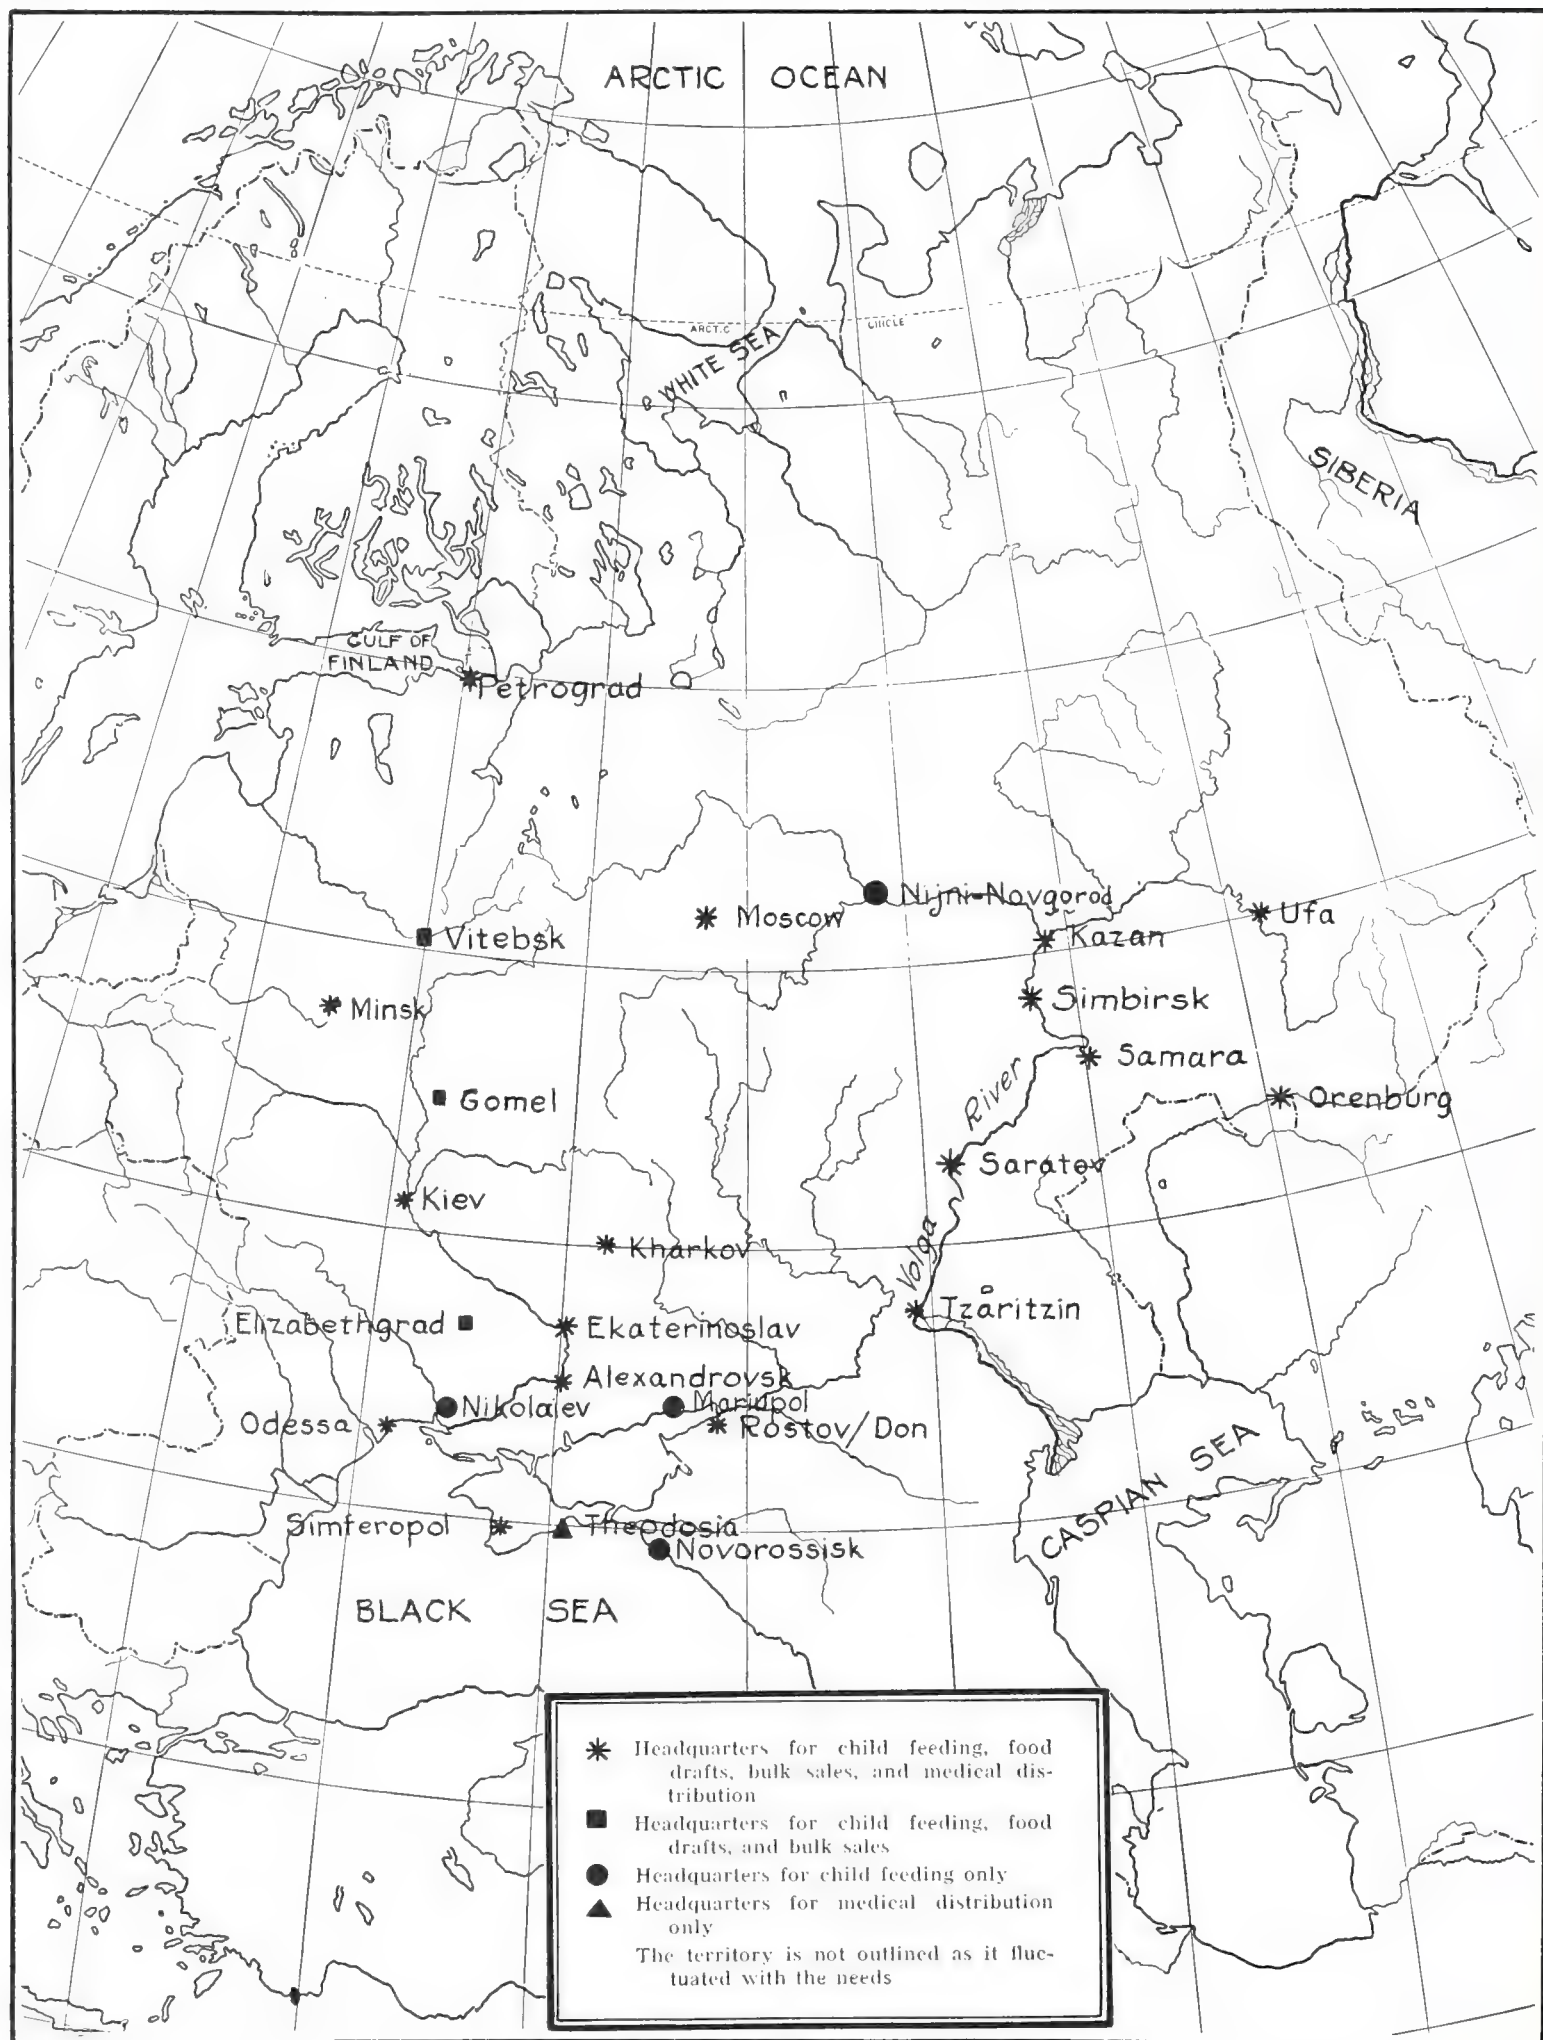

Commodities	American Relief Administration	Roumanian Government	Total
Flour .....	250.0	492.0	742.0
Rice .....	170.0	.....	170.0
Beans and peas.....	130.0	492.0	622.0
Pork products .....	70.0	161.0	231.0
Milk .....	185.0	1,090.0	1,275.0
Cocoa .....	220.9	.....	220.9
Sugar .....	406.4	.....	406.4
Miscellaneous food... ..	.....	92.0	92.0
<b>Total .....</b>	<b>1,432.3</b>	<b>2,327.0</b>	<b>3,759.3</b>

Owing to the fact that food conditions improved greatly in Roumania after the 1919 harvest and that imported food was needed so much more in other countries, it was decided to discontinue child-feeding work in Roumania after November, 1919. The European Children's Fund took over the work of distributing children's relief in August, 1919, but they made no further contributions of commodities beyond the shipments made during the Armistice Period, paid for out of the Congressional Appropriation as a gift to Roumanian children. During the seven months of the child-feeding work in Roumania supplies for approximately 24,515,000 meals were distributed, which prevented great suffering among these children.

As shown in Table 90, the total relief deliveries to Roumania during the Armistice and the Reconstruction Periods, as accounted for in this report, amounted to 229,202.8 metric tons, valued at \$53,637,311.31. Considering the basis on which this relief was furnished to Roumania, the total may be divided as follows:

Sold for cash.....	\$ 1,024,322.26
Delivered on credit.....	51,879,716.29
Benevolence .....	733,272.76
<b>Total .....</b>	<b>\$53,637,311.31</b>

Map of Russia showing principal warehouses, feeding and distributing centers.

## RUSSIA

### ARMISTICE PERIOD

#### CONDITIONS IN RUSSIA

Relief deliveries to Russia, or to different portions of that great country, were made at various times and for various reasons between 1919 and 1924. By far the most important of these operations was the relief furnished to Soviet Russia during the terrible famine which afflicted that country in 1922 and 1923. The earlier deliveries, some of them relatively large and important, were all made during the Armistice Period or immediately thereafter. Table 91 summarizes the several Russian relief operations considered in this report and shows that the total deliveries for that account amounted to 768,159.9 metric tons, valued at \$78,305,318.49. This is by no means all of the relief supplied to Russia during this period. As explained in other sections of this report, such organizations as the Jewish Joint Distribution Committee, the American Red Cross, the American Friends Service Committee, and a great many other organizations were furnishing food and medical relief to Russia on their own responsibility—relief which is not reported in the present volume.

TABLE 91

SUMMARY OF TOTAL RELIEF DELIVERIES TO  
RUSSIA, 1919-1924  
(For detail see Table 496)

Accounts	Total Metric Tons	Total Value
Northwest Russia .....	19,010.7	\$ 5,890,076.54
Kouban .....	1,592.5	578,490.50
Siberia .....	40.0	75,000.00
Ukraine .....	5,550.0	8,500,222.67
Volunteer Army .....	394.0	86,680.00
Soviet Republics .....	741,572.7	63,174,848.78
Total .....	768,159.9	\$78,305,318.49

The problem of Russian relief was complicated by the fact that in 1919 civil wars raged throughout the former Russian Empire. The

Bolshevist seizure of power in November, 1917, their dispersion of the All-Russian Constituent Assembly, their repudiation of foreign loans and expropriation of property, their separate peace with the Central Powers, their program of world revolution, brought on conflict with national groups which demanded complete separation from Soviet Russia, with political groups opposed to the Bolshevist program, and finally with the Entente Powers. By the time the Peace Conference met, Allied representatives had been withdrawn from Soviet territory and Allied troops were in conflict with Red forces in different parts of Russia. At the same time the Allies were giving moral and material support to the national and anti-Bolshevist governments which had repudiated the Bolshevist external and internal program. During the early weeks of the Peace Conference three attempts were made to re-establish relations with the Soviets, and to put an end to the civil wars. The proposal to have all the Russian governments meet representatives of the Allies at Prinkipo, and the visit of Bullitt and Steffens to Moscow to find out the peace terms of the Bolsheviks came to nothing.<sup>1</sup> In March, 1919, Mr. Hoover proposed to the Allied Supreme Council a plan of relief to all Russia, Bolshevist and non-Bolshevist alike, under the direction of Dr. Nansen. This plan encountered strong opposition in Paris and elsewhere. The Bolshevist conditional acceptance, long delayed, had a hostile reception in the Supreme Council, and Mr. Hoover's efforts to save the plan failed. (Cf. page 244.) The failure of this plan did not affect relations between the Supreme Council and the non-Bolshevist governments of the Baltic States, the Ukraine, the Kouban, and Siberia, and it was to these territories where suffering was intense that relief was given in 1919.

<sup>1</sup> H. W. V. Temperley, *A History of the Peace Conference of Paris* (London, 1924), Vol. VI; *Russian-American Relations* (New York, 1920), Documents 129-133; W. C. Bullitt, *The Bullitt Mission to Russia* (New York, 1919).

## NORTHWEST RUSSIA

(Appendix Tables 497-506)

## ARMISTICE PERIOD

Reference has been made in preceding sections of this report to the condition of the population in the northern Baltic countries of Esthonia, Latvia, and Lithuania in the spring of 1919. The terrible situations pictured there were not confined to those countries but were even worse in the sections of Russia between the Esthonian border and the Petrograd - Moscow railway. Most of this territory had been occupied by German troops prior to the Armistice of November 11, 1918, after which the German troops withdrew. Later, in addition to the local forces a Russian anti-Bolshevist military force was organized in this region under the leadership of General Yudenitch. In May and June, 1919, this army succeeded in driving the Soviet forces out of a considerable area and in taking Narva and Jamburg.

The retreating Soviet troops had sacked the towns, destroyed property, and carried off most of the already scanty stocks of food. Reports which came to the Director General of Relief indicated that food conditions in this area were as bad as or worse than anywhere else in Europe.

By virtue of the relations existing between the Northwest Government and the Allied and Associated Powers it was possible to deliver relief to civilians in this area. Contracts similar to those made with the other governments of the liberated regions of Central and Eastern Europe

were made with the representatives of the Russian Northwest Government. The first cargo delivered under this arrangement was that of the "Lake Strabo," which arrived at Reval, June 16, 1919, with 633.3 tons of flour. From that time until the first of August, 1919, a total of 17,950.4 metric tons of food, valued at \$5,285,380.17, was delivered to the Northwest Government and assisted in alleviating some of the suffering of the people in this region. The details of these deliveries by steamers and commodities are shown in Table 498.

The condition of these people with regard to clothing was little better than that with regard to the food supply. Mr. Hoover arranged with the U.S. Liquidation Commission to sell the Russian Northwest Government 200.0 tons of clothing and 510.0 tons of miscellaneous supplies, for which they agreed to pay \$428,299.46 (Table 92). The A.R.A. transported the major portion of these commodities from France to northern Russian ports at a cost of \$52,188.18. This made the total relief delivered to Northwest Russia during the Armistice Period 18,660.4 metric tons, with a value of \$5,765,867.81. The Russian Northwest Government gave notes for this amount to the organizations making deliveries, all of which were turned over to the U.S. Treasury. At the end of 1919, the fortunes of war turned against General Yudenitch, and this territory again came into the possession of the Soviet authorities.

TABLE 92

SUMMARY OF TOTAL RELIEF TO NORTHWEST RUSSIA  
(For detail see Table 497)

Operation	Total Metric Tons	Total Value
<b>Armistice Period</b>		
American Relief Administration (Congressional Appropriation) .....	17,950.4	\$5,285,380.17
American Relief Administration (freight finance).....	.....	52,188.18

Grand total relief deliveries.....	19,010.7	\$5,890,076.54

## RECONSTRUCTION PERIOD

## CHILDREN'S RELIEF

The terrible condition of the children in this Northwest territory led the A.R.A. to undertake a child-feeding program similar to those in the other Baltic countries. A central committee was formed of leading citizens and under their guidance local committees were organized. Feeding began on July 4, 1919, and continued under the European Children's Fund until after this territory was captured by the Bolsheviks.

The A.R.A. delivered a total of 305.2 metric tons of food for child feeding, with a total value of \$111,705.13. This was paid for out of the Congressional Appropriation for Relief as a gift from the United States Government to Russian children. The E.C.F. supplemented these supplies with 12.8 tons of food and clothing, worth \$6,223.60, while the Russian Northwest Government contributed 32.0 tons of flour and 0.3 tons of pork products, thus making a total of 350.3 metric tons of supplies for children's relief with a total value of \$124,208.73.

The maximum number of children fed in this territory reached 8,000 in July and again in October, 1919. During the eight months of feeding, the estimated number of meals provided was 1,286,000. In addition, the E.C.F. provided shoes, stockings, and overcoats for some 1,500 Russian children.

With the retreat of the Northwest army in October, 1919, a vast number of refugees fled across the Esthonian border, where their condition was extremely pitiful. The E.C.F. persuaded

the Esthonian Government to provide camps for these refugees. The children were fed under the direction of the Esthonian children's relief committee.

The children's relief in this part of Russia was accomplished with extreme difficulty, due to the rapid movement of troops, the shifting of the children from place to place, and the general disorder in which the work had to be carried on. At times, the food issued was woefully insufficient for proper nourishment, and often the parents were unable to supplement the ration with other food, but at all times it represented at least the margin which prevented actual starvation.

The details of the arrivals of relief supplies for child feeding in Northwest Russia are given in Tables 500 to 503, while Table 505 gives the internal distribution of these supplies as shown by feeding-station receipts. Table 93 shows the commodities delivered in this territory during the whole of the relief operations.

As shown by Table 92, the total deliveries to Northwest Russia during the existence of the provisional government amounted to 19,010.7 metric tons, valued at \$5,890,076.54. The major portion of this was furnished on credit for which payment will probably never be made, but having regard to the basis on which it was supplied the total may be divided as follows:

Sold for cash .....	\$ 6,280.00
Delivered on credit .....	5,765,867.81
Benevolence .....	117,928.73
Total .....	\$5,890,076.54

## THE KOUBAN

(Appendix Tables 507-509)

### ARMISTICE PERIOD

The Kouban in southern Russia is one of the great surplus food-producing areas of Russia. Even in this region, however, there was considerable suffering in the cities after the Armistice, because of unemployment and because the peasants refused to sell their food for the local currency. The war had depleted the country of all manufactured articles, such as clothing, tools, implements, etc. The peasants found that none of the things they wanted were to be purchased with the currency, and hence preferred to keep their grain.

Partly in order to supply this demand of the peasants, and partly to secure cheaper grain for Armenia, the A.R.A. chartered the steamship "Kickapoo" and loaded a cargo of miscellaneous supplies, including hardware, implements, clothing, etc., purchased from the U.S. Liquidation Commission at Marseilles. The "Kickapoo" proceeded to Novorossisk on the Black Sea, where 915.5 tons of these miscellaneous supplies, worth \$444,718.50, were traded to the peasants for wheat which was sent to Armenia (cf. page 150). In this way the A.R.A. was able to secure some 8,000.0 tons of wheat for Armenia at a cost of less than \$500,000, while at the same time the peasants of the Kouban were supplied with materials they needed so badly. To have supplied 8,000.0 tons of wheat for Armenian relief from the United States would have cost upward of \$1,500,000. The transaction thus resulted in a very significant saving.

In addition, the "Kickapoo" carried 577.0 tons of clothing for the Kouban, which represented a donation by the American Red Cross. The value of this clothing was approximately \$123,300.

The United Kingdom also donated 100.0 tons of clothing and miscellaneous supplies to the people of the Kouban. The value of these commodities was approximately \$10,472.

The total relief to the Kouban amounted to 1,592.5 metric tons, valued at \$578,490.50. Of this, \$444,718.50 may be regarded as a cash transaction, while \$133,772.00 represented direct gifts.

These transactions are summarized in the following table.

TABLE 94  
SUMMARY OF TOTAL RELIEF DELIVERIES  
TO THE KOUBAN  
(For detail see Table 507)

Operation	Total Metric Tons	Total Value
Armistice Period		
American Relief Administration (cash settlement) . . . .	915.5	\$444,718.50
American Red Cross . . . . .	577.0	123,300.00
Total American relief . . . .	1,492.5	\$568,018.50
United Kingdom . . . . .	100.0	10,472.00
Grand total relief deliveries . . . . .	1,592.5	\$578,490.50

## SIBERIA

(Appendix Table 510)

### ARMISTICE PERIOD

In the middle of 1919, the American Jewish Joint Distribution Committee sent 40.0 tons of clothing to Siberia by way of Vladivostok to relieve some of the distress reported there. This

shipment was reported to the office of the Director General of Relief and hence is included here, although it was undertaken entirely on the responsibility of the Joint Distribution Committee. The total value of this shipment was \$75,000. (Cf. Table 124.)

## UKRAINE

(Appendix Table 537)

## ARMISTICE PERIOD

Reports received by the Director General of Relief during the Armistice Period indicated that the peasants in Ukraine, like those in the Kouban, were suffering for lack of clothing and manufactured articles. A sale to the Ukrainian Government of 5,550.0 tons of miscellaneous commodities was arranged with the U.S. Liquidation Commission. This transaction included

4,000.0 tons of surplus Army clothing, and 1,550.0 tons of other non-foods which included medical supplies, motor trucks, and building materials. The total value of the commodities sold to Ukraine was \$8,500,222.67. This sale was handled through a co-operative society known as *Ukrailian*, which operated for the government and which turned over notes of the Ukrainian Government in payment to the U.S. Liquidation Commission.

## VOLUNTEER ARMY

(Appendix Table 538)

## ARMISTICE PERIOD

In spite of the fact that the Kouban had a large surplus of grain, there was great suffering in the cities, because the peasants would not part with their grain for the local currencies. In May, 1919, reports to the Director General of Relief showed the need for some assistance to these people. Great Britain had established a military mission with headquarters at Ekaterinodar, some seventy miles northeast of Novorossisk, and were co-operating with General Denikin, who had organized a volunteer army in southern Russia and had established a pro-

visional government. The British supported a request from the Denikin Government for supplies of flour to relieve some of the civilian suffering in this territory.

Acting upon the request of the Supreme War Council, the A.R.A. sent 394.0 metric tons of flour from stocks at Constantinople to Novorossisk on the British transport "War Pointer." This flour was turned over to the Russian Volunteer Army (Denikin Government), from whom obligations to pay the United States were obtained. This sale for \$86,680, like those to other newly formed governments, was a credit transaction, paid for out of the \$100,000,000 appropriation for European relief.

## SOVIET REPUBLICS

(Appendix Tables 511-536)

## RECONSTRUCTION PERIOD

The story of the food crisis in Soviet Russia and the attempt made by the United States and others to alleviate the suffering there in 1921 to 1923 has been told by many competent writers, including Fisher,<sup>1</sup> Golder and Hutchinson,<sup>2</sup> and others. No attempt will be made to repeat this

story here, but a few of the outstanding events will be discussed briefly in order to give some basis for understanding the necessity which caused the American Relief Administration to pour hundreds of thousands of tons of food and millions of dollars into this territory.

In the first place, it must be understood that food difficulties in Russia began long before the autumn of 1921. As a matter of fact, they began almost immediately after the declaration of war in 1914. These early difficulties were not due to

<sup>1</sup> H. H. Fisher, *The Famine in Soviet Russia, 1919-1923* (Macmillan, 1927).

<sup>2</sup> Frank A. Golder and Lincoln Hutchinson, *On the Trail of the Russian Famine* (Stanford University Press, 1927).

a food shortage, for Russia was always a surplus food-producing region. But the disturbance of the war was sufficient to upset the transportation and financial systems of the country. This, together with the corruption and incompetence of the administration, soon resulted in a deficient supply to the cities and in rising prices. The revolution of March, 1917, which overthrew the Czar, was hastened at least, if not actually precipitated, by "bread riots" in Petrograd and Moscow. The inability of the provisional government to handle the food situation, as much as anything else, made possible the *coup d'état* of October 25, 1917, known as the Bolshevik Revolution. Lenin and his grimly competent associates were abler and more determined than their predecessors. But they, too, failed to solve the food situation, although they did control distribution, and thus used food as a weapon to compel support and to thwart opposition.

Russian food was a problem of no small moment at the Peace Conference in Paris. The Supreme Council made several attempts to grapple with the Russian question, but all were unsuccessful. The last of these attempts was inspired by Mr. Hoover, who, as Director General of Relief, had received disquieting reports about the Russian food situation. In a letter to President Wilson on March 28, 1919, Mr. Hoover described the dangers to the rest of Europe and to the world in the fomenting caldron on the east. He pointed out the suffering which the Russian people were enduring, and, with the thought that the Soviet Government would welcome assistance in their difficulties, he proposed that a neutral international food commission should be organized, patterned after the Belgian relief, which could assist the Russian people and thus perhaps give them an opportunity to work out their social re-organization. This plan was approved by President Wilson, and at Mr. Hoover's request Dr. Fridtjof Nansen, of Norway, undertook to organize such a commission. Nansen's proposal was given formal approval by the Council of Four on April 9, 1919, and the plan was transmitted to the Soviet authorities for their views. The Bolshevik reply was a bitter criticism of the Allied policy toward Russia and a refusal either to cease hostilities or to divorce political control from the distribution of foodstuffs. Since the Allied Powers would not consider turning over vast quantities of foodstuffs

to any country in a state of civil war without retaining power to see that the relief went actually to the civilian population, this reply ended any further attempt to furnish relief to Russia during the Armistice Period.

In the summer of 1920, during the Russian invasion of Poland the European Children's Fund sought permission from the Soviet Government to continue the operation of the child-feeding stations in eastern Poland, occupied by the Bolsheviks, and offered to extend the child-feeding work to such Russian cities as might require assistance, providing that assurance be given that all feeding should be carried on "without regard to race, politics, or religion." The reply from the Soviet Government declared that the government had departments fully adequate to take special care of children, and that any relief brought in from the outside must be placed under control of the Soviet relief organization. This rebuff effectively closed the door to any further negotiations.

#### THE GREAT FAMINE

In the spring of 1921, Russia suffered an exceptionally severe drought which totally ruined the crops in the Volga region and in the districts to the east. Vast areas of that fertile country failed to return the seed that had been used in planting. The news of this disaster was carefully hidden behind the wall of censorship, which permitted only dissemination of news that the authorities believed desirable for the world to know. By June, 1921, however, the situation began to get beyond control. The hunger and panic of the peasants threatened to depopulate the villages and overwhelm the cities with starving and diseased refugees. The censorship had to be relaxed, and an official statement admitted that famine raged among a population of "about 25,000,000." The European press began to publish grim rumors of horrors, but the Soviet authorities did not bring themselves to the point of making an appeal for help until July 11. Even then, the Soviet Government did not ask directly, but permitted Maxim Gorky to issue his famous appeal, dated July 13, 1921, which told of the crop failure, the threatened starvation of millions of Russians, and asked for prompt aid from Europe and America. This appeal did not appear in the press until July 23, 1921. On the

same day, Mr. Hoover sent a telegram to Gorky offering the assistance of the A.R.A. on condition that the Soviet authorities must ask for this relief and agree to its distribution under the same terms accepted by other countries.

On July 31, the acceptance of Mr. Hoover's offer by the Soviet Government was received, and on August 20, 1921, a formal agreement was signed at Riga by Maxim Litvinov for the Soviets and by Walter Lyman Brown for the American Relief Administration.<sup>1</sup> This agreement set forth the conditions under which food would be distributed, and provided that the costs of internal distribution should be borne by the Soviet Government.

Among other things, the Soviet authorities agreed to fully protect supplies imported by the A.R.A. and affiliated organizations and to replace or pay for any supplies lost or stolen; to permit full control by the A.R.A. of distribution up to the time of consumption; to bear the entire cost of unloading, storage, and inland transportation of commodities, as well as the overhead expenses of the necessary distributive organization in Russia; to furnish necessary office space and living quarters for American personnel; to allow full freedom of movement to the American personnel in Russia, as well as freedom from search; to furnish free telephone and telegraph communications, and other necessary guaranties. In return, the A.R.A. agreed to feed children and adults in the famine area to the extent of their capability and gave formal assurances regarding the non-participation of American personnel in political questions.

On August 27, 1921, seven days after the signing of the Riga agreement, the first contingent of the A.R.A. Russian Unit arrived in Moscow and began preparations for what proved to be two long years of strenuous work. On September 1, the S.S. "Phoenix" docked at Petrograd with 700.0 tons of balanced rations, and on September 7 the first relief kitchen was opened.

#### FINANCE FOR RELIEF

In the fall of 1921, the immensity and urgency of the Russian debacle were verified, and the necessity for immediate relief was apparent. Securing funds for such an enormous undertaking presented the most difficult problem which had ever faced the officials of the American

Relief Administration. Less than \$5,000,000 remained from the European Relief Council drive, and commitments for child-feeding programs in other countries had not yet been fulfilled. It seemed impossible to make a successful campaign for benevolent funds in the United States, following so closely the European Relief Council drive for \$30,000,000. The depression of 1921 throughout America was at its peak, and American benevolence had been extended to its limit. Furthermore, a campaign of this character would require months of preparation and there was no time to lose, as the famine was a reality; people were dying, and it would be too late before a campaign really got into effective operation. Part of this urgency was due to the necessity for supplying seed grain, without which the following year would record a still more appalling catastrophe. A meeting of the European Relief Council was held at Washington at the end of August, 1921, when the Riga Agreement was accepted as a working charter and the several organizations incorporated in the European Relief Council agreed to give support to the relief work in Russia.

The only alternative of benevolent support to meet the financial requirements was federal aid. Mr. Hoover placed the problem before President Harding, calling his attention to the difficulties of our own farmers at this time, particularly as regards the enormous surplus of corn and the fact that this cereal was selling at 14 cents per bushel and was actually being burned. President Harding was sympathetic and recommended legislation in his message of December 6, 1921, and, after hearings, a bill was passed (Act of December 22, 1921), which authorized the Congress to cause to be expended out of the capital of the United States Grain Corporation a sum not exceeding \$20,000,000 for corn, seed grain, and milk for the starving people of Russia. Corn was specifically mentioned as it was a distressed product in the United States and at the same time the Russians were familiar with its use as food.<sup>2</sup>

<sup>1</sup> Cf. pages 926-27 for copy of this agreement.

<sup>2</sup> As shown on page 114 there was a significant increase in the price of corn in the United States between November, 1921, and the spring of 1922. This result was due largely to the effect of the heavy purchases of this commodity for the Russian relief work, and was of substantial benefit to thousands of American farmers.

With this \$20,000,000 as a nucleus, immediate efforts were made to supply the balance of approximately \$40,000,000 to complete the estimated requirements. The American Red Cross, although desirous of giving the medical aid, did not have the personnel actually to pursue the work in Russia on such a large scale. They agreed, however, that they would provide medical supplies to the extent of \$3,600,000, which generous gift fell far short of the estimated medical needs in Russia. The War Department had a considerable surplus stock of hospital and medical supplies and, through Mr. Hoover's efforts, a resolution was introduced in Congress, authorizing the President to transfer to the American Relief Administration medical and hospital supplies not to exceed \$4,000,000 cost value, without further charge. This Act was finally passed by both houses and approved by the President on January 20, 1922.

Following the policy pursued in other countries, Mr. Hoover urged the Soviet authorities to do their share, as he was aware of the fact that they had several million dollars in gold coin in their treasury, and he proposed that a large portion of this reserve should be used for the purpose of purchasing seed grain and food supplies. The Soviet authorities were not averse to this suggestion, but the agreement to transfer the gold was not completed until December 30, 1921, when the Soviet Government placed gold, chiefly gold rubles, of an approximate value of \$10,000,000 at the disposal of the American Relief Administration. This action was followed within a very few days by a similar agreement with the Ukrainian Soviet Republic, which placed approximately \$2,000,000 in the form of gold at the disposal of the American Relief Administration.

This made a total of approximately \$12,000,000 of Russian gold for the purchase of relief supplies. The realization of credit for this gold was no simple matter. It had to be transported from Russia to the United States, permission had to be secured for its entry into this country, and many other obstacles had to be overcome, all of which involved long delays, while Russian people starved. Plans were finally worked out by which credits for the major part of this gold were established in advance of its receipt. The A.R.A. began buying for the Soviet account on January 10, 1922, although the first shipment of gold

was not received until February 7. This enabled the A.R.A. to get seed grain to Russia in time for the spring planting.

Shortly after the meeting of the European Relief Council referred to above, a number of other relief organizations which proposed to work in Russia made arrangements to conduct their work in co-operation with the A.R.A. Among these organizations may be mentioned the following: the Volga Relief Society, the National Lutheran Council, the American Mennonite Relief, and the Southern Baptist Convention. Other organizations affiliated with the European Relief Council were: the American Friends Service Committee, American Red Cross, Federal Council of Churches, American Jewish Joint Distribution Committee, National Catholic Welfare Association, Knights of Columbus, the Y.M.C.A., and the Y.W.C.A.

Each of these organizations undertook to collect funds on its own account, but agreed to co-ordinate its work with the A.R.A. The A.R.A., on the other hand, undertook to leave as much freedom as possible to each organization, but to assist and protect their work in every way possible.

In Central Europe it had been found that the work of these charitable organizations had been facilitated by the A.R.A. Warehouses, which carried stocks of supplies suitable for relief work. The supplies were sold to these organizations at a small profit, but at considerably less than these organizations could purchase and ship in small quantities on their own account. It was decided to adopt the same plan for Russia, and bulk food sales of this character accounted for more than \$4,000,000 worth of relief to Russia, while clothing sales represented nearly three-quarters of a million dollars in addition (Table 96, page 248).

In connection with the Warehouse operations the A.R.A. established a food remittance service in which food drafts, similar to those used successfully elsewhere in Europe, were sold. Food draft sales for Russia amounted to more than \$9,000,000, a considerable portion of which was purchased by co-operating relief organizations in a manner similar to the bulk sales.

In addition to the sources of finance listed above, the Laura Spelman Rockefeller Memorial paid for the transportation of the government medical supplies in the amount of \$267,392.38. The American Friends Service Committee pur-

chased supplies for direct shipment to the extent of \$267,394.24. The governments of Poland, Latvia, and Esthonia donated transportation and warehouse facilities for Russian supplies valued at \$115,360.63, while the Soviet Government contributed commodities for child feeding worth \$30,026.64.

By these various means, the A.R.A. was able to mobilize finance for the relief of the Russian famine to the extent of \$63,174,848.78. The sources of this finance, as outlined above, are shown in tabular form in Table 95. The contribution of \$10,252,795.71 from the American Relief Administration includes cash donations to the A.R.A. funds by the Jewish Joint Distribution Committee to the extent of \$3,686,129.24 (cf. page 145). The remainder of this fund came from money contributed through the European Relief Council, and from such profits as were realized on the remittance and bulk sale operations in Russia.

TABLE 95

SOURCES OF FINANCE FOR RELIEF TO THE SOVIET  
REPUBLICS\*

U.S. Grain Corporation (Congressional Appropriation) .....	\$18,662,180.00
American Relief Administration .....	10,252,795.71
Soviet gold .....	11,357,325.13
U.S. Government medical supplies .....	4,000,000.00
Laura Spelman Rockefeller Memorial (freight finance) .....	267,392.88
American Red Cross medical supplies .....	3,804,863.15
Remittances and bulk sales .....	14,417,510.40
American Friends Service Committee .....	267,394.24
Soviet Government donation (commodities) .....	30,026.64
Facilities donated by European governments .....	115,360.63
Total .....	\$63,174,848.78

\* This table represents the total and final figures for all relief to the Soviet Republics handled under the direction of the A.R.A. The figures quoted by H. H. Fisher in *The Famine in Soviet Russia* do not include under "Charitable distribution" the following contributions and donations: clothing for general relief; clothing deliveries to institutions; food distributed to employees in lieu of pay (*paioks*); accounting adjustments directly chargeable to relief applied; and the donation of facilities by European governments.

## RELIEF DELIVERIES

Table 96 shows that from the beginning of these operations in August, 1921, to their close in 1923, the A.R.A. was instrumental in delivering to Russia a total of 741,572.7 metric tons of relief supplies, with a total value, including

the contribution of facilities by other European governments, of \$63,174,848.78. For purposes of discussion, the relief to the Soviet Republics may be divided into three principal groups: (1) child and adult relief; (2) seed grain; and (3) remittances and bulk sales from warehouses. Table 526 shows the distribution of total relief by districts within Russia.

*Child and adult relief.*—The famine conditions made it necessary to include adults in the relief work as well as children. The experience of the A.R.A. in Central Europe during the Reconstruction Period had been chiefly with child relief, and the appeal for funds for Central Europe were largely restricted to children. However, for Russia, contributions were requested which made it possible to extend the work to adults. For the most part, the records do not permit a segregation of relief given to children from that for adults.

Table 96 shows the total deliveries for child and adult relief as 471,567.1 metric tons, valued at \$38,216,887.24. A portion of this, 131,966.6 tons, valued at \$12,377,951.19, was definitely allocated for children's relief and used through child-feeding kitchens in the same manner as similar relief in Central Europe. The remainder of this relief, including supplies from the Grain Corporation, medical relief, etc., was used for both children and adults.

*a) Children's relief:* The sources of the finance for the specific children's relief, referred to above, may be summarized as follows:

Soviet gold .....	\$ 4,322,450.83
Soviet Government contribution (commodities) .....	30,026.64
Joint Distribution Committee .....	3,686,129.24
American Relief Administration .....	4,339,345.48
Total .....	\$12,377,951.19

The child-feeding operations followed closely the methods successfully developed in Belgium and in Central Europe. Local volunteer committees were organized, but the work required close supervision by the two hundred members of the American staff, assisted by a large number of Russian employees furnished by the Soviet Government. By August, 1922, more than 4,000,000 children were being fed in some 28,000 kitchens located in 18,000 cities, towns, and villages.

TABLE 96

SUMMARY OF TOTAL RELIEF DELIVERIES TO THE SOVIET REPUBLICS, AUGUST, 1921—JUNE, 1923  
(For detail see Table 511)

Operation	Total Metric Tons	Total Value
Reconstruction Period		
Child and adult relief		
American Relief Administration (children's relief) .....	131,412.6	\$12,347,924.55
Soviet Government donation .....	554.0	30,026.64
American Relief Administration (clothing deliveries) .....	1,723.4	1,700,795.00
American Relief Administration (employees paid) .....	3,687.5	375,312.38
U.S. Grain Corporation (delivered by A.R.A.) .....	310,673.7	14,865,303.45
U.S. Grain Corporation (delivered by Near East Relief) .....	11,031.8	557,874.95
Medical Supplies		
U.S. Government surplus and American Red Cross (delivered by A.R.A.) ...	8,066.7	7,862,524.40
U.S. Government surplus (delivered by Near East Relief) .....	215.2	209,731.63
American Friends Service Committee .....	4,202.2	267,394.24
Total child and adult relief .....	471,567.1	\$38,216,887.24
Seed Grain		
American Relief Administration (Grain Corporation) .....	55,107.6	\$ 2,948,485.24
American Relief Administration (Soviet gold) .....	111,865.9	7,034,874.30
Total seed grain .....	166,973.5	\$ 9,983,359.54
Remittances and bulk sales		
American Relief Administration (food remittances) .....	54,316.3	\$ 9,305,300.00
American Relief Administration (bulk, Eurelcon,* and internal sales) .....	34,570.5	4,374,893.28
American Relief Administration (clothing) .....	350.0	737,317.12
Total remittances and bulk sales .....	89,236.8	\$14,417,510.40
Sale damaged commodities and other adjustments .....	13,795.3	\$ 441,730.97
Total relief from United States .....	741,572.7	\$63,059,488.15
Relief from other countries		
Estonian Government (warehouse facilities) .....		\$ 1,102.94
Latvian Government (warehouse facilities) .....		24,257.69
Polish Government (railroad transportation, etc.) .....		90,000.00
Total from other countries .....		\$ 115,360.63
Grand total relief deliveries .....	741,572.7	\$63,174,848.78

\* Abbreviation refers to sales to organizations belonging to the European Relief Council.

The actual work of feeding was controlled by the segregation of the famine zone into districts; each in charge of an American district supervisor (cf. map, page 238), with one or two American assistants and an American district physician. Allocation of supplies was made from the A.R.A. headquarters in Moscow, based on the reports of conditions received from the district supervisors. It was the supervisor's responsibility to organize committees and kitchens, allocate supplies to towns and villages, arrange transportation, inspect and control dis-

tribution, and to account for every pound of food with receipts from the local committees. This gave an absolute control on all American supplies, which was deemed essential. The results accomplished by these supervisors and their assistants deserves the very highest praise. It was work under great pressure, much of it under very difficult and discouraging conditions. But through their loyalty and devotion and their ability to overcome all obstacles, the work succeeded, millions of lives were saved, and much suffering was mitigated.

All of the direct child-feeding operations were carried on under the immediate supervision of the A.R.A. with the exception of 1,401.3 tons of supplies, valued at \$127,305.00, which were turned over in sixteen different districts to the Joint Distribution Committee, who themselves handled the feeding. Table 527 shows the detail of these deliveries to the J.D.C. by districts. The same table also shows the detail of the internal deliveries, by districts and by commodities, of the 130,539.0 metric tons (\$12,250,646.19) of supplies fed by the A.R.A. through kitchens to Russian children. The commodities delivered on the child-feeding program are summarized in Table 97.

b) *Child and adult relief*: Table 96 shows a total of 310,673.7 metric tons of food, valued at \$14,865,303.45, purchased with U.S. Grain Corporation funds, as authorized by Congress, and distributed by the A.R.A. This table also shows a total of 11,031.8 metric tons of supplies, worth \$557,874.95, turned over to the Near East Relief for distribution in the Caucasus district of southern Russia. These two allotments represent the portion of the Grain Corporation funds used for food, while the remainder was used for the purchase of seed, as discussed below. The total accounting for the Grain Corporation fund may be summarized as follows:

Food for child and adult relief	
Accounted for by districts.....	\$14,627,294.12
Special relief to railroad workers.....	238,009.33
Total .....	\$14,865,303.45
Seed for planting.....	2,948,485.24
Total distributed by A.R.A.....	\$17,813,788.69
To Near East Relief for Caucasus.....	557,874.95
Sales of damaged goods, pilferage, etc...	290,516.36
Grand total .....	\$18,662,180.00

The detail of the distribution of these supplies is shown by districts and by commodities in Table 530.

In carrying out the terms of the Act of Congress of December 22, 1921, President Harding issued an executive order creating the Purchasing Commission for Russian Relief, consisting of the following members: Secretary of Commerce Herbert Hoover; James P. Goodrich of Indiana; Edward M. Flesh of Missouri, vice-president and

\* Organizations in charge of distribution through kitchens.

treasurer of the U.S. Grain Corporation; Edgar Rickard of New York, director general of the A.R.A.; and Don Livingston, formerly commissioner of agriculture for South Dakota. This commission was charged with the duty of purchasing, transporting, and delivering in Russia the commodities authorized by the Act. The President also designated that the Purchasing Commission should deliver these commodities

A.R.A. child and adult dining room at Ufa, Russia. Note mess equipment on table at right.

to the American Relief Administration in Russia, which was to have full charge of the internal distribution within Russia.

Authority was also granted to the A.R.A. to designate other organizations to distribute a portion of these commodities, which permitted them to turn over 11,031.8 metric tons to the Near East Relief for the Caucasus, where the latter organization was in much better position to secure ade-

quate distribution than was the A.R.A. No detail of the internal distribution of these supplies in the Caucasus has been received from the Near East Relief. Details of the shipments of all supplies handled by the Purchasing Commission for Russian Relief, showing steamers and cargoes, are given in Tables 517 and 518.

The supplies to be purchased from the Grain Corporation fund were restricted by the Act of Congress to corn, seed grain, and preserved milk. These commodities, including the seed grain<sup>1</sup> purchased from this fund, may be summarized as follows:

DISTRIBUTION OF COMMODITIES PURCHASED FOR RUSSIA  
FROM THE GRAIN CORPORATION FUNDS  
(Metric Tons)

Commodity	A.R.A. Seed Grain	A.R.A. Food	N.E.R. Food	Damaged Commodities and Other Adjustments	Total
Seed wheat	35,713.3	.....	.....	1,225.3	36,938.6
Seed corn	18,294.3	.....	.....	115.7	18,410.0
No. 2 corn	.....	201,395.3	.....	5,558.3	206,953.6
Corn grits	.....	76,415.0	6,103.9	1,441.5	83,960.4

Milk	.....	19,548.3	.....	41.3	19,589.6
Miscellaneous	1,100.0	.....	.....	.....	1,100.0
Total	55,107.6	310,673.7	11,031.8	9,257.7	386,070.8

Table 530 shows that of the Grain Corporation food delivered by the A.R.A., 5,757.0 metric tons of rye and corn, worth \$238,009.33, were supplied as special relief to Russian railroad workers. This was connected with the breakdown of Russian transportation, in the spring of 1922, which in part was due to the inability of the Soviet Government to pay its railroad employees a living wage. The government was requiring these workers to transport vast quantities of food for the benefit of other people, but did not supply sufficient food for the workers and their families. The situation promised to get out of hand unless the railroad workers' demands for satisfactory rations were fulfilled. The A.R.A. agreed to loan a small amount of corn to the government to feed the railroad workers, on condition that it should be paid back. As a matter of fact, repayment was never made, and the matter was not adjusted until the final liquidation agreement in 1923. But the railroad workers secured food which they badly needed and this, no doubt, contributed greatly toward speeding up the movement of supplies to the famine areas.

<sup>1</sup> Additional seed grain was purchased with Soviet gold as discussed on page 255.

When the \$20,000,000 appropriation from the Grain Corporation Fund was made by Congress, the Near East Relief asked that a portion of this relief be allocated to Russian famine sufferers in the Caucasus. In order to determine the need in this area, in comparison with other parts of Russia, Lincoln Hutchinson, who had made a study of conditions in the Volga and Ukraine districts, was sent to the Caucasus. Based on Mr. Hutchinson's recommendations, a total of 11,031.8 metric tons of food, consisting of corn grits and rye grain, was shipped to Batoum, on the SS. "Deepwater," II, and turned over to the Near East Relief for internal distribution. No further detail is available on this shipment.

Likewise, when the Act of Congress was passed, making \$4,000,000 worth of medical supplies available for Russia, the Near East Relief requested a portion of these for the Caucasus. A total of 215.2 metric tons of these supplies, valued at \$209,731.63, was delivered and turned over to the Near East Relief at New York by the A.R.A. Medical Table 3 (pages 977-86) furnishes a detailed inventory of the medical and hospital supplies receipted for by the Near East Relief at New York. No further details are available regarding the distribution of these supplies which were shipped and handled entirely by the Near East Relief and at their expense.

*c) Clothing relief:* The need for clothing in many parts of Russia during the famine was only a little less acute than the need for food. In a large measure, this was due to the almost complete stagnation of industry during the early years of the Soviet régime and, of course, to the lack of funds with which to purchase such garments as might be available.

During the early period of operation, the relief work, of necessity, consisted in efforts to get food to the starving people. However, the A.R.A. began in the late fall of 1921 to send in shoes, stockings, and woolen goods for children's relief. With the cold winters in the greater part of Russia, it was necessary to provide clothing to enable the children to come to the feeding stations.

The question of clothing to the adult population was still unsolved. Consideration was given to plans for clothing remittances similar to the food remittances which had operated so successfully. This plan had to be abandoned for 1921-1922,

largely because of the transportation difficulties within Russia. The plan was revived and carried through in the fall of 1922.

Table 511 shows that the total deliveries of clothing by the A.R.A. for children and adults amounted to 1,447.8 metric tons, valued at \$1,700,795.00. This is divided into three parts in the records of the relief work: (1) children's relief, including shoes and stockings only; (2) general relief, including cloth and accessories for garments distributed to both children and adults; and (3) miscellaneous deliveries, which includes material furnished to children's homes and similar institutions. The deliveries under (1) and (2) are shown in Table 529, segregated by districts. Table 98 summarizes the commodities which were delivered under each of these categories and includes also the clothing remittances and bulk sales which are discussed on pages 259-61.

*d) Medical relief:* One of the striking features of Russian famine conditions was the almost complete exhaustion of supplies necessary for the prevention and treatment of diseases. With the population undernourished, and with congestion in the medical institutions, the spread of sickness and infectious diseases was especially serious. These conditions made medical relief next in importance to food relief. As a practical matter, there was little use in spending energy and resources to feed people who were almost certain to die later from epidemics of cholera, typhus, or other diseases.

As stated in an earlier paragraph, the American Red Cross was not in a position to go into Russia itself, but agreed to donate medical supplies to the value of some \$3,600,000, an amount which was later increased. Mr. Hoover succeeded in obtaining surplus medical and hospital supplies, worth \$4,000,000, from the U.S. Government through an Act of Congress. The Laura Spelman Rockefeller Memorial contributed funds to cover the cost of transporting the government supplies to Russian ports. The problem presented to the A.R.A. was that of providing for the distribution and the utilization of some eight million dollars' worth of medical supplies. The American Relief Administration had never carried on medical relief in other countries.

Upon the advice of the American Red Cross, Colonel Henry Beeuwkes, Medical Corps, U.S.A., was selected to head the medical division of the A.R.A. His function was to distribute these supplies to Russian hospitals and institutions and to render all assistance possible to Russian physicians, who were carrying on a heroic struggle under great difficulties.

The medical unit found that cities and towns in Russia were adequately supplied with hospitals and institutions which were well organized, but unable to function effectively, due to the extreme shortage of drugs and dependable supplies. Blankets, bedding, and clothing were worn out or entirely lacking. Rubber goods, such as hot-water bags, syringes, sheeting, etc., simply did not exist; quinine, aspirin, salvarsan, and

TABLE 98

## SUMMARY OF CLOTHING DELIVERIES IN SOVIET RUSSIA

Commodity	General Relief	Children's Relief	Institutions	Remittances and Bulk Sales

\* Includes 9,920 overcoats, 2,890 bales of old clothing, and 180 barrels of overcoats.

similar common drugs, not to mention sera or rarer products, were seldom to be had.

The need, therefore, was not for new first-aid stations, but for a distribution of the supplies to already existing institutions. Distribution was made throughout Russia and Ukraine, as far north as Karelia and as far south as the Black Sea.

The total quantity of medical and hospital supplies furnished to Russia amounted to 8,291.9 metric tons, valued at \$8,072,256.03, of which 215.2 tons, worth \$209,731.63, were turned over to the Near East Relief for the Caucasus (cf. page 116). This left 8,066.7 metric tons, valued at \$7,862,524.40, to be distributed by the A.R.A. Table 99 summarizes the source of the entire medical program for Russia.

TABLE 99

## SUMMARY OF MEDICAL SUPPLIES FOR SOVIET RUSSIA

Source	Total Metric Tons	Total Value
Distributed by American Relief Administration		
American Red Cross supplies .....	5,174.3	\$3,804,863.15
U.S. Government surplus medical and hospital supplies...	2,892.4	3,790,268.37
Laura Spelman Rockefeller Memorial (freight finance) .....		267,392.88
Total .....	8,066.7	\$7,862,524.40
Distributed by Near East Relief		
U.S. Government surplus medical and hospital supplies...	215.2	209,731.63
Grand total .....	8,281.9	\$8,072,256.03

If one has any misconception as to the diversity which can be exhibited by 8,000.0 tons of medical and hospital supplies, he will do well to examine Medical Tables 1, 2, and 3, pages 936-86, which show in detail the distribution of these supplies by districts in Russia. Among other items, there were 357 kinds of medicines, 627 kinds of surgical instruments, and hundreds of kinds of laboratory supplies, disinfectants, vaccines, etc. In quantity, too, these supplies ran into enormous numbers.<sup>1</sup>

<sup>1</sup> A complete description of the work of the medical division in Russia has been issued by Dr. Beeuwkes under the title of "American Medical and Sanitary Relief in the Russian Famine, 1921-1923," in the A.R.A. *Bulletin Series 2*, No. 45.

Some idea of the magnitude of the work of distributing these thousands of different kinds of articles can be obtained from the following tabulation, showing the number of institutions to which they were sent.

## RUSSIAN INSTITUTIONS FURNISHED WITH MEDICAL AND HOSPITAL SUPPLIES

Kind of Institution	Number of Institutions	Total Capacity
Hospitals .....	5,764	352,332
Dispensaries, etc. ....	4,123	247,087
Children's homes .....	4,760	326,821
Day nurseries .....	372	25,259
Schools, etc. ....	165	17,999
Homes for aged, etc.....	248	59,237
Unclassified .....	987	11,000
Total .....	16,419	1,039,735

The following summary includes the estimated tonnage and the value of the supplies to each of the eighteen districts, and to the Caucasus through the Near East Relief.

## SUMMARY OF THE DISTRIBUTION OF MEDICAL AND HOSPITAL SUPPLIES BY DISTRICTS

District	Estimated Metric Tons	Value
Ekaterinoslav .....	484.0	\$ 471,751.46
Kazan .....	484.0	471,751.46
Kharkov .....	484.0	471,751.47

Theodosia .....	161.3	157,250.49
Tzaritzan .....	161.4	157,250.49
Ufa .....	564.7	550,376.71
Caucasus (N.E.R.) .....	215.2	209,731.63
Total .....	8,281.9	\$8,072,256.03

Among other things accomplished by the A.R.A. medical unit was the completion of a program by which approximately 10,000,000 Russians were inoculated against five different epidemic diseases: viz., typhoid fever, two types

of paratyphoid, smallpox, and diphtheria. In another effort to stamp out disease, able-bodied refugees in the cities were organized into clean-up gangs. The receipt of food was conditioned on this work. These gangs cleaned out sewers, drains, and depositories of rubbish and litter where disease germs might collect.

e) *Paiook for employees*: The Russian word *paiook* means "allowance." The A.R.A. had to employ a large number of Russians, including office employees, chauffeurs, warehouse managers and assistants, food and clothing remittance employees engaged in making up and delivering remittance packages, etc. These employees were paid by the A.R.A. It was soon found, however, that the employees had difficulty in purchasing food supplies with the money paid to them, and that they would much prefer to have part of their pay in the form of food commodities. Efforts were made to induce the Soviet Government to provide such rations at reduced prices, as was done for employees of Soviet institutions, but it proved impossible to secure action on this request. With the rapidly rising prices, it became impossible for anyone to support a family on the rate of pay which had been agreed upon with the government, and the A.R.A. employees became dissatisfied. In order to provide adequate support, and also to remove some of the temptation for pilfering, the A.R.A. decided in December, 1921, to supplement the pay of their employees with a definite food package. Strict regulations were drawn up as to the class of employees entitled to this *paiook*, which did not include laborers, port workers, servants, local committees, or kitchen personnel, all of whom were furnished and paid by the Soviet Government under the Riga agreement.

The authorized *paiook* to be issued on the last working day of each month included the following:

Corn grits .....	30 pounds
Cocoa .....	3 pounds
Evaporated milk .....	10 cans
Bulk lard.....	10 pounds
Flour .....	45 pounds
Sugar .....	10 pounds

At times, certain other commodities were substituted in accordance with the available supplies.

As shown by Table 96, the total deliveries of

food in the form of employees' *paiooks* amounted to 3,687.5 metric tons, valued at \$375,312.38. Table 532 shows the detail of these deliveries by commodities and by districts. These deliveries represent relief applied, but in principle are sales for cash, since they were delivered in lieu of cash payments.

The commodities delivered under employee *paiook* may be summarized as follows:

EMPLOYEE PAIOK	
Commodity	Metric Tons
Flour .....	1,603.5
Rice .....	693.2
Beans and peas .....	10.0
Corn grits .....	273.8
Pork products .....	278.5
Milk .....	345.6
Cocoa .....	66.1
Sugar .....	373.8
Miscellaneous food .....	15.2
Soap .....	27.8
Total.....	3,687.5

f) *American Friends Service Committee*: Reference has been made in earlier sections of this report (cf. pages 117-20) to the relief work of the Quakers, and a brief indication has been given of their co-operation in Russia. The Quakers were in Russia before the Riga agreement, and the A.R.A. had contributed certain commodities to their work there, as discussed under Special Programs. With the signing of the Riga agreement and its adoption by the European Relief Council, of which the American Friends Service Committee was a member, they enlarged their Russian program. Among other things, the Friends had assembled certain relief supplies at Hamburg intended for German relief. With conditions so much more serious in Russia, they sought the co-operation of the A.R.A. in transporting certain of these commodities from Hamburg to Baltic ports, for use in that country. Between January and August, 1922, the A.R.A. forwarded for the Friends a total of 4,202.2 metric tons of supplies, valued at \$267,394.24. These commodities were delivered to the A.F.S.C. at Russian ports, and the further handling and internal distribution was taken care of by the American Friends Service Committee. The detail of these shipments by steamers and commodities is given in Table 525.

Contents of an A.R.A. Russian food remittance package

The following tabulation summarizes the commodities handled by the A.R.A. for the Friends on this operation.

COMMODITIES HANDLED BY A.R.A. FOR AMERICAN  
FRIENDS SERVICE COMMITTEE

Commodities	Metric Tons
Flour .....	3,037.3
Rice .....	71.9
Beans and peas.....	90.6
Corn grits .....	917.8
Pork products .....	16.6
Sugar .....	67.6
Clothing .....	.4
Total .....	4,202.2

In addition to this work, the Friends purchased substantial quantities of commodities from the A.R.A. Warehouses, either as bulk or Eurelcon sales, and they carried on substantial relief programs on their own account, quite apart from the work done in direct co-operation with the A.R.A. and referred to in this report.

*Seed grain.*—The second major division of relief for the Soviet Republics was that of grain for seeding purposes. The early investigations of the A.R.A. disclosed the fact that in vast territories along the Volga, in eastern and southern Russia, and in Ukraine not only was there no food, but there would be no grain for planting the next year and consequently the famine conditions in 1922–1923 would only be aggravated. This was one of the main arguments placed before Congress for the appropriation of the Grain Corporation funds. The Act of Congress specifically mentioned that seed grain should be supplied.

The Soviet Government also was deeply concerned about seed and specified that the major portion of their appropriation for relief should be for seed grain. This fund, like that of the Grain Corporation, did not become available until January, 1922, and it was with the very greatest difficulty that the purchases were made and the grain transported and distributed to the peasants in time for the spring planting. These difficulties were greatly increased by the breakdown of railroads and all internal distribution in Russia. But these difficulties were overcome, and the seed grain was distributed and planted

by the peasants. This was the big factor in relieving the distress in 1922.

Table 96 shows that the total deliveries of seed grain amounted to 166,973.5 metric tons, worth \$9,983,359.54. This was divided between the two funds as follows:

Fund	Metric Tons	Total Value
Grain Corporation ....	55,107.6	\$2,948,485.24
Soviet gold .....	111,865.9	7,034,874.30
Total .....	166,973.5	\$9,983,359.54

The purchases from the Grain Corporation Fund were all made in the United States,<sup>1</sup> as required by the law. The seed was shipped to Russia and distributed to districts, where it was delivered to authorized representatives of the Soviet Government and receipted for by them. The final distribution to the peasants was made by the Soviet authorities. Table 530 shows the distribution of this grain to districts as compiled from the receipts, while Table 517 shows the detail of the shipment of these supplies from the United States.

The purchases of seed grain, from the Soviet gold, were made in the United States, excepting the oats which was purchased in Esthonia and Sweden. This oats was for forage, rather than seed, and was required to feed the horses in order that the land might be prepared for planting. The famine had naturally greatly decreased the number of work animals available, and it was important that those remaining should be maintained in working condition.

The grain purchased with the Soviet gold was delivered to the Russian authorities at Baltic ports, and all responsibility of the A.R.A. ceased at that point. The Soviet officials attended to the internal distribution of the grain, and no detailed information is available regarding these operations, except that it is known to have been distributed in the famine areas.

The detail of the shipment of the grain, purchased for the Soviet account, is shown in Table 519.

<sup>1</sup> It is of interest to note that in selecting seed adaptable to Russian conditions, purchases were made of grain produced in some of our Northwestern states from seed originally imported from the Russian famine districts. This was true also of purchases from the Soviet gold.

Interior of food remittance packing room at Moscow, Russia

The following tabulation summarizes the seed grain purchases under these two funds:

SUMMARY OF SEED GRAIN DELIVERIES IN RUSSIA  
(Metric Tons)

Commodity	Grain Corporation	Soviet Gold	Total
Seed wheat .....	35,713.3	101,321.0	137,034.3
Seed corn .....	18,294.3	4.1	18,298.4
Seed rye .....		3,810.2	3,810.2
Beans and peas ...		4,229.6	4,229.6
Grass seed .....		142.0	142.0
Forage oats .....		2,359.0	2,359.0
Shipping material	1,100.0	.....	1,100.0
Total .....	55,107.6	111,865.9	166,973.5

*Remittances and bulk sales.*—The third group of relief activities in the Soviet Republics had to do with remittances and bulk sales. As in the countries of Central Europe, these represented sales of relief commodities to organizations or individuals and were used as a means of mobilizing certain types of charity funds and of facilitating the work of other organizations.

The total remittances and bulk sales in Russia amounted to 89,236.8 metric tons, valued at \$14,417,510.40, and were divided as follows:

Operation	Metric Tons	Value
Food remittances .....	54,316.3	\$ 9,305,300.00
Bulk sales .....	34,570.5	4,374,893.28
Clothing remittances ..	350.0	737,317.12
Total .....	89,236.8	\$14,417,510.40

a) *Food remittances:* The food remittance operation of the A.R.A. Warehouses in Central Europe (cf. page 90) had been successful in mobilizing relief funds which would not ordinarily have been contributed to any general fund. Since no public appeal had been made for funds for Russia, and since the need was so great, a similar plan was put into operation there. By these means thousands of Americans purchased food drafts in the United States which, when sent to their friends and relatives in Russia, enabled the latter to obtain packages of American food at far less cost than the same food could be purchased and shipped by the donor. No special warehouse operation was set up, but the remittances and bulk sales were handled by the A.R.A. organization, although for the most part from supplies shipped specially for that purpose.

The Russian food remittances were sold in \$10 units only, and were offered for sale not only in America, but in all the principal countries of central and western Europe and in Siberia.

The food parcels were made up in Russia from imported supplies, and deliveries were made direct to beneficiaries at the nineteen different district headquarters where A.R.A. Warehouses were located. Deliveries to outlying districts were made from these stations, using the Russian parcel post under the terms of a special agreement with the Soviet authorities with regard to remittances. Each package was sent fully insured for its gold value, in favor of the beneficiary.

The contents of the Russian food remittance were as follows (cf. page 254):

Flour .....	49 pounds
Rice .....	25 pounds
Tea .....	3 pounds
Fats .....	10 pounds
Sugar .....	10 pounds
Milk .....	20 tins

In order to provide additional funds for child feeding in Russia, it was decided to allow a rather large margin of profit on the food remittance business. The food making up the standard package, purchased in large quantities, cost the A.R.A. about \$6.75. Transportation, insurance, packing, etc., amounted to about \$1.00, so that on the average there was a margin of about \$2.25 per package. Inasmuch as the cost of similar food in Russia varied from \$60 to \$16 in different cities, and at different times, the price of the package was not excessive, and all who purchased Russian remittances were advised of this margin, and the intentions of the A.R.A. to use the surplus for child feeding.

The sales of individual Russian remittances as distinct from "bulk sales" ran to a very large volume, reaching a total not far from 1,000,000 packages. Table 96 shows that the food remittances distributed amounted to 54,316.3 metric tons of supplies, valued at \$9,305,300. Table 533 shows the distribution of these remittances by districts within Russia and by commodities. A summary of the commodities delivered through the food remittances is shown on page 259.

A considerable portion of the food remittance business was due to large purchases of remittances by other relief organizations, such as the

Food remittances being packed for delivery by post, Moscow warehouse

Jewish Joint Distribution Committee, which often found it more convenient to purchase these packages than to use the bulk commodities. A large number were used also in the intelligentsia relief (cf. page 261).

*b) Bulk sales:* In an earlier section, reference is made to the A.R.A. warehouse stocks of relief supplies in Russia from which sales could be made to any of the co-operating relief organizations who cared to avail themselves of the opportunity. These commodities were sold by the A.R.A. at cost, plus a sufficient margin to insure the organization against loss, with the understanding that profits, if any, would be used for child feeding in Russia.

The total food bulk sales of all kinds in Russia amounted to 34,570.5 metric tons, with a sales value of \$4,374,893.28 (Table 96). These sales were handled under three different heads. The first group was known as Eurelcon sales, meaning sales to organizations belonging to the European Relief Council, according to the agreement signed in August, 1921. The second group was designated as bulk sales, and included sales to relief organizations not belonging to the European Relief Council. The third group, known as internal sales, included sales to organizations and individuals within Russia. The total volume of business was as follows:

	Metric Tons	Value
Eurelcon sales .....	15,840.8	\$1,812,726.02
Bulk sales .....	13,886.2	2,148,457.28
Internal sales .....	4,843.7	413,709.98
Total bulk sales.....	34,570.7*	\$4,374,893.28

\* Difference of .2 metric ton between this total and that in Table 96 (see reference in paragraph above) is due to detail being carried to three decimals.

Many of the co-operating organizations also made large purchases of food remittances in addition to bulk sale purchases.

No tabulation is possible from the receipts for bulk sales and remittances which will show the total purchases by different organizations. However, the following tabulation adapted from data contained in the *Annual Report of the Executive Committee of the American Relief Administration* of April 4, 1923, shows the approximate contributions from various organizations which were available for the purchase of bulk food and clothing, and food and clothing remittances.

APPROXIMATE SUMS USED TO PURCHASE FOOD AND CLOTHING REMITTANCES AND BULK COMMODITIES BY RELIEF ORGANIZATIONS

American Jewish Joint Distribution Committee .....	\$1,314,000
American Friends Service Committee.....	415,000
Apostolic Delegation (Catholics).....	750,000
Federal Council of the Churches of Christ in America .....	90,000
Laura Spelman Rockefeller Memorial.....	830,000
Mennonite Central Committee.....	400,000
National Lutheran Council.....	300,000
Seventh-Day Adventists .....	50,000
Various Protestant churches.....	25,000
Volga Relief Society .....	220,000
Y.M.C.A. and Y.W.C.A. (student relief).....	200,000
Total .....	\$4,594,000

In addition to these sums from organizations, there were many large contributions from private sources, such as \$95,000 from William Bingham, II, for relief of doctors and \$5,000 from the Rochester (New York) Community Chest for the same purpose, as well as many others.<sup>1</sup>

The following tabulation summarizes the commodities delivered through the food remittances and various types of bulk sales:

SUMMARY OF FOOD COMMODITIES DELIVERED ON RUSSIAN REMITTANCES AND BULK SALES

(Metric Tons)				
Commodity	Food Remittances	Bulk Sales	Eurelcon Sales	Internal Sales
Flour .....	27,199.1	6,740.6	6,718.0	2,324.7
Rice .....	6,690.0	1,826.6	1,545.9	344.4
Beans and peas. ....		0.1	217.8	31.6
Corn grits .....	3,737.1	894.5	2,707.1	635.7
Pork products .....	2,741.0	853.2	638.4	210.1
Milk .....	8,428.5	2,104.8	2,536.9	705.3
Cocoa .....	69.2	62.6	306.5	115.2
Sugar .....	4,919.1	1,292.5	1,151.0	463.3
Tea .....	532.1	111.3	.....	5.3
Miscellaneous foods .....	.....	.....	19.1	5.8
Soap .....	0.2	.....	.....	2.2
Total .....	54,316.3	13,886.2	15,840.7	4,843.6

*c) Clothing remittances:* Reference has been made to a proposed plan for clothing remittances, similar to the food remittances discussed

<sup>1</sup> In addition to the references cited, much additional information regarding the remittance and bulk sale operations is contained in numerous issues of the American Relief Administration *Bulletins*. See particularly "The Carriage of Philanthropy," by J. R. Ellingston, A.R.A. *Bulletin Series 2*, No. 43.

Sample of clothing remittance package for Russia (contents quoted in text on opposite page).

above. The urgent need for clothing in Russia in the winter of 1921-1922 caused the plan to be proposed, but it had to be abandoned because of the severe internal transportation difficulties in Russia. In the fall of 1922, the need for clothing was still urgent, and the remittance plan was revived. A clothing remittance agreement was signed with the Soviet Government on October 26, 1922, and the plan was put into effect during the next few months. The fact that both food and clothing remittance sales were discontinued in March, 1923, gave this plan only a few months' operation. During that period, the total sales of clothing amounted to 350.0 metric tons, valued at \$737,317.12.

The perfecting of plans for the clothing remittance offered many difficulties. It was necessary that the package should be acceptable to both men and women, and to all ages and sizes. This made it impossible to include shoes, stockings, or ready-made garments. The package finally adopted consisted of  $4\frac{2}{3}$  yards of woolen cloth, 4 yards of linings, 16 yards of muslin, 8 yards of flannelette, 4 spools of thread, and 48 buttons of different sizes. By buying in large quantities, the A.R.A. was able to sell this package, delivered in Russia, for \$20.00, with a small margin of profit for safety. The same package would have retailed in New York for about \$21.50, and in Russia was worth from \$30.00 to \$40.00.

Although in no way comparable in extent with the food remittance operation, the clothing remittances formed a very useful supplement to the other phases of Russian relief. Both the sales and the gift packages came at an opportune time to meet a need strongly emphasized by the changing economic conditions in Russia.

The details of the clothing remittance deliveries are given in Table 529 and the commodities delivered are summarized in Table 98, page 251.

*d) Intelligentsia relief:* Although not forming a special section of the Russian relief, some reference should be made to the relief provided for the intellectual classes through the contributions from organizations and individuals, used especially to purchase food and clothing remittances.

It would be impossible to describe the hardships through which the educated classes in

Russia passed during the revolution and the famine. Nor is it possible to estimate what Russia and the world lost through the untimely death of thousands of scholars and artists who could not survive these difficulties. Physically, the intelligentsia were worse off than the peasants during the famine, for the former had no hidden reserves of food and they were looked upon with too great disfavor by the new government to receive the ration which went to the

Special or intelligentsia relief packages being given to the priests of the Russian Orthodox Church at Ufa, February, 1922.

common laborer. In a land where the sole interest of practically everyone was to secure bread for the day, the educated and professional groups were ill adapted to hold their own. Many broke under the burden, and it looked as if the whole of the intellectual class of Russia might meet extinction. Ellingston<sup>1</sup> quotes from a letter written by a Russian in Petrograd from which the following is extracted:

Death was now more in evidence than life. Before my eyes there died Feodor Batiushkov, the famous professor of philology, poisoned from eating uneatably filthy cabbage. Another one to die from hunger was S. Bengerov, professor of history and literature, he who gave to the Russian people entire editions of Shakespeare, of Schiller and of Pushkin. . . . I saw the talented critic A. A. Ismailov die of hunger. At the same period the philosopher V. V. Rosanov succumbed to starvation in Moscow. Before his death the latter roamed the streets in search of cigarette ends with which to appease his hunger. . . . Try to visualize your own Emerson in tatters, wandering about the streets of Boston, snatching with frozen fingers some crumb from the highway mud. . . .

<sup>1</sup> "The Carriage of Philanthropy," *A.R.A. Bulletin*, Series 2, No. 43 (December, 1923), page 107.

Peasants waiting for packages at delivery station at Simbirsk, Russia

For many, the conditions were more than they could bear, and thousands committed suicide.

With the establishment of the food remittance plan in November, 1921, the way was open to supply relief to special classes of the population. Special appeals were made by various groups of Russian intelligentsia to similar groups in America. In time these bore fruit.

The first contribution for intelligentsia relief was for doctors and was the result of an appeal by the A.R.A. personnel, who had seen the heroic fight that Russian physicians were making against the ravages of disease, although they themselves often had little to eat or wear. This first contribution totaled \$67,500, including a gift of \$35,000 from William Bingham, II., of Maine (later increased by another \$60,000); \$25,000 from the Jewish Joint Distribution Committee; \$5,000 from the Rochester Community Fund; and many others.

The largest contribution for intelligentsia relief was \$830,000 from the Laura Spelman Rockefeller Memorial. The funds administered for this purpose were distributed in several different categories, with the approximate amounts for each as follows:

University professors and other teachers....	\$ 527,659
Physicians, nurses, and attendants.....	123,587
Artists and musicians .....	13,791
Ballet schools .....	2,900
Writers .....	4,100
Religious bodies .....	10,000
General intelligentsia .....	330,000
Individual relief, not specified.....	194,000
Total .....	\$1,206,037

In addition to the above, there were hundreds of thousands of dollars worth of supplies distributed to intelligentsia by organizations affiliated with the A.R.A.

#### DAMAGED COMMODITIES AND ADJUSTMENTS

Table 96 shows under the sale of damaged commodities and other adjustments in the Russian operation an item of 13,795.3 metric tons, worth \$441,730.97. This includes a number of categories, among which were 9,257.7 tons, worth \$290,516.36, from the Grain Corporation supplies which were damaged or lost in transit. The Grain Corporation sold the damaged supplies for what they would bring and collected

for the lost supplies from underwriters and ocean carriers. The principal item in the Grain Corporation adjustment was the loss of the S.S. "West Munham," which grounded off Heligoland on March 9, 1922, with the result that the cargo was badly damaged.

Adjustments on the A.R.A. shipment included a total of 4,537.6 metric tons, with a value of \$138,528.60. This included port outturn, overages and shortages, losses in transit, and pilferage. In addition, there was a loss of \$12,686.01 in handling, cutting, and other shortages in connection with the clothing operations. These adjustments are all shown in the detailed distribution tables in the Appendix to this report.

When one considers that these food commodities all had to be transported through large areas where the population was on the verge of starvation, it is remarkable that the pilferage losses were not larger. In any event, the stolen articles were no doubt consumed, probably by individuals who needed them as badly as those to whom they were destined.

#### DONATIONS FROM EUROPEAN GOVERNMENTS

Table 96 shows facilities and services donated to the Russian relief by the governments of Esthonia, Latvia, and Poland, to the value of \$115,360.63. The donations consisted of warehouse space for A.R.A. Russian supplies in Esthonia and Latvia, and of railroad transportation for similar supplies in Poland. These contributions were of material assistance to the A.R.A. and, had they not been donated, it would have been necessary for the A.R.A. to pay out these sums, thereby reducing by that much the commodities which were sent into Russia.

The Soviet Government itself made very large contributions to the relief work in the form of cash, services, and facilities. A careful estimate of the value of these contributions at the completion of the A.R.A. work in Russia placed the value of these donations at \$13,960,850.00, which is exclusive of the \$11,357,325.13 in gold and of the \$30,026.64 in commodity donations accounted for elsewhere. This contribution includes such items as stevedoring and other port services, rail and water freights, handling, warehousing, motor and wagon handling, light, water, fuel, baking, telephone and telegraph, travel and housing for A.R.A. personnel.

## LIQUIDATION

In the early spring of 1923, Mr. Hoover asked that a careful survey of Russian food conditions be made to determine the need, if any, for a continuation of the relief work. On May 14, 1923, Lincoln Hutchinson reported the results of a careful study of Russian crops and needs which indicated that Russia should have a surplus of grain and other foods after the new harvest. This conclusion was supported by much other evidence, including the rapidly declining price of foodstuffs, and by the unanimous opinion of the A.R.A. district supervisors.

Food and clothing remittance sales had been closed on March 15, 1923, and plans were made to liquidate the other activities as rapidly as possible. On June 15, 1923, a liquidation agreement was signed between the A.R.A. and the Soviet officials by which all responsibilities of the A.R.A. in Russia were terminated, and the Soviet Government agreed to accept the A.R.A. accounting for all supplies without question. By July 4, 1923, the last of the district headquarters had been closed, and after the inevitable festivities, in which the Soviet Government expressed its sincere appreciation of the work of the A.R.A., the relief personnel was on its way home.

## TURKEY

(Appendix Tables 541-542)

### ARMISTICE PERIOD

In the early months of 1919, the supply of wheat flour in Constantinople was exhausted, and the poor were existing chiefly on bread called *vecika*, of a very inferior quality, and sold at exorbitant prices. Samples of this bread revealed that it contained all sorts of refuse matter, including large amounts of chopped straw.

In February, the price of flour jumped from the government's buying price of  $3\frac{1}{2}$  piasters per  $2\frac{1}{2}$  pounds to a selling price of 250 and 300 piasters. Small chocolate-colored loaves of bread, containing just enough flour to amalgamate their adulteration of sawdust and straw, were retailed on the streets at prices equivalent to 30 cents in American money.

The Ottoman Empire had no credits, and there was practically nothing to be exported in payment for Allied supplies. Obviously, credit could not be granted to Turkey, which was still considered an enemy country. Finally, arrangements were made with a syndicate composed of officials of the National Bank of Turkey, a Brit-

ish institution. This syndicate, in possession of foreign credits, was able to purchase flour and resell it to the Turkish population at a nominal profit. These transactions were carried on through the commercial organization of J. W. Whittall and Company. In all, the American Relief Administration sold against cash settlement 20,278.3 metric tons of flour, valued at \$4,369,404.30, through this syndicate for Turkish consumption. No other relief to Turkey during the Armistice Period was reported through the office of the Director General of Relief.

The effect of these deliveries on the food situation in Constantinople was most beneficial. Wide publicity was given to the arrival of each American cargo, and it finally became known that this American flour was to be sold at a price to undercut the wholesalers, and thus eliminate the inflated prices of the speculators.

The effect was almost instantaneous. The wholesalers became frightened, and flour dropped over 50 per cent. The street speculator in bread disappeared, and white loaves made from American flour were placed on sale at reasonable prices.

## UNITED KINGDOM

(Appendix Table 543)

### U.S.F.A. PERIOD

The United Kingdom is always dependent upon overseas imports for the major portion of the food supply of her people. Between 40 and 45 per cent of the total imports into the country are in the classification of food, drinks, and tobacco. In the pre-war years, the average imports of the United Kingdom were equivalent to approximately 220,000,000 bushels of wheat, as against domestic production of less than 60,000,000 bushels. Nearly 80 per cent of the nation's bread supply had to come by ships from overseas points. Nearly half of the normal meat supply, all of the sugar, and a large portion of the dairy products consumed in the United Kingdom had to be imported. Consequently, when Germany announced her plan of unrestricted submarine warfare and began to put it into effect, Great Britain was seriously concerned as to her food supply. The entrance of the United States into the World War, in the spring of 1917, was welcomed by Great Britain more for the assurance of our great agricultural resources to support her food requirements than for any immediate assistance on the battle field.

With the continuation of the submarine warfare, and the resulting shortage in world shipping, the Allied nations and Great Britain, in particular, came to depend more and more upon the United States for their food supply. Reference has been made in an earlier section to the great expansion of food production in this country under the demands of the Allies.<sup>1</sup> Reference has also been made (page 16) to the serious shortage of the food supply in the United Kingdom in the early months of 1918 and the almost desperate efforts made by the United

States Food Administration to meet these demands which for a time threatened the whole success of the Allied cause.

Almost immediately after our declaration of war against Germany, Congress passed an act (Act of April 24, 1917) establishing a credit of \$3,000,000,000 in favor of the foreign governments engaged in war with the enemies of the United States. These credits were extended to a total of \$10,000,000,000 by later acts (Acts of September 24, 1917; April 4, 1918; and July 9, 1918). Under these authorizations, the U.S. Treasury loaned vast sums to the Allied countries.

The total net credits established in favor of Great Britain under these authorizations amounted to \$4,196,818,358.44.<sup>2</sup> Of this amount, according to the records in the United States Treasury, \$1,375,484,734.33 was for the purpose of purchasing foodstuffs in the United States.

As explained on page 19, it has been necessary to partially estimate the tonnage of foodstuffs which were purchased with these credits, since the records in the Treasury are incomplete in this respect. Using the methods outlined, a grand total of 8,605,296.7 metric tons is obtained as the quantity of foodstuffs, including oats, purchased by the United Kingdom with these credits. The commodities purchased are shown in Table 543 and may be summarized as follows:

FOOD PURCHASES BY THE UNITED KINGDOM FINANCED BY  
U.S. TREASURY CREDITS, 1917 TO 1919

Commodities	Metric Tons
Flour .....	1,350,580.8
Grain .....	3,274,037.9
Rice .....	24,289.4
Beans and peas .....	23,878.9
Pork products .....	957,641.3
Milk .....	181,886.2
Sugar .....	1,539,236.7
Miscellaneous food .....	439,799.9
Forage (oats) .....	813,945.6
Total .....	8,605,296.7

<sup>1</sup> See also F. M. Surface, *American Pork Production in the World War* and *The Grain Trade during the World War*.

<sup>2</sup> *Annual Report of the Secretary of the Treasury for the Fiscal Year Ending June 30, 1920*, page 338.

## ARMISTICE PERIOD

As in the case of all Allied and neutral countries, the food purchases for Great Britain during the Armistice Period were made through the Interallied purchasing organizations, and had no direct relationship to the Director General of Relief (cf. page 17). In fact, a portion of the food supply for the United Kingdom during the Armistice Period is included in the sales during the U.S.F.A. Period, since the U.S. Treasury continued to grant credits to the Allies during a portion of the Armistice Period.

However, in connection with the relief of Austria under the Joint Allied Finance arrangement, it became important to make immediate deliveries which could not be financed directly by the American Relief Administration. Mr.

Hoover, therefore, arranged a sale of 47,371.9 tons of food, valued at \$10,618,045.72, to the United Kingdom, which they in turn delivered to Austria as part of the \$16,000,000 worth of food which the United Kingdom was to furnish that country under the terms of the Joint Allied Finance. From the standpoint of the American Relief Administration this represented a cash sale, but in reality it represented a credit sale to Austria by the United Kingdom, financed by a loan to the latter country from the United States Treasury for that purpose.

As shown in the footnote to Table 543, the commodities and value involved in this transaction are accounted for under Joint Allied Finance for Austria (cf. page 60), and for purposes of the general summary of all relief deliveries this transaction is deducted to obtain a net total of the relief furnished.

## SUNDRY ACTIVITIES

(Appendix Tables 539-540)

### ARMISTICE PERIOD

Among the varied operations carried on by the several organizations included in this report, there were certain activities that cannot well be classified as relief to any special country. For example, when, under the direction of the Director General of Relief, France furnished food supplies to Russian prisoners of war interned in Germany, it is difficult to decide whether this should be classed as relief to Russia or to Germany. These and certain other inter-organization operations have been included under "Sundry Activities" as outlined in Table 539.

The total volume of relief classified under this heading amounts to 56,529.2 metric tons, with a value of \$23,654,740.07. Inasmuch as these sundry operations represent less than two-tenths of one per cent of the total tonnage, and less than one-half of one per cent of the value of the operations included in this report (cf. Table 3), they cannot be regarded as excessive. Table 100 summarizes the operations included under Sundry Activities.

TABLE 100

SUMMARY OF DELIVERIES CLASSED UNDER  
SUNDRY ACTIVITIES  
(For detail see Table 539)

Operation	Metric Tons	Total Value
Armistice Period		
C.R.B. (sundry sales) . . . . .	51,392.0	\$21,990,430.40
A.R.A. (cash sales) . . . . .	1,903.2	464,770.08
Total from United States	53,295.2	\$22,455,200.48
France (Russian prisoners of war in Germany) . . . . .	2,672.0	1,100,917.00
Total, Armistice Period	55,967.2	\$23,556,117.48
Reconstruction Period		
E.C.F.—Laura Spelman Rocke- feller Memorial (Russian refugees in Constantinople) . . . . .	562.0	98,622.59
Grand total . . . . .	56,529.2	\$23,654,740.07

### SUNDRY SALES BY THE C.R.B.

The details of these sundry operations are shown in the statistical report on the work of the Commission for Relief in Belgium.<sup>1</sup> As some of the major items, these sales include commodities transferred to the American Relief Administration, to the value of \$4,486,570.10 (cf. Table 103); also the distribution in Belgium of some twenty million British army rations, valued at \$4,377,650.26; and miscellaneous sales, including recovery from underwriters and the sale of damaged commodities.

### A.R.A. CASH SALES

These activities include a group of sundry cash sales made to various organizations or individuals from American Relief Administration stocks during the Armistice Period. These sales in many respects are similar to the A.R.A.W. sales carried on during the Reconstruction Period. With the great shortage of food supplies in many of these countries, it was often possible to effect needed relief by selling these supplies for cash, either to organizations which expected to use them as relief, or to employees or even to tradesmen, providing sufficient precautions against profiteering in their further sale were taken. As shown in detail in Table 540, these sundry sales are grouped in several categories which may be summarized as follows:

SUMMARY OF SUNDRY CASH SALES BY THE AMERICAN  
RELIEF ADMINISTRATION—ARMISTICE PERIOD

	Metric Tons	Total Value
Commission for Relief in Belgium	668.3	\$122,638.77
Jadranska Bank—Trieste . . . . .	326.3	156,975.28
U.S. Navy—Adriatic ports . . . . .	16.7	6,325.33
Viborg sales . . . . .	373.7	79,515.01
Miscellaneous sales, all ports . . . . .	518.2	99,315.69
Total . . . . .	1,903.2	\$464,770.08

<sup>1</sup> George I. Gay, *The Commission for Relief in Belgium, Statistical Review of Relief Operations.*

The sales to the Commission for Relief in Belgium represent commodities from American Relief Administration stocks at Rotterdam which were taken over by the Commission to meet special needs and which were settled for either by cash or by the return of commodities as indicated above.

Sales to the Jadranska Bank in Trieste were for supplies to employees and others who were experiencing difficulty in securing adequate amounts of food. The sale to the U.S. Navy in the Adriatic, and the Viborg sales, were for supplies to Americans or American government personnel in the respective regions.

Miscellaneous sales include sales to commercial organizations, such as the Magazzini Generali in Trieste, to army officers and Red Cross officials, and commodities used to pay for services, etc.

#### RUSSIAN PRISONERS OF WAR IN GERMANY

The deliveries of 2,672.0 metric tons of food to Russian prisoners of war in Germany have been commented upon elsewhere (cf. page 187). This represented a benevolent gift by France, with a value of \$1,100,917. Owing to the difficulties Germany was experiencing with food supplies for her own people during the Armistice, the war prisoners were suffering severely, and

this gift by France was of great assistance in relieving a very distressing situation.

#### RECONSTRUCTION PERIOD

##### RUSSIAN REFUGEES IN CONSTANTINOPLE

The remaining relief, to be accounted for under Sundry Activities, relates to the food furnished to Russian refugees in Constantinople (Istanbul) in 1922. This relief, which was handled by the European Children's Fund, was made possible by a special donation of \$100,000 from the Laura Spelman Rockefeller Memorial. The need for this relief and its character have already been discussed under Special Programs and need not be repeated here. This relief, because of its special character, referring again to nationals of a country located on foreign soil, has not been included under any of the other relief activities accounted for in this report. The total supplies of food furnished to these refugees amounted to 562.0 metric tons, valued at \$98,622.59.

Of the total deliveries under Sundry Accounts, the major portion, \$22,455,200.48, represented sales for cash or its equivalent, and \$1,199,539.59 consisted of benevolent contributions. The latter category includes the deliveries to the Russian prisoners of war in Germany and to the Russian refugees in Constantinople.

## APPENDIX TABLES

### NOTE TO APPENDIX TABLES

Parentheses ( ) in the Port of Sailing or Port of Arrival column have been used to designate geographical divisions or cities other than recognized ports. Cf. Table 111, page 284 (Berne), (Lemberg), (U.S.A.), (Paris), etc.

† Table 113 shows the allocation of these child feeding supplies as originally determined by the American Relief Administration, and as reported to the President and Congress. In order to meet urgent needs in

certain countries, the European Children's Fund found it necessary to shift some of these supplies to other countries. Table 114 shows the final destination by countries in which the supplies were consumed.

\* Figures in this table differ from those listed in Table 113 for the following reasons: 58.0 metric tons originally invoiced as cocoa were found to be sugar. In tabulating internal deliveries for Finland, several

deliveries of milk and cocoa were found to be gross weight. The tare on the milk was 29.1 metric tons, on cocoa 5.0. The final net figures are listed in this table.

\* Compiled from data contained in Table 111.

† Rotterdam was used extensively as a storage and forwarding port. Had the figures been compiled on first port of arrival basis, Rotterdam would have been credited with 255,000 tons. In this table the tonnage

has been transshipped to final port of arrival and therefore is reflected in the figures of the other ports.

‡ Due to steamers discharging at more than one port.

† Cf. Table 164A for Central European detail.

\* Two figures are given for each month. The upper figure in each case represents the number of children fed, and the lower the number of

adults. The adult feeding figures largely indicate the "Corn Distribution" by U.S.G.C. The total for Russia from July, 1919, to February, 1920, represents feeding in Northwest Russia.

<sup>a</sup> Deliveries from this fund for children's relief are accounted for in Column 23, Table 187.

<sup>b</sup> Includes the total deliveries listed to the United Kingdom in Column 8.

<sup>c</sup> Represents freight paid by France on relief supplies delivered by the A.R.A.

<sup>d</sup> Includes \$2,021,250.00, representing freight and transportation charges paid by Italy on relief supplies delivered by the A.R.A.

<sup>e</sup> Includes total deduction listed in Column 9.

<sup>f</sup> The detail of \$1,217,238.27, which is in addition to the above total and represents freight, insurance, etc., is shown in Columns 5 and 6.

<sup>g</sup> This sum was paid for by the A.R.A. but billed to the J.D.C.

<sup>a</sup> Deliveries from this fund for Russian prisoners of war are accounted for in Column 9, Table 186.

<sup>b</sup> This value includes \$532,790.01, which represents freight and insurance charges on Grain Corporation flour listed in Column 26.

<sup>c</sup> In order to show the food and the country where it was consumed, 7,720.3 metric tons, valued at \$864,562.40, have been transferred to Poland. (Cf. footnote <sup>i</sup>.)

<sup>d</sup> See value for Soviet Republics.

<sup>e</sup> The gross total has been reduced to a net figure by deducting 1,237.2 metric tons and \$341,309.37, which figures appear as duplications in Columns 25 and 29.

<sup>f</sup> These are net quantities consumed in Latvia. Table 153 includes the Lithuanian deliveries in the Latvian total because the sales were made in that country.

<sup>g</sup> These figures include a Norwegian Government donation of cod liver oil in the amount of 6.6 metric tons, valued at \$3,960.00.

<sup>h</sup> This represents net supplies delivered to Lithuania. (Cf. footnote <sup>f</sup>.)

<sup>i</sup> This total includes the supplies transferred from Danzig and used in Poland. (Cf. footnote <sup>c</sup>.)

<sup>j</sup> See value for Soviet Republics.

<sup>k</sup> The gross total has been reduced to a net figure by deducting 57,822.0 metric tons and \$4,322,450.83, which figures appear as duplications in Columns 24 and 36.

<sup>l</sup> This value represents donations by: Soviet Republics of \$3,026.64; Polish Government, \$6,030.00; Latvian Government, \$4,257.60; Estonian Government, \$1,102.94.

<sup>m</sup> This total includes 481,945.3 metric tons of flour, f.o.b. value \$57,782,118.20, sold under Act of Congress, March 30, 1920, and 586,070.8 metric tons, valued at \$18,662,180.00, delivered to Russia under Act of Congress, December 22, 1921.

<sup>n</sup> This total includes \$267,392.88, representing transportation charges paid by Laura Spelman Rockefeller Memorial.

<sup>o</sup> This total includes 3,762.0 metric tons of food, valued at \$746,107.12, which were delivered to Armenia. The balance of 74.7 metric tons, valued at \$14,535.34, represents clothing deliveries for the intelligentsia.

<sup>p</sup> This value represents finance on freight paid on tonnage listed in Column 36.

Friday .....	Cocoa .....	12	..	....	..	72‡	12	16	...	..
Saturday .....	Dumplings with beans.....	92	..	10.5	12	..	..	..	9.2	8

\* This table represents the standard ration. The ration for Jewish children included 8 grams of vegetable oil, whereas the Christian children were given 8 grams of lard or lard substitute. The small children were fed on a milk ration consisting of 120 grams of milk.

\*\* Principally vegetables: onions, carrots, and parsley.

† One part condensed, two parts evaporated.

‡ Equal portions of condensed and evaporated.

<b>Total .....</b>	<b>181.5</b>	<b>659.6</b>

\* Russian Unit—The menus for the Russian child-feeding programs varied in proportion to the demands of the community and the malnutrition of the children. The details of the rations are set forth in Tables 194–198, inclusive.

Table 194 shows the ration for children confined in hospitals.

Table 195 shows the first or famine ration, or the supplies delivered to the kitchens when conditions were at their worst.

Table 196 shows the ration when local conditions had improved to the extent that the local institutions were able to assist in the child-feeding operation, thereby making the A.R.A. feeding purely a supplemental ration. The corresponding menu is shown in Table 197.

Table 198 shows the A.R.A. ration as it was increased to care for the greater demands of the communities. The increased demands were due to local food shortages prior to the spring harvesting.

Feculent, though technically an incorrect term, was used to designate rice, beans, peas, and corn grits. These commodities were interchangeable, depending upon the available stocks. The interchanging of these commodities materially assisted in varying the menu as rice and milk, bean soup, maize gruel, maize pudding, etc.

\* Space will not permit the quotation of complete detail for all clothing deliveries. Since Austria is the first one of the countries appearing in the Appendix, to which clothing for children was delivered, this table covering the distribution of shoes delivered on third program is quoted as evidence of the detail manner in which the records were kept

for each article issued. This applies not only to Austria but in each country where operations were carried on under the supervision of the ARAECF. Individual receipts, supporting this table, were signed by each child as the articles of clothing were issued.

Total Internal Deliveries for Lower Austria .....			11,264.299*	2,852.888	2,775.975	591.796

\* Of the 11,264.3 metric tons of flour, only 9,984.7 tons were used for child feeding. The difference, amounting to 1,279.6 metric tons, was accounted for by 800.0 tons being exchanged for 600.0 tons of sugar (Table 213) and 479.6 tons being shipped to Hungary. Of this latter

amount, 98.0 tons came from A.R.A. stock and 381.6 tons from E.C.F. supplies. These adjustments involve a change in the total tonnage used for child feeding, reducing this from 30,168.0 metric tons, as shown, to 28,888.4 metric tons.

\* When the European Children's Fund took charge of child feeding in the Danzig area, the A.F.S.C. was given credit for feeding already accomplished. An equivalent amount of money, representing the cost of

food supplies actually fed, was released to the A.F.S.C. The E.C.F. used this money to purchase cottonseed meal for the A.F.S.C. Polish program.

\* There was a surplus of condensed milk, cocoa, and sugar in Finland with a shortage in flour. The Finnish Children's Relief Committee was

authorized by the European Children's Fund to dispose of the surplus commodities, providing the proceeds be used to purchase the needed flour.

† Although these supplies were paid for by the President's National Security and Defense Fund, the A.R.A. received notes from the Government of France which were turned over to the United States Government. At the time of writing, France has reimbursed the United States Government for the major portion of the value of these deliveries.

\* Supplies purchased by A.R.A. from U.S. Army quartermaster in France.

† These commodities arrived on steamers listed in Tables 165 and 166. Deliveries were made against food drafts, bulk sales, and sundry sales.

‡ This duplication is caused by giving the A.R.A. Warehouses full credit for all bulk sales and the American Friends Service Committee credit for delivery of same commodities in the child-feeding program.

\* Of these deliveries 39.5 metric tons were used in Riga student kitchens. Cf. Table 379.

† Corned beef.

## LATVIA—

Table 380

## Detail of Internal Deliveries for Child Feeding, by Districts

Receipt No.	Districts or Kitchens	Date of Delivery †	Flour	Rice	Beans, Peas
43	Latvia—Not Segregated .....	1919 To Sept.	....	....	....
1	Libau .....	September	11.851	6.073	3.467
2	Libau outside Towns.....	September	9.059	3.177	1.853
3	Riga outside Kitchens.....	September	9.776	7.977	6.479
4	Riga City Kitchens.....	September	75.514	35.173	26.771
	Total for September.....		166.200	52.400	38.570

\* Except as noted. Starting in April, 1921, milk is quoted in cans and in May, 1921, soap is quoted in pieces. In these instances the total tons per receipt exclude milk and soap. The monthly totals, however, include all commodities in net metric tons.

† Receipts are tabulated according to months in which food was used. Where delivery date differs from the tabulated month, it indicates that the food was delivered on that date but was held over to the following month for child feeding. See Receipts 59, 60, May, 1921, for example.

† This organization is not to be confused with the A.R.A. that handled the U.S. Congressional Appropriation, \$100,000,000 fund. The E.C.F. has been dropped from Russian tables because all Russian relief

was handled under the Riga Agreement, dated August 20, 1921, by and between the A.R.A. and the Russian Socialist Federative Soviet Republic (R.S.F.S.R.). Cf. pages 926-27.

\* For the 300 series, cf. Tables 514 and 515. For 401 and up, cf. Table 516. Table 513 quotes original steamers or source by numbers 1 to 286, inclusive. Table 514 quotes transshipping steamers by numbers 301 to 352, inclusive. These supplies must be retranshipped to reach Russia.

All steamer numbers or rail following a colon indicate that transshipments come from steamers preceding the colon. Table 515 shows retransshipments via rail from Danzig to Stolpe. Table 516 quotes transshipping steamers 401 to 522, inclusive.

\* For complete detail of internal deliveries to districts, see pages 935-86.

† These supplies were a donation from the U.S. Government surplus medical and hospital supplies and the American Red Cross. The tonnage and value, per district, have been made on a percentage basis, in

accordance with the figures contained in "A.R.A. Bulletin," Series 2, No. 45, April 1926, by Henry Becuukes, M.D., Table 20, pages 89-90.

‡ These figures are based upon the actual weight and value of supplies turned over to the Near East Relief in New York City.

**RIGA AGREEMENT**

**AGREEMENT BETWEEN THE AMERICAN RELIEF ADMINIS-**  
**TRATION AND THE RUSSIAN SOCIALIST FEDERATIVE**  
**SOVIET REPUBLIC**

WHEREAS, a famine condition exists in parts of Russia, and

WHEREAS, Mr. Maxim Gorky, with the knowledge of the Russian Socialist Federative Soviet Republic, has appealed through Mr. Hoover to the American people for assistance to the starving and sick people, more particularly the children, of the famine stricken parts of Russia, and

WHEREAS, Mr. Hoover and the American people have read with great sympathy this appeal on the part of the Russian people in their distress and are desirous, solely for humanitarian reasons, of coming to their assistance, and

WHEREAS, Mr. Hoover, in his reply to Mr. Gorky, has suggested that supplementary relief might be brought by the American Relief Administration to up to a million children in Russia;

Therefore, it is agreed between the American Relief Administration, an unofficial volunteer American charitable organization under the chairmanship of Mr. Herbert Hoover, hereinafter called the A.R.A., and the Russian Socialist Federative Soviet Republic, hereinafter called the Soviet Authorities,

That the A.R.A. will extend such assistance to the Russian people as is within its power, subject to the acceptance and fulfillment of the following conditions on the part of the Soviet Authorities who hereby declare that there is need of this assistance on the part of the A.R.A.

The Soviet Authorities agree:

*First:* That the A.R.A. may bring into Russia such personnel as the A.R.A. finds necessary in the carrying out of its work and the Soviet Authorities guarantee them full liberty and protection while in Russia. Non-Americans and Americans who have been detained in Soviet Russia since 1917 will be admitted on approval by the Soviet Authorities.

*Second:* That they will, on demand of the A.R.A., immediately extend all facilities for the entry into and exit

from Russia of the personnel mentioned in (1) and while such personnel are in Russia the Soviet Authorities shall accord them full liberty to come and go and move about Russia on official business and shall provide them with all necessary papers such as safe-conducts, laissez passer, etcetera, to facilitate their travel.

*Third:* That in securing Russian and other local personnel the A.R.A. shall have complete freedom as to selection and the Soviet Authorities will, on request, assist the A.R.A. in securing same.

*Fourth:* That on delivery by the A.R.A. of its relief supplies at the Russian ports of Petrograd, Murmansk, Archangel, Novorossisk, or other Russian ports as mutually agreed upon, or the nearest practicable available ports in adjacent countries, decision to lie with the A.R.A., the Soviet Authorities will bear all further costs such as discharge, handling, loading, and transportation to interior base points in the areas where the A.R.A. may operate. Should demurrage or storage occur at above ports mutually agreed upon as satisfactory such demurrage and storage is for the account of the Soviet Authorities. For purposes of this agreement the ports of Riga, Reval, Libau, Hango, and Helsingfors are also considered satisfactory ports. Notice of at least five days will be given to Soviet representatives at respective ports in case the Soviet Authorities are expected to take c.i.f. delivery.

*Fifth:* That they will at their own expense supply the necessary storage at interior base points mentioned in paragraph (4) and handling and transportation from same to all such other interior points as the A.R.A. may designate.

*Sixth:* That in all above storage and movement of relief supplies they will give the A.R.A. the same priority over all other traffic as the Soviet Authorities give their own relief supplies, and on demand of the A.R.A. will furnish adequate guards and convoys.

*Seventh:* That they will give free import and re-export and guarantee freedom from requisition to all A.R.A. supplies of whatever nature. The A.R.A. will repay the Soviet Authorities for expenses incurred by them on re-exported supplies.

*Eighth:* That the relief supplies are intended only for children and the sick, as designated by the A.R.A. in ac-

cordance with paragraph (24), and remain the property of the A.R.A. until actually consumed by these children and the sick, and are to be distributed in the name of the A.R.A.

*Ninth:* That no individual receiving A.R.A. rations shall be deprived of such local supplies as are given to the rest of the population.

*Tenth:* That they will guarantee and take every step to insure that relief supplies belonging to the A.R.A. will not go to the general adult population nor to the Army, Navy, or Government employees but only to such persons as designated in paragraphs (8) and (24).

*Eleventh:* The Soviet Authorities undertake to reimburse the A.R.A. in dollars at c.i.f. cost or replace in kind any misused relief supplies.

*Twelfth:* That the A.R.A. shall be allowed to set up the necessary organizations for carrying out its relief work free from governmental or other interference. The Central and Local Soviet Authorities have the right of representation thereon.

*Thirteenth:* That the Soviet Authorities will provide:

- A. The necessary premises for kitchens, dispensaries and, in as far as possible, hospitals.
- B. The necessary fuel and, when available, cooking, distributing, and feeding equipment for the same.
- C. The total cost of local relief administration, food preparation, distribution, etc., themselves are in conjunction with local authorities. Mode of payment to be arranged at later date.
- D. On demand of the A.R.A. such local medical personnel and assistance, satisfactory to the A.R.A., as are needed to efficiently administer its relief.
- E. Without cost railway, motor, water or other transportation for movement of relief supplies and of such personnel as may be necessary to efficiently control relief operations. The Soviet Authorities will for the duration of the A.R.A. operations assign to the A.R.A. for the sole use of its personnel, and transport free of cost, such railway carriages as the A.R.A. may reasonably request.

*Fourteenth:* In localities where the A.R.A. may be operating and where epidemics are raging, the A.R.A. shall be empowered by the Soviet Authorities to take such steps as may be necessary towards the improvement of sanitary conditions, protection of water supply, etc.

*Fifteenth:* That they will supply free of charge the necessary offices, garages, storerooms, etc., for the transaction of the A.R.A. business and when available heat, light, and water for same. Further that they will place at the disposal of the A.R.A. adequate residential quarters for the A.R.A. personnel in all localities where the A.R.A. may be operating. All such above premises to be free from seizure and requisition. Examination of above premises will not be made except with knowledge and in presence of the chief of the A.R.A. operations in Russia or his representative and except in case of *flagrant delict*, when examiner will be held responsible in case examination unwarranted.

*Sixteenth:* That they will give to the A.R.A. complete freedom and priority without cost in the use of existing radio, telegraph, telephone, cable, post, and couriers in Russia and will provide the A.R.A., when available and subject to the consent of competent authorities, with private telegraph and telephone wires and maintenance free of cost.

*Seventeenth:* To accord the A.R.A. and its American representatives and its couriers the customary diplomatic privileges as to passing the frontiers.

*Eighteenth:* To supply the A.R.A. free of cost with the necessary gasoline and oil to operate its motor transportation and to transport such motor transportation by rail or otherwise as may be necessary.

*Nineteenth:* To furnish at the request of the compe-

tent A.R.A. Authorities all A.R.A. personnel, together with their impediments and supplies, free transportation in Russia.

*Twentieth:* To permit the A.R.A. to import and re-export free of duty and requisition such commissary, transport, and office supplies as are necessary for its personnel and administration.

*Twenty-first:* That they will acquaint the Russian people with the aims and methods of the relief work of the A.R.A. in order to facilitate the rapid development of its efficiency and will assist and facilitate in supplying the American people with reliable and non-political information of the existing conditions and the progress of the relief work as an aid in developing financial support in America.

*Twenty-second:* That they will bear all expenses of the relief operation other than:

- A. Cost of relief supplies at port (see paragraph 4).
- B. Direct expenses of American control and supervision of relief work in Russia with exceptions as above. In general they will give the A.R.A. all assistance in their power toward the carrying out of its humanitarian relief operations.

The A.R.A. agrees:

*Twenty-third:* Within the limits of its resources and facilities, to supply, as rapidly as suitable organization can be effected, food, clothing, and medical relief to the sick and particularly to the children within the age limits as decided upon by the A.R.A.

*Twenty-fourth:* That its relief distribution will be to the children and sick without regard to race, religion, or social or political status.

*Twenty-fifth:* That its personnel in Russia will confine themselves strictly to the ministration of relief and will engage in no political or commercial activity whatever. In view of paragraph (1) and the freedom of American personnel in Russia from personal search, arrest, and detention, any personnel contravening this will be withdrawn or discharged on the request of the Central Soviet Authorities. The Central Soviet Authorities will submit to the chief officer of the A.R.A. the reasons for this request and the evidence in their possession.

*Twenty-sixth:* That it will carry on its operations where it finds its relief can be administered most efficiently and to secure best results. Its principal object is to bring relief to the famine stricken areas of the Volga.

*Twenty-seventh:* That it will import no alcohol in its relief supplies and will permit customs inspection of its imported relief supplies at points to be mutually agreed upon.

The Soviet Authorities having previously agreed as the absolute *sine qua non* of any assistance on the part of the American people to release all Americans detained in Russia and to facilitate the departure from Russia of all Americans so desiring, the A.R.A. reserves to itself the right to suspend temporarily or terminate all of its relief work in Russia in case of failure on the part of the Soviet Authorities to fully comply with this primary condition or with any condition set forth in the above agreement. The Soviet Authorities equally reserve the right of cancelling this agreement in case of non-fulfillment of any of the above clauses on the part of the A.R.A.

Made in Riga, August Twentieth, Nineteen Hundred and Twenty-one.

On behalf of Council of Peoples Commissaries of the Russian Socialist Federative Soviet Republic.

(Signed)

MAXIM LITVINOFF

Assistant Peoples Commissary for Foreign Affairs

On behalf of the American Relief Administration.

## APPENDIX III

### MEDICAL TABLES 1, 2

The spelling of the names of three cities or district headquarters have been changed to conform with the spelling adopted by the A.R.A. Accounting Department in food deliveries: Cherkov to Kharkov, Kief to Kiev, and Simpheropol to Simferopol.

### MEDICAL TABLES 2, 3

The captions of the original reports submitted to the President and filed with the Congress of the United States read:

"AMERICAN RELIEF ADMINISTRATION Report on The Distribution in Russia of Army Surplus Medical Supplies under the Authorization of Congress, 1922-1923."

"AMERICAN RELIEF ADMINISTRATION Supplementary Report on the Delivery in the United States to The Near East Relief of Army Surplus Medical Supplies under the Authorization of Congress for Distribution in Southern Russia by the Near East Relief, 1922-1923."

The captions on these reports have been changed to conform with the Act of Congress of January 20, 1922, and the Executive Order of January 24, 1922, to wit:

#### MEDICAL TABLE 2

"American Relief Administration Report of the Distribution in Russia of the United States Government Surplus Medical and Hospital Supplies, 1922-1923."

#### MEDICAL TABLE 3

"American Relief Administration Detail of Deliveries of the U.S. Government Surplus Medical and Hospital Supplies to the Near East Relief for Distribution in Southern Russia, 1922-1923."

## AMERICAN RELIEF ADMINISTRATION

Detail by Districts of the Distribution in Russia of Medical and Hospital Supplies Donated by the American Red Cross,\* 1921-1923

## Medical Table 1†

# AMERICAN RELIEF ADMINISTRATION

## Detail of Deliveries of the United States Government Surplus Medical and Hospital Supplies to the Near East Relief for Distribution in Southern Russia,\* 1922-1923

Medical Table 3

Commodity and Unit	Quantity	Commodity and Unit	Quantity	Commodity and Unit	Quantity
Acacia powder, lbs.	32	Apomorphine, hydrochloride, 6 mgm., 20 in tube.	169	Congo red, 10 gm., vial.	12
Acetanilid, ¼ lb., bot.	40	Apomorphine, hydrochloride, 6 mgm., 25 in tube.	25	Copper sulphate, 1 oz., bot.	35
Acetanilid, ½ lb., bot.	47	Antimony and potassium tartrate, 1 oz., bot.	24	Copper sulphate, ¼ lb., bot.	8
Acetanilid, 1 lb., bot.	1	Arecoline hydrobromide, ½ gr. H.T., 10 in tube.	20	Creosote, 1 oz., USP, bot.	92
Acetanilid, 30 gr. tabs., 100 in box.	3	Arecoline hydrobromide, 1 gr., H.T., 10 in tube.	4	Dextrose, ¼ lb., bot.	45
Acetphenetidum, 1 lb., lbs.	4	Arseni trioxidum, 1 oz., bot.	2	Dextrose, ½ lb., bot.	1
Acid, acetic, ¼ lb., bot.	6	Arseni trioxidum, 1 mgm. tabs., 250 in bot.	5	Elan, 1 oz., bot.	44
Acid, acetic, 1 lb., USP, bot.	22	Arseni trioxidum, 1 mgm. tabs., 500 in bot.	1	Eosine, pure, alcohol soluble, 10 gm., vial.	1
Acid, acetic, glacial, 1 lb., bot.	48	Asafetida, 2 oz., bot.	1	Eucalyptol, 1 oz., bot.	11
Acid, acetylsalicylic, 1 lb., lbs.	6	Atropine sulphate, ¼ oz., bot.	5	Eugenol, ½ oz., bot.	27
Acid, boric, 1 lb., lbs.	4	Atropine sulphate, .65 mgm. H.T., 20 in tube.	168	Extractum belladonnae, 1 oz., bot.	18
Acid, boric, 324 mgm. tabs., 500 in bot.	105	Bacto, dextrose, 1 lb., bot.	16	Extract cascara sagrada tabs., 250 in 130 mgm., bot.	5
Acid, citric, crystals, lbs.	7	Bacto, gelatine, ¼ lb., bot.	72	Extract cascara sagrada tabs., 500 in 130 mgm., bot.	3
Acid, hydrochloric, USP, ½ lb., bot.	25	Bacto, lactose, 1 lb., bot.	25	Extractum glycyrrhizae, ¼ lb., bot.	4
Acid, hydrochloric, SM., 1 lb., bot.	40	Bacto, peptone, ½ lb., bot.	54	Extractum glycyrrhizae, 1 lb., jar.	34
Acid, hydrochloric, USP, 1 lb., bot.	91	Bacto, peptone, 1 lb., bot.	26	Extractum hyoscyami, 1 oz., bot.	13
Acid, nitric, ½ lb., bot.	7	Balsam copaiba, ½ lb., bot.	87	Ferric phosphate, 1 lb., bot.	51
Acid, nitric, lbs.	21	Balsam copaiba, 1 lb., bot.	3	Ferrous sulphate, dried, ¼ lb., bot.	2
Acid, oxalic, ¼ lb., SM., bot.	15	Balsam peru, ½ lb., bot.	37	Ferri et quinae citrate sol., 3 oz., bot.	110
Acid, oxalic, ½ lb., USP, bot.	14	Barbital tabs., 324 mgm., 500 in bot.	3	Fluid extractum, belladonnae, 1 oz., bot.	2
Acid, oxalic, 1 lb., bot.	17	Barium sulphate, CP., 1 oz., bot.	1	Fluid extractum, belladonnae leaves, 1 pt., bot.	2
Acid, pyrogallol, bot.	8	Barium sulphate, lbs.	2	Fluid extractum, colchicum, 1 oz., bot.	9
Acid, glycolic, ¼ lb., USP, bot.	78	Beef extract, ¼ lb., tin.	300	Fluid extractum, ergot, ½ lb., bot.	14
Acid, glycolic, ½ lb., bot.	10	Bismuth, subcarbonate, 1 lb., bot.	33	Fluid extractum, gentian, 1 lb., bot.	14
Acid, glycolic, 1 lb., bot.	7	Bismuth, subcarbonate, 324 mgm. tabs., 500 in bot.	2	Fluid extractum, gelsomium, 1 lb., bot.	2
Acid, glycolic, 5 gr. tabs., 500 in bot.	335	Bismuth, subgallias, 1 lb., bot.	16	Fluid extractum, ipecac, ¼ lb., bot.	48
Acid, sulphuric, ½ lb., bot.	12	Bismuth, subgallias, 250 gm., bot.	15	Fluid extractum, muels vomica, bot.	1
Acid, sulphuric, 1 lb., SM., bot.	3	Bismuth, subnitras, ½ lb., bot.	4	Fluid extractum, wild cherry, 1 lb., bot.	23
Acid, sulphuric, 1 lb., USP, bot.	3	Bismuth, subnitras, 5 gr. tabs., 500 in bot.	1	Fluid extractum, zingiberis, ¼ lb., bot.	7
Acid, sulphuric, aromatic, ½ lb., bot.	20	Brilliant green, 10 gms., vial.	5	Foot powder, ¼ lb., tin.	20, 292
Acid, tannic, ¼ lb., USP, bot.	110	Caffeine citrate, tabs., 65 mgm., 250 in bot.	5	Formin, 1 oz., bot.	6
Acid, tannic, 1 lb., bot.	26	Camphor, 1 lb., bot.	11	Gelatine powder, ¼ lb., bot.	50
Acid, tartaric, ½ lb., bot.	115	Camphor, opium tabs., hard rub. bot. for ease emerg., bot.	10	Glycerine, 1 lb., bot.	3
Acid, trichloroacetic, oz.	22	Cantharides, 1 oz., USP, bot.	8	Guaiac resin, ½ lb., bot.	2
Adeps lanæ hydrosus, ½ lb., jar.	35	Capsicum powder, ½ oz., bot.	10	Hematoxylin, light, 10 gm., vial	2
Adrenalin hydrochloridum, 3/200 gr. tabs., 23 in tube.	109	Capsicum tabs., 32 mgm., 600 in bot.	32	Heroin tabs., hard rubber bot. for ease emerg., bot.	3
Agar agar, ½ lb., pkg.	15	Carmine powder, 1 oz., bot.	1	Hexamethylenamine, 1 oz., bot.	6
Agar agar, 1 lb., pkg.	25	Carium oxalate, ¼ lb., bot.	2	Hexamethylenamine, 1 lb. bot.	7
Alcohol, 12 oz., bot.	9	Chalk, prepared, ½ lb., bot.	44	Homotropine hydrobromide, 15 gr., vial.	139
Alcohol, 3 pbs., tin.	130	Chloral hydrate, ¼ lb., bot.	2	Hydrargyri, chlor. corros., 500 gm., bot.	21
Aloes, pulverized, USP, 1 oz., bot.	8	Chloral hydrate, 1 lb., bot.	3	Hydrargyri, chlor. corros., S.M., ¼ lb., bot.	1
Aloes, pulverized, USP, 2 oz., bot.	62	Chloral hydrate, 324 mgm. tabs., 400 in bot.	6	Hydrargyri, chlor. corros., S.M., ½ lb., bot.	1
Alumen powder, ½ lb., bot.	5	Chloral hydrate, 324 mgm. tabs., 500 in bot.	67	Hydrargyri, chlor. corros., comm., 1 lb., bot.	22
Alumen powder, 1 lb., bot.	26	Chlorazene tabs., N.R., 100 in bot.	5	Hydrargyri, chlor. corros., tabs., 250 in bot.	28
Ambrine, 1 lb., cake.	6	Chloroform, ¼ lb., tin.	100	Hydrargyri, chlor. corros., mite, 2 oz., bot.	20
Ammonia, aromatic spirits, ½ lb., bot.	8	Chromic alum, lbs.	5	Hydrargyri, chloride, 6.5 mgm. tabs., 250 in bot.	12
Ammonia, aromatic spirits, 1 lb., bot.	4	Chrysarobinum, ½ oz., bot.	5	Hydrargyri, chloride, mite, 65 mgm., tabs., 500 in bot.	12
Ammonia, bromide, ½ lb., bot.	31	Cocaine hydrochloride, ¼ oz., bot.	27	Hydrargyri, chloride, mite, 33 mgm., tabs., 1,000 in bot.	7
Ammonia, carbonate, ½ lb., USP, bot.	41	Cocaine hydrochloride, 10 mgm. H.T., 20 in tube.	555	Hydrargyri, chloride, mite, 30 mgm., tabs., 1,000 in bot.	50
Ammonia, carbonate, 1 lb., bot.	1	Cocaine hydrochloride, 10 mgm. H.T., 25 in tube.	55	Hydrargyri, chloride, mite, 32 mgm., tabs., 500 in bot.	5
Ammonia, chloride, ½ lb., bot.	57	Cocaine hydrochloride, 1/6 gr. tabs., 100 in bot.	1	Hydrargyri, chloride, mite, 32 mgm., tabs., 500 in bot.	24
Ammonia, chloride, 1 lb., bot.	6	Cocaine hydrochloride, 2 gr. H.T., 10 in tube.	95	Hydrargyri, iodide flavum, 10 mgm., 500 in bot.	11
Ammonia, chloride, 60 gr. tabs., 100 in bot.	14	Cocaine sulphas, 32 mgm., 500 in bot.	17	Hydrargyri, iodide rubrum, 1 lb., bot.	87
Ammonia, persulphate, 1 lb., bot.	7	Cocaine sulphas, 32 mgm., 600 in bot.	14	Hydrargyri, massa, ¼ lb., bot.	4
Anilin, 10 gms., vial.	14	Codine sulphas, 1 oz., bot.	23		

\* These supplies were turned over to the Near East Relief in New York City. Transportation and distribution in Russia handled by the Near East Relief.

[Continued on next page]

## AMERICAN RELIEF ADMINISTRATION

Detail of Deliveries of the United States Government Surplus Medical and Hospital Supplies to the Near East Relief for  
Distribution in Southern Russia, 1922-1923

Medical Table 3—(Continued)

Commodity and Unit	Quantity	Commodity and Unit	Quantity	Commodity and Unit	Quantity
Hydrargyri, oxidum flavum, 10 mgm., 250 in bot.	30	Oleum chenopodi, 1,000 in box.	6	Potassium iodide, 1/2 lb., bot.	3
Hydrargyri redistilled, 5 lbs., jar.	1	Oil, cod liver, 1 lb., bot.	29	Potassium iodide, 324 mgm., 500 in bot.	26
Hydrargyri salicylate, oz.	37	Oil, cottonseed, 1 qt., bot.	88	Potassium nitrate, 1/2 lb., .	2
Hydroxide powder, 1 lb., tin.	23	Oil, linseed, 1/2 gal., tin.	12	Potassium nitrate, powder, 1 lb., bot.	10
Hydroquinine, 1/4 lb., bot.	4	Oil, orange, 1 oz., bot.	9	Potassium nitrate, 4 gm., compressed tabs., 100 in bot.	55
Hyoquine hydrobromide, 65 mgm. tabs., 20 in tube.	137	Oil, peppermint, 1 oz., bot.	7	Potassium oxalate, 1/4 lb., bot.	1
Ichthyol or equivalent, 1 lb., tin.	99	Oil, mantali, 1 oz., bot.	2	Potassium permanganate, 324 mgm., 8,400 in tin.	1
Iodine swabs, 6 in box.	271	Oil, theobroma, 1/4 lb., bot.	26	Potassium permanganate, 1 lb., bot.	8
Ipecac powder, 1/4 lb., bot.	45	Oil, tigli, 1/2 oz., bot.	3	Potassium et sodium tartrate, 3 lb., bot.	7
Ipecac et opii powder, 2 oz., bot.	1	Oleoresin aspidium, 1 oz., bot.	6	Proaine, 1 oz., bot.	2
Ipecac et opii powder, 3 oz., bot.	1	Pepsin, gran., 3 oz., bot.	1	Protargol, 1 oz., bot.	68
Ipecac et opii powder, 1/4 lb., bot.	16	Peptone, 1 lb., bot.	54	Pyrethrum, 8 oz., tin.	200
Ipecac et opii, 324 mgm., 500 in bot.	47	Peptone, 1/2 lb., bot.	11	Quinine dihydrochlorate, 32 mgm., 20 in tube.	100
Ipecac et opii, 324 mgm., 700 in bot.	28	Peptonizing tabs., 100 in bot.	17	Quinine chlorohydro sulphate, 32 mgm., 20 in tube.	318
Lactose, 1/4 lb., bot.	10	Petrolatum, 1 lb., tin.	1	Rosinae podophylli, 1/2 oz., bot.	18
Lead acetate, 6 oz., bot.	8	Petrolatum, 3 lb., tin.	1	Rheum powder, 2 oz., bot.	16
Lead acetate, 1/2 lb., USP., bot.	4	Phenol, camphorated, 4 oz., bot.	5	Saccharum lactis, 1/4 lb., bot.	7
Lead acetate, 1 lb., bot.	1	Phenol, crystals, 1/2 lb., bot.	43	Saccharum lactis, 1 lb., bot.	1
Lead acetate, 2 lb., bot.	9	Phenolphthalein, 130 mgm., 100 in bot.	3	Santonin tabs., 250 in bot.	1
Lead acetate, 130 gm., 500 in bot.	9	Phenyl salicylate, 1/4 lb., bot.	35	Sapo mollis, 1/2 lb., jar	4
Lead acetate, 130 gm., 600 in bot.	40	Phenyl salicylate, 1/2 lb., bot.	21	Silver nitrate crystals, 1 oz., bot.	41
Licorice comp. powder, 1 lb., bot.	9	Phenyl salicylate, 1 lb., bot.	8	Silver nitrate crystals, 1 oz., bot.	22
Licorice comp. mixture, 1,000 in bot.	12	Phenyl salicylate, 324 mgm., 500 in bot.	11	Silver nitrate fused, 1 oz., bot.	2
Liquor potassium arsenide, 1/2 lb., bot.	14	Physostigma sulphate, 1 gm., 10 in bot.	9	Sodium bicarbonate, 1 lb., bot.	1
Lithii citros, efferves., 325 tabs., 25 in bot.	14	Physostigma sulphate, 6 gm., vial.	3	Sodium bicarbonate, tabs., 1000 in bot.	2
Litmus paper, red, 100 strips in vial.	165	Ipecac and opium tabs., h. rub., bot. for ease emer., bot.	11	Sodium bicarbonate, menthae pip., 250 in bot.	2
Litmus paper, blue, 100 strips in vial.	12	Morphine sulphate, tabs., bot. for ease emer., bot.	11	Sodium borate, 1 lb., bot.	101
Litmus powder, 4 oz., bot.	1	Pill, aloin comp., 200 in bot.	2	Sodium bromide, 6 oz., bot.	6
Lycopodium, 100 gm., bot.	10	Pill, aloin comp., 12 in pkg.	10	Sodium bromide, 1 lb., bot.	18
Lycopodium, 1/4 lb., bot.	11	Pill, camphor and opii, 200 in bot.	1	Sodium carbonate, 1 lb., bot.	2
Magnesia carbonas, 2 oz., bot.	102	Pill, camphor and opii, 500 in bot.	21	Sodium carbonate monohydrated, 1/2 lb., bot.	78
Menthol crystals, 1 oz., bot.	50	Pill, camphor and opii, 875 in tin.	67	Sodium carbonate monohydrated, 1/4 lb., bot.	40
Methylene blue, S.M., 10 mgm., vial.	34	Pill, cathartic comp., 200 in pkg.	2	Sodium carbonate monohydrated, 1 lb., bot.	4
Methyl salicylate, 1 lb., bot.	2	Pill, copaiba comp., 500 in bot.	19	Sodium carbonate, sal soda crystals, 1 lb., bot.	20
Methyl violet, 10 gm., bot.	1	Pill, ferri comp., 100 in bot.	6	Sodium chlorate, 1 lb., bot.	527
Morphine sulphas, 1/4 oz., bot.	6	Pill, ferri comp., 80 in bot.	200	Sodium chlorate, 1 lb., bot.	100
Morphine sulphas, 1/4 gr. H.T., 500 in bot.	28	Pill, ferri comp., 100 in bot.	1	Sodium hydroxide, 1/4 lb., bot.	35
Morphine sulphas, 8 mgm., H.T., 25 in tube.	277	Pill, ferri carb., 200 in bot.	1	Sodium hydroxide, 1 lb., bot.	4
Morphine sulphas, 8 mgm., 3 oz., tin.	21	Pill, ferri carb., 500 in bot.	1	Sodium hyposulphate, lbs.	120
Morphine sulphas, 8 mgm., 20 in tube.	1,023	Pill, ferri carb., 500 in 324 mgm. tabs., bot.	5	Sodium phosphate, 3 oz., bot.	61
Morphine sulphas, 8 mgm., 500 in bot.	612	Pilocarpine hydrochloride, 1 gr., 10 in tube.	12	Sodium phosphate, exsiccated, 1/2 lb., bot.	11
Morphine sulphas, 8 mgm., 600 in bot.	25	Pilocarpine hydrochloride, 20 in tube.	40	Sodium salicylate, 6 oz., bot.	53
Mustard, ground, 5 lb., pkg.	1	Pix liquida, 1 lb., tin.	8	Sodium salicylate, tabs., 500 in bot.	113
Naphthalene, 1 lb., bot.	175	Pix liquida, 1 gal., tin.	1	Sodium salicylate, 1 lb., bot.	99
Naphthalene, 5 lb., cart.	2	Potassium acetate, 1 lb., bot.	17	Sodium sulphate, 1/2 lb., bot.	59
Nitroglycerine, .65 mgm., H.T., 20 in tube.	53	Potassium acetate, 6 oz., bot.	73	Sodium sulphate crystals, 1 lb., bot.	45
Nitroglycerine, spirits of, 1 oz., bot.	28	Potassium arsenate tabs., 100 in bot.	8	Spirits of aether compound, 1/2 lb., bot.	8
Nitrous ether, spirits of, 1/2 lb., bot.	23	Potassium bicarbonate, 1 lb., bot.	34	Strychnine sulphate, H.T., 1 mgm., 20 in tube	405
Nitrous ether, spirits of, 1 lb., bot.	28	Potassium bromide, 1 lb., bot.	20	Strychnine sulphate, H.T., 1 mgm., 100 in bot.	5
Normal saline solution, tabs., 100 in bot.	92	Potassium chlorate, 324 mgm., 500 in bot.	75	Strychnine sulphate, H.T., 1 mgm., 250 in bot.	2
Novocaine, 1 oz., bot.	1	Potassium chlorate, 1 lb., bot.	106	Strychnine sulphate, H.T., 1 mgm., 500 in bot.	4
Novocaine, 35 gr., cart.	7	Potassium chlorate, 324 mgm., 500 in bot.	55	Sudan, 10 gm., vial	1
Novocaine, 1 per cent solution, bot.	9	Potassium chlorate, 324 mgm., 1,000 in bot.	21	Sulphonal tabs., 1,000 in bot.	1
Nux vomica powder, 1 lb., bot.	20	Potassium hydroxide, 1 oz., bot.	21	Sulphur, lotum, 1/2 lb., bot.	28
Oil of castor, 1 qt., bot.	16	Potassium iodide, 1 lb., bot.	10	Sulphur, roll, lbs.	70

## AMERICAN RELIEF ADMINISTRATION

Detail of Deliveries of the United States Government Surplus Medical and Hospital Supplies to the Near East Relief for  
Distribution in Southern Russia, 1922-1923

Medical Table 3—(Continued)

Commodity and Unit	Quantity	Commodity and Unit	Quantity	Commodity and Unit	Quantity
Burette, 25 cc., ea.	12	Case, canvas, with instrument, ea.	151	Cautery, Paquelin, ea.	1
Burette, 50 cc., ea.	7	Case, canvas, for instrument, assorted, ea.	2	Cautery, Paquelin, extra bulbs for, ea.	3
Burette, 50 cc., with stopcock, ea.	1	Case, ear, nose, and throat, 912, ea.	9	Cautery, points No. 1, with handle, ea.	3
Bowls, soup, Delft, ea.	974	Case, emergency, 1913-1916, ea.	14	Cellu, cotton, lbs.	575
Box, soap, metal, ea.	2	Case, eye, incomplete, ea.	2	Cement, anes crown and bridge colors, pkg.	90
Burner, Bunsen, assorted, ea.	15	Case, field dressing, veterinary, empty, ea.	23	Cement, dark brown, box.	100
Burner, Bunsen, dental, No. 12, with spider, ea.	2	Case, field, incomplete, veterinary, ea.	12	Cement, pearl gray, box.	100
Burner, Bunsen, gas, Scimataco patent, ea.	3	Case, foot, ea.	1	Cement, small, tube.	1
Burner, Bunsen, gas, blast, ea.	1	Case, forceps, haem., ea.	13	Cement, yellow, box.	100
Burner, Bunsen, gas, micro., ea.	2	Case, general operating, complete, ea.	8	Centrifuge, elec., 110 v., with rheostat, ea.	1
Burner, Terrill, gas, wing top for, ea.	9	Case, general operating, incomplete, ea.	3	Centrifuge, elec., 110 v., without rheostat, ea.	2
Burnisher, I.B., assorted, ea.	80	Case, G.U., Par. 917 (1 syringe short), ea.	2	Centrifuge, hand, ea.	2
Burnisher, I.B., No. 29, ea.	18	Case, G.O., Par. 971, veterinary, ea.	1	Centrifuge, tube, grad., 15 cc., ea.	50
Burnisher, tantalum, No. 1, ea.	20	Case, gynecological, ea.	1	Centrifuge, tube, grad., 50 cc., ea.	20
Burs, dentate, for H.P., No. 7, No. 359, ea.	210	Case, heater, ea.	1	Centrifuge, tube, ungrad., 15 cc., ea.	100
Burs, dentate, for H.P., No. 568, ea.	198	Case, hoof knives, "B," ea.	1	Chairs, barony, w.e., ea.	1
Burs, bone, Friedman's, No. 27, ea.	3	Case, for hoof knives, "B," ea.	2	Chairs, dental, Columbia, ea.	5
Burs, invert cone for, HP., "M," ea.	216	Case, hoof, veterinary, contains 3 knives and 1 handle, ea.	1	Chairs, dental, portable, in chests, ea.	14
Burs, invert cone for, HP., No. 7 No. 331½, ea.	180	Case, hoof, veterinary, contains 5 knives and 1 handle, ea.	1	Chairs, dental, portable, in chests, crates for, ea.	5
Burs, invert cone for, HP., No. 7 No. 34, ea.	240	Case, instrument, ea.	1	Chairs, invalid, rolling, ea.	11
Burs, invert cone for, HP., No. 7 No. 35, ea.	240	Case, instrument, for M.O., 919, ea.	12	Chairs, operating, dental, ea.	4
Burs, invert cone for, HP., No. 7 No. 41, ea.	180	Case, instrument, for M.O., incomplete, ea.	1	Chairs, specialist, ea.	1
Burs, round HP., "M," No. ½, ea.	300	Case, instrument, for E.M., web belts, with contents, ea.	24	Chairs, wood seat and back, ea.	56
Burs, round HP., "M," No. 1, ea.	200	Case, office prep., extra, ½ oz. bot. for, ea.	2	"Chemistry," Simon, ea.	1
Burs, round HP., "M," No. 2, ea.	300	Case, office prep., oak, empty, ea.	14	"Chemistry, Blood and Urine, New Methods," C. & B., ea.	1
Burs, round HP., "M," No. 3, ea.	240	Case, operating, small canvas, ea.	3	"Chemistry, Elementary," Chemot, ea.	1
Burs, round HP., "M," No. 6, ea.	198	Case, operating, small rosewood box, ea.	1	Chest, with dental engine, complete, ea.	15
Burs, round HP., "M," No. 8, ea.	240	Case, operating, small rosewood box, ea.	6	Chest, field lab., No. 1, Par. 930, ea.	1
Burs, round HP., "M," No. 9, ea.	198	Case, operating, small incom., ea.	8	Chest, field lab., No. 2, Par. 931, ea.	1
Cabinet, dental, ea.	3	Case, pocket, 923, ea.	1	Chest, field lab., not listed, contains 1 inc. oil heater, ea.	1
Cabinet, dental, aseptic pressed, No. 610, ea.	25	Case, pocket, complete, ea.	3	Chest, field veterinary, ea.	9
Cabinet, file, wood, 4 drawers, "B," ea.	9	Case, pocket, incom., ea.	18	Chest, instrument, empty, No. 1, ea.	18
Cabinet, file, wood, 5 drawers, "B," ea.	1	Case, post mortem, 924, ea.	1	Chest, instrument, empty, No. 2, ea.	14
Cabinet, for medicine ward, ea.	39	Case, post mortem, incom., ea.	1	Chest, instrument, ea.	3
Cabinet, large, for dressing and instrument, ea.	4	Case, rubber gloves, empty, ea.	52	Chest, localizing, ea.	1
Cabinet, metal, for blanks and documents, "B," ea.	3	Case, rubber gloves, filled, ea.	3	Chest, supplementary med. and surg., 933, ea.	3
Cabinet, small, for dressing and instrument, ea.	11	Case, surgical, small, ea.	2	Chest, supplementary med. and surg., 933, incom., ea.	25
Cake turner, ea.	8	Case, thermo, cautery, ea.	4	Chest, supplementary med. and surg., 933, incom., ea.	70
Calcar molding sand, 3 lbs., tin	5	Case, tooth extracting, 925 MMD., 1916, ea.	2	Chest, supply, dental, ea.	20
Camp, infirm, Par. 869, ea.	5	Case, tooth extracting, 3 in., ea.	8	Chest, supply, empty, ea.	15
Candles, 6 in., lb.	60	Case, tooth extracting, forceps, 6 in., roll	7	Chest, tool, No. 1, incomplete, 837, ea.	2
Can opener, ea.	1	Case, trial lenses, 926, ea.	4	Chest, veterinary, officers, ea.	2
Canvas for litter, ea.	113	Case, veterinary dental, "B," roll	1	Chest, veterinary, officers, ea.	2
Caps, operating, paper, ea.	100	Case, veterinary foot, "B," ea.	1	Chisel, bone, 18 mm., ea.	1
Capsules, 100 in box	216	Case, veterinary general oper., "B," ea.	1	Chisel, Buckley, ea.	8
Capsules, size 00, 100 in box	115	Case, veterinary post mortem, "B," ea.	1	Chisel, c.s. points, ea.	2
Capsules, size 0, 100 in box	200	Case, ward dressing, ea.	3	Chisel, labyrinth, ea.	2
Carriages, dressing, ea.	2	Casting machine, ea.	4	Chisel, l.h., assorted, ea.	366
